They are right about renewables in energy. Their logic is sound. We are right about preserving this renewable resource. Our logic is the same.

SISTERS OF ST. FRANCIS HOSPITAL HONORED

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. FISH. Mr. Speaker, I take this opportunity to pay tribute to the Sisters of St. Francis Hospital for its outstanding record of service to the community on the occasion of the Annual Franciscan Award Dinner on May 20, 1989.

For 75 years, the Sisters of St. Francis Hospital has offered its dedicated religious and humanitarian service to the people of our community. Founded by a small group of Franciscan Sisters in 1914, St. Francis Hospital has become a dynamic and innovative leader in Hudson Valley health care.

The first American community of Franciscan Sisters was founded in 1855 by the Most Reverend John N. Neumann, the fourth bishop of Philadelphia. Five years later, the Sisters opened a branch in the Diocese of Buffalo.

Sisters from the Buffalo community arrived in New York City in 1882 to assist Father John C. Drumgoole in caring for homeless and destitute children at the Mission, then located on Lafayette Place in lower Manhattan.

Twenty-eight Sisters at the Mission decided to establish a new community in New York City in 1893—under the name "Sisters of Saint Francis of the Mission of the Immaculate Virgin, Conventuals of the Third Order"—and later located their Motherhouse at Hasting-on-Hudson in Westchester County.

From that Motherhouse came the first Sisters to Poughkeepsie. In addition to establishing the St. Francis Hospital, the Sisters began hospitals in White Plains, Port Jervis, and Orange, NJ, the Mission of the Immaculate Virgin on Staten Island, a home for the blind, schools throughout Westchester and a nursery in New York City.

A Sister has been the senior administrator at the hospital from its origin, and members of the order have served both as nurses and in administrative capacities throughout its history. Today, nine Sisters carry on the tradition at St. Francis Hospital. Their continuing presence is the mark of the hospital's special commitment to caring.

On this occasion of the anniversary of 75 years of dedicated community service, I want to commend the Sisters of St. Francis, Sister Mary Paul, O.S.F., superior general of the Sisters of St. Francis, and Sister M. Ann Elizabeth, O.S.F., president, St. Francis Hospitals and St. Francis Health Care Foundation.

As the St. Francis Hospital enters its fourth quarter century of providing care and humanitarian service to our community, all of us extend our best wishes for continued prosperity and the completion of your great mission to the community.

TRIBUTE TO THOMAS P. FURRER

HON. BARBARA BOXER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mrs. BOXER. Mr. Speaker, today it is with great pride that I rise in honor of Mr. Thomas P. Furrer. As a teacher at Casa Grande High School, Mr. Furrer initiated a project worthy of the highest praise. His 1985 natural resources class undertook a massive cleanup of Adobe Creek which had been declared a "dead" stream. Over the next 3 years his classes removed 20 truckloads of litter and planted 300 redwood trees to provide shade for spawning. His class even started a fish hatchery in an abandoned greenhouse with an eye toward hatching and releasing steelhead into the rejuvinated stream. Recently four king salmon were spotted entering Adobe Creek, the first salmon recorded in the creek since the turn of the century.

I am so proud to have this wonderful teacher in the Sixth District of California. Environmental awareness is vital to our district and to the country. Mr. Furrer's teachings set wonderful examples as to how to protect and preserve the environment. His students are dedicated to cleaning up Adobe Creek. In fact, upon learning that the hatchery would have to be closed due to lack of meeting earthquake standards, the students have applied for corporate and government grants, sought private donations, and held fundraisers. More than $100,000 has been received and the National Guard has agreed to build a new hatchery.

I am personally dedicated to ensuring that our environment is safe and intact for future generations. I am very pleased to honor a constituent who is also dedicated, and who teaches students firsthand about the beauty of our environment. I wish the program continued success.

STIFFER PENALTIES FOR DRUG OFFENSES INVOLVING FIREARMS

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. GOODLING. Mr. Speaker, today, I am introducing legislation which would change Federal law to impose stiffer penalties on people convicted of lesser drug offenses involving firearms. Under current Federal law, a person convicted of a felony crime, involving drugs and firearms faces increased criminal penalties and is also prohibited from legally owning a firearm. This is not the case, however, for individuals convicted of less serious drug offenses.

My legislation is simple: It expands current law to treat individuals who commit less-serious drug offenses in the same manner as people involved in other drug crimes, such as drug trafficking. Any person found guilty of a drug crime not currently classified as a felony, including simple possession of a controlled substance, and who possesses a firearm at the time of the offense, will face jail time and/or mandatory fines in addition to any penalty imposed for the drug offense. For second or subsequent offenses, mandatory jail time and fines are mandated.

Furthermore, regardless of whether a firearm is present during the offense, the guilty party will also be prohibited from owning a firearm in the future, if they are convicted after enactment of the law. Exceptions to this rule can be made, however, depending upon the circumstances surrounding each individual's case. Present law states that a person convicted of a drug crime can petition to the Secretary of the Treasury for an exemption to the firearms prohibition if they can prove "that the circumstances regarding the conviction, and the applicant's record and reputation, are such that the applicant will not be likely to act in a manner dangerous to public safety and that the granting of the relief would not be contrary to the public interest."

The effectiveness of current tactics being employed in the war on drugs is the subject of heated debate. In my view, the time has come for serious efforts to convince people who use drugs that the cost of engaging in this activity outweighs any perceived benefits. If my bill becomes law, individuals who use drugs and own firearms for legitimate purposes—hunting, target-shooting, collecting, or personal protection—and who also engage in "recreational" drug use, will think twice before participating in their drug-related endeavors.

This bill will not affect a law-abiding citizen's right to own a firearm. It will, however, increase the price of drug use for people who choose to continue this illegal, mind-altering, and self-destructive activity. The legislation will also complement President Bush's recently announced anticrime initiative. While President Bush's proposal would bar the sale of firearms to, or possession of firearms by, persons convicted of violent misdemeanor offenses, this bill will impose a similar prohibition on misdemeanor drug users. We all know

that the drug problem is expensive to society as a whole; let's try to transfer more of the costs to those who use and abuse controlled substances. This legislation is an important step in the right direction.

INTRODUCTION OF RESOLUTION URGING ISRAEL TO TAKE IMMEDIATE STEPS TO OPEN SCHOOLS IN THE WEST BANK

HON. HOWARD C. NIELSON

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. NIELSON of Utah. Mr. Speaker, for nearly 2 full academic years, school aged children in the occupied West Bank have been forbidden from attending school. Informal makeup classes and even the distribution of homework assignments have been prohibited for students of all ages.

The school closures have had the most profound effect on younger children, who may not be able to make up those lost years later in their cognitive development. The school closures have created an entire generation of 8-year-old illiterates and have dealt a severe blow to the Palestinians who pride themselves in being the most educated group in the Arab world.

The Israeli authorities have kept the schools closed as a means of quieting unrest only in the West Bank. This policy is difficult to understand in as much as schools in the Gaza Strip have been allowed to remain open despite the fact that the Gaza Strip has experienced more violence and unrest during the "Intifadah" than has the West Bank.

Under the terms of the fourth Geneva Convention an occupying power has the responsibility to do everything possible to promote the care and education of children. This responsibility is clearly not being met.

Today I am introducing legislation expressing the sense of the Congress that Israel should take immediate steps to reopen West Bank schools. As we prepare to vote on a new $3 billion aid package to Israel in the coming weeks, it is time to let Israel know that Americans value the right of all people to an education and that we believe reestablishing a more normal educational environment on the West Bank would be an important step toward creating a climate which is more conducive to achieving peace in the region.

I would like to insert into the record a May 8 New York Times article entitled "For West Bank Arabs, Education Has Been Deemed a Criminal Act." This article accurately depicts the current situation and should help my colleagues understand the urgent need to cosponsor this resolution.

[From the New York Times, May 8, 1989]

FOR WEST BANK ARABS, EDUCATION HAS BEEN DEEMED A CRIMINAL ACT

(By Joel Brinkley)

RAMALLAH, ISRAELI-OCCUPIED WEST BANK, May 5—Every day, hundreds of Bir Zeit University students disguise their textbooks, talk their way through army checkpoints and sneak off to secret classes in church basements, clubs and professors' homes.

"I put my books in a bag wrapped with papers so maybe the army will think it's fruit," said Farid Jaman, a senior mathematics student, grinning.

In some classes, "students jump everytime they hear a car, thinking maybe it's the army," said Ali B. Jarbawi, a political science professor, shaking his head.

SCHOOLS CLOSED FOR 16 MONTHS

The Israeli authorities have kept West Bank schools and universities closed for more than 16 months, keeping 320,000 elementary and high school students and 18,000 college students from almost two full academic years. As a result, clandestine classes are the best that Bir Zeit and the five other universities in the West Bank and Gaza Strip can offer.

Even then, troops or the police sometimes step in. Last month, the police in Jerusalem announced that they had "uncovered a network of illegal classes," and then closed them. Most often the army turns a blind eye.

Israeli officials say the schools must stay closed because the minute they are opened they become breeding grounds for unrest. And, in fact, some schools have been the source of violence during the few days that they have been open during the uprising.

YOUNGEST ARE HURT THE MOST

This has enraged Palestinians, who are proud that they have one of the highest levels of education of any group in the Arab world. Many Palestinian academics are despairing, worried that the schools may remain closed for years and that their children will grow up illiterate.

In fact, for younger students, almost nothing is allowed. Last year, the army outlawed "popular committees" that had been organizing dozens of basement schools.

And last month, after the United Nations' 90 West Bank schools for refugee children had been closed for more than a year, the United Nations decided to start a home-teaching program for first, second and third graders. "We now have thousands of 8-year-old illiterates," said Rolf Van Uye, a United Nations official.

About 10,000 home-instruction booklets in math, science, religion and Arabic were printed, and teachers planned to deliver them home to home, where students were to work under the tutelage of parents or older siblings.

"The idea was to circumvent the Israeli accusation that if you get the kids together in one place they will start trouble," Mr. Van Uye said. But when the army heard of the plans, it sent word that the new program would not be allowed.

"It's all so ridiculous," Mr. Van Uye said. "They're making education of even little children into a crime."

Israeli officials said they did not want to start this alternative form of education because teaching should be done in schools. But the schools remain closed.

Assad Arideh, who manages education programs for Israel's military government in the West Bank, asserts that "many parents asked us to close them because their children were getting wounded" during violent demonstrations at school.

MANY STUDENTS ARE IN JAIL

But now, Mr. Van Uye said, using the Arabic word for the uprising, "Most of the students are caught up in the intifada, congregating on street corners instead of in classes."

"Some of my students have taken jobs," Dr. Jarbawi said. "Some are just waiting for schools to reopen. But many are in jail."

Some educators are discouraged. "Personally I have no hope that they will reopen unless there is a political solution for the Palestinian situation," said Dr. Anton Sansour, who is president of the executive committee of the Council of Higher Education in the occupied territories and executive vice president of Bethlehem University.

The army and the military government both give a firm "no comment" when asked when West Bank schools will reopen. Gaza Strip schools, though not universities, are open. That baffles West Bank educators because "in Gaza, there's always more violence and trouble," said a West Bank high school principal.

Now even some Israelis are beginning to protest. A few days ago, 400 Israeli university professors petitioned the Defense Ministry to reopen the schools, saying among other things that the real reason for the continued closure was collective punishment, not security concerns. Otherwise, they asked, why did the army refuse even to allow school librarians to go to work so they could keep up their collections?

LEADERS NURTURED IN PRISON

"If we keep the universities shut, the leaders will develop in prison," said Hava Lazarus-Yafe, a professor of Islamic studies at Hebrew University. "We had better let the future leadership of the Palestinians grow in universities rather than grow frustrated and angry in jails."

The army responded in a letter, saying, "We've tried at least twice to reopen schools, as we would like, but couldn't do this because as soon as they opened they became targets for violence again."

Now that the second academic year with little or no schooling is about to close, Palestinians are trying to deal with a number of difficult issues, including "the first grade pile up problem," as one West Bank teacher puts it.

If the schools reopen in the fall, there will be three times as many first-grade students as normal: the ones who started first grade in 1987, just before the schools closed; the ones who should have started in 1988; and the new ones for 1989. School officials now must search for more teachers.

These last 16 months, the 12,000 teachers in the Government's schools have been getting partial pay, about one-third of their salaries. Most have taken other jobs, and many are not expected to return to school.

The high school principal showed his most recent monthly paycheck, 375 shekels, or about $208. He now works in a print shop.

LOCAL BUSINESSES LEND A HAND

Teachers who return will face a difficult job. The students who come back will have forgotten much of what they learned, and many will probably have to repeat one or more grades.

"It's creating a whole generation of students who are not going to have a proper education," the high school principal said. "The whole academic process is being destroyed, and we are going to suffer for 10, 15 years."

In the meantime, many West Bank businesses are trying to employ children to keep them out of trouble. At the Silvana Chocolate and Sweets Company, about 50 elementary and high school students work in a bustling and crowded basement room stuffing candy bars into packing boxes.

"We don't really need them here at all, but it at least keeps them off the streets," said Jamal Shawar, the factory comptroller. "A lot of the factories are doing the same thing."

For the time being, the universities are trying to teach only students in their junior and senior years; the younger students do not have enough experience with university life to do well in the free-form world of clandestine classes, professors say.

But even in the higher levels, only those whose majors do not require laboratory or computer work can think of completing their schooling.

ARAB NATIONS PAY PROFESSORS

Professors remain on full salary, though students are not being charged tuition. The money comes from Arab nations; Kuwait just donated $5 million, Dr. Sansour said.

But even with a full staff, "We can't duplicate lab instruments or computers in these circumstances," said Nabeel Kassis, vice president for academic affairs at Bir Zeit.

Even if there were lab courses, "We can't just keep teaching seniors," Dr. Jarbawi said. "We're in a dilemma."

Still, to a man, students and teachers say the educational problems are a price they are willing to pay for the uprising.

"If you love your country, you must sacrifice," said Zakarya Ilayan, an engineering student.

"We don't know what will happen tomorrow," said Mr. Jaman, the math student. "Maybe we'll finish university, maybe not. Maybe we'll be wounded, maybe killed. This is the important thing now."

TRIBUTE TO VINCENT ROSS

HON. BOB McEWEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. McEWEN. Mr. Speaker, in recent years, there have been a number of popular movies which have celebrated and feted the work of some extraordinary educators from all sections of America who have faced considerable obstacles and still brought positive change to the lives they have touched.

For 27 years, the Clearcreek School System has benefited from the hard work of an individual unfailingly dedicated and infinitely able. Vincent Ross is retiring shortly after a long career in which he has guided countless lives in his community in southwest Ohio. This life of service culminated, most recently, with 19 years as the principal at Springboro High School.

Without the fanfare accorded the subjects of Hollywood's recent education dramas, but with a justifiable sense of accomplishment, Vincent Ross can look back on a variety of assignments in which he has done a great job, and to great and lasting effect for his students. He has done it all—elementary school principal, student counselor, classroom teacher, and active athletic booster—and done it well.

He also has pitched in and helped the community at large as a member of the Lion's Club. This has made him a man well-liked and respected by students and his Springboro neighbors alike. All in all, a very productive life which is truly worthy of our attention and praise today.

Mr. Speaker, I ask my colleagues to join Vincent Ross's family and many friends and me in offering hearty congratulations and best wishes to Vincent on his record of service to Clearcreek Schools and to America.

WORKER'S OPTION ACT OF 1989

HON. BILL ARCHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. ARCHER. Mr. Speaker, today I am introducing H.R. 2348, the Worker's Option Act of 1989. It is a bill which would repeal the Social Security earnings limitation for workers who have attained the normal retirement age, currently 65.

Earlier in this session, I introduced H.R. 58, which would repeal the test for all beneficiaries now subject to the limitations. That remains my long-term goal.

As an intervening measure, the Worker's Option Act permits workers 65 to 69 to either receive full benefits in spite of earnings, or delay filing and receive an actuarially sound delayed retirement credit of 8 percent a year.

The increased delayed retirement credit is one of several offsets which helps to reduce the startup costs of this bill. Other features will: First, eliminate recomputations after a worker who has attained the normal retirement age first files for benefits; and second, eliminate retroactive entitlement for reduced benefits for the purpose of charging off excess earnings.

SSA actuaries estimate the net costs over 3 years to be just under $10 billion, and $16 billion over 5 years. I realize these are significant short-term hurdles, but I would emphasize again that there are no long-term costs to the trust funds. Ultimately, the full 8 percent delayed retirement credit, now scheduled for 2008, will make the worker's retirement or work option a "wash" to the trust funds.

But, I want to emphasize that the elimination of the earnings test is not a wash either to the national economy or to the health of older Americans. Both would benefit.

I was not at all surprised that the Washington Post on April 19 editorialized against Senator ARMSTRONG'S recent effort to increase the current $8,880 threshold limit by $80 a month. But, I was surprised that the Post's "For the Record" column on the editorial page on May 5 included such a succinct argument for eliminating the test. Citing a new study by the Greater Washington Research Center entitled "Growing Older in Greater Washington," the column said:

By the year 2000 . . . the area's over-65 residents are expected to number almost 430,000. That will be nearly double their number in 1980. The 75-and-older population will more than double * * *

Retirement begins early today for many Washingtonians. By the early 60s, more than half are no longer employed. But over five percent are still working at 75 and above. The first years of retirement often are justly called the "golden years," a time of well-earned leisure and fulfillment. But too many seniors have trouble finding enough interesting things to do. They become bored and increasingly dependent. Retirement incomes often are less adequate than expected.* * *

Older people who do manage to stay active often live on for many years. Many of those who do become sick only rarely and enjoy life to its fullest until very near its end. Many experts believe that activity can reduce or delay deterioration. * * *

[I]t has long been common practice to encourage older workers to retire early and make room for younger people. Now, with a chronic labor shortage that promises to last for decades, we need to re-examine this practice. How can we now help older Washingtonians who are able and want to work to keep on doing so or to return to work if they are not totally satisfied with retirement? How can we persuade and enable them to volunteer for community service, thus helping both others and themselves? For those who can no longer work, how can we best keep them active and challenged in the interest of preserving their physical and emotional health?

Mr. Speaker, we can help older Washingtonians, and indeed all older Americans who are able and want to work by repealing the Social Security limitation earnings test, the last vestige of age discrimination embodied in Federal law.

I have advocated the repeal of this provision for the past 18 years. During that time, the ratio of workers to beneficiaries has declined by almost one-half of worker—from 3.7 workers per beneficiary to 3.3. Clearly it is important that we encourage older Americans to remain productive, for their own health and economic benefit as well as that of the Nation.

ELIMINATION AT NORMAL RETIREMENT AGE IN 1990—FISCAL YEAR ESTIMATES

TABLE 2.—ESTIMATED CHANGES IN OASDI AND HI INCOME AND OUTGO RESULTING FROM A PROPOSAL TO ELIMINATE THE RETIREMENT EARNINGS TEST AT NORMAL RETIREMENT AGE, RAISE THE DELAYED RETIREMENT CREDIT TO 8 PERCENT, ELIMINATE BENEFIT RECOMPUTATIONS BASED ON EARNINGS AFTER ENTITLEMENT, ELIMINATE CERTAIN RETROACTIVE ENTITLEMENTS, AND CREDIT THE TRUST FUNDS WITH ANY ASSOCIATED INCREASE IN FEDERAL INCOME TAXES, FISCAL YEARS 1990–99

[Dollars in billions]

Raise the delayed retirement credit to 8 percent for credits earned after 1989	−.4	−.4	−.4	−.4	−.3	−.3	−.3	−.3	−.2	−.1	−1.9	−3.1
Eliminate benefit recomputations based on earnings after the later of (i) the year of entitlement or (ii) the year of attainment of normal retirement age after 1989		(2)	−.5	−.8	−1.1	−1.4	−1.6	−1.9	−2.1	−2.4	−2.4	−11.7
Prohibit retroactive entitlement to reduced benefits either (a) to charge off excess earnings or (b) despite the involvement of an unreduced auxiliary beneficiary, effective for entitlements after 1989	−.1	−.1	−.1	−.1	−.1	−.1	−.1	−.1	−.1	−.1	−.7	−1.3
Net total increase in OASDI benefit payments	2.7	4.5	4.1	3.9	3.8	3.6	3.5	3.3	3.1	2.9	19.0	35.3
Net reduction in OASDI administrative expenses [3]	(4)	(4)	.1	.1	.1	.1	.1	.1	.1	.1	.2	.6
Increase in OASDI revenues as a result of the Federal income taxation of OASDI benefit payments [5]	.2	.3	.3	.3	.3	.3	.2	.2	.2	.2	1.3	2.5
Net total increase in OASDI cost (prior to the effects of any net increase in work effort induced by the elimination of the retirement test) [6]	2.5	4.2	3.7	3.5	3.4	3.3	3.1	3.0	2.8	2.6	17.4	32.2
Estimated offsets to above cost due to increased work effort resulting from the elimination of the retirement test: [7]												
Increase in OASDHI payroll taxes	.1	.2	.1	.1	.1	.1	.1	.1	.1	.1	.6	1.3
Reduction in HI benefit payments due to primary payments by private health insurance [8]	(2)	(2)	(2)	(2)	(2)	(2)	(2)	(2)	(2)	(2)	.1	.3
Increase in OASDI revenue due to transfers from the general fund of the Treasury representing additional income taxes attributable to the elimination of the retirement test [9]	.1	.2	.1	.1	.1	(10)					.6	.6
Total of offsets	.2	.3	.3	.3	.3	.2	.2	.2	.2	.2	1.4	2.2
Net total increase in OASDHI cost after estimated effects of induced work effort [11]	2.2	3.9	3.5	3.3	3.2	3.1	3.0	2.8	2.7	2.5	16.0	30.0

[1] The retirement test would cease to apply beginning with the first full month during which the beneficiary has attained age equal to the normal retirement age.
[2] Reduction in benefits of less than $50 million.
[3] Estimates based on information provided by the Office of Budget.
[4] Net change in administrative expenses of less than $50 million.
[5] Estimates based on information provided by the Office of Tax Analysis, Department of the Treasury.
[6] Represents net increase in OASDI benefit payments, less (i) reduction in OASDI administrative expenses and (ii) net increase in receipts from the taxation of benefits.
[7] The magnitude of this effect is highly uncertain. Investigations of available data on this subject have produced conflicting evidence as to the nature of this induced effect. The estimates shown in the second half of this table represent the evaluation of the Office of the Actuary based on (1) data collected from the Social Security Administration's Continuous Work History Sample, and (2) independent studies of this issue. Actual amounts could be substantially different.
[8] Estimates based on information provided by the Office of the Actuary, Health Care Financing Administration.
[9] Under the proposal, any such induced increases in general income taxes would be appropriated from general revenues to the OASI and DI Trust Funds on an estimated basis for a period of 5 calendar years. Similar induced increases in income tax revenue would continue after calendar year 1994, but would accrue to the general fund of the Treasury.
[10] Net increases in tax income of less than $50 million.
[11] Represents net increase in OASDI cost shown in top half of table, less offsets due to induced work effort shown in bottom half of table. See footnote 7 concerning the reliability of effects of induced work effort.

Notes: 1. OASDI benefit estimates shown for each provision reflect interaction with the preceding provisions; estimates for individual proposals alone could be substantially different. Totals may not equal sum of components due to rounding. 2. All estimates are based on the alternative II–B economic and demographic assumptions from the 1988 Trustees Report. All proposals are assumed to become effective January 1, 1990.

Source: Social Security Administration, Office of the Actuary, June 28, 1988.

THOUGHTS ON ALL THE OLD GROWTH

HON. AL SWIFT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. SWIFT. Mr. Speaker, "We should not cut all the old growth." We hear that all the time. In the Northwest where we are currently undergoing an intense controversy over the spotted owl with very grave likelihood of the loss of 130,000 jobs in the second largest industry in the region, the stakes are high. It is all the more important that we understand accurately what it is we are talking about. This is an essay drawn from a letter written to me by Dave Buse, an executive in a small timber products firm founded and owned by his family.

The environmentalists, frankly, have been very imprecise in describing the issue. They keep talking about losing "all" the old growth. It is an excellent device to gain public support. The average person does not want all the old trees cut.

The fact is, no one is talking about cutting all the old growth. Cutting all the old growth in simply not an issue.

Half of the remaining old growth in the Pacific Northwest is already locked up forever: 3 million acres worth. It is locked up in national parks and wilderness areas. The issue is not cutting "all" old growth. The question is survival of an industry that supplies hundreds of thousands of people of all ages with the ability to support their families.

Furthermore, each American uses about an acre's worth of wood products in a year. Where are we going to find substitutes for these wood products? We are already importing more wood fiber to this country than we are exporting. Are we going to shut down our domestic timber industry and use wood products from nations that cut their trees but do not do the intense reforestation that we provide? That is the surest way of contributing to the greenhouse effect one can think of.

What are we going to substitute for wood products? Plastic, which causes huge environmental problems? Are we going to write on parchment? I remember when there was great outrage that grocery stores were going to plastic bags rather than paper bags because the environmentalists said the plastic bags were not biodegradable.

We simply have to be reasonable about these matters. We have to be thoughtful. We cannot be stampeded by those who wave the greenhouse effect at us when the proposal they are making would make it worse. We cannot believe those that say there are efforts afoot to cut down "all the old growth" when there are not only no such efforts but federal law would prevent them from being successful.

We need to look at the survival of small families, small businesses, small communities. Virtually everything that is threatened by this spotted owl controversy is small. We are limited in our resources to fight the legal and political battles, sharply limited in resilience, seriously limited in our ability to survive.

The cities of Seattle, Spokane, and Portland will hardly notice the dying of little communities all over the Northwest until their taxes have to go up to reflect the loss of revenue from scores of dying little towns and by the increased unemployment, welfare, and law enforcement costs that accompany such devastation to a region's economy. What we will have is millions of acres of mature trees, rotting silently in the forest, giving off carbon dioxide and thereby increasing the greenhouse effect.

We are not exploiters. We are hard working Americans who love the outdoors and who have an enormous self interest in preserving our great forests in perpetuity. Why must we be endangered? Why must we die to perserve a forest that isn't going anywhere and for which we are the strongest advocates of its surviving forever?

A TRIBUTE TO MARY LAMBERT

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. FISH. Mr. Speaker, I take this opportunity to honor Mary Lambert, the 1989 nominee for the Yorktown Senior Citizens Hall of Fame. Mary's record of service is exemplary since she began her volunteer efforts on behalf of Yorktown's senior citizens.

Mary embodies the volunteer spirit that is flashing a "thousand points of light" across our land in the spirit of our forefathers who committed themselves to the community. Helping the seniors of Yorktown, Mary has contributed many times with transportation for doctors' appointments, hospital visits, church services, shopping chores and to other tasks that brighten the day of those in need of assistance.

For this spirit and willingness, we today offer our tribute to the achievements of Mary Lambert. Over the years, Mary has been willing to help with her faithful visits and phone calls to those shut in with health cares. She has cleaned and decorated parish facilities at Saint Patrick Church on holidays and other special occasions, assisted with fund raising and contributed generously of her time and her special devotion to service.

During 5 years of kitchen duty as a member of Yorktown Senior Citizens Chapter 2, Mary has willingly served in shopping for and the supply of refreshments. She is a well-known representative at the veterans hospital, where she has devoted more than 1,500 hours to sponsored recreational activities and parties for the patients. Mary has been instrumental in bringing needed clothing to the hospital and to Graymoor.

Mary has been honored the past 8 years as the Memorial Day Poppy Chairman for Yorktown. Today we honor her for the outstanding record of service and achievement she has compiled with the Yorktown Senior Citizens Chapter 2. We commend Mary Lambert and wish her well-deserved happiness and prosperity.

PEORIA: AN ALL-AMERICA CITY

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. MICHEL. Mr. Speaker, what residents of Peoria, IL, have known for many years has received official confirmation: Peoria is an "All-America City." On Saturday, May 13, 1989, the jury of the All-America City competition, held this year in Chicago, named Peoria 1 of only 10 cities in the United States to receive this prestigious award.

My congratulations go to Mayor Jim Maloof, and to all of the people of my hometown and the surrounding area. In Mayor Maloof's words, "This is one of those things that we have all worked so hard for * * * I am thrilled and happy for the people of the community—this entire area."

At this point I wish to insert in the RECORD two articles from the Peoria Journal Star, "Peoria Wins All-America Status," May 14, 1989, and "Maloof Makes Plans to Utilize City's New Honor," May 15, 1989.

[From the Peoria (IL) Journal Star, May 14, 1989]

PEORIA WINS ALL-AMERICA STATUS

(By Ann-Perry Washabaugh)

CHICAGO.—Peoria is All-American and it's got a national award to prove it.

The city succeeded Saturday night in capturing the All-America City award that proved so elusive in past years.

But the honor didn't come without a little nervous perspiration, since Peoria was the last of 10 cities to be presented with the designation.

The reason: All-America officials were so impressed by Mayor Jim Maloof's colorful speech after garnering only an honorable mention last year that they intentionally saved the best performer for last.

Maloof made it worth the wait, standing before the crowd and singing "Here's to the Winners" for the second year in a row. For the second year in a row, he received a standing ovation.

"Last year, it was a little more difficult to sing it, but the message is still there," Maloof said afterward. "I'm so thrilled, I could damn near—make that darn near—cry."

A few tears fell among the nine-member Peoria delegation when the announcement was made by jury foreman William Quinn, the former governor of Hawaii. But those tears merely replaced the beads of sweat that had formed on the delegates' brows as they watched all of the other cities who returned for a second run at the award, capture the prize.

"This is horrible. This is horrible. I hate this," said Peoria Chamber Achiever Deb Rochford, after three cities had received their awards and made their speeches. She is the wife of attorney Jim Rochford, who led the effort to garner the designation, both in 1988 and this year.

During its presentation to the jury on Friday, Peoria presenters Rochford, Maloof, Andrea Carman of Forward Peoria! Patti Bash of the Peoria Area Health Education Center and former East Peoria Mayor Jim Ranney stressed the importance of community involvement and cooperation.

The theme was inclusion, and Peoria painted a picture of a city that had despaired and pulled itself back to prosperity through community spirit and intergovernmental cooperation.

The presentation was in sharp contrast to the 1988 attempt, when Maloof dominated with fast-talking and wisecracks.

On Saturday, after the ceremony at the Hyatt Regency here had ended. Rochford clutched the All-America City certificate and beamed.

"That's fantastic," he said. "But the agony of sitting there until the last one was incredible."

As Quinn began to read out the final city's accomplishments, Peoria delegates recognized the description of their programs and Maloof began to hoot.

"God is good. God is good," the mayor shouted as he took the podium. A few delegates of other cities responded as though Maloof were leading a prayer meeting, and they bellowed, "Yes He is."

"We were here last year and we were determined to come back," Maloof told the representatives of 30 cities who competed for the 10 designations. "I've got news for you. We're coming back next year."

First, though, comes the task of using this year's award to bolster the city's reputation, Peoria delegates said.

"It's like icing on the cake," City Councilman James Polk said. "The themes we've been pushing for the last four years have been recognized. Now, we'll have the entire nation looking at us."

The All-America City competition coordinators already have provided finalist cities with a book on how to market the award. Outside the banquet hall, a marketing company had set up a display of products that could bear the All-America label and the winning cities' names.

Peoria doesn't have its strategy in place, yet, but that's coming soon, Rochford said.

Maloof already knew what has first attempts would be to make the world aware of Peoria's All-America status.

"We're going to use the recognition in every possible way we can to attract more jobs and business to the community," Maloof said, suggesting city statutory and newspaper front pages as obvious places where the All-America badge could be displayed prominently. The last time Peoria was an All-America City was in 1966, and it won the award only once before, in 1953. The community has made several runs at the designation in the intervening years, suffering its most disheartening loss last year after making it to the finals.

In that competition, Peoria became the popular favorite of other cities because of the mayor's boisterous personality, but the judges said they found it difficult to believe that Peoria ever had suffered through hard times.

The other cities that won the designation were Phoeniz, Ariz., the largest competitor with a population of nearly 900,000; Inglewood, Calif., which won an honorable mention last year; Greeley, Colo., with a population of about 53,000; Salina, Kan., population about 42,000; New Bedford, Mass., population 98,478; Tupelo, Miss., population 23,905; Dunn, N.C., population 8,962; New Bern, N.C., which returned after winning an honorable mention last year; and Roanoke County, Va., whose major city, Roanoke, won an All-America designation in 1988.

[From the Peoria (IL) Journal Star, May 15, 1989]

MALOOF MAKES PLANS TO UTILIZE CITY'S NEW HONOR

(By Sally McKee)

Just one hour after returning to Peoria, Mayor Jim Maloof was busy spreading the good word of Peoria's All-America City status.

The mayor called a press conference Sunday afternoon to congratulate Peoria-area residents for the successful campaign for All-America city.

"This is one of those things we have all worked so hard for," Maloof said. "I am thrilled and happy for the people of the community—this entire area."

Maloof said this year's presentation focused on people involvement instead of last year's emphasis on economic development.

Last year, Peoria received an honorable mention.

Just back from the competition, the man who has poured his heart and soul into this city is not finished. He is busy making plans on how to best use the award.

Maloof said he hopes to appoint a committee of local people as the All-America City Event Committee.

"My hope is this will become a celebration that will go on a number of weeks, no, months," he said. "We will use this every way we can to attract people jobs and businesses to the community."

Maloof already has investigated the possibility of highway signs announcing Peoria's new status.

"I hope the newspapers will put the (All-America) symbol out through the entire year," he added. "I am asking all of the local businesses to put the symbol on their stationery—I want to splash it all over the world."

"It is our feeling that the people in Peoria don't realize how significant this is," he stressed.

Maloof's excitement about the award was contagious as citizens filed into the City Hall board room to hug and congratulate the mayor. However, Maloof was quick to give credit to the others involved in the competition.

He was joined by Patti Bash of the Peoria Area Health Education Center, Andrea Carman of Forward Peoria!, former East Peoria Mayor Jim Ranney and attorney Jim Rochford, who all contributed to Peoria's presentation in Chicago.

Rochford said last year's experience helped Peoria win this year. He compared last year's presentation with showing the judges a 150-pound person and saying they used to weigh 300 lbs., without showing any photos of the 300-lb. person.

"They needed to see the first picture," he said. "We demonstrated where we came from to where we are at now."

Although the judging is over, Rochford said their work is only half done. The first part was winning, the second part is to let people know about it.

Upcoming plans for the city include an Applaud Peoria program set for Friday near the Courthouse Plaza. This event will start the All-America City celebration, Rochford noted.

Bash's contribution to the presentation was to focus on the cooperation between the city's three hospitals. She discussed the joint laundry facility, the heart transplants, shared equipment use and the plans for the health education center as examples of how the city's medical community works together.

As Forward Peoria! chairwoman, Carman highlighted citizen involvement in the Forward Peoria! committees. Although citizen groups like Forward Peoria! are not unusual in cities, she said the extent of Peoria's was unusual, especially because no public money was used.

DR. RICHARD GREEN

HON. MARTIN OLAV SABO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. SABO. Mr. Speaker, it was with great shock and sadness that we learned last week of the death of Dr. Richard Green, the chancellor of the New York City schools. He will be sorely missed by many of us.

Richard's passing is a tragic loss not only for his wife Gwen and his family, but also for New York City and his many friends and admirers in Minnesota. As the head of the Nation's largest school district, his death is also a loss for American public schools.

It was with a very personal sense of sorrow and sadness that I heard the news. Richard and I had been friends for more than 30 years, since we were classmates at Augsburg College in Minneapolis. Richard was a bright student at Augsburg and it was clear then that he would go far. He didn't just fulfill our expectations, he exceeded them.

Richard dedicated his life to education and he rose fast in that field. Beginning as a special-education teacher in Minneapolis, he rose to become an assistant principal, then principal of Minneapolis' North High School, and, for nearly 8 years, a strong superintendent of the city's school system.

Fourteen months ago, he became the chancellor of the New York City school system. That was an immense undertaking, as you can well imagine, but Richard took on the daunting task with the same spirit he had displayed in every other challenge in his life.

Richard was an outstanding educator. Countless young people, teachers, and parents benefited from his tireless work. He was a shining example for young people, encouraging them to do their very best. He always pushed for excellence and high standards.

Most of all, Richard always had an abiding concern for his students. He cared deeply about them and was a forceful advocate for them. I was always struck by the personal sense of responsibility Richard had for the success of his students.

Richard's passing was especially noted in Minneapolis, his hometown and a city he had served so well for so long. I want to share with you a particularly poignant article written by noted Minneapolis Star Tribune columnist Jim Klobuchar. It offers some deep insights into Richard's life, character, and qualities as related by his close, life-long friend Harry Davis.

[From the Star Tribune, May 11, 1989]

GREEN'S LEGACY IS FOR ALL CHILDREN

(By Jim Klobuchar)

How did a street fighter from north Minneapolis become one of the great educators in America, Harry?

Tell us, what is the distance from a settlement house in Minneapolis to the chancellor's office of the world's biggest school district in New York City? Tell us, so that we can measure that distance in sweat and hunger and the electric surges of a restless, exploring mind.

Explain what there was inside Richard Green that we should mourn most, Harry, because most of us didn't walk the street that Richard Green walked.

"The street he walked to school every day as a boy took him past pimps and prostitutes and drifters," Harry Davis said. "He didn't have many illusions about the world by the time he was in grade school." Nor did he have many visions of the future when he as a kid, no silent furies driving him toward some personal chalice.

"What he had," Harry said, "was belief and confidence. He knew he was different, and one way or another Richard Green would matter, whether it was in a playground fight, the classroom or someplace else. He mattered more than he could possibly have guessed when he was a kid. And now he's gone."

Harry said it often enough Wednesday to accept the reality of it. Richard dead—the nursery school kid he met nearly 50 years ago at the Phyllis Wheatley House; the cheeky boy to whom he gave a pair of boxing gloves a few years later, telling him there was a better way than duking it out in the street; the man who sat beside him at school board meetings in Minneapolis, presiding as superintendent; the man he heard addressing the Urban League in Minneapolis just two weeks ago, seemingly healthy and vigorous, speaking from the maturity of a mind now grappling with the futures of nearly a million children.

"I'll never forget the conversation we had when the list for the New York City job had been pared down and he was one of the finalists. He asked me what I thought about it. I said, 'You're not going to take that job? You have to be crazy.' He had that habit of tilting his head a little when he talked, always moving, light on his feet. And he said, 'Hey, you always taught me to go for it. And here's a chance for that snot-nosed kid you knew years ago to become chancellor of the biggest school system in the country.' He laughed, and there was no turning back. There shouldn't have been He was right, and he was the best man for the job."

Expect no public tears from Harry Davis in the death of Dr. Richard Green, to whom he gave what most fathers give their sons: a hug, a direction, forgiveness and trust. If that is love, it is what Harry gave to Richard. Harry is not Jesse Jackson and he is not Martin Luther King. There are leaders who can define the tragedy, the yearnings and the greatness of their people in language so powerful and lyrical that it can ignite all people.

Harry is not one of those. He is a calm and understated man whose canvas is smaller. He has been a teacher and friend and a public man, a school board member. Somewhere in that process he has, incidentally, saved hundreds of lives. But he will tell you that Richard Green was saved and ultimately turned into a figure of national leadership by two people—his mother, Gertrude, and by Richard Green.

"She did day work, cleaned houses, to feed her kids. She took them to church. She gave them her energies," Harry said. "Nobody else gave Richard what was inside of him. He was aggressive and smart and full of energy. Any group he was in, he was the leader. Sometimes he was a peacemaker and sometimes he was the enforcer. He was a persuavise kid. He was an athlete and he could think of his feet. I would put him in with kids of more experience because he was more mature. In the kind of world he grew up in, you had to be able to run or fight. Richard could do both. Racism was everyday then. It was part of your life. It was thick then. You had to find a way to deal with it. It's why I got into Golden Gloves. The kids could take out their aggressions that way."

The Phyllis Wheatley settlement house in north Minneapolis was a refuge and learning center. Long before desegregation decisions and Martin Luther King, before the slogans of black pride, it was a house of black brotherhood and a door to survival for the kids. Their role models were Cecil Newman and Gertrude Brown and others, blacks in the community who had stood up to racism and, in whatever way seemed serviceable, stung the conscience of the institution. Wheatley nurtured young men whose names later occupied the forefront of the black movement of the middle century; Roy Wilkins, Whitney Young, Carl Stokes, Carl Rowan and others. Athletes good enough to play for the University of Minnesota football team lived at Wheatley. They were good enough to play, but not good enough, or white enough, to live in the university dorms. In the Wheatley of those years, teenagers like Harry Davis adopted kids like Richard Green as their students and projects.

"He was a terrific student, but he was also disruptive. He was assigned to Vocational High School, which in those years was a kind of work opportunity school. Gradually he grew out of the tough-guy mentality. It was more satisfying to use his mind. He wasn't satisfied with the street vocabulary. He worked on his own from grade school."

Sometimes he would tell one of the dudes, at 9 or 10 years of age, "How come you're so belligerent?"

I'm what?

"It means pushy. You can look it up."

From Vocational, there was a scholarship to Augsburg, teaching in Minneapolis, assistant principal, principal at North, a doc-

torate from Harvard, upward for Richard Green.

The commencements were starting to get sloppy at North when he came in. Green stopped that. Graduating from high school meant that you had done something, that you counted. Feel it. Wear it. He told the girls to come in formals and boys in tuxes the next time. They still do.

The man who gave Richard his boxing gloves at Wheatley was the one who urged him to apply for the Minneapolis school superintendency. "When the interviews started," Davis said, "I felt good about that. We had a lot of good candidates but Richard stood above them. He had the information. You asked him, and he looked you straight in the eye and he gave you answers. When he was in the job, he didn't back away from hard decisions. He closed 18 schools in one year because it had to be done. He irritated some people because of his straight-ahead style. They called it arrogance. Another name for it is leadership. He'd write to me from New York, telling me of bits of progress here and there. He really was excited about doing something for those kids. He was restless about it. Education was everything for him. He said nobody can give excuses for learning."

He felt it deeply not only because he was a professional educator, but because he was black. He knew better that most, drawing from his years in north Minneapolis, the truth about quality education: It is as vital as blood and air for people in want. In a rough way, his life mirrored the struggles of his people. As a boy he felt the abuse, he responded with protest and defiance, and finally he saw that the most durable way for Richard Green—without discounting the other ways—was the way of the school. He carried that message to city kids of all colors for the rest of his life, and from this city to New York, it will ring loud and clear.

CHILDREN'S IDEAS ABOUT THE VALDEZ OILSPILL

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. MILLER of California. Mr. Speaker, I would like to bring to the attention of my colleagues several letters to me about the Valdez oilspill written by bay area fifth-graders in Alameda, CA. I believe these students typify the feelings of children everywhere. They show great sensitivity to the environment, and they're extremely perceptive. Equally important, they're not short on interesting suggestions for oilspill cleanup either.

I take their comments very seriously, and I don't want to let these kids down.

They are putting their trust in us to find solutions to this problem and to make sure the environment and our natural resources are protected. We have to do the best we can to meet that trust.

The following are excerpts from letters I have received.

SHANNON MORLIN'S ESSAY ON "EXXON OIL SPILL"

As you all know there was a bad oil spill in Alaska. This accident shouldn't of even happened. I think this was a bad time to happen because baby birds were about to be born.

If people care so much about animals they would probably give up their life just for animal life.

In this oil spill 240,000 gallons of oil was spilt. If you say that is nothing you must be out of your mind because that is making gas cost a lot more money.

In Alaska people are removing the oil by hand. Also Hazelwood admitted he was drinking while driving the boat but he didn't tell how much.

I think in the future people are going to say to themselves "What will happen if we have an oil spill here? How will we pick up the oil? What will we do? How will people and birds survive?"

I think I would go to Alaska, if I was older, because even though the animals are wild, they have a right to live.

DEAR CONGRESSMAN GEORGE, I'm writing you this letter because of the big oil spill in Valdez. I know this shouldn't of happened but you said that the equipment to clean up the oil would work, but in some cases they didn't except for putting the oil in another tanker, but that only got half of the oil, not even half, just some. I'm very concerned about this, but as you know us kids don't get very much to talk out what we feel. Well, I hope you write back to me.

Sincerely,

BERNA GRIFFITH.

DEAR CONGRESSMAN MILLER, I'm mad that Exxon is going to kill all of my animals in Alaska.

From,

JASON PATTERSON.

DEAR CONGRESSMAN MILLER, I hear you're in charge of the oil spill. Can't you use a very powerful vacuum cleaner like the one below to move along the beach and pick up the oil?

The oil emulsifier will soften the oil so it could sweep it up. It would be 1 foot 7 inches up, and 2 feet 6½ inches across. The hose is 6 inches thick and 2 feet 2 inches across. The piece at the end is 1 foot around.

Sincerely,

ZACH VOGEL.

DEAR CONGRESSMAN MILLER, I am a fifth grader at George P. Miller School (named after your father). I believe Alaska is hurting very badly from the spill. Our school did several reports on our opinion about the oil spill and you would be surprised at how much our opinion counts. We have very strong feelings about this subject. If the new generation grows up to think we can't trust oil companies and Congress then our country will fall apart. Alaska's wildlife are hurting very badly and all Congress can think of is robbing land from the creatures to drill on! I think before you think about getting more oil you should clean up the 245 gallons left in the ocean! Please help.

Signed,

ALLISON DUNN.

George Miller why would you want to take the patch of land from Alaska. Please don't.

Sincerely,

RICKY BLAIR.

THE MARINE CORPS FMFM1

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. SKELTON. Mr. Speaker, in the newly published manual, FMFM1, entitled "Warfighting," by U.S. Marine Corps Gen. Al Gray, the Commandant outlines his philosophy on warfighting. His philosophy is described on an authoritative basis, and is not only for the Marine Corps, but for all the military in our country.

In light of the Armed Services Committee Panel on Military Education, which I chaired, two sections of FMFM1 are particularly important and I set them forth herein so that the Members will have an idea of some of the subject matter involved with our year-long study of American professional military education:

PROFESSIONAL MILITARY EDUCATION

Professional military education is designed to develop creative, thinking leaders. A leader's career, from the initial stages of leadership training, should be viewed as a continuous, progressive process of development. At each stage of his career, he should be preparing for the subsequent stage.

Whether he is an officer or enlisted, the early stages of a leader's career are, in effect, his apprenticeship. While receiving a foundation in professional theory and concepts that will serve him throughout his career, the leader focuses on understanding the requirements and learning and applying the procedures and techniques associated with his field. This is when he learns his trade as an aviator, infantryman, artilleryman, or logistician. As he progresses, the leader should have mastered the requirements of his apprenticeship and should understand the interrelationship of the techniques and procedures within his field. His goal is to become an expert in the tactical level of war.

As an officer continues to develop, he should understand the interrelationship between his field and all the other fields within the Marine Corps. He should be an expert in tactics and techniques and should understand amphibious warfare and combined arms. He should be studying the operational level of war. At the senior levels he should be fully capable of articulating, applying, and integrating MAGTF warfighting capabilities in a joint and combined environment and should be an expert in the art of war at all levels.

The responsibility for implementing professional military education in the Marine Corps is three-tiered: it resides not only with the education establishment, but also with the commander and the individual.

The education establishment consists of those schools—administered by the Marine Corps, subordinate commands, or outside agencies—established to provide formal education in the art and science of war. In all officer education particularly, schools should focus on developing a talent for military judgment, not on imparting knowledge through rote learning. Study conducted by the education establishment can neither provide complete career training for an individual nor reach all individuals. Rather, it builds upon the base provided by commanders and by individual study.

All commanders should consider the professional development of their subordinates a principal responsibility of command. Commanders should foster a personal teacher-student relationship with their subordinates. Commanders are expected to conduct a continuing professional education program for their subordinates which includes developing military judgment and decision making and teaches general professional subjects and specific technical subjects pertinent to occupational specialties. Useful tools for general professional development include supervised reading programs, map exercises, war games, battle studies, and terrain studies. Commanders should see the development of their subordinates as a direct reflection on themselves.

Finally, every Marine has a basic responsibility to study the profession of arms on his own. A leader without either interest in or knowledge of the history and theory of warfare—the intellectual content of his profession—is a leader in appearance only. Self-study in the art and science of war is at least equal in importance—and should receive at least equal time—to maintaining physical condition. This is particularly true among officers; after all, an officer's principal weapon is his mind.

LEVELS OF WAR

War takes place simultaneously at several correlated levels, each with differing ends, means, characteristics, and requirements.

Activities at the strategic level focus directly on national policy objectives. Strategy applies to peace as well as war. Within strategy we distinguish between national strategy, which coordinates and focuses all the components of national power to attain the policy objective, and military strategy, which is the application of military force to secure the policy objective. Military strategy thus is subordinate to national strategy. Strategy can be thought of as the art of winning wars. Strategy establishes goals in theaters of war. It assigns forces, provides assets, and imposes conditions on the use of force. Strategy derived from national policy must be clearly understood to be the sole authoritative basis of all operations.

Activities at the tactical level of war focus on the application of combat power to defeat an enemy in combat at a particular time and place. Tactics can be thought of as the art and science of winning engagements and battles. It includes the use of firepower and maneuver, the integration of different arms, and the immediate exploitation of success to defeat the enemy. Included within the tactical level of war is the sustainment of forces during combat. The tactical level also includes the technical application of combat power, which consists of those techniques and procedures for accomplishing specific tasks within a tactical action. These techniques and procedures deal primarily with actions designed to enhance the effects of fires or reduce the effects of enemy fires—methods such as the call for fire, techniques of fire, the technical operation of weapons and equipment, or tactical movement techniques. There is a certain overlap between tactics and techniques. We make the point only to draw the distinction between tactics, which are the product of judgment and creativity, and techniques and procedures, which are generally performed by repetitive routine.

The operational level of war links the strategic and tactical levels. It is the use of tactical results to attain strategic objectives. The operational level includes deciding when, where, and under what conditions to engage the energy in battle—and when, where, and under what condition to refuse battle—with reference to higher aims. Actions at this level imply a broader dimension of time, and space than do tactics. As strategy deals with wars and tactics with battles and engagements, the operational level of war is the art of winning campaigns. Its means are tactical result, and its end is the military strategic objective.

AN UNINTENDED DUTY INCREASE ON PAINT AND COATINGS INGREDIENT SHOULD BE CORRECTED

HON. BILL ARCHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. ARCHER. Mr. Speaker, recently I introduced a miscellaneous tariff bill, H.R. 1872, on behalf of Rhone-Poulenc, Inc., which manufactures chemicals, high performance ceramics, and rare earths in over 40 facilities in the United States. The company began the manufacture of a new, high performance polyisocyanate resin at its Freeport, TX, facility in March 1988. This resin is used by the U.S. paint manufacturing industry to make polyurethane coatings of far greater durability than previously possible. The economic viability of this new facility is threatened by an unintended duty increase of more than 100 percent on a key raw material which must be imported, HDI-monomer. The duty increase should be corrected as soon as possible.

The unintended duty increase is a consequence of the replacement of the Tariff Schedules of the United States [TSUS] with the new Harmonized Tariff System [HTS], which became effective January 1, 1989. The duty increased from the rate of 7.9 percent ad valorem to 16.2 percent ad valorem plus 2.9 cents per kilogram. This change is not based on any change or variance in chemical composition or any congressional decision to increase HDI-monomer tariffs. Indeed, the tariff protects no domestic producer. Apart from the HDI manufactured and consumed in the resin production of Rhone-Poulenc's competitor, no HDI is produced domestically. The tariff increase is solely a result of the technical process chosen for converting from the TSUS to the HTS.

In the conversion process, items classified under TSUS categories were reclassified to subheadings provided for in the HTS. For example, the chemicals with which HDI-monomer was grouped, under TSUS item 425.52.90 were reclassified into approximately 50 separate HTS subheadings, each with its own tariff rate. The tariffs for these HTS subheadings were often established by reference to the TSUS tariff for the commodity representing the preponderance of trade in the new grouping. In his request to the International Trade Commission to undertake the necessary reclassification from the TSUS to the HTS, President Reagan directed that the conversion avoid changes in duties on individual articles. In the case of HDI-monomer, however, a huge duty increase occurred. If a temporary reduction of the duty, to its pre-January 1, 1989, level, is not adopted, the conversion from the TSUS to the HTS will cause Rhone-Poulenc to pay increased duties on imported HDI-monomer of about $1.12 million a year.

The Freeport facility's continued operation is important to the plant's customers. The sophistication and complexity of the paint and coatings many Rhone-Poulenc customers manufacture requires that Rhone-Poulenc's resin product have very specific characteristics. Rhone-Poulenc's customers have tested these resins for 3–5 years to establish the acceptability of the Rhone-Poulenc resins now being produced at Freeport. In some cases, Rhone-Poulenc's customers' contracts with their own customers require the use of Rhone-Poulenc's polyisocyanate resins.

Rhone-Poulenc is seriously considering building a new U.S. plant for production of HDI-monomer, both to end its dependence on imports and to be able to expand its resin production at the Freeport, TX, plant. However, planning and construction will take several years. A few European producers are now manufacturing polyisocyanate resins and Japanese producers have built pilot projects. Temporary reduction of the increased duties and, thereafter, a temporary suspension of the duty to correct the unintended tariff burden on Rhone-Poulenc's U.S. resin producing facility, will allow the company to establish a solid position for U.S. production in an important and expanding domestic and international market.

AN AGENDA FOR KEEPING AMERICA'S FAMILIES TOGETHER

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. PEPPER. Mr. Speaker, several weeks ago, I submitted for my colleagues' attention my legislative agenda for keeping America's families together. Unfortunately, portions of my agenda were inadvertently omitted. I would like to present at this time my agenda in its entirety.

Mr. Speaker, as Chairman of the House Select Committee on Aging's Subcommittee on Health and Long-Term Care, I join with all those who have been involved in advocating meaningful changes to improve conditions for the people of our Nation. I want to commend Members of the 100th Congress for their foresight to enact a number of important bills that will be of great assistance to older persons and their families. One of the most significant was the creation of the U.S. Bipartisan Commission on Comprehensive Health Care which was an amendment to the Catastrophic Health Care Act passed by this Congress and signed into law by the President. This Commission, legislation for which I had the pleasure to author, will submit to the Congress, within 1 year, two immensely important reports. The first will detail how the Congress might finance and administer a program of long-term care for all Americans and the second will detail how we might finance and administer a program of comprehensive health care for all Americans. This Commission will

for the first time in the history of the United States attempt to come to agreement on how every man, woman, and child in America can have the benefit of appropriate health care, regardless of income or ability to pay.

There have been many other important accomplishments on behalf of the elderly and their families in the 100th Congress. We created the 13th Institute of Health—the National Institute on Deafness and Communications Disorders. This new Institute will hopefully bring about new knowledge and cures for over 30 million Americans, half of whom are elderly, who have been robbed of the ability to hear and speak correctly.

Also enacted last year was legislation establishing the National Biotechnology Information Center within the National Library of Medicine. This Center marks an important step toward improving the quality of lives for all Americans. Biotechnology, the branch of science focusing on DNA and the molecules which control the life processes, is one of the most promising areas of medical research . If we can understand. genetics, we will begin to understand why disease occurs in certain individuals. We will then be on our way to solving the puzzles of Alzheimer's disease, arthritis, cancer, AIDS, and other ailments for which the cure has so far eluded us. This new Center, which will speed the dissemination of crucial information to researchers worldwide, will vastly improve the health status of all Americans in the future.

Tragically, despite these accomplishments, this last Congress did not see fit to enact a program of long-term health care nor a program of comprehensive health care for all Americans. The Congress has not yet adopted procedures for protecting those living under abusive guardianships, nor do we allow older Americans to continue working beyond the age of 65 without penalty of Social Security reduction or taxation.

Today, I am pleased to offer for consideration of my colleagues in the House an "Agenda for Keeping America's Families Together." This legislative agenda will meet the pressing needs of America's aging and changing families for better health care, housing, personal security against criminal victimization, employment, and retirement income.

We are far from the point where we can say that the job is done, but we will not cease our efforts. In this Congress, we will continue our fight for the rights of America's families. Their needs are many:

HEALTH

First, there is nothing more critical to the well-being of an individual than his or her own health. Our health care system in America is failing. It is failing the 37 million Americans who have no health insurance. It is failing 1 million Americans of all ages who go bankrupt annually paying the costs of catastrophic long-term illnesses. It is failing the thousands who die annually unable to pay for a life-giving transplant. It is failing American business by cutting their competitive edge due to our inability to control costs and double digit health care inflation. It is failing thousands of technology-dependent children who are forced to live out their last days in costly and uncaring hospitals because of our health system's bias against home care. Health is the fastest growing industry in America accounting for about 12 percent of the gross national product, yet it is failing to provide Americans with fundamental health care protection. Instead, it is becoming simply a privilege few can afford.

We must enact legislation recognizing that it is one's birthright to obtain the best health that modern science can provide. We can't afford not to. During the 100th Congress, while the catastrophic illness bill was under debate, Congressman HENRY WAXMAN offered my bill to create a bipartisan Commission on Comprehensive Health Care as an amendment to the catastrophic illness bill. This Commission is now required by statute to present Congress with recommendations on how to finance and how to administer a program of long-term care for all Americans and how to finance and how to administer a program of comprehensive health care for all Americans by November 9 of this year. This historic mandate is unprecedented in the history of the United States. Hopefully, the Commission will lay before the Congress a legislative package upon which it can act to provide comprehensive health care to all Americans.

Pending the Commission's recommendations, the current institutional bias of Federal policy must be changed, so that thousands of chronically ill Americans are not deprived of home health care by present provisions emphasizing more expensive nursing home care. Last year, the Congress approved the Catastrophic Health Care Act and in doing so sought to improve burdensome costs associated with acute catastrophic illnesses. Eighty percent of catastrophic health care expenses, however, are for long-term chronic illnesses. To meet these costs, many families are forced into bankruptcy or poverty—1 million each year. Neither Medicare, nor Medicaid provide significant assistance in these cases. Private insurance policies are similarly limited. Yet, the burden is enormous:

Over 10 million children are said to have chronic health conditions;

More than half a million accident victims are left permanently disabled each year;

Over 20 million Americans have chronic heart conditions;

Ten million Americans have chronic lung conditions;

One of every three seniors will have a chronic health problem that requires long-term care by the age of 85;

Others have chronic conditions as diverse as cerebral palsy, Lou Gehrig's disease, Huntington's disease, mental illness, cancer, arthritis, strokes, and Alzheimer's disease.

Congress should enact H.R. 2263, legislation I have introduced that would meet the enormous challenge of providing long-term care to chronically ill Americans. Such legislation should protect Americans of all ages, regardless of income, who have been certified to be unable to perform two or more normal activities of daily living—eating, bathing, dressing, transferring, or toileting—without assistance. Services delivered should be closely monitored and managed to assure efficiency and effectiveness. Costs should be tightly controlled and should not exceed the cost of providing similar services in a hospital or nursing home. It should be self-financed and progressive. Public opinion surveys indicate enormous support for eliminating the cap—$48,000 in 1989—on income subject to the Medicare payroll tax of 1.45 percent which would generate income sufficient to pay for the program in its entirety. This change affects only those 5 percent of workers who earn more than $48,000 in individual income—not family income.

Every public opinion survey indicates overwhelming support for long-term care protection. A recent Lou Harris poll, for example, found that 8 of every 10 Americans favor the Federal Government providing a program of long-term home care for all ages. And, three-quarters of all Americans were in favor of paying for this new program by eliminating the $48,000 cap on income subject to the 1.45 Medicare payroll tax. Interestingly, the poll found that three-quarters of those who would actually pay the tax—those making over $48,000—were willing to do so for a program of long-term care.

Lastly, while we were successful in enacting legislation I sponsored last Congress establishing a National Center on Biotechnology Information, much remains to be done in this vast and exciting field of research.

The Congress should give funding priority to efforts underway at the National Institutes of Health to map the human genome. In understanding the makeup of the human gene, we will begin to understand why disease occurs in certain individuals. We will then be on our way to solving the puzzles of Alzheimer's disease, arthritis, cancer, AIDS and other ailments for which the cure has so far eluded us. I am confident, and prominent scientists have echoed this view, that we will see continued progress in the area of natural interventions. Through biotechnology, we will hopefully unlock the mysteries of disease and so improve the health status of every American in the future.

RETIREMENT INCOME AND EMPLOYMENT

Mr. Speaker, with the following words, President Franklin Delano Roosevelt began the greatest and most successful public program in our Nation's history, Social Security:

I am looking for a sound means which I can recommend to provide at once security against several of the great disturbing factors in life—especially those which relate to unemployment and old age * * *.

No single function of government affects as many Americans as profoundly as the Nation's social insurance system: Social Security. America's aged receive a monthly retirement check, and more than 4 million disabled workers and their spouses and children receive disability insurance benefits every month. Altogether, more than 38 million beneficiaries receive a check every month, and over 120 million workers contribute through the payroll tax to Social Security.

Between its inception in 1935 and now, Social Security has transformed the economic well-being of virtually every man, woman, and child in America. The dramatic reduction in the incidence of poverty among the aged, for example, can be attributed almost completely to Social Security. Without Social Security, in fact, the poverty rate among the elderly would nearly quadruple—jumping from 12.4 percent to 47.6 percent in 1984. Social Security is the

primary source of income to more than half of those aged 65 and over, and it is the sole source of income for one out of every four older Americans.

Many Americans think of Social Security as a pension program for older Americans. Social Security is far more important. It is more broad based and comprehensive than any pension program. Our Nation's 120 million contributing workers are building vital protection for themselves and their families. Social Security plays a key role in keeping America's families together. It is important for current workers not only because of the retirement, life, and disability protection it provides when needed, but also because it relieves them of the financial burden of caring for parents or disabled family members giving independence and dignity to each generation.

Currently about 140 million people of all ages are insured in the event of death or disability, and 95 out of 100 children have inflation-proof survivor protection. In sum, Social Security is not an old age program—it is a program for the ages and for all ages.

While the 1983 Bipartisan Commission on Social Security, of which I was privileged to be a member, developed legislation assuring a strong, solvent, and sound Social Security system well into the next century, there are improvements to Social Security that deserve the immediate attention of the Congress in its continuing effort to make Social Security even sounder and stronger than it is now.

First, the Congress should enact H.R. 2247, a bill I introduced which among other things would make Social Security an independent agency in 1989. When first created it was an independent agency. And, as a member of the 1983 Social Security Commission, I and other Commission members recommended that it be made an independent agency once again.

In addition to independent status, we must also give the Social Security Administration sufficient staff to operate the program effectively. For the past 8 years there has been a continuous attack on Social Security staff. Staff has been cut by nearly 15,000 or 20 percent. These dramatic cuts make it more difficult for many to get benefits—especially disability benefits—to which they are rightfully entitled and serve to undermine public confidence in the program. As a first step we should at least stop any more cuts to Social Security staff and eventually we should restore all cuts.

Second, beginning in 1984, up to one-half of Social Security benefits became subject to taxation for beneficiaries whose incomes exceeded certain base amounts—$25,000 for single taxapayers, $32,000 for married taxpayers filing jointly. The taxation of benefits, an unfortunate compromise of the Social Security Bipartisan Commission, is simply a cut in benefits and should not have been adopted. H.R. 2247, which would eliminate the taxation of these benefits, should be enacted at the earliest possible time.

Third, in order for a Social Security beneficiary to qualify for his or her entire benefit at time of eligibility they are prohibited from earning more than $6,480 from age 62 through 64, or more than $8,880 from age 65 though 70. For every $2 above those amounts that a person earns their benefit is reduced by $1. This is called the earnings test. My bill, H.R. 2247 would eliminate the earnings test. We should not continue to penalize older workers who wish to continue working and contributing directly to their own benefit. As a society, we should be encouraging, not discouraging, productivity among people regardless of age.

Lastly, we should act to raise the Social Security death or funeral benefit to a level sufficient to reflect the actual cost of a low-cost funeral and tie future increases in the benefit to the rate of inflation. The Social Security death benefit, only $255, has not been increased since the inception of the program and falls far short of assisting surviving spouses for whom a funeral is oftentimes a brankrupting experience. Again, my bill—H.R. 2247—would provide for an adequate death benefit.

Aside from assuring older Americans and their families appropriate protection from earnings lost due to retirement, disability, or death, it is imperative that the Congress take necessary action to protect American workers against discrimination on the basis of age in the work force. In 1978, the Congress took action to prohibit age discrimination in employment in the public sector. Again, in 1986, the Congress extended the same protections to those in the private sector. Now, however, it is important for the Congress to take the final step and eliminate age discrimination in employment altogether by banning the mandatory retirement of certain occupations which remain outside the protection of the Age Discrimination in Employment Act. They include several groups of Federal employees, including foreign service officers, Central Intelligence personnel, and air traffic controllers. Also excluded are elected State and local officials and those for whom age is a bona fide occupational reasonably necessary to normal operations of a particular business, that is, airline pilots.

Evidence from many sources points to the need to act swiftly to eradicate the remaining vestiges of age bias in the workplace. Just as race and sex are no indicators of competence or employability, so should age never be used as a determinant of one's worth.

HOUSING AND BOARD AND CARE HOMES

Over the past 8 years, the Federal role in housing has been reduced significantly with cuts in outlays approaching 75 percent. The need for affordable and adequate housing options for low-income older Americans promises to increase dramatically over the next 20 years. The Congress must act to reverse the current reduction in new construction of federally assisted housing.

In addition, while many older Americans—about 70 percent—own their own homes, the majority of these homes are 50 years old or older and badly in need of repair. Living on fixed incomes, most seniors are ill-equipped financially to maintain repairs on their homes and often are required to prematurely seek institutionalization or housing in a less costly environment. We should consider enacting legislation which would assist elderly and their families preserve dignity and independence in the later years of life by providing tax credits for home improvements necessary to maintain a safe living environment.

One of the most troublesome aspects of our housing and health care system today involves board and care homes in America. My Subcommittee on Health and Long-Term Care recently completed its 10-year investigation into the adequacy of such housing in our country today. They found that most of the 1 million elderly, disabled, and mentally ill persons who reside in board and care homes are being warehoused in understaffed, unregulated, shoddy, and unsafe facilities. Although the abuse is so broad and systemic as to be evident in every State of the Union, neither the State governments nor the Federal Government, which spend an estimated $7 billion annually on these facilities, have evidenced any concern for their residents' safety and welfare, leaving this vulnerable population largely unprotected and exploited.

To validate our findings we conducted unannounced visits in 1988 and 1989 to both licensed and unlicensed board and care homes. In all, we interviewed over 2,500 residents in 46 homes in 10 States. We witnessed an incident of fraud, waste, or abuse in literally every State we visited.

Unfortunately, there is little incentive for States to take corrective action to curb these abuses which they acknowledge are increasing in number and are unlikely to abate. Over the last two decades, the States have been under tremendous pressure to shift thousands of mental patients, and elderly and the handicapped, out of State mental hospitals and into board and care homes, where the cost of their care can be shifted from the State to the Federal Supplemental Security Income [SSI] Program. Our figures show that States have reduced their mental patients from 500,000 in 1969 to only 100,000 in 1987. Meanwhile, the cost to maintain an individual in a mental institution increased substantially—from $5,626 in 1969 to $41,131 in 1987.

The General Accounting Office confirmed our subcommittee's findings and further found that the States are not enforcing the Keys amendment which was enacted by the Congress in 1972 to protect residents of board and care homes. Thus, the only legal remedy available to board and care residents is simply ineffective.

The Federal Government should adopt H.R. 2219, legislation I have introduced which would provide for the adoption of standards to provide for the adequate protection and care of board and care residents in the same manner that we require standards of care be met in our Nation's nursing homes. Overall, State oversight of board and care homes is atrocious. Ten States have no standards at all. We must establish and enforce national minimum standards of care and protection—including a bill of rights for residents—for all homes providing care to two or more unrelated elderly or disabled individuals receiving SSI. Once properly licensed, then we should allow residents to retain their eligibility for receipt of benefits they would have received in their homes such as food stamps, public assistance, and energy assistance. We should increase the minimum SSI payment for residents of licensed board and care homes. Seventy percent of all residents pay rent with the entirety of their SSI checks, the national mini-

mum of which is $360 a month. Last, States need to make a determined effort to track and close down, if necessary, unlicensed and illegal board and care homes.

CRIME AND VICTIMIZATION

Mr. Speaker, you may be aware that the Subcommittee on Health and Long-Term Care, which I chair, has over the past decade investigated a wide variety of frauds against Americans of all ages.

These fraudulent schemes assume a wide variety of forms, including travel scams, bogus medical remedies and other types of health fraud, investment schemes, land fraud, and the sale of worthless yet costly insurance. Each and every one of us has had countless numbers of constituents who have been duped by the perpetrators of these activities.

There can be no doubt that fraud is currently a profitable business. Hearings conducted by our subcommittee revealed that our citizens were being defrauded out of $10 billion per year through phony medical cures and procedures alone. Taken together, the cost of all types of consumer fraud is astronomical.

The time has come to take action. The existing mail and wire fraud statutes have two serious shortcomings which hamper their effectiveness in protecting consumers. First, under current law, the perpetrator of a fraud, no matter how large or serious in scope, is often allowed to keep the profits and proceeds from his or her illegal scheme after serving a brief sentence and paying a negligible fine. Second, the law does not contain any effective provisions to assure that the victims of fraud are compensated for their losses.

Consumer protection would be greatly enhanced by correcting these two deficiencies through H.R. 2090, legislation I have introduced called the Fraud Victims Restitution Act. It would make the practice of fraud much less attractive by providing for both civil and criminal forfeiture for mail and wire fraud—allowing the Government to deprive violators of their illicit profits before they have an opportunity to dispense with or hide them. This mechanism, which contains proper safeguards to protect the property rights of innocent third parties—including creditors—has proven effective in combatting drug trafficking and the peddling of child pornography. Administrative costs would be minimal and would be borne out of the funds seized.

More importantly, the Fraud Victims Restitution Act would require that the profits and proceeds seized from the fraudulent schemers be returned to the rightful owners, the victims. Often now, the victims of consumer frauds never see their money again. For some victims, that means that home or life savings are gone forever.

The Fraud Victims Restitution Act, developed through close consultation with national consumer and law enforcement experts, would be a dramatic step forward in consumer protection, stopping the alarming increase in number of these fraudulent schemes and reducing the number of victims.

Another area of concern noted by our subcommittee involves the increasing incidence of physical, financial, and emotional abuse perpetrated against the elderly at the hands of their loved ones or those entrusted with their care. Truly, abuse of the elderly is a national disgrace.

It is sad enough that each year around 4 percent, or over 1.1 million elderly Americans may be the victims of abuse. It is sadder still that despite State efforts to strengthen legislation to protect their elderly, only an average of $2.90 per elderly person is spent for elderly protective services. The Federal Government, faced with the clear need to do more, has not only refused to enact needed reforms, but also has cut the primary funding source for protective services by nearly a fifth since 1981.

Elder abuse, like spousal abuse or child abuse, will simply not go away. Swift and determined action must be taken to deal with this national problem and help families stay together. The Federal Government should assist the States in their efforts to deal with the pervasive problem of elder abuse. This need not involve tremendous new expenditure of Federal funds. For example, the Child Abuse Program, after which pending legislative elder abuse proposals have been based, had a very salutary effect in encouraging the States to deal with child abuse as an expenditure in 1974, when the program first started. Therefore, the Congress should enact legislation to identify and protect the victims of elder abuse in the same manner as we encourage the States to provide identification and protection for the victims of child abuse.

Lastly, our subcommittee has uncovered widespread abuse and neglect in our Nation's guardianship system. We found our current system for protecting the incompetent to be nothing short of a national disgrace.

Guardianship is a unique and powerful abrogation of a person's rights. Once under guardianship an individual can no longer receive money or pay bills, marry or divorce, choose where to live or what medical care to receive. In short, guardianship is one of the most punitive penalties our legal system can impose. Today there are more than 500,000 Americans of all ages under guardianship. A complete accounting of court records could bring this figure much higher.

While guardianship was designed to protect the individuals whose competency is temporarily or permanently called into question, the subcommittee found that it has become a process that is often used to take advantage of them. We found that there is a marked lack of due process in most States in the procedure by which a guardian is appointed—there is no minimum requirement of education or intelligence in any of the 50 States or the District of Columbia. There is no followup check to monitor the progress of the guardianship arrangement. Although laws in 44 States require guardians to file regular accountings of a ward's money, they were missing or imcomplete in 48 percent of guardianship files examined in a recent Associated Press survey. Only 14 States require the alleged incompetent individual to be informed as to their legal rights—right to counsel, right to present evidence—or rights they stand to lose if placed under a guardianship. Eight States have no requirement that the alleged even be notified that someone is petitioning to have them placed under guardianship and many others allow waiver of such requirement. This is clearly a violation of basic due process under the law. Fifteen States do not even specify that the alleged incompetent has a right to counsel at the guardianship hearing. Only 16 States require that the alleged incompetent be present at his or her own guardianship hearing. A recent study revealed that in 84 percent of cases, neither the accused elderly or a legal representative was present at the guardianship hearing. Thirty-three States allow advanced age as a cause for determining an elderly person's competence and whether he or she should be placed under guardianship. Only 12 States require that medical evidence be submitted in order to find a person incompetent. Unfortunately, for an individual who was wrongfully found incompetent and wishes to appeal the finding, or an individual who was only temporarily unable to manage his or her affairs, to have contol over their own lives restored is often difficult if not impossible.

We must enact H.R. 1702, National Guardianship Rights Act. This bill would require that all Americans facing the imposition of a guardianship receive adequate notice of impending guardianship proceedings; be represented by trained attorneys and to have counsel provided if they cannot afford one; be afforded an examination by an independent professional team before any guardianship may be imposed; have a right to a jury trial; and, right to prompt appeal of the decision or choice of guardian.

In addition, H.R. 1702 requires that all guardians be of competent character; receive thorough training; provide at least annual reports on the financial and physical well-being of the incapacitated person; and be subject to annual review and automatic removal by the courts.

State and local guardianship systems have become sleeping watchdogs of personal liberty. The National Guardianship Rights Act assures that our courts will be ever vigilant in preserving the rights and protections afforded all Americans by our Constitution.

MEETING INTERGENERATIONAL NEEDS

Mr. Speaker, the Congress passed the Older Americans Act in 1965. The Older Americans Act has won widespread bipartisan praise for providing our senior citizens with critically needed nutritional and social and other support services and acting as a mechanism for better coordinating services generally available to older persons. I am particularly proud of the Older Americans Act Nutrition Program which I had the privilege to author and the impact it has had on improving the health status of older Americans and breaking down the walls of isolation confronting Americans in the later years of life. This program has made a very meaningful contribution to the betterment of every community in America.

The success of the Older Americans Act should set us on the path for establishing something that is long overdue in this great America, a national policy for the young people of our country. We have reached a crisis with the youth of our Nation. The following statistics give a general indication of the staggering problems which need to be faced:

Thirteen million children, one in five, live in poverty.

Nine million American children live in unsafe housing. Over 100,000 are homeless.

More than one in four teenagers entering high school will not graduate.

More than 1 million American children run away from home each year.

Child abuse has increased dramatically in the past 5 years; and suicide rates for children continue to rise faster than any other age group.

These statistics, which express so clearly the plight of American's youth, are jarring and demand our immediate attention. The Young Americans Act of 1989, H.R. 1492, which I recently introduced has been patterned after the largely successful older Americans program I just described. It has been carefully designed and refined by the leading child welfare advocates in the Nation as a cost-effective way of addressing these problems in a coordinated national fashion. In addition to providing grants to the States and localities, the act establishes permanently in the law a single Federal agency responsibility for overseeing programs for the children, youth, and families of our Nation. It establishes within the Department of Health and Human Services the Administration for Children, Youth, and Families. The act also provides for a White House Conference on Young Americans to be held in 1990. This Conference would have the purpose of bringing together the national, State, and local leaders and experts to develop a comprehensive coherent national policy on children, youth, and families in America.

I am pleased to point out that my good friend and long-recognized champion of the right of young Americans, the Honorable DALE KILDEE, chairman of the Subcommittee on Human Resources of the Education and Labor Committee, has agreed to promptly hold hearings on the Young Americans Act this session of the Congress.

Mr. Speaker, I was shocked to learn that almost one-quarter of our young Americans never finish high school. I believe it should be the policy of the United States that all Americans should complete a high school education. What greater legacy can we leave our children, what better investment can we make in their future than the guarantee of the opportunities that an education can bring.

You may wonder why am I—now 88 years old and just entering my middle age—disturbed about dropouts. Aristotle's view suggests an answer. "Education," he remarked, "is the best provision for old age."

But the facts about dropouts are disturbing enough on their own: We are producing about 1 million new dropouts each school year. The individual dropout is not the only one to lose. Society incurs costs when education is cut short: We bear the burden in wasted opportunities and weakened economic growth, in additional crime, in welfare dependency, and in the perpetuation of inequality. It is estimated that dropouts cost us another 5 percent of lost income, or $11.5 billion, in additional welfare payments.

Some will argue we cannot afford to mount a large-scale, national effort. I say we cannot afford not to. Dropouts add to the deficit. A recent study estimates that new dropouts from 1 year's class, over their lifetime, will cost us $68 billion in lost tax revenues.

We owe it to our children, and to ourselves, to act now and to act decisively. I have introduced H.R. 670, the School Completion and Incentives Act, a bill to set a national goal to improve our high school completion rate by the year 2000. The measure calls on the States to submit plans and provides States with the incentives and resources to meet their goals. H.R. 670 safeguards that funds will be used in the schools that most need assistance and insures that graduation requirements will not be lowered.

This is a propitious time to act. President Bush plans to make his administration the education Presidency. Dr. Lauro Cavazos, who is the Secretary of Education, has indicated that the dropout problem is one of his priorities. It would be a shame not to accept the challenge.

CONCLUSIONS: A TIME TO ACT

The lack of health care, the need to assure adequate incomes, affordable and safe housing, the desire to safeguard young and old from abuse and criminal victimization, and the pressing demands of changing and aging families should move us as a nation to move.

It is time that we, a nation still steeped in prosperity, develop policies and enact reforms to assist our most treasured unit, the family. It is time we stop institutionalizing our chronically ill and time we developed alternative types of care such as home health care, day care, and the like. It is time we stop warehousing our mentally ill in unlicensed and uncaring board and care homes and improve the quality of care that such homes can provide. It is time we guarantee each child born in America the education he or she needs in order to pursue the happiness envisioned by our great Constitution.

It is time we place into action our agenda for keeping America's families together—before the 20th century runs out.

THE INTRODUCTION OF THE CORRECTIONAL ALTERNATIVES ACT OF 1989

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. RANGEL. Mr. Speaker, today, I will be introducing the Correctional Alternatives Act of 1989. This legislation provides for the establishment of a Federal discretionary grant program to assist State efforts to institute new and innovative alternatives to imprisonment.

American prisons today are not doing the job of rehabilitating prisoners or deterring future crime. We are in effect warehousing prisoners at incredible costs and when they come out they simply are better criminals. At an average cost of $50 a day per inmate we are spending over $30 million a day on a system that is not working and has failed us miserably. We need to explore a new approach.

In the President's crime address yesterday, he concentrated on prisons and incarcerating criminals. Punishment and preventing recidivism are seen as the answer to the problem of the prison population sitting around doing nothing except making license plates. The real answer to avoid continuing incarceration and recidivism is through programs that begin to train inmates to be productive citizens.

Even if we build more prisons as the President proposes, why should we not require that when inmates are released they return to society as bricklayers, electricians, painters, carpenters, and skilled in other trades. This is what we are proposing today.

The Correctional Alternatives Act of 1989 is directed toward the many nonviolent offenders who are incarcerated and would be eligible for a wide range of alternatives including boot camps, house arrests, drug treatment, and vocational education, among others. Since it is the States and localities where most of the prison overcrowding is occurring in the United States, our bill provides support to the States for these programs.

A unique aspect of this bill is a private sector/State partnership to provide vocational and job training programs to offenders. We need to teach working skills to inmates while in prison not only for their benefit but for the benefit of our society. Our approach should be if you do a crime you are going to do time, but you are also going to come out with a skill to become a productive citizen. Our legislation encourages the private sector to join with State correctional agencies in creating these programs and I will be exploring additional legislation to enhance tax incentives to private businesses that engage in these job training and job placement activities.

If our prisons remain as warehouses then all we are buying with more and bigger prisons is a bit of time and a false sense of security. Whether in prison or through the types of alternatives proposed in this bill in addition to punishment we must provide the opportunities for offenders to change their behavior.

Specifically, the legislation does the following:

Authorizes the Bureau of Justice Assistance to award grants to States for the purpose of funding new and innovative alternatives to incarceration in order to reduce prison overcrowding.

Provides $200 million for this program for each of fiscal years 1990, 1991, 1992, and 1993.

Requires that 20 percent of the total funding available be used to fund joint State/private vocational education and job training programs. It also requires a 30 percent State/private sector—no less than 15 percent from the private sector—match for these joint State/private efforts.

Joining with me as cosponsors are my colleagues Mr. COUGHLIN, Mr. GUARINI, Mr. GILMAN, Mr. ORTIZ, Mr. TOWNS, Mrs. COLLINS, Mr. SCHEUER, Mr. BRENNAN, AND Mr. FAUNTROY.

[Text of the bill follows:]

H.R. —

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Correctional Alternatives Act of 1989".

SEC. 2. FINDINGS AND PURPOSE.

(a) FINDINGS.—The Congress finds the following:

(1) From the mid-1970's to the mid-1980's, the number of adults incarcerated in the United States rose dramatically.

(2) By 1987, over half a million adults were incarcerated in the United States.

(3) At the current rate of increase, it is estimated that in less than a decade more than a million adults will be incarcerated in the United States.

(4) In State prisons alone, 216 adults are incarcerated for every 100,000 people in the general population. As of mid-1987, over 522,866 adults were under supervision in State prisons.

(5) The cost of incarceration varies from State to State. Estimates range from as low as $43 per day to as high as $113 per day. Typically, annual operating costs are higher than the official budgets.

(6) It has been estimated that prison costs have risen 1,720 percent, adjusting for inflation (about 180 percent), since 1970.

(7) Using alternatives to incarceration for nonviolent offenders may alleviate overcrowding and reduce the per capita expenditures.

(8) Federal support is needed to assist States to implement innovative alternatives to incarceration in order to meet the crisis of prison overcrowding and the escalating costs of incarceration.

(b) PURPOSE.—It is the purpose of the amendments made by this Act to provide financial assistance to States—

(1) to carry out projects that demonstrate innovative alternatives to incarcerating individuals convicted of nonviolent offenses,

(2) to encourage States to maximize the capacity of their correctional facilities to confine individuals convicted of violent offenses, and

(3) to stimulate private sector participation in providing vocational education projects and job training projects, as alternatives to incarcerating individuals convicted of nonviolent offenses.

SEC. 3. DEMONSTRATION GRANTS.

(a) ESTABLISHMENT OF PROGRAM.—Title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3711 et seq.) is amended—

(1) in section 901—

(A) in paragraph (20) by striking "and" at the end,

(B) in paragraph (21) by striking the period at the end and inserting a semicolon, and

(C) by adding at the end the following:

"(22) 'boot camp prison' means a correctional facility in which inmates are required to participate in a highly regimented program that provides the strict discipline, physical training, hard labor, drill, and ceremony characteristic of military basic training; and

"(23) 'house arrest' means post-conviction confinement in the residence of the convicted individual under the terms of a sentence that allows such individual to leave such residence only under the circumstances authorized by the sentencing authority.",

(2) by striking the heading for part N and inserting the following:

"PART O—TRANSITION",

(3) by redesignating section 1401 as section 1501, and

(4) by inserting after part M the following:

"PART N—GRANTS FOR PROJECTS DEMONSTRATING ALTERNATIVES TO INCARCERATION

"DESCRIPTION OF DEMONSTRATION GRANT PROGRAMS

SEC. 1401. (a) Of the total amount appropriated for this part in any fiscal year, 80 percent shall be reserved and set aside in a special discretionary fund for use by the Director to make grants under this subsection. The Director is authorized to make grants to States to carry out projects that demonstrate innovative alternatives to incarcerating individuals who are convicted of nonviolent offenses. Such alternatives may include house arrest, boot camp prisons, drug treatment projects, vocational education projects, and job training projects.

"(b) Of the total amount appropriated for this part in any fiscal year, 20 percent shall be set aside in a special discretionary fund for use by the Director to make grants under this subsection. The Director is authorized to make grants to States to carry out jointly with private entities vocational education projects, and job training projects, that are innovative alternatives to incarcerating individuals who are convicted of nonviolent offenses. A grant made under this subsection may not be expended for more than 70 percent of the cost of the project for which such grant is made. Not less than 15 percent of the cost of such project shall be paid with contributions made in case or in kind by private entities.

"APPLICATIONS TO RECEIVE GRANTS

"SEC. 1402. To request a grant under subsection (a) or (b) of section 1401, the chief executive officer of a State shall submit to the Director an application at such time and in such form as the Director may require. Such application shall include—

"(1) a description of the project the State proposes to carry out to demonstrate an innovative alternative, with respect to the State, to incarcerating individuals who are convicted of nonviolent offenses;

"(2) a certification that Federal funds made available under section 1401 to the State will not be used to supplant State or local funds that would, in the absence of Federal funds, be made available to carry out such project;

"(3) a description of the method the State will use to carry out the evaluation required by paragraph (4), and

"(4) an assurance that after each fiscal year for which a grant is made under section 1401, the State shall submit to the Director an evaluation of the impact and the effectiveness of the project for which such grant is made.

"REVIEW OF APPLICATIONS

"SEC. 1403. For purposes of determining whether to make a grant under section 1401 to a State, the Director shall—

"(1) except as provided in paragraph (2), give priority to States that clearly demonstrate that the capacity of their correctional facilities is inadequate to accommodate the number of individuals who are convicted of offenses punishable by a term of imprisonment exceeding 1 year; and

"(2) not approve an application submitted by a State if—

"(A) the amount of the grant requested by the State for the fiscal year involved exceeds 5 percent of the aggregate amount appropriated for such fiscal year to carry out this part; or

"(B) in any 3 preceding fiscal years the State received a grant under this part for the project for which a grant is requested in such application.".

(b) AUTHORIZATION OF APPROPRIATIONS.—Section 1001(a) of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3793(a)) is amended—

(1) in paragraph (3) by striking "and M" and inserting "M, and N", and

(2) by inserting after paragraph (6) the following:

"(7) There are authorized to be appropriated $200,000,000 for fiscal year 1990 and such sums as may be necessary for each of the fiscal years 1991, 1992, and 1993, to carry out part N of this title.".

(c) TECHNICAL AMENDMENT.—The table of contents of title I of the Omnibus Crime Control and Safe Streets Act of 1968 is amended by striking the items relating to part N and inserting the following:

PART N—GRANTS FOR PROJECTS DEMONSTRATING ALTERNATIVES TO INCARCERATION

"Sec. 1401. Description of demonstration grant programs.
"Sec. 1402. Applications to receive grants.
"Sec. 1403. Review of applications.

"PART O—TRANSITION

"Sec. 1501. Continuation of rules, authorities, and proceedings.".

THE CIVIC ACHIEVEMENT AWARD PROGRAM REAUTHORIZATION

HON. MARTIN FROST

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. FROST. Mr. Speaker, it is with great pleasure that I am introducing legislation to reauthorize the Civic Achievement Award Program. Open to students in grades five through eight, the program is a supplementary citizenship education program aimed at improving civic literacy in elementary schools across the Nation.

The program was created in honor of the highest constitutional officer in the legislative branch of the Federal Government, the Speaker of the House of Representatives.

The program is divided into three components: First, the learning project which provides students with a common body of knowledge relating to American government and history; second, the research project which requires students to gather and process information using libraries and other sources; and third, the civic project which requires students to research a current issue and identify, assess, and publicly address various approaches to solving the issue. Upon successful completion of the program, students receive the Civic Achievement Award.

The Close-Up Foundation developed the program and administers it with the assistance of the Library of Congress and the National Association of Elementary School Principals. The Civil Achievement Award Program was piloted in the spring of 1988 in 150 classrooms throughout the country. In the 1988–89 field test year, approximately 23,000 students were participants in the program.

The legislation reauthorizes the program for 1990 at $1,003,785, and for 1991 at $1,164,691. At these authorization levels, Close-Up expects to reach 60,000 children in 1990, and 90,000 children in 1991 through the

program's activities. I commend the Civic Achievement Program and am pleased to be a part of its formal launch.

MSGR. GEORGE WILLIAM ROHLING: 50 YEARS IN THE PRIESTHOOD

HON. BOB CLEMENT

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. CLEMENT. Mr. Speaker, I would like to join the many friends and colleagues of Msgr. George William Rohling in commemorating this Thursday, May 18, as the 50th anniversary of his ordination into the priesthood.

Monsignor Rohling was ordained a Catholic Priest in 1939 by Bishop William Adrian in his hometown of Lawrenceburg, TN. His ordination was the culmination of many years of instruction, beginning with Father Ryan High School and continuing at St. Bernard College in Cullman, AL, St. Gregory College for philosophy in Cincinnati, and at St. Mary's of the West.

And we are proud of the fact that he has spent nearly all of his 50 years serving and teaching congregations in Tennessee. He served his early years as a pastor at St. John Vianny Church in Gallatin, TN, and at St. Francis Cabrini in Lebanon, TN.

He was also the beloved pastor of both St. Joseph Church in Madison, TN, and St. Henry Church in Nashville, TN, before becoming monsignor on April 27, 1967.

Monsignor Rohling has been active with many ministerial groups during his priesthood, including the Knights of Columbus, the Ladies of Charity, the Catholic Charities, the Little Sisters of the Poor, St. Thomas Hospital, and his high school alma mater, Father Ryan. In the Nashville Diocese, he demonstrated his outstanding administrative skills and served as episcopal vicar, vicar general, and diocesan consultor.

Monsignor Rohling has long been active in spreading the Catholic faith through numerous radio and television appearances and as a charter member of the Nashville Chapter of the National Conference of Christian and Jews.

And, even after 50 years of dedicated service, the monsignor continues to be active in city and church affairs, most recently chairing the diocesan sesquicentennial celebration in 1987. He continues to serve on the Metro Charitable Solicitations Board.

Many accolades have been bestowed on this distinguished man, including the honor of being selected Clergyman of the Year by the National Conference of Christian and Jews. He has also been honored by Father Ryan High School and by the Nashville alumni of Notre Dame.

My own remarks can add little to the outpouring of affection and respect that all residents of Nashville have for Msgr. George Rohling.

And, as he celebrates the 50th anniversary of his ordination, I simply join the monsignor's many friends and colleagues in saying that we look forward to his continued service for many years ahead.

The monsignor's gentleness, his great devotion to his faith, and his boundless love for his fellow men and women has enriched us all. We are most thankful that his life has crossed ours.

CONGRATULATING THE AUSTIN VOICE NEWSPAPER OF CHICAGO, IL, AS THE RECIPIENT OF THE MARTIN LUTHER KING, JR. DRUM MAJOR AWARD

HON. CARDISS COLLINS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mrs. COLLINS. Mr. Speaker, I rise today to congratulate the Austin Voice, a Chicago-based publication of Megamedia Enterprises Inc., that is the 1989 recipient of the Dr. Martin Luther King, Jr. Drum Major Award. It was presented on April 7 to this distinguished black newspaper by the Metropolitan Chicago chapter of the Southern Christian Leadership Conference.

In accepting the honor, the publisher Isaac Jones said that the founders of the 4½-year-old newspaper have no formal journalism training, no money, and no wealthy friends. "We had dreams, and it's true—sometimes God watches over little folks and helps them perform miracles."

Mr. Speaker, the Austin Voice is a unique community newspaper because it is owned by its work force. Commenting on its coownership Mr. Jones said that while the financial rewards are currently nominal, the job of producing the publication is by far one of the most satisfying jobs that he and his staff have experienced.

As a voice of black America, the Austin Voice has demonstrated the leadership that is essential to educating the community. If I may take a moment to reflect on our history, I do recall the words spoken by Samuel E. Cornish, the founder of the first black newspaper in 1867. Championing the movement, he stated. "For too long have others spoken for us. We wish to plead our cause."

Mr. Speaker, the power of the pen still remains one of the most influential instruments that educates, enlightens, and entertains people from all walks of life. On behalf of the Seventh Congressional District of Illinois, may I extend to the Austin Press my congratulations and best wishes for continued success as the media age evolves.

DEDICATION AND OPENING OF THE HUNGARIAN HERITAGE CENTER

HON. BERNARD J. DWYER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. DWYER of New Jersey. Mr. Speaker, on Sunday, May 21, 1989, the American Hungarian Foundation will dedicate the Hungarian Heritage Center in New Brunswick, NJ.

The American Hungarian Foundation was chartered in 1954. Almost immediately, the foundation began to obtain Hungarian works of art, literature and historical material. What started as a dream to establish a cultural center where these exhibits could be available for everyone, became the goal of a great many people. When the center is dedicated on Sunday, the American Hungarian Foundation will be richly rewarded for its work and commitment to the project.

The Hungarian Heritage Center will be the only center of its type in the entire United States. The center will house a museum which will feature exhibits of the artistic and scientific contributions made by Hungarians to this country.

A library, which will be a Rutgers University Affiliate Library, will house rare archives and manuscripts. Since its establishment, the foundation has received over 30,000 publications, including newspapers, letters, and photographs. To have these collections available to students and researchers will be of enormous benefit.

A visitors center, book shop and conference facilities will allow Hungarians and the public to learn more about Hungarian traditions and crafts.

This has been an extraordinary effort. The site of the new center was only purchased in 1980 and in these 9 years, the building has been restored and converted into what will be a national center for Hungarians in the United States. That it is located in New Jersey is appropriate because approximately 40 percent of American Hungarians reside in the Northeastern United States.

The center will tell the story of American Hungarians to all people and will keep alive the cultural and traditional values which have made the Hungarian contribution so vital to America's growth.

CONGRATULATIONS ANDREW ORTWEIN

HON. LARRY J. HOPKINS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. HOPKINS. Mr. Speaker, it is a privilege today to recognize a young constituent of mine who has already proven that he has mastered one of life's toughest lessons.

Andrew Ortwein, age 10, is a student at Good Shepherd School in Frankfort. He is one of only six elementary school and six high school students in the Nation who have just received awards from the President's Council on Physical Fitness and the California Raisin Advisory Board.

Andrew and his fellow winners have written on the importance of physical fitness in allowing us to fulfill our potential, to reach our capacity as human beings. Chosen from over 19,000 entries, Andrew and these others have argued in clear and compelling terms for us as a nation to enforce a little physical discipline on ourselves, lest we be hampered in our lives by avoidable ill health.

Congratulations, Andrew, and congratulations to Ms. Becky Smith, his teacher, and all teachers who have made the next generation

of America's leaders aware of the acute need for physical fitness in our world today.

HEAD START EXPANSION

HON. TIMOTHY J. PENNY

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. PENNY. Mr. Speaker, today I am introducing legislation to fully fund Head Start by fiscal year 1994.

Head Start is one of the Nation's most successful and popular domestic initiatives. This comprehensive child development program positively affects many areas—health, nutrition, educational development, social skills, et cetera. However, the program currently serves only one-fifth of the eligible children.

In addition, the need for full day and summer care for Head Start children is greater than ever. Without changing the structure and purpose of the Head Start Education Program, my bill provides for full day care and summer care for Head Start children whose parents are working or attending a job training or educational program.

Rather than competing with other education programs or further adding to the deficit, my bill contains a pay-as-you-go component. The legislation calls for delaying the indexing of the standard income tax deduction and the tax bracket adjustment. This approach would affect every taxpayer evenly.

Mr. Speaker, we have limited resources. At this time, we cannot afford to create new and costly programs for child care and other needs. But I contend that we can no longer afford to underfund a program with a proven record of success. An investment in Head Start for all eligible children will save us at least $6 for every $1 spent.

As the commercial says, "You can pay now or pay later." Let's do the right thing now. The cost to the taxpayer and these deserving children is too high if we wait.

Mr. Speaker, I ask that a copy of my bill follow this statement.

H.R. —

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Head Start Expansion Amendments of 1989".

TITLE I—AMENDMENTS TO THE HEAD START ACT

SEC. 101. DEFINITION.

Section 637 of the Head Start Act (42 U.S.C. 9832) is amended by adding at the end the following:

"(4) The term 'full-working-day' means at least 10 hours per day.".

SEC. 102. FINANCIAL ASSISTANCE FOR HEAD START PROGRAMS.

Section 638 of the Head Start Act (42 U.S.C. 9833) is amended—

(1) by striking "and (2)" and inserting "(2)"; and

(2) by inserting the following before the period at the end: "; and (3) may provide child care services".

SEC. 103. AUTHORIZATION OF APPROPRIATIONS UNDER THE HEAD START ACT.

(a) AUTHORIZATION OF APPROPRIATIONS FOR HEAD START SERVICES OTHER THAN CHILD CARE SERVICES.—Section 639 of the Head Start Act (42 U.S.C. 9835) is amended—

(1) by inserting "(a)" after "SEC. 639.";

(2) by striking "the provisions" and all that follows through "1990" and inserting "this subchapter (other than section 638(a)(3) $3,500,000,000 for fiscal year 1990, $5,000,000,000 for fiscal year 1991, $7,000,000,000 for fiscal year 1992, $8,500,000,000 for fiscal year 1993, and $9,000,000,000 for fiscal year 1994"; and

(3) by adding at the end the following:

"(b) AUTHORIZATION OF APPROPRIATIONS FOR CHILD CARE SERVICES.—If the amount appropriated under subsection (a) for a fiscal year equals or exceeds the amount authorized to be appropriated under such subsection for such fiscal year, then there are authorized to be appropriated for the respective fiscal year—

"(1) $700,000,000 in the case of fiscal year 1990;

"(2) $840,000,000 in the case of fiscal year 1991;

"(3) $1,000,000,000 in the case of fiscal year 1992;

"(4) $1,200,000,000 in the case of fiscal year 1993; and

"(5) $1,500,000,000 in the case of fiscal year 1994;

to provide child care services in accordance with this subchapter.".

SEC. 104. PARTICIPATION IN CHILD CARE SERVICES PROVIDED IN HEAD START PROGRAMS.

Section 645(a) of the Head Start Act (42 U.S.C. 9840(a)) is amended—

(1) in the second sentence of paragraph (1) by striking "paragraph (2)" and inserting "paragraphs (2) and (3)"; and

(2) by adding at the end the following:

"(3) Funds allotted under section 640 to a State that are attributable to funds made available under section 639(b) may be expended to enable Head Start programs to provide child care services Monday through Friday throughout the year to children who receive services (other than child care services) provided in Head Start programs, so that such children receive full-working-day Head Start services (including child care services) if such child care services are provided to meet the needs of parents who are working, or attending a job training or educational program.".

SEC. 105. TECHNICAL AMENDMENT.

Section 652(b) of the Head Start Act (42 U.S.C. 9847(b)) is amended by inserting "For All Urban Consumers" after "Consumer Price Index".

TITLE II—AMENDMENTS TO THE INTERNAL REVENUE CODE OF 1986

SEC. 201. 1-YEAR DELAY IN INDEXING OF INCOME TAX RATES AND PERSONAL EXEMPTION.

(a) INCOME TAX RATES.—

(1) IN GENERAL.—Subsection (f) of section 1 of the Internal Revenue Code of 1986 (relating to adjustments in tax tables so that inflation will not result in tax increases) is amended by adding at the end thereof the following new paragraph:

"(7) NO ADJUSTMENT FOR TAXABLE YEARS BEGINNING IN 1989.—Notwithstanding paragraph (1), the tables contained in subsections (a), (b), (c), (d), and (e) shall apply with respect to taxable years beginning in 1989 in lieu of the tables prescribed by the Secretary for such taxable years."

(2) TECHNICAL AMENDMENTS.—

(A) Paragraph (3) of section 1(f) of such Code is amended—

(i) by inserting "second" before "preceding calendar year" in subparagraph (A), and

(ii) by adding at the end thereof the following new sentence:

"For purposes of those provisions of law which refer to this paragraph (other than the provisions of this section, section 63(c)(4), and section 151(d)(3)), subparagraph (A) shall be applied without regard to the word 'second'."

(B) Paragraph (4) of section 63(c) of such Code (defining standard deduction) is amended by striking "1988" and inserting "1989".

(C) The Secretary of the Treasury or his delegate shall modify the tables and computational procedures under section 3402 of such Code to reflect (with respect to remuneration paid on or after the 1st day of the 1st calendar month beginning more than 15 days after the date of the enactment of this Act) a full-year effect of the amendments made by this section.

(b) PERSONAL EXEMPTION.—Paragraph (3) of section 151(d) of such Code (relating to exemption amount) is amended by striking "1989" each place it appears in the heading and the text and inserting "1990".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1988.

RESOLUTION DESIGNATING LEYTE LANDING DAY ON OCTOBER 20, 1989

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. PANETTA. Mr. Speaker, I rise today to introduce a joint resolution to designate October 20, 1989 as "Leyte Landing Day." This will mark the 45th anniversary of the Allied Forces' return to Leyte in the Philippines to fulfill a national promise and liberate the Philippine people from Japan. Gen. Douglas MacArthur led 420 transports carrying 165,000 men of the U.S. Sixth Army and 157 warships manned by 50,000 sailors who fought at Red Beach and represented the largest operation yet conducted in the Pacific war. Through the combined efforts of the Philippine Scouts and the Allies the Japanese forces were defeated and the direction of World War II changed.

The events which occurred at Leyte between 1944–45 have not received much deserved recognition. The Leyte landing was as important in the events of World War II as were the events at Normandy on D-Day, but I am sure you will agree the recognition of these two events has not been comparable. The Philippine Scouts fought bravely alongside with the United States Army to defend the vital military and strategic American bases in the Pacific.

In the past the Leyte landing has been commemorated by ceremonies in various parts of the country including California. However, I believe it is time for national recognition of this important event in U.S. history. The dedication and sacrifice endured by these men during World War II should not be forgotten. I urge my colleagues to support this legislation

to designate a day for national observance of the return to Leyte.

A copy of the resolution follows:

H.J. RES. —

Whereas October 20, 1989, marks the 45th anniversary of the landing of allied forces on Leyte Island in the Philippines;

Whereas the allies' courageous return to the Philippines fulfilled a solemn national promise to liberate the Philippine people from the Japanese empire;

Whereas the 420 transports, carrying 165,000 men of the United States Sixth Army, and the 157 warships, manned by 50,000 sailors, which fought at Red Beach represented the largest operation yet conducted in the Pacific War; and

Whereas the combined efforts of Philippine Scouts and allied forces resulted in the eventual defeat of the Japanese forces and changed the direction of the war in the Pacific: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That October 20, 1989, is designated as "Leyte Landing Day," and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such day with appropriate ceremonies and activities.

SOME GOOD ADVICE ON PANAMA

HON. GEO. W. CROCKETT, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. CROCKETT. Mr. Speaker, the May 9, 1989, Los Angeles Times carried an op-ed piece on Panama by Mr. Robert J. Kurz, a former staff member of the Subcommittee on Western Hemisphere Affairs, which I have the honor to chair.

Mr. Kurz explains how we got ourselves into this mess, and why it would be unwise to heed the calls to break the Panama Canal Treaties. He calls on the President to work out a long-term approach with our friends in Latin America.

I hope my colleagues will give this article, which follows, their careful attention.

TIME OUT ON PANAMA—IF WE MUST "DO SOMETHING," LET IT BE RATIONAL AND DEMOCRATIC

(By Robert J. Kurz)

The election in Panama is over, and the result, unfortunately, is no surprise to anyone: Gen. Manuel Antonio Noriega's man is the winner. The question, in both Panama and Washington, is: Now what?

To some, the United States' response should be as simple as it is swift: Break the Panama Canal Treaty. This has already been suggested by Florida's new Republican senator, Connie Mack, and others returning Monday after watching the so-called election. That approach also may have some appeal to President Bush's political advisers as they seek an issue on which they can demonstrate the Administration's decisiveness in foreign policy.

There is no question that the election was a fraud. And there is no question that Noriega is crafty and dangerous. He has no intention of relinquishing his power, and his handling of the election demonstrates his skill at political survival. Once again, Noriega has transformed a threat to his power into a grant of false legitimacy.

Noriega's strength comes from two sources. First, he has built the Panamanian Defense Force into a Mafia-like institution with tentacles into all aspects of Panamanian economic life. And he has been adept at using the power of nationalism to thwart pressure from the United States.

Breaking the treaty would prove that Noriega has been right all along—that he is the embodiment of Panama's sovereignty and national identity. That has been his "secret weapon" against the United States. And it is high time we stopped playing into his script.

The U.S. government has used Noriega, and has been used by him, for years. Our officials have known of his drug deals and power plays. Those who are now outraged by the weekend's events in Panama remind us of the scene from "Casablanca," where the corrupt police chief says, "I am shocked there is gambling going on here," while pocketing his share of the winnings. Gen. Noriega has long been treated as a staunch ally of the United States—so close that our various agencies have actually fought over which could claim to be his best friend. As a retired Latin American military officer visiting Washington observed with a shrug, "What is the surprise? You Americans created Noriega."

Sunday's election should also remind us of Panama's last presidential election, in 1984, when Noriega talked like a democrat. Then, too, there was a strong showing by the opposition. Then, as now, the outcome was fraudulent. Then, however, Noriega's candidate, Nicolas Ardito Barletta, was also Washington's candidate. When it became clear that Barletta was going to lose, Noriega stopped the ballot-counting and declared his and our candidate the winner. Despite some lonely voices of protests, the U.S. ambassador and the State Department sanctioned the sham.

In 1985 and 1986, the United States continued to turn a blind eye to what was happening in Panama because Noriega was proving helpful in support of the Nicaraguan Contras.

Let us be clear about what has been happening in Panama since then: Noriega was becoming more obviously the dictator and less compliant with U.S. wishes around the time that drug-trafficking became a U.S. domestic priority. Washington seized on an approach to deal with him that was ill-conceived and poorly thought-out. It backfired. The U.S. sanctions against Panama struck the opposition harder then Noriega.

Now, some of the U.S. officials who observed the weekend election are seeking another quick fix to a long-standing problem. Breaking the treaty might make them feel good, but it would do little to weaken Noriega or encourage democratic institutions. It is a classic example of what Harvard Prof. Howard Wiarda has described as a failure to understand that the levers of power in foreign policy are not easily manipulated.

It is time to build a new policy toward Pamana. No quick fixes, no overnight solutions. And no abrupt moves that will only stoke the fires of Panamanian nationalism and rally people to Noriega's cause.

It may be quite some time before the damage done in the 1980s can be overcome. But the Panamanian people need to know that the United States has a clear policy, guided by principles.

We need to say clearly and boldly that we will respect the canal treaty, that the days of the United States' controlling Panama are over; that the days of tolerating military dictatorship in Panama are numbered, and that we want the people of Panama to be able to choose their leaders in fair, free elections, after which those elected will take office and exercise their responsibilities.

Secretary of State James A. Baker III needs to be clear on the ends and the means of U.S. policy toward Panama. He must resist political pressures to break the treaty. Instead, he should call for a meeting of the democrats of Latin America to develop a coordinated package of carrots and sticks that will include specific steps that would reduce Noriega's strength without allowing him to fan the flames of anti-Americanism. In short, U.S. policy should take the long view, having as its goal a Panama that is a true, reliably democratic ally.

A TRIBUTE TO "GOOD SCOUT" A. ROY MENZIES

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. WAXMAN. Mr. Speaker, the Los Angeles Area Council of the Boy Scouts of America will next month present Mr. A. Roy Menzies with the Good Scout Award.

Mr. Menzies has a long and distinguished history with the Boy Scouts beginning in 1938 when he first joined Scouting. Since then, he has held a wide variety of leadership positions ranging from Scoutmaster to Council Commissioner—and including just about everything in between.

Mr. Menzies has received many awards and honors for his hard work. He is the recipient of the Award of Merit, Scouter's Award (Boy Scout), Scouter's Key, Silver Beaver, Woodbadge, Arrowhead Award, Doctor of Philanthropy, Silver Antelope, Scouter's Award (Cub Scout), Los Angeles Area Council High Adventure Maker Award, John K. Northrop Exceptional Outdoor Leadership Award, and the National President's Scoutmaster's Award of Merit.

Outside of Boy Scouts, Mr. Menzies is also a noted business professional. He is currently president of Menzies & Co., Market and Training Specialists. Mr. Menzies also serves as director of the management internship program and as senior lecturer in marketing at the University of Southern California's Graduate School of Business Administration.

In addition to his work for Boy Scouts and his busy professional life, Mr. Menzies volunteers his time for many other organizations, including the: American Heart Association, American Red Cross, Association of Rehabilitation Facilities, Brandeis-Bardin Institute, Foundation for Airborne Relief, Girl Scouts of America, Salvation Army, UCLA Unicamp, Wood River Valley Council for the Arts, YMCA (Metropolitan Los Angeles and Long Beach), and the YWCA (Metropolitan Los Angeles).

Mr. Speaker, in these troubled times, we cannot overlook the invaluable work of the Boy Scouts in instilling important values in our boys and young men. I offer my highest praise to all those who strive to keep Boy Scouts of America going. I would especially like to ap-

plaud Mr. A. Roy Menzies for the myriad of worthy and important contributions he has made to the Boy Scouts and to his community. Keep up the good work!

INDIAN DEVELOPMENT FINANCE CORPORATION ACT

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. RICHARDSON. Mr. Speaker, today I am proud to reintroduce legislation to create the Indian Development Finance Corporation. The 100th Congress passed this legislation and sent it to the White House. It was pocket vetoed. I continue in my commitment to the economic development of Indian tribes by establishing the Indian Development Finance Corporation.

American Indians currently suffer one of the Nation's highest unemployment rates. The unemployment rate of the largest reservation, the Navajo, is 37 percent—seven times higher than the rest of the Nation as a whole. Other reservations in my district have unemployment rates over 50 percent. The millions of dollars spent by the Federal government over the last 20 years have not broken this cycle of unemployment and poverty. Long-term progress in overcoming the conditions of extreme poverty and its attendant social problems on reservations can only be met if we create institutions that will be available for the long term. Such institutions must enable the Indian people to do for themselves rather than have the government do for them. In this very important sense, the Indian Development Finance Corporation furthers the U.S. government's longstanding policy of self-determination and self-sufficiency in Indian affairs.

The Indian Development Finance Corporation will spur economic development by furnishing the necessary capital, financial services, and technical assistance to Indian-owned business enterprises and will stimulate the development of the private sector of Indian tribal economies. These goals would be accomplished by establishing a federally chartered, mixed ownership corporation authorized to provide a broad range of financial intermediary services, including equity capital, direct loans, loan guarantees and business management assistance. The Indian Development Finance Corporation is modeled on the successful experience of the World Bank and is designed to operate on the same level as the private market.

The Indian Development Finance Corporation Act passed by Congress last year is the result of years of research and represents the best thinking of economic experts, tribal leaders, business management specialists and Members of Congress. It is the first truly innovative and significant step toward addressing the severe economic crisis on our Indian reservations.

Mr. Speaker, despite the actions of President Reagan I am hopeful that the new breeze mentioned by the President will breathe some life into these ailing tribal economies. I invite the new administration to work with the Congress on this legislation so that together we can establish the Indian Development Finance Corporation. Through this effort we can provide Native Americans the economic opportunity that is the birthright of all Americans.

HUMAN RIGHTS VIOLATION IN IRAN

HON. THOMAS M. FOGLIETTA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. FOGLIETTA. Mr. Speaker, I rise today to call my colleagues' attention to the recent wave of human rights violations in Iran.

Human rights violations are a matter of grave concern wherever they occur. But it is perhaps the most worrisome when we observe a government, and are forced to conclude that its violations of human rights are only becoming more pronounced and widespread. According to Amnesty International and the United Nations Human Rights Commission, this is just the case in Iran.

In a recent report, Amnesty International said that, "Iran has been carrying out the biggest wave of executions of political prisoners since the early 1980s." Along with the executions, abuses include torture, failure to charge defendents, and lack of legal counsel.

Some of my own constituents, and yours, have lost family members to execution by Khomeini's henchmen. Still others have had family and friends fall victim to torture by the Khomeini government. I would like to share with you one of the heart-wrenching incidents relayed to me by my constituents. This incident has been documented in Amnesty International's Iran Briefing.

This particular incident involved a 26-year-old female student. She describes her first beating in captivity, "When I refused to confess, I was blindfolded and told to lie down on the floor. One of them whipped my feet with a heavy cable. I was wearing socks, but the first lash was so painful that I jumped up and ran around the room. Then they tied my hands behind my back, and my feet together, removing my socks. They covered my head with a blanket and beat me again on my back and feet, telling me to confess which political organization I belonged to and give the name of my political comrades. I don't know how long it continued. At one point I pretended to be unconscious, but they just beat me harder, accusing me of trying to fool them."

My colleagues, we have seen—and protested—the brutal death threats extended by the Ayatollah Khomeini to non-Iranians, as in the case of British author Salman Rushdie. Now we must put pressure on the Iranian Government to cooperate with human rights organizations investigating the situation in Iran. We must also do all in our power to see that the Khomeini regime ends this appalling wave of human rights violations.

RURAL HEALTH CARE COALITION'S LEGISLATIVE PACKAGE

HON. ARLAN STANGELAND

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. STANGELAND. Mr. Speaker, we are seeing a situation in rural America where smaller hospitals are going under due to the exorbitant costs of running a hospital and caring for a disproportionate share of Medicare patients. There are serious flaws in the design of Medicare's reimbursement policies which have further exacerbated the demise of the rural health care delivery system and the access of care to rural beneficiaries.

Congress must continue its involvement to ensure that medical services are just as accessible to farmers and small businessmen and women in rural Minnesota as they are to corporate executives in Minneapolis.

In 1986, Congress designed Lake Regional Hospital in Fergus Falls, MN, as a Rural Secondary Specialty Center. The demonstration project verifies that rural hospitals are in disadvantaged positions under Medicare's prospective payment.

The project has demonstrated that a rural hospital providing sophisticated medical care can actually save the Medicare Program money by treating Medicare patients in a rural hospital rather than in an urban hospital. The second issue addressed was the diminishment of quality and access to health care if this type of hospital were unable to provide medical care to these Medicare patients.

Retroactively to October 1, 1986, Lake Region Hospital began receiving payments at the higher rate under the demonstration project. The hospital has been paid 13.12 percent higher than a typical rural hospital, but still 13.27 percent less than a small urban hospital and 26.65 percent less than a large urban hospital.

The savings to the Medicare Program have been significant. Each year during the pilot project the net savings to Medicare have been approximately $750,000. As a result of receiving a higher level of reimbursement from Medicare, Lake Region Hospital continues to provide access to quality and appropriate medical care to the growing Medicare population in west central Minnesota and the Dakotas. The population of the area is expected to expand as retirees continue their relocation to the lake areas of the State.

This demonstration project reinforces the plight of the rural health care network under Medicare's inequitable reimbursement policies, and redoubles our efforts in promoting the House Rural Heath Care Coalition and the enactment of its omnibus legislative package during the 1st session of this 101st Congress. I ask all our colleagues to support these critical measures—H.R. 1583, H.R. 1584, H.R. 1585, H.R. 1586, H.R. 1587, H.R. 1588, H.R. 1589—which are designed to aid financially troubled hospitals, promote rural Medicare care by attracting health professionals, and improving the access of care to rural beneficiaries by expanding present programs and services.

LITTLE LEAGUE BASEBALL CELEBRATES 50TH ANNIVERSARY

HON. GEORGE W. GEKAS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. GEKAS. Mr. Speaker, at this time 50 years ago in 1939, the field was being prepared, the uniforms were being sewn, and the athletes were getting ready for the first official game of Little League Baseball. This game was scheduled to be played on June 6 of that year in Williamsport, PA, and featured a match up between the Lycoming Dairy and Lundy Lumber Co. baseball teams.

Since that very first day in 1939, Little League Baseball has grown dramatically. By 1955, Little League was found in every State, and today it is played by 33 countries, with over 2.5 million youngsters participating. In August of each year, the league hosts a truly international "World Series," with the very best from such exotic places as Israel and Jordan, Germany and Holland, Indonesia and Australia, and Japan and China competing.

Yearly, over 750,000 adult volunteers give of their time and energy to make this program possible. Among its graduates the program boasts more than 450 major league baseball players and countless leaders in business, industry, and politics, including many Members of Congress.

From its inception, Little League Baseball has been a vehicle for promoting the virtues of fair play, good sportsmanship, and the desire to excel through friendly competition. That goal continues and today, just days before its 50th anniversary, I would like to echo the words of President Bush who said of Little League, "I know how well this program represents wholesome, family-oriented, and competitive sportsmanship at its best."

Mr. Speaker, it is a great honor for me to rise to introduce this concurrent resolution recognizing the 50th anniversary of this great institution. And to the dedicated team which runs Little League Baseball. In my 17th Congressional District, I salute you on your outstanding work and wish you all the best for the next 50 years. The President and the Congress are delighted to recognize your special contribution to the Nation's youth.

TRIBUTE TO THE 41ST ANNIVERSARY OF ISRAEL

HON. JACK BUECHNER

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. BUECHNER. Mr. Speaker, I rise today to recognize the 41st anniversary of one of our country's closest and most reliable allies: the State of Israel. As it enters its fifth decade Israel stands as it always has: a monument to the principles of democracy and self-determination.

Like so many of our own forefathers, the original Zionists came to Palestine seeking only religious freedom and a place where their children might finally know the peace so long denied them. From the ashes of the Holocaust arose a new hope for the Jewish people: the home they had sought through three millennia.

Amid the austerity of the Palestinian desert, the fledgling state grew despite the constant shadow of Arab malevolence, giving shelter to any who might join them. Belligerent neighbors attacked continually, and time and again, they were repelled. This commitment to a dream, not unlike our own, is a lesson to us all. We, as Americans, can take some pride for our role in the birth of this nation.

In return for our support Israel has consistently been among our staunchest allies; they have supported us in the United Nations. Even when our NATO allies denounced our actions. A stable ally in the Middle East is of paramount strategic importance to the United States, and Israel has never failed us in that capacity. The Israelis have long been, and will continue to be a tactical thorn in the side of Communist expansionism.

However, despite its precarious role as an ally of the West amid the anti-Westernism and anti-Semitism of the radicals in the Moslem world, Israel has not wavered in its commitment to a peaceful Middle East. This has never been more evident than in 1979, when after many years of conflict, Menachim Begin and Anwar Sadat shook hands and signed the Camp David accords. This triumph of diplomacy over a hatred which had spanned centuries shall always be remembered as a vital and historic reaffirmation of the diplomatic process, a process in which many of us had lost faith. The fact that this tradition has been honored by the successors of its creators stands as a reminder to us all that ideas and words create where tanks and bullets destroy, and that communication will always be the nemesis of hatred.

Mr. Speaker, I ask this entire assembly and the Nation it represents to join me in saluting one of our closest friends on its 41st birthday. The very existence of Israel is a triumph of a dream and a spirit akin to our own.

NATIONAL DISABILITY AWARENESS WEEK

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. COELHO. Mr. Speaker, today I am pleased to join my esteemed colleague, Senator PATRICK LEAHY, in introducing legislation that would designate October 1–7, 1989, as "National Disability Awareness Week."

I look forward to this commemorative week which will provide us with an opportunity to celebrate the contributions of Americans with disabilities. But, just as important, this week will provide us with an opportunity to educate the public about the experience of persons with disabilities in our society.

Persons with disabilities are often denied the basic opportunities and civil rights that persons without disabilities take for granted. On a daily basis, persons with disabilities are subject to prejudice and discrimination that are usually the results of one thing—ignorance. In a society that focuses on what persons with disabilities cannot do, there will naturally be a lack of understanding about what persons with disabilities can do. It is the lack of understanding, rather than any actual physical or mental limitations on the part of those with disabilities, that represents the greatest barrier between persons with disabilities, and what we can achieve.

An estimated 37 million Americans have disabilities. I hope that my colleagues will join me in this resolution to recognize the contributions and experience of this group of Americans. I also hope that National Disability Awareness Week will give us all an opportunity to appreciate, rather than denigrate, the differences between us, and to focus on the contributions that each of us, with or without a disability, can make to our communities and to our country.

PHIL CRANE AND THE PANAMA CANAL

HON. LARRY E. CRAIG

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. CRAIG. Mr. Speaker, in light of the recent violence surrounding the elections in Panama and President Bush's decision to reinforce U.S. Armed Forces in that region, I believe it is appropriate for Congress to reconsider its position on the Panama Canal Treaty. As the treaty requires the United States to cede all control of the canal and the surrounding zone by the year 2000, we are going to have to make some tough decisions as to whether or not Panama's instability will jeopardize our national security interests in Central America and the entire Western Hemisphere.

I want to take this opportunity to commend our colleague, Representative PHIL CRANE, on his leadership and energetic efforts to revisit the controversy which has lingered over the treaty. I also urge my colleagues to read Representative CRANE's comments in the May 15 edition of Spotlight as reprinted below.

[From Spotlight, May 15, 1989]

PANAMA CANAL TREATIES CALLED NULL AND VOID

Immediately after the House of Representatives passed H.R. 1763, the bill authorizing expenditures for the Panama Canal for fiscal year 1990, Rep. Phil Crane (R-Ill.) took on the floor of the House to remind his colleagues of an apparent oversight on their part.

Said Crane: "I believe this is an appropriate time to bring to the attention of my colleagues [details of] numerous problems with the Panama Canal Treaties. If you find these facts as disturbing as I do, I encourage you to cosponsor my bill, House Concurrent Resolution 47, expressing a sense of Congress that the Panama Canal Treaty is an illegal document."

Crane then presented his colleagues with facts detailing the many inconsistencies and legal fallacies contained within the agreement with Panama wherein the United States paid Panama to assume eventual ownership and control of this vital, strategic

waterway, built with American sweat and blood.

Crane's first objection to the legality of the Panama Canal payaway was that there were actually two treaties signed by then-President Jimmy Carter and Panamanian "head of state" Omar Torrijos in 1977. The first was the "Panama Canal Treaty," which was intended to gradually transfer control over the canal and the zone to Panama, culminating in a final transfer of sovereignty in 1999.

The second treaty was the "Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal," also known as the "Neutrality Treaty," which was intended to guarantee the neutrality of the canal after the transfer was complete.

The text of the treaties as signed was not completely acceptable to the U.S. Senate when they were submitted for ratification. Thus, several reservations were attached to the treaties to clarify the meaning which the Senate placed on the provisions of the treaties, which were then ratified.

Chief among these was the so-called DeConcini Reservation, introduced by Sen. Dennis DeConcini (D-Ariz.), which declared that the right of the United States to intervene to guarantee the neutrality of the canal could be exercised unilaterally, that is, without the permission of the government of Panama.

In fact, the reservation even stated clearly that this power would be exercised even against the opposition of the Panamanians, if neutrality were threatened.

The DeConcini Reservation was strongly opposed by the Panamanian negotiators, however, who inserted a three-paragraph counterreservation into their instrument of ratification. This asserted that it was the understanding of Panama that the DeConcini Reservation did not allow for unilateral U.S. action, despite the clear intentions of the Senate to the contrary.

So essentially what we have is a basic disagreement over one of the fundamental provisions of the treaties. More importantly, the Panamanian counterreservation was never presented to the Senate for a vote (as required by the Constitution) and is not even mentioned in the U.S. instrument of ratification.

So there are two different versions of the treaties, which both sides are supposed to be in complete agreement with. This is patently impossible, and thus the ratification is faulty and the treaties are void.

This is further supported by the Vienna Convention on the Law of Treaties, to which both Panama and the United States are signatories. The convention states that each reservation to a treaty must be accepted by both parties. Since neither reservation was accepted by the other party (since they are mutually exclusive), there has been no ratification under international law.

Other objections Crane noted include the fact that the treaties never explicitly and legally transferred sovereignty over the canal to the Panamanians. All it contained was an abrogation of the original 1903 treaty, establishing U.S. sovereignty over the canal. This abrogation alone was not sufficient to transfer sovereignty to Panama.

Also, for a treaty to be overturned, the House of Representatives, according to the Constitution, must vote on the measure which effects this, just as both houses must vote to repeal any law. The House never voted on this abrogation.

Crane cited many other objections, most having to do with the fact that the treaties were illegal even under Panamanian law.

But Crane has made his point. The canal treaties are a hopeless welter of conflicting and illegal provisions. The two sides agreed to two different documents, and they are illegal under both the U.S. Constitution and international law.

The majority of the American people opposed the Panama Canal payaway when it was carried through in 1977, and should it be put to a vote today, it is undoubtedly true that the same majority would agree to declare the treaties null and void, and take back the canal.

Panama, much in the news lately because of the drug running and money laundering of its leader, strongman Manuel Antonio Noriega, a rabid anti-American leftist, is also a world center for basing these illegal activities.

The U.S. government clearly has the legal justification for taking back control of this vitally important waterway, which now is being held hostage by the criminal Noriega, who has threatened to shut down traffic on the canal if the United States persists in its efforts to depose him.

There is no reason why the United States should not counter this threat, and reassert a measure of control over its own destiny, by taking back the canal.

If you agree, let your representative know that you want him to sign on as a co-sponsor of Crane's measure declaring the canal treaties null and void.

NEW FAIR HOUSING AMENDMENTS BEGINNING TO WORK

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. EDWARDS of California. Mr. Speaker, when Congress enacted the Fair Housing Amendments Act of 1988, we said then that the new law represented a strong weapon to fight housing discrimination. The new law has been in effect only few weeks, and we have begun to see the positive results of our efforts.

I want to share with our colleagues an article signaling the significance of the Fair Housing Amendments Act. With this strong new law, our nation moves closer to eliminating the housing discrimination that continues to be all too common around the country.

[From the New York Times, May 13, 1989]

BLACK WINS $140,000 UNDER STIFF HOUSING LAW

(By Martin Tolchin)

WASHINGTON, May 12—In a reflection of newly strengthened provisions of the Fair Housing Act, a Florida mobile home community has agreed to pay a black New Jersey woman $40,000 for discrimination.

"We broke new ground in the Deep South, using the strength of the new law," Rachel Susz, the woman's lawyer, said today.

Charles Burr, a lawyer for the mobile home park, said his client had no intent to discriminate and had sold many homes to blacks. The company consented to the award, approved in Federal district court, only because "it was going to be an extremely embarrassing, high-visibility lawsuit," he said in a telephone interview.

Irma Princeton, the plaintiff, said she was told by a salesman at the mobile community, in Clearwater, Fla., that it was restricted and that had he known she was black, he would have told her not to make the trip.

The $40,000 award signaled the significance of amendments to the Fair Housing Act that took effect in March. The 20-year-old law sought to combat discrimination in the sale or rental of housing but had lacked tools for effective enforcement. The amendments eliminated a ceiling of $1,000 for punitive damages and added the disabled and families with children to those protected from discrimination on the basis of sex, race, color, religion or national origin.

Although the court did not specify whether the award was for actual or punitive awards, the plaintiff's lawyers said that the mere possibility of high punitive damages has expedited the case.

"The possibility of large punitive damages was definitely a factor in getting this case resolved," Ms. Susz said.

Under the consent order, the company is required to offer to sell Mrs. Princeton a mobile home. Indeed, the company says it has always offered to do so. Mrs. Princeton is not interested, however.

The judgment was approved May 2 by the Federal District Court in Tampa but received little notice.

Under the amendments to the Fair Housing Act, the Government is obligated to act as advocate and legal counsel for victims of housing discrimination, taking cases to court and seeking penalties, instead of merely mediating disputes and seeking to expedite out-of-court settlements.

The lawsuit was filed last January, but the plaintiff sought to amend the complaint after the Fair Housing Act amendments took effect, Ms. Susz said.

ACCOUNT BY PLAINTIFF

Mrs. Princeton said in a telephone interview that she was a retired free-lance writer who had sought to move to Florida and had responded to an advertisement by Wayne Wetzel Mobile Homes. Mrs. Princeton, a widow in her 60's, said she called the company and was invited by Robert J. Wendel, a salesman, to inspect a mobile home community in Clearwater. The company agreed to pay half the costs of her lodging.

In the telephone conversation, she said she told Mr. Wendel that she wrote a consumer column for "Senior Power," a publication of the New Jersey Federation of Senior Citizens, and he said: "We could use someone with those skills. Would you be willing to do that down here?" He also asked her to edit a brochure he had written, Mrs. Princeton said.

Mrs. Princeton made the trip to Clearwater in February 1988 and went to the company's office. "When I introduced myself in his office, and we shook hands, the expression on his face was, like, 'I don't believe it,'" Mrs. Princeton said.

"He said he had to give it to me straight," she continued. "He said that they had restricted housing, and had he known I was a 'colored lady,' he would have told me this and spared me the expense of the trip."

The conversation took five minutes, Mrs. Princeton said, after which she spent some time editing Mr. Wendel's brochure. She then returned to her car.

"I sat in my car and said, 'Did I just experience what I think I experienced?'" Mrs. Princeton said.

DEMAND FOR FEDERAL ACTION

She said that when she returned to New Jersey she called the Department of Housing and Urban Development in Washington,

which referred her to Clearwater's Office of Community Relations.

"She filed the case with our office," said Ron McElrath, the office manager. "We're a contract agency with H.U.D. We found probable cause that discrimination had occurred."

Mr. McElrath gave Mrs. Princeton a list of lawyers, from whom she selected Avery S. Friedman, who worked on the case with Ms. Susz.

"We think that taking away an American's human rights should be expensive," Mr. Friedman said. "The new amendments make civil rights violations economically disadvantageous."

Mr. Wendel, the mobile home salesman, was also a defendant in the case. When he spoke with Mrs. Princeton by telephone, he said in an interview. "I did not know she was black."

He said that at their meeting in Clearwater, "she said that she was very anxious to get socially involved" in a mobile home community. Mr. Wendel said he advised her that "there is discrimination in some of the parks."

"WE BROKE NEW GROUND IN THE 'DEEP SOUTH,' AN ELATED LAWYER SAYS"

"I said that she might find a problem," Mr. Wendel continued. "It's a sad thing. It's part of our society."

"I said that I was willing and ready to sell her a mobile home," Mr. Wendel said. "She said that under the circumstances, she wasn't interested."

Mr. Wendel said he had been candid with Mrs. Princeton because "I felt sorry for that lady" and did not want to see her move into a mobile park where she would not be welcome.

"I haven't had more than five colored people in my office in 10 years," he added.

Mr. Burr, the company's lawyer, said: "It was the position of the company that the salesman made isolated remarks to this lady that were probably ill advised and were arguably paternalistic, but never intended in any way to discourage her from buying a mobile home or placing her in one of the mobile parks."

Under the court order, the company must conduct semiannual training sessions of all of their agents and employees concerning fair housing laws, and cooperate with the periodic monitoring of their sales by the Clearwater Office of Community Relations. In addition, the company is required to post notices of the fair housing laws in "conspicuous locations at their places of business."

PRAISE FOR LAWRENCE COUNTY HIGH SCHOOL BAND

HON. RONNIE G. FLIPPO

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. FLIPPO. Mr. Speaker, I rise to bring to the attention of my colleagues the considerable accomplishments of the Lawrence County High School Band.

Over the past 15 years, the Lawrence County High School Band has received over 200 awards for superior ratings and first place competition awards throughout the Southeast and across the Nation. The band has participated in regional and national competitions in Alabama, Florida, Tennessee, Georgia, Virginia, Washington, DC, New York City, and has traveled to Whitewater, WI on six occasions to observe national level competitions.

These considerable accomplishments serve to point out the tremendous commitment to excellence in music on the part of students, parents and school officials over the past 15 years. The band program brings together everyone involved in a way that creates appreciation for music, but also provides a broader exposure to and appreciation for American culture.

The band program is a central activity of the local community and receives widespread support from business and industry in Lawrence County. The awards and accomplishments of the Lawrence County High School Band are truly shared by everyone in the community because it is through their broad-based support that this high level of excellence over the 15-year period has been possible.

I want to extend my wholehearted congratulations to the students, teachers, parents, and supporters of the Lawrence County Band program for a job well done.

TRIBUTE TO JOSEPH C. BERRY

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. DINGELL. Mr. Speaker, I would like to take this opportunity to pay tribute to one of Michigan's exemplary citizens, Mr. Joseph C. Berry. This fine gentleman's outstanding accomplishments merit recognition and praise. Mr. Berry spent most of his career as a United Automobile Workers International representative. At the time of his retirement he was assigned to the auditing department, a role he served ably since 1953. Mr. Berry's concerns for community affairs began when he was elected to serve as a member of Ford UAW Local 600's General Council and in 1947 he became president of Local 600's Coke Ovens & Blast Furnace Unit. Mr. Berry truly has demonstrated he is first among equals in his dedication to serve the ranks of labor within our free enterprise system.

But Mr. Berry's outstanding talents and unyielding commitment to people and public service is not merely limited to his occupation. As a dedicated husband and father of two, Joseph C. Berry held his share of offices as a distinguished member of the Allen Park Board of Education from 1969 to 1989 including president, vice president, secretary, and treasurer. In expressing his concerns for public education, this four-time Allen Park Board of Education President said "* * * to meet the human resource needs of our people, and to help them become effective and responsible citizens."

In addition to his civic responsibilities, this dedicated citizen took an active interest in the political life of his community. Mr. Speaker, Joseph Berry's list of accomplishments is endless. His service to his family and community truly exemplifies the call that service to humanity is one of Earth's greatest treasures.

As for awards, Mr. Berry says the best award of life is returning the favor to the citizens of his community. His deeds and accomplishments represent the highest ideal of servanthood. In his tireless devotion to his community, he has sought to improve mankind. I must admit, Mr. Speaker, Joseph C. Berry has made an impact in my life.

In saluting him today, we pay tribute to those who share his dedication and compassion for humanity, for they are the citizens of civilization.

"HOW TO TRANSFORM CRISIS INTO TRIUMPH"—AN ADDRESS ON POLAND BY CONGRESSMAN STEPHEN J. SOLARZ

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. ROSTENKOWSKI. Mr. Speaker, a few days ago our colleague, the gentleman from New York [Mr. SOLARZ], delivered an address on the significance of recent developments in Poland at the annual Polish National Alliance banquet in Chicago, IL, in honor of the 1791 Polish Constitution.

In his speech, Mr. SOLARZ discussed the April signing of the roundtable agreement as representing a historic opportunity for the Polish people to make a peaceful transition from dictatorship to democracy. He also pointed out that the developments could have lasting significance for East-West relations by helping to end the cold war. Noting the threats to successful implementation of the agreement, including the potential for social unrest caused by the deteriorating Polish economy, Mr. SOLARZ described the measures that the United States can take to encourage the momentum for reform. These steps include cooperating with our Western allies to produce a comprehensive economic assistance program which would act as an incentive for the Polish Government to continue on the road toward democracy.

Mr. Speaker, I believe that the ideas put forward by Mr. SOLARZ about the how, in his words, "to transform the Polish crisis into a Polish triumph," ought to be seriously considered by the American people and by our colleagues as we begin to weigh how best to respond to the new realities in Poland. I commend Mr. SOLARZ' insights and recommendations, and I ask leave now to place them in the RECORD.

POLISH CONSTITUTION DAY

(Address by Congressman Stephen J. Solarz)

Witam Panstwa!!

I am proud to be here tonight in the company of so many distinguished Americans and Poles.

I am especially grateful to the Polish-American Congress and the Polish National Alliance for giving me the opportunity to speak to you about the significance of the round table accords for Poland and the United States.

After more than four decades of darkness and despair, of decline and dictatorship, of foreign domination and domestic degredation, a ray of light can now be seen at the end of the long tunnel of totalitarianism.

Whether it will be possible for the Polish people to emerge from the darkness of dictatorship into the sunlight of democracy will depend in no small measure on their personal courage and politial creativity.

It will also depend on the memory of democracy in Poland which is symbolized by the May 3rd Constitution whose 198th anniversary we celebrate tonight.

Along with the French and American consitutions of the same era, it defined the modern understanding of the relationship between the power of the state and the rights of the individual.

For almost two centuries, the May 3rd constitution has been an enduring symbol of human rights and human dignity in Poland.

For more than 120 years of foreign domination it kept hope alive.

For the past 50 years, a period in Polish history which began with the brutal attack by her Nazi neighbor to the West and her communist neighbor to the East, the memory of the May 3rd constitution has sustained the desire for democracy among a people who during this time experienced nothing but dictatorship.

And today, its message of human rights and human dignity is being heard loudly and clearly again.

From the shipyards on the Baltic to the coal mines in Silesia, from large cities like Warsaw and Wraclaw to small towns like Sanok and Suwalki, the Polish people are once again crying out for freedom.

They know that human rights are given by God and not by man, and that no theory of history, no theory of economics, no theory of class struggle has the power to take them away.

One month ago, the Polish government and the Polish people concluded a far reaching accord intended to rejuvenate the political, social and economic life of the nation.

For the government, the agreement represents an admission that the policies of the past eight years—indeed of the past forty years—have been a failure.

It constitutes a belated recognition by the regime of the truth of Stalin's observation that trying to impose socialism in Poland is like trying to put a saddle on a cow.

Yet in signing the agreement, the authorities are making a gamble that by relinquishing some power, they can preserve the rest.

For the opposition, while the agreement creates a momentum for change, it provides no guarantee for the establishment of democracy.

It also commits the opposition to sharing responsibility for implementing what could be painful economic reforms.

Yet for all of its limitations, the round table agreement offers the best opportunity Poland has had in half a century to make a peaceful transition from dictatorship to democracy.

It is important, therefore, for us to understand exactly what the agreement does—and does not—provide.

In political terms, the round table agreement:

Restores the legal rights of Solidarity as well as those of Rural Solidarity and the Independent Student Association.

It sets elections in June for the Sejm in which 35 percent of the seats will be freely contested by anyone who chooses to run.

It restores via free and open elections in June a 100 member upper chamber of parliament—the senate—with the power to veto legislation enacted by the lower house.

It establishes the post of president of the republic, elected to a six year term by the two houses of parliament.

It allows Solidarity a half hour of television time weekly and one hour of radio time on the state controlled media.

It permits Solidarity to publish its own daily national newspaper and eases press censorship in general.

It requires the government to strengthen the independence of judges and the courts.

In the economic realm, the agreement calls for:

The indexation of wage and pension increases to 80 percent of inflation.

The redirection of investment resources toward consumer goods and away from defense and raw material industries.

The elimination of preferential access to consumer goods for party members.

The eventual balancing of the national budget and the gradual phasing out of subsidies.

And the selection of factory managers on the basis of ability rather than political connections.

As sweeping as these provisions are, it is important to note that the agreement does not:

Legalize opposition political parties.

Provide for a freely elected parliament.

Abolish all press censorship or break the state control of the media.

Furthermore, the agreement fails to:

Address in any comprehensive way the problem of low productivity in the economy.

Restore consumer goods to the marketplace

Or abolish the detestable and demoralizing nomenklatura system in which almost 1 million key jobs in the economy are set aside as a special reserve for the 1.3 million members of the communist party.

But although the round table agreement falls short of providing what Abraham Lincoln characterized as a government of the people, by the people and for the people, it does represent an enormous opportunity for democracy in Poland.

Yet it is also true that, like Rome, political pluralism and economic prosperity in Poland cannot be built in a day.

The real choice that confronts Poland is not between purgatory and paradise, but between stagnation and rejuvenation.

The Polish people, exhausted by the seemingly endless talks and by the daily grind of economic hardship, have greeted the agreement with a certain degree of skepticism.

Their cautious reaction underscores the political realities of a country where dashed hopes and unkept promises have become part and parcel of a long history of betrayal and repression.

The bitter disappointments—the failure of Gomulka's political reforms in the late 1950's, the collapse of Gierek's economic policies in the mid 1970's, and the betrayal of the Gdansk accords in the early 1980's—have taught the Polish people the lesson that promises by the authorities are more often broken than fulfilled.

It will take the continuing courage and commitment of the Polish people to counter the inevitable efforts on the part of Stalinist elements within the communist party to subvert not only the spirit but also the letter of the agreement.

But difficult as this will be, Poles can take heart from the fact that they are blessed with extraordinary leadership, inspired by the charismatic eloquence of Lech Walesa, the sage advice of activists like Jacek Kuron and Adam Michnik, and by the spiritual wisdom of Pope John Paul II.

For Poland, the difference between the success and failure of the round table agreement will be the difference between the establishment of democracy and the continuation of dictatorship.

For the United States, the success of the accords would mean the fulfillment of our humanitarian hopes for the Polish people, but the emergence of genuine democracy in Poland also represents a necessary condition for the end of the cold war and the transformation of our relationship with the Soviet Union from one of aggressive confrontation to one of peaceful competition.

In recent years, much has happened to suggest that the Iron Curtain—which only a few years ago had seemed to be a permanent fixture on the European landscape—may finally be lifting.

Yet if the cold war is really to end, it will need to end where it began. And that place is Poland.

We need, therefore, to consider how the United States can most effectively contribute to a fundamental political and economic transformation in Poland.

And we also need to consider the major threats to the roundtable agreement and what we can do to help the forces of freedom in Poland deal with them.

There is, first of all, the possibility of Soviet intervention.

While the "new thinking" in Soviet foreign policy would seem to militate against any direct military intervention by the Red Army in Poland, the history of Eastern Europe, not to mention the invasions of Hungary in 1956 and Czechoslovakia in 1968, and the threatening military maneuvers around Poland in 1981, suggest that it would be dangerously naive to preclude the possibility of another Soviet intervention in the region.

Yet even if a Soviet invasion is only a remote possibility, the United States needs to make it clear to the Soviet Union that not only would such an intervention jeopardize—perhaps fatally—the prospects for meaningful arms control, it would also eliminate the possibility of significant and sustained economic cooperation between the U.S. and U.S.S.R.

By putting Moscow on notice that we simply will not tolerate the use of force to suppress the aspirations of the Polish people, we can diminish the possibility that in a crisis the Soviet Union will resort to military means in order to put the genie of democracy back into the bottle of repression.

The process of democratization which the round table agreement has set in motion could also be cut short by a decision on the part of the Polish communist party to halt or reverse the process of reform. The Polish government declared martial law once. It could conceivably do so again.

Here, too, the United States can create disincentives for the use of force by making it very clear to the Polish authorities that such a misguided move would doom their hopes for better relations with the West.

The final threat to the effective implementation of the accords lies in the possibility of a massive social upheaval caused by the continuing deterioration of the economy.

Such a scenario would clearly bring political progress to a halt and could very easily lead to a crackdown by the communist authorities which would bring the whole process of reform and rejuvenation to a crashing and categorical end.

Such a dismal and depressing scenario is by no means a purely hypothetical possibility. At a time when real national income is

still below what it was a decade ago; at a time when prices are almost doubling every year and when a zloty buys virtually nothing; at a time when the wait for a new car is 10 years and an apartment 35 years, a single spark resulting from a wholly unexpected incident could easily set off a confrontation between the authorities and the population that would once again plunge Poland into the abyss of violence and repression.

But here too there are steps which the U.S. could take in concert with its Western allies to maximize the prospects for social stability by providing Poland with the kind of financial assistance that can minimize the painful consequences of necessary economic reform.

In June 1947, fearing the collapse of democracy in a Europe ravaged by a brutal war and paralyzed by a frigid winter, the American Secretary of State George Marshall spoke about the need to rebuild Europe.

If democracy was going to be saved, he said, we would need a cure rather than just a palliative.

Poland today, like Western Europe 40 years ago, needs a cure rather than a palliative.

This is a time not just for the United States but the West in general to think boldly rather than incrementally, creatively rather than conventionally, in determining how to transform the Polish crisis into a Polish triumph.

President Bush's speech on Poland a few weeks ago constituted a measured and appropriate initial response to the signing of the round table agreement.

The offer to support debt reschedulings, to reduce our tariffs for a range of Polish goods, and to encourage U.S. investments in Poland are all positive and needed initiatives.

But just as the Polish government needs to go further in the elaboration and implementation of its programs for political and economic reform, so too does the U.S. need to go further in indicating comprehensively what additional steps we would be willing to take, in concert with our western allies, if the Polish authorities agreed to the establishment of genuine democracy and a free economy.

We cannot expect that vague promises of future action on our part will provide the Polish government with a sufficient incentive to continue—let alone complete—its journey on the path to democracy.

Such promises have the same value as the zloty, for like the zloty they are likely to buy us very little.

Whether the round table agreement finally evolves into a charter for freedom like the May 3rd constitution rather than becoming another in a long list of broken commitments will depend largely on events in Poland itself.

But it will also depend on the willingness of the United States to take the kinds of steps that will help to transform the dream of democracy into the reality of freedom.

Yet the truth of the matter is that the Bush Administration has no clear idea of what we and our western allies should be willing to do for Poland, if the Polish authorities are willing to abolish the nomenklatura, end all censorship, introduce a market economy, implement totally free elections, and establish a real democracy.

I call upon the President to establish a high level Administration taskforce to determine what resources would be needed to put the Polish economy back on its feet.

For only if we know the true dimensions of what needs to be done can we assess what we are prepared to do.

It might be useful to suggest what such a proposal should include.

It would need to involve generous debt rescheduling, including outright forgiveness of some loans and the reduction of interest rates on others.

It would need to include new credits, perhaps through the capitalization of a bank to help in providing capital to small and medium sized private enterprises.

It would need to explore ways to stimulate foreign investment in Poland.

It would need to help private firms tap western capital markets through such means as mutual funds.

And it would need to train the management of small and medium size industries, which is where Polish entrepreneurial talent is most heavily concentrated.

Such a program would not be cheap. It could easily cost $10 billion over the next five years.

But before we dismiss such a sum as being widely unrealistic we should consider the fact that the countries of the western alliance spend $350 billion a year in maintaining the defense of Europe.

If democracy in Poland can help to bring about the end of the cold war, thereby saving us tens of billion of dollars that we are obligated to spend on defense, then $10 billion dollars as an inducement to the Polish authorities to agree to the kind of reforms that would bring real democracy to Poland would be one of the best investments the NATO nations have ever made.

It is important to emphasize that this is truly a western and not just American responsibility.

The United States clearly has a significant stake in the emergence of democracy in Poland, but so too do our western allies.

A comprehensive program of assistance designed to facilitate the transition from dictatorship to democracy must, therefore, be a collective initiative.

There are those who say that we should begin immediately the task of rebuilding the Polish economy, and that we should not wait for the establishment of real democracy and a market economy before providing this kind of financial support.

But those who would argue for such a policy ignore the experiences of the early 1970's when western creditors pumped over $20 billion in credits into Poland only to find that the regime used the loans to avoid rather than to support reform.

A repeat performance would be the height of economic folly and political naivete.

There are also those who argue that Poland is not our responsibility and that at this time of substantial budget deficits we should not consider taking on any additional financial burdens.

But given the enormous stake we have in progress toward real political pluralism in Poland, such a do-nothing policy would be morally unacceptable and strategically unwise.

History is filled with the stories of Poles who have come to the aid of others.

Sobiewski's lifting of the siege of Vienna in 1683, Kosciuszko's contribution to our own revolution in 1776, and the brave Polish soldiers, sailors and airmen who fought alongside the Allies to liberate Europe from the Nazis in the 1940's, all made a critical contribution to the cause of freedom in other lands.

In view of what Poland has done for America and Europe, it is time for America and Europe to start doing something for Poland.

Finally, I wish to address a few words to Poles in Poland who may be listening via their radios to this celebration in Chicago.

We are watching with awe and admiration your heroic struggle to achieve the rights and freedoms for which we struggled over two centuries ago and which without your help we might never have achieved.

The events which are now taking place in Poland constitute one of the greatest and most important political dramas in the history of our time.

On the outcome depends your aspirations for freedom and our hopes for a more stable world. As you engage in this historic struggle you should know that you have our moral and political support.

It is my hope—and I shall work tirelessly to see that it comes to pass—that you will also have our material assistance as well.

Permit me to close on a very personal note which concerns an experience I had during a visit I made to Gdansk a few years ago.

When I left St. Brygida's after a lengthy meeting with Lech Walesa and Father Jankowski, who I am pleased to see here this evening, I saw a wedding ceremony in progress. A short time later, on my way to the airport, I stopped to lay a wreath at the monument to the shipyard workers killed in the uprising of 1970.

There to my amazement I saw the same couple—their marriage vows still fresh on their lips—in their first act as man and wife paying their respects to those fallen heroes who gave their lives in the struggle to make Poland free.

It is that unique pride in country and commitment to freedom which leads me to believe that, however long the journey may take, the Polish people will eventually reach the promised land of democracy and freedom.

Niech Zyje Polska.

TRIBUTE TO CHESTER J. SIMMONS

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. KILDEE. Mr. Speaker, I rise today to pay tribute to Chester J. Simmons of Flint, MI, who died Sunday night at the age of 60 years old.

Chester Simmons was a remarkable man, a man whose ideas about justice changed the lives of the people who knew him and forever changed my hometown of Flint. In his most recent position as the city's affirmative action officer, and in his more than a quarter century of fighting racial discrimination, Chester Simmons was victorious.

In the most literal sense, he was victorious because he got things done; he succeeded in replacing discriminatory policies with just ones. He helped make open housing a reality in Flint. His work with Model Cities, a renewal program in the area, created new job opportunities for African-Americans. He helped lay the foundation for re-examining the city's affirmative action policies in 1984, and his work with the Genesee County Community Action Agency, as a first ward councilman and on the Genesee County Board of Supervisors

opened many, many new doors for African-Americans. In doing so, he made our city and our society more decent.

There is another way in which Mr. Simmons was victorious. He was victorious because he did not yield his dream. He did not yield it to fear, or to weariness, or to cynicism. He was true to himself and his own deep surety that all people, regardless of race, sex or creed, are valuable and deserve equal treatment under the laws and policies of this land. It was a concept Chester took firm hold of as a young adult and never let slip from his grasp.

I believe, too, that Chester's life was one of profound hope. Through the decades, there were many times when changes in attitudes about race were not readily apparent, times when it appeared that racial stereotypes were too entrenched to ever be completely routed. Both in the times of slow change, and in the times of dizzying breakthroughs in the 1960's, Chester kept his eye fixed firmly on his goal and moved steadily towards it. It was this hope—the hope that, in the words of Martin Luther King, people would one day be judged not by the color of their skin, but by the content of their character—that made Chester Simmons a victorious warrior in the battle for justice.

I knew this special man for many years, since the 1950's, when I was a teacher at Flint Central High School and acting as assistant youth director of the NAACP. From our first conversation in the 1950's to our last conversation earlier this month, I learned and I grew because of the words Chester Simmons spoke.

He was not only an intelligent man, he was a deeply caring man, a rare combination of uncompromised principles and personal kindness. I owe much to Chester, as many in our city do. He was loved and respected and will be very missed by his family, his friends, and the countless number of people whose lives he touched.

Chester did not live to see the dream of perfect racial equality become a reality. But I, and many others in Flint, know that although Chester will not see the final chapter in our history of civil rights, he himself made history in the struggle for racial justice in Flint, MI.

H.R. 2222, THE CABLE CONSUMER PROTECTION ACT OF 1989

HON. CHRISTOPHER SHAYS

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. SHAYS. Mr. Speaker, on May 3, Senator JOSEPH LIEBERMAN and I introduced legislation that takes an important step toward putting the right to regulate the cable television industry back where it belongs—in the hands of the States and local authorities that grant cable franchises in the first place.

Since 1984, when Congress took away the ability of States and municipalities to directly regulate this industry, cable customers have been at the mercy of growing regional monopolies. Our bill, the Cable Consumer Protection Act of 1989, will help protect cable subscribers from these monopolies.

The Cable Communications Policy Act of 1984 removed the ability of most franchising authorities to regulate subscriber rates. The legislation was intended to "promote competition in cable communications and minimize unnecessary regulations that would impose an undue economic burden on cable systems" by establishing one national regulatory policy for the industry.

The 1984 act had just the opposite effect. It created a network of regional cable monopolies that have little incentive to provide competitive rates or services. Without Federal regulation, prices in many areas have skyrocketed. Since 1987 the national average monthly cable television rate has increased 32 percent.

One of these regional monopolies services southwestern Connecticut and the New York area. "Basic" service fees in my congressional district have risen dramatically—from $4.50 in 1984 to $19.95 today—and customers are not receiving all the programs and services they contracted and paid for. Under the 1984 legislation, cable operators are allowed to drop components of their service with no reimbursement or recourse to the consumer.

Our legislation would help put an end to these practices. The bill:

Gives franchising agencies the authority, if they choose to use it, to issue regulations governing rates and allows them 180 days to implement these regulations;

Grants franchising authorities the right to require 60 days notice of changes in service, including dropping of service or rearrangement of programming. It permits the regulators to hold public hearings on proposed changes and to adjust rates as a result of these service changes;

Limits further concentration of ownership by permitting franchising authorities to use high concentration of media ownership as a criterion for: First, prohibiting the purchase of a cable system; or second, denying renewal of a franchise; and

Requires cable systems to provide adequate carriage of local stations, including network, independent and public broadcasting stations, in order to be eligible for long-distance and local compulsory copyright licenses, which currently permit cable operators to pay a prorated copyright fee for over-the-air programming they pick up without being liable for a copyright suit.

There was clearly no compelling reason to deregulate the cable industry. It was a mistake that should be rectified immediately. The only ones who seem to have benefited from cable deregulation are the operators themselves who have cornered regional service markets.

With no meaningful competition in the cable industry now and little promise of any in the foreseeable future, for the sake of the consumer, these regional monopolies should be regulated. Until competition exists, the Cable Consumer Protection Act can help safeguard the interests of cable subscribers everywhere.

MENTAL HEALTH FOR CHILDREN

HON. GERRY SIKORSKI

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. SIKORSKI. Mr. Speaker, the National Mental Health Association [NMHA] has proclaimed May as National Mental Health Month, and this year's theme is "Mental health begins at birth. Remember the children."

I applaud the NMHA for choosing children as the focus of its educational campaign this year, because few issues are more important to our fate as a nation than the health and welfare of our children. Recognizing this, Congress created a National Commission on Children, the goal of which is to comprehensively examine the status of children in our society and to explore ways in which public and private institutions at the Federal, State, and local levels can improve the quality of their lives. Its mission reinforces the ongoing efforts of the Select Committee on Children, Youth and Families, on which I serve, by providing a much needed forum and context for considering the ramifications on children of our public policy decisions. In order to improve children's overall health status, the Commission must be sure to look at not only children's physical needs, but also their mental and emotional needs.

Recent studies have begun to measure the extent to which our young people suffer from mental or emotional disorders, and the results are alarming. For example, a 1986 study by the Office of Technology Assessment found that at least 12–15 percent of those under 18 years of age—7.5 to 9.5 million young people—suffer from a mental health problem severe enough to require treatment. The Centers for Disease Control recently released a study that found that one out of every three eighth, ninth and tenth graders in 20 States admitted that they had seriously considered suicide, and 15 percent had actually attempted to kill themselves. Experts estimate that more than 5,000 adolescents actually take their lives every year.

A 1988 survey exploring the adult perceptions of problems faced by adolescents and children, which was conducted by Riter Research for the National Association of Private Psychiatric Hospitals, found that the vast majority of adults believe that the myriad of problems faced by today's youth including child abuse, drug and alcohol abuse, depression, teen pregnancy, suicide and attempted suicide constitute a national crisis. In fact, 27 percent of those surveyed personally knew a teenager or child who had either attempted or committed suicide; 56 percent knew a child or teenager that had suffered from depression; and 58 percent and 56 percent, respectively, knew a teenager or child who had an alcohol or drug abuse problem.

Despite the enormous need for mental health services among this population, less than 50 percent receive outpatient care, and less than 1 percent of those under 18 receive hospital or residential treatment services. The

OTA estimates that approximately 70–80 percent of these troubled young people are not getting the care they need. Instead, the burden of coping with the mental and emotional needs of young people may fall to underfunded child welfare departments, juvenile justice systems, and educational and public health systems, few of which are organized to provide appropriate mental health services.

We must do a better job of dealing with this problem, not only by assisting our public health systems, but also by encouraging public and private health insurance plans to provide better coverage for mental and emotional disorders. Appropriate health insurance coverage should provide for a full continuum of services—from outpatient to partial hospitalization—so that our children and adolescents can receive the most appropriate treatment available for their problems.

Because of the clear presence of the stigma in our society regarding mental illness, we must also do a better job of educating the public about the availability and efficacy of treatment.

Although the adequate funding of public programs will take time, many mental health organizations can help right now to provide education about the resources that are currently available. For instance, the American Psychiatric Association has available a series of 12 pamphlets—each about a specific mental illness. The American Academy of Child and Adolescent Psychiatry publishes 35 "Facts for Families," including information on the mental illnesses affecting American youth today and strategies for treatment and intervention. The National Association of Private Psychiatric Hospitals offers a pamphlet outlining its admissions and discharge criteria for the hospital based treatment of children and adolescents. Other valuable information is available from the National Alliance for the Mentally Ill, the National Mental Health Association, the American Psychological Association and others.

I urge my colleagues and all Americans to take advantage of this free information.

RETIREMENT OF SUSAN GALBREATH

HON. WILLIAM O. LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. LIPINSKI. Mr. Speaker, I rise today to honor Ms. Susan Galbreath, who has just completed 35 years of dedicated service to the Chicago Park Service. Ms. Galbreath, who retired on March 31 of this year, has completed a fruitful career which may be used as a model for all of us. Through selfless public service, Ms. Galbreath has shown that one person may make a tremendous difference in the lives of others.

Susan Galbreath began her career as a recreation leader for the Kennedy Park in 1952. Her penchant for hard work and her motivation allowed her to retire a physical activity leader for Areas 2 and 4 of the park district. Through her service, the people of Chicago have had a productive outlet by which they may channel their energies, and she has provided an alternative for Chicago's youth to the violence which runs rampant in so many of our Nation's cities. For this we may all be grateful.

My colleagues, I ask you to join me in saluting Susan Galbreath for her work and in wishing her much happiness in her future life.

CONGRESSIONAL SALUTE TO MS. DIANE HAZELROTH

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. MATSUI. Mr. Speaker, I rise today to pay tribute to an outstanding member of my community, Ms. Diane Hazelroth, who has been selected by the Sacramento Association of Realtors as their choice for Citizen of the Year. It is a well-deserved honor bestowed upon Ms. Hazelroth in recognition of her dedication and volunteer service to the community which has greatly contributed to the enrichment of Sacramento.

Diane Hazelroth's seemingly infinite energy has improved the quality of life for all those with whom she comes in contact. Many organizations have been the benefactors of Diane's spirit of giving and strive for excellence. As chair of the 1988 United Way Campaign, Diane's enthusiasm and ability to recruit and organize quality volunteers resulted in a $11.4 million success story. In addition, she was instrumental in the implementation of the United Way Board Bank Task Force, which developed a program to recruit and train 150 highly qualified employee volunteers from the private sector to utilize their talent and expertise as Board Members of nonprofit community organizations. Indicative of its success, this "Board Bank" serves as a national model for the United Way.

In addition to her seven year affiliation with United Way, Diane has served in various leadership positions in many other community organizations. Her creativity, talent, and leadership has contributed to the Board of Directors public television station KVIE; the Citrus Heights Chamber of Commerce; the Sacramento Metropolitan Chamber of Commerce, the American Lung Association and the Comstock Club. Diane has dedicated herself to helping others and serves as a role model for women as an advisory board member of WEAVE [Women Escaping A Violent Environment] and the Young Women's Christian Association. Her tireless effort and commitment to the ideals of these organizations is to be commended.

Mr. Speaker, Ms. Hazelroth truly exemplifies the spirit of community volunteerism and Sacramento is honored and privileged to have an individual of her caliber as a member of our community. I salute Diane for her outstanding contributions and congratulate the Sacramento Association of Realtors for selecting such a stellar representative of our community as their Citizen of the Year.

WOMEN'S BUSINESS EQUITY ACT

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. CONTE. Mr. Speaker, I rise today to introduce the Women's Business Equity Act of 1989. It is my great pleasure to introduce a bill that provides common sense solutions to problems women business enterprises face when trying to do business with the Federal Government. This bill will provide for permanent women's business enterprise advocacy and will greatly facilitate women business contracting actions. This is a bill for women's business equity in Federal contracting programs.

In May 1979, President Jimmy Carter issued Executive Order 12138, establishing a national women's business enterprise policy and National Program for Women Business Enterprise. This order was created in response to findings that recognize:

First, the significant role women business enterprises can play in promoting full employment and balanced growth in our economy.

Second, the many obstacles facing women entrepreneurs.

Third, the need to aid women business enterprises.

In furtherance of its findings, the order charged all departments and agencies of the executive branch to take appropriate action to preserve and strengthen women business enterprises. One subsection of the order charged the Small Business Administration with providing staff and support for the Federal women business enterprise effort.

Continuing and upgrading this important effort begun by President Carter is the reason I, and my distinguished small business colleagues, JOE MCDADE, IKE SKELTON, and ANDY IRELAND, are introducing the Women's Business Equity Act. Essentially, this bill amends the Small Business Act to do the following:

First, make permanent the Office of Women Business Enterprise at the SBA;

Second, create a preemptive and uniform certification process to be used by all Federal agencies in identifying women-owned businesses for Federal contracting opportunities; and

Third, include women business enterprises in Federal procurement through prime and subcontract goal setting. This bill would further require all agencies to include at least one bid from a women business enterprise for all small purchase orders under $25,000.

Beside formalizing Executive Order 12138, the Women's Business Equity Act also continues our fine congressional initiative from the 100th Congress, Public Law 100–533, the Women's Business Ownership Act of 1988. As originally introduced, H.R. 5050 contained a provision for women business enterprise procurement goaling, which was later dropped in conference. The language in H.R. 5050 did not change existing law but simply amended it to include women business enterprises in yearly prime and subcontracting goals. I

strongly supported that section and was extremely disappointed when it was deleted. I have modified that provision for inclusion into this bill—the major difference being that my bill also requires one women business enterprise bid on all small purchases under $25,000.

A major concern of women business enterprises nationwide is that the certification process used to identify women business enterprises is exceedingly cumbersome, costly and repetitive and frequently is more of a barrier than a pathway to participation. Apparently certifying women business enterprises has become somewhat of a business in its own right, with some Federal agencies requiring separate certifications on each job performed for the agency. This, of course, does not include the duplicative needs of State and local agencies. Certification generally includes a lengthy application plus 3 years back records—both business and personal. The cost for certification can range upward of $5,000 per application. Basically, all certifications are the same so for women business enterprises, and for the productivity of the American economy, repetitive certification is a monumental waste of time and money—precious commodities for any business let alone a struggling women business enterprise. My bill would simply establish a central certifying authority at the SBA. Any women business enterprise seeking to contract with any Federal agency or any State/local program utilizing Federal funds shall be required to submit an application to the SBA. The SBA shall establish uniform certification criteria in conjunction with the Office of Federal Procurement Policy and other agencies. Any certification issued shall be valid for a period of 1 year and shall be the exclusive certification required. Recertification would only require updated material.

My bill would also establish a definition of women business enterprise to mean one that is 51 percent owned and operated by one or more women. This is essentially the same definition used to determine economically and socially disadvantaged businesses except that in the case of women business enterprises, the community property laws of any jurisdiction shall not apply. This provision is necessary because there are approximately 13 community property States whose laws govern property acquired by husband and wife through joint effort. Using those community funds can be grounds for denial of certification—even if the woman owns all the stock and manages the daily operations of her business.

The Women's Business Equity Act, will establish: a permanent Office of Women Business Enterprise, agency goal setting in both prime and subcontracts, and a uniform/preemptive certification. I believe it will effectively help women business enterprises increase their share of government contracts above the 1 percent now achieved. My bill places women business enterprises on an equal footing with all small and small disadvantaged businesses and provides them with equal consideration regarding outreach and advocacy.

Women now own about 30 percent of all American businesses. By the year 2000, they could own 50 percent. However, many frustrating barriers still impede their drive for equality. Women are an important segment of our economy and require equal access in order to compete for their fair share of Federal contracting opportunities. My bill provides that opportunity. My bill removes those barriers. I ask all my colleagues to join with me, JOE MCDADE, IKE SKELTON, and ANDY IRELAND, and cosponsor the Women's Business Equity Act to support women's business equity in Federal contracting programs.

TRIBUTE TO ST. MATTHIAS PARISH

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. TRAFICANT. Mr. Speaker, I rise today to pay tribute to St. Matthias Parish of Youngstown, OH, on the occasion of their 75th anniversary. This blessed celebration in my 17th Congressional District is a perfect example of the deep religious traditions which hold this country together as "One Nation Under God." This anniversary is marked by a Mass of Thanksgiving to be attended by over 1,000 parishioners, which will be followed by a dinner-dance where I have the honor of being toastmaster.

St. Matthias parish was the idea of a group of Slovak immigrant families who had the vision to establish a strong church/school community. The first services in July 1914 were held in a rented home, but through generosity and hard work by generations of families the St. Matthias Parish plant today contains a school, convent, rectory, and church, all debt-free. This once vision has now become a reality that 1,041 families share.

Today, a highly dedicated staff of Vicentian Sisters and lay people provide an unsurpassed education for St. Matthias students. Along with this quality education, the school offers a multitude of athletic programs which the students as well as the community take an active role. Over 3,000 students have graduated from St. Matthias creating a strong alumni which includes myself.

Mr. Speaker, I ask that the House join me today in honoring St. Matthias parish community. May this parish, which I was once fortunate enough to attend, continue to prosper in the next 75 years. It is truly an honor and a privilege to represent such a fine community organization.

A SALUTE TO THE DANCE THEATRE OF HARLEM

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. DELLUMS. Mr. Speaker, I rise to pay tribute to an outstanding dance company, the Dance Theatre of Harlem.

Under the leadership of its founder, Arthur Mitchell, the Dance Theatre of Harlem has, since 1969, brought hundreds of thousands of dance lovers around the world to their feet as a result of its innovative well-choreographed performances. The history of this company is a rags to riches story, which emanated out of Harlem, NY, going from local popularity to become one of the most sensational dance experiences on stage today.

Arthur Mitchell has taken his talents and has not only shared them with disadvantaged youth from the black community, but has built bridges of understanding between black Americans and the cultures of the world. It has been a distinct and uplifting pleasure to watch the company's art form breaking into the world of American, and then to international ballet.

In a time when nations feared and fought each other, when dialog was needed between peoples of the world, Arthur Mitchell and the Dance Theatre of Harlem were ambassadors of peace, promoting understanding and the university of human experience through an art form that can only be described as exhilarating.

Mr. Speaker, Arthur Mitchell and the Dance Theatre of Harlem are not only to be commended for outstanding contributions to the world of the arts, but also deserve recognition for their significant and eloquent symbolism in support of peace at home and abroad.

I ask my colleagues to join me in extending best wishes for continued success in all the future endeavors of Mr. Mitchell and the Dance Theatre of Harlem.

AWARD WINNER: PAM LUGINBILL

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. FRENZEL. Mr. Speaker, I rise to congratulate a young constituent from Minnesota's Third District whose essay was recently recognized in the Great Raisin Fitness Challenge.

Ms. Pam Lugenbill, a senior at Rosemount High School, wrote an essay on the topic of the importance of regular vigorous exercise and healthy eating habits for maintaining peak physical fitness. Ms. Lugenbill and the 11 other national winners have come to Washington, DC, to participate in a special program which includes a fitness forum for the benefit of these young essayists.

It's always a pleasure to see a constituent receive national recognition for excellent work.

RICHARD G. MORSE, SR.: FORTY YEARS OF PUBLIC SERVICE

HON. GERALD B.H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. SOLOMON. Mr. Speaker, one of the greatest public servants in my district is retiring June 1 after 40 years of loyal service, and it won't seem the same without him.

Richard G. Morse, Sr., has been clerk of the Greene County (N.Y.) Legislature for 9 years, and before that, town clerk and Republican

chairman of the Town of Windham, and sealer of weights and measures.

Service to his country came first. Morse served in the U.S. Navy during World War II and served 3 more years in the Naval Reserve. His love of country also has been reflected in membership in Veterans of Foreign Wars and the American Legion ever since his discharge from active duty.

Love of community has matched his love of country. He was well-known years ago as the owner of a grocery store, but still found time to serve as a volunteer fireman with Windham Hose Company since 1945, and has been active with Little League, Boy Scouts, the Windham Methodist Community Church, and the advisory board of Bankers Trust.

He will be honored by a surprise dinner on May 28, but it won't be the first time he has been honored.

Six years ago, he received the Presidential Recognition Award from President Reagan. The award honors "public and private sector employees, individuals, agencies, businesses and groups who provide outstanding service to their communities through their participation in worthwhile volunteer activities and public-private partnerships."

Mr. Speaker, Richard Morse, Sr., exemplified the purpose of the Presidential Recognition Award to the highest degree. An individual had to be nominated to be considered for the award, and Greene County legislators would be the first to testify to his worthiness. Mr. Morse's days were often 10-hours long, but he has never been too busy to help a neighbor, often without being asked. He is the kind of American who often stops to place memorials on veterans' plots in the local cemetery, paying his own quiet tribute.

Mr. Speaker, fellow Members, please join me in saluting a great American, Richard G. Morse, Sr., and in wishing him all the best in a long and well-deserved retirement.

RURAL HEALTH CARE IS IN A STATE OF EMERGENCY

HON. CLAUDE HARRIS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. HARRIS. Mr. Speaker, I rise today in strong support of the rural health initiatives put forth by the Rural Health Care Coalition on March 22, 1989. This coalition, which represents more than 100 Members of the House of Representatives, presented a bipartisan package of legislation designed to revitalize the rural health care delivery system in this Nation. I hope that my colleagues on the House Appropriations Committee will review this package carefully when they consider the budget later this year.

In my State of Alabama, during this past year, there has been a unprecedented increase in the number of closures of rural hospitals. In fact, our State leads the Nation in the number of closures. In 1988 there were 7 closures, including 4 rural hospitals. In 1989, the Alabama Hospital Association is predicting an additional 7 to 12 hospitals will close their doors. These closures represent a tragedy for a rural community. In addition to the loss of access to care, rural residents also lose a valuable employer for their communities.

The infant mortality portion of the package represents one of the brighest achievements in the package. Alabama has one of the highest rates of infant mortality in the Nation. The infant mortality initiative will expand the Maternal Child Health Program by $50 million. This expansion of the program will incorporate suggestions given by both local and national experts to lower the rate of infant mortality. The bill pioneers the use of mobile outstations where pregnant women can receive information about WIC, food stamps, Medicaid, and subsidized housing. By eliminating some of the difficulties of enrolling in the programs, it is hoped that more women will take advantage of these valuable programs. In addition, this initiative provides for the training of prenatal counselors to make some visits to high risk mothers.

Another highlight of the package is the elevation of the Office of Rural Health into an undersecretary position within the Department of Health and Human Services. This elevation will focus more attention on the needs of rural communities. It is important that the Secretary of Health and Human Services, Secretary Louis Sullivan, remember that rural areas are the backbone of America and deserve the same accessible, quality care that other citizens enjoy. For too long the needs of these communities have been ignored in favor of the larger, more populous urban areas.

I would also like to bring to the attention of my colleagues, the sense of Congress resolution that is being introduced today by my colleague, the Honorable ROBIN TALLON of South Carolina. I am proud to join Representative TALLON in his efforts to recommend the immediate elimination of the Medicare differential between urban and rural health care providers. This differential is unfairly contributing to the poor health of rural health care providers. When the differential was orginally established, policymakers justified this difference by correlating reimbursements to labor costs in the rural areas. In fact, recent evidence by medical experts have shown that costs are more expensive that that of urban areas in many cases. Labor costs should not be the only component in determining the real cost of providing a service.

SUPPORT OF THE RADIATION VICTIM COMPENSATION BILL

HON. WAYNE OWENS

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. OWENS of Utah. Mr. Speaker, today together with six of my colleagues from involved southwestern States, I am introducing the radiation victim compensation bill. This legislation would redress an outstanding national obligation to citizens in our region, who were unjustifiably and involuntarily sacrificed to advance our Nation's position during the "cold war".

They are either the heirs of Colorado Plauteau uranium miners who were unwittingly exposed to extraordinary levels of radiation in underground uranium mines, where ore for the Government's nuclear developments was mined during the 1950's, or they are the heirs and family members of fallout victims from the Government's nuclear testing in Nevada during that same era.

Both classes of victims have presented their cases to the judiciary system. In both cases, court opinions were issued that the deaths and injuries were caused by the radiation exposures, and that Government officials knew of the risks and failed to act. However, because the courts also found that the Federal decisions to disregard these people's iives and safety were premeditated, Federal sovereign immunity laws were applied to bar their claims. Indeed, it is because their deaths and injuries were deemed intended, or, in other words a policy decision of the United States, that they have gone uncompensated under current law.

They are the victims of the "cold war", who, unlike other war victims, could have chosen to live or work elsewhere, had they been informed of the danger.

Both the 9th and 10th Circuit Courts of Appeal struggled in these cases with the unjust result imposed by applicable Federal sovereign immunity laws. The ninth circuit stated "we agree with the district court that this is the type of case that cries out for redress, but the courts are not able to give it: Congress is the appropriate source in this instance."

This legislation would respond to these judicial recommendations with a national apology and modest, but long overdue, compassionate payments, similar to those provided for victims of the "Texas City Disaster" and Japanese-Americans who were unjustly interned during World War II. I invite you, Mr. Speaker, and my colleagues in the House of Representatives to join in fulfilling this outstanding national obligation.

SPECIAL TRIBUTE TO MARIAN HANCOCK

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. LAGOMARSINO. Mr. Speaker, I rise today to join in paying tribute to Marian Hancock. It is truly fitting that the Marian Medical Center Foundation is bestowing its first endowment in Mrs. Hancock's name. She, along with her late husband, G. Allan Hancock, donated the site of land on which the Marian Medical Center is located.

The Marian Medical Center is Santa Maria's only not-for-profit medical center. This endowment will allow the excellent care the center has provided over the years to continue. In addition, this endowment provides the assets needed to acquire new state-of-the-art equipment and continue to advance as future needs are identified.

In Santa Maria, Mrs. Hancock is well known and respected by her friends, neighbors, and fellow citizens. She has been selfless in giving of herself not only in Santa Maria but through-

out the State of California. She is known for providing the leadership which is necessary to get the job done. Mrs. Hancock has contributed much to her community through her philanthropic activities.

And so, in joining in this tribute I am pleased that Santa Maria can claim this remarkable woman as a member of its community. Congratulations on this distinguished honor. No one is more worthy of being honored at this first endowment activity than this year's recipient who is so being honored.

RURAL HEALTH CARE

HON. BILL EMERSON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. EMERSON. Mr. Speaker, those of us who live in rural America are facing some difficult times in the arena of health care. As one who believes that access to quality medical care should not be limited by your age or your income or by where you live, it is extremely important to me that our rural hospitals, health care practitioners, and patients be treated with the utmost fairness. As it stands now, there are some serious inequities in the way that Medicare reimburses for health care in rural areas.

Of course, rural America can't continue to take this. That is why the efforts of the House Rural Health Care Coalition are so tremendously important. I am asking my colleagues to join me in supporting the legislative package that the coalition has introduced in the 101st Congress. Eliminating the urban/rural differential in Medicare reimbursement for physicians and hospitals, improving the qualifications for "sole community provider" status for hospitals, and creating incentives by which we can attract more doctors and health professionals to rural America are among the highlights of this package.

I urge my colleagues to join me in this effort to bring fair and equitable health care policies to rural America. We must continue to make progress in this area if we are to meet the unique challenges that we face in delivering health care in this Nation.

TO HONOR CONGREGATION HABONIM

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. WEISS. Mr. Speaker, later this year, Congregation Habonim, a synagogue in my district in New York, will celebrate its golden anniversary. The congregation, founded by men and women who had fled from persecution in Nazi Germany, has experienced 50 years of successful achievements in its community.

I would like to insert into the RECORD the text of a letter I have sent to Rabbi Bernhard N. Cohn, the Rabbi of Congregation Habonim, congratulating him and them on this wonderful occasion.

DEAR RABBI COHN: I am proud to extend my congratulations to Congregation Habonim on the occasion of your 50th anniversary.

Like the men and women who founded Congregation Habonim in November of 1939, I was one of the fortunate few to leave Europe shortly before the worst of the Holocaust began. I feel privileged to be associated with the "bonim"—builders—of that time, who were all forced to rebuild their lives, and to recapture their religious tradition. The fact that this congregation is celebrating its golden anniversary is a testimony to the success of its founders in that effort.

I commend all the leaders and members of Congregation Habonim for your achievements and for your activity in the community, and I look forward to sharing many more years of success with you.

Sincerely,

TED WEISS,
Member of Congress.

TRIBUTE TO THE LATE WILLIAM McDONALD WHEELER

HON. J. ROY ROWLAND

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. ROWLAND of Georgia. Mr. Speaker, William McDonald Wheeler—known as "Don" to his legions of friends in Georgia and around the country—recently passed away in his beloved hometown of Alma, GA, where he was born and raised and where he resided for most of his 74 years.

For 8 of those years, 1947 until 1955, he served with distinction in the U.S. House of Representatives.

Don Wheeler contributed a depth of knowledge to Congress in a wide range of areas, including education, agriculture, and business. He was educated at South Georgia College in Douglas, Middle Georgia College in Cochran, Georgia Teachers College at Statesboro, and in 1966 received his LL.B. from the Atlanta Law School. As a young man, he taught school and served as a principal of junior high schools in Bacon and Appling Counties. He also farmed and tried his hand at sales and public relations. He served as tax examiner for the State of Georgia, on the staff of the Georgia Motor Vehicle Division, as coordinator for Federal programs for the Bacon County Board of Education, and once strayed to Mississippi where he served as assistant director of the Governor's Highway Safety Program.

He was always a leader. He enlisted in the Army Air Force early in World War II and rose to the rank of captain by the time of his discharge in 1946. Within a year, he had been elected to Congress, representing an area of Georgia that is now a part of the Eighth Congressional District, which I have the honor of currently representing.

Don approached the problems of Government with both philosophical and pragmatic insight. During my own years in Congress, I always found his incisive views and sound advice to be of great value. All of us have lost a friend.

SALUTING RAY RING

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Mr. STARK. Mr. Speaker, I wish to take this opportunity to pay tribute to Ray Ring for his numerous contributions in the Hayward and San Leandro communities. Ray has an impressive military service record in addition to commendable community service.

His decision to enter the U.S. Coast Guard in 1938 began a long history of dedicated service. In 1946 he received an honorable discharge. Ray began volunteering as a veteran's representative after being disabled from an injury while he was employed. He has traveled over 100,000 miles and spent over 15,000 hours at different VA hospitals. He is committed to assisting fellow veterans wherever and whenever a need arises.

Ray's schedule of volunteer work includes a position as State service officer for the Veterans of Foreign War. He has earned the honorable distinction of commander-elect of District 14 of the Veterans of Foreign Wars post, a 19-post, 9,000-member organization. Ever eager to participate with the VFW, he also serves as their fifth area chief of staff and national aide-de-camp for the recruiting class.

His philanthropic duties permeate throughout the community, touching the lives of the unfortunate. His compassion and inspiration are exemplified through his work with homeless individuals. Ray has channeled his energy for the community by distributing surplus food donated by businesses in the Hayward-San Leandro area to these forgotten, needy people.

Ray Ring's civic and military involvement is a testament to a career of service and dedication toward those less fortunate. His willingness to help others benefits all of us. Lucky are those who have been affected by his courage, understanding, and good will. He deserves our recognition as a fine example of American citizenry.

PROMOTING INTER-AMERICAN COOPERATION OVER RAIN FORESTS

HON. CLAUDINE SCHNEIDER

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 16, 1989

Ms. SCHNEIDER. Mr. Speaker, today, I am introducing a resolution that promotes a cooperative effort between Brazil and the United States to implement ecologically sustainable management of rain forests and other fragile natural resources.

Last year, the Congress unanimously passed House Joint Resolution 648 that was signed into law, calling on the President to vigorously pursue an international treaty to conserve the Earth's animal and plant species, which are being lost at an unprecedented rate. Much of this loss is occurring as the result of tropical rain forest destruction, which

has been vividly documented in Landsat photos. Stopping this destruction has become a central, and controversial, issue in the environmental community. Concern in some quarters has resulted in a call for any and all measures to stop this destruction, including trade embargoes on products from countries that fail to halt this loss of biological diversity. While this reaction is understandable, it is not constructive.

Recently, I organized a meeting with a number of congressional colleagues to meet Brazilian Congressman Fabio Feldman, the leading environmentalist in the Brazilian Congress. During this meeting, Mr. Feldman explained that the Brazilian Government viewed the suggestion of trade embargoes as a serious threat to Brazilian national sovereignty.

We discussed setting up a linkage between the Brazilian and United States Congresses to encourage better understanding between our two nations. In the face of global climate change and the threat to the Earth's biodiversity, we must work together with Brazil to pursue a strategy that is mutually beneficial. To that end, Senator REID and I have introduced companion joint resolutions, encouraging a national policy effort that promotes a spirit of cooperation between Brazil and the United States. The resolution encourages an expeditious effort to implement ecologically sustainable management of rain forests and other fragile natural resources. This can, and should be done in a way that respects, not threatens, the sovereignty of Brazil.

This policy is one that will lead to understanding and progress. The promotion of sustainable forestry is environmentally sound and economically viable. It is a constructive policy that incorporates economic growth and mutual understanding into our view of the global ecosystem.

The text of the resolution follows:

H.J. RES. —

Whereas tropical forests are the world's storehouse of biological diversity, containing more than one-half of the plant and animal species on earth, with millions yet to be described by scientists;

Whereas these tropical forests are a major absorber of atmospheric carbon dioxide and help prevent its potentially serious buildup in the atmosphere;

Whereas more than one-half of the world's medicines were derived from wild plants and animals;

Whereas future medicine, industry, and agriculture will depend on genetic resources found in nature;

Whereas approximately one-third of the world's tropical forests have already been lost and over 30 million acres are being cleared each year, primarily without reforestation, and this trend threatens the futures of all nations;

Whereas some United States assistance to tropical forest nations has encouraged nonsustainable forest development and environmental impact analyses are not required for all of this assistance;

Whereas the United States has imported tropical forest products derived from nonsustainable utilization of these forests;

Whereas successful foreign policy to help developing nations establish effective conservation programs and support democracy must include exchange of technology and managerial expertise;

Whereas Brazil and other sovereign nations with tropical forests are developing effective conservation programs, and the United States wishes to work together with them in these efforts;

Whereas practicable technology and management strategies are greatly needed to manage sustainable uses of tropical forests, and the United States desires to help develop these technologies and

Whereas nongovernmental organizations in concerned nations are playing an increasingly important role in tropical forest conservation and conservation of biological diversity: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That it is the policy of the United States—

(1) to work together as a partner with nations with tropical forests within their borders to help conserve these forests and help ensure that any utilization of these forests is carried out on a sustainable basis;

(2) to furnish United States assistance programs, including multi-lateral banks, for the maintenance of tropical forests and sustainable uses of these forests, complemented by professional environmental analyses;

(3) to support the strengthening of intercongressional links between the United States and Brazil, and between the United States and other nations owning tropical forests, to explore jointly partnerships in forest conservation and sustainable economic growth;

(4) to encourage nongovernmental organizations to work with governments to help design, implement, and assess sustainable forest management policies and programs for conservation of tropical forests and bilogical diversity;

(5) to establish a bilateral agreement between the United States and Brazil and between the United States and other interested nations to share technology, experience, training, and research in tropical forest conservation, through direct personal contracts with congressional, scientific, educational, and management personnel;

(6) to encourage and directly support development of model projects demonstrating sustainable use and conservation of tropical forests;

(7) to support increased research and training by the United States in tropical forest ecology and management; and

(8) to place extremely high priority on the conservation of the world's tropical forests and the biological values and opportunities found in these forests.

SEC. 2. REPORT.

Not later than one year after the date of enactment of this joint resolution, the President shall submit to the Congress a report describing progress made toward the purposes in the first section.

HOUSE OF REPRESENTATIVES—*Wednesday, May 17, 1989*

The House met at 12 noon.

The Reverend Martin Ruge, pastor, St. Paul Lutheran Church, Neenah, WI, offered the following prayer:

O God, You are so good to us. You really are! You love us so much, and You place such trust in us. You created this world, and then You gave us dominion over it.

We know, for instance, that just about every decision made in this room, directly or indirectly, affects the whole world.

Realizing that, and knowing how much You trust us, help us to trust You more and more. Amen.

Let it be so. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. SMITH of Vermont. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. SMITH of Vermont. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 295, nays 113, not voting 26, as follows:

[Roll No. 56]

Mr. YOUNG of Alaska changed his vote from "yea" to "nay."

Mr. GIBBONS changed his vote from "nay" to "yea."

So the Journal was approved.

The result of the vote was announced as above recorded.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore (Mr. NAGLE). The Chair will ask the gentleman from Oklahoma [Mr. INHOFE] to lead the House in the Pledge of Allegiance.

Mr. INHOFE led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Lundregan, one of its clerks, announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H.J. Res. 170. Joint resolution designating May 1989, as "National Digestive Disease Awareness Month."

The message also announced that the Senate had passed a joint resolution of the following title, in which the concurrence of the House is requested:

S.J. Res. 113. Joint resolution prohibiting the export of technology, defense articles, and defense services to codevelop or coproduce the FSX aircraft with Japan.

PASTOR MARTIN E. RUGE

(Mr. DAVIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DAVIS. Mr. Speaker, I am pleased to host Pastor Martin E. Ruge of Neenah, WI, as our guest chaplain. I have known Reverend Ruge for 10 years, dating back to his days as pastor of Emmanuel Lutheran Church in Menominee, MI.

It is for a special reason that he has been honored as our guest chaplain. On May 25, Reverend Ruge will celebrate his 25th anniversary in the ministry, a ministry that is special in many ways.

It is my great pleasure to play a small part in honoring a man who has meant so much to so many people. His history is one of service to God and man. He is probably best known as a minister who takes his message beyond the church walls and into the community—to the needy, the handicapped, and the elderly.

Let me also add that Pastor Ruge's son, Mark, is my extremely able chief of staff.

Reverend Ruge, it is people like you who make America a better place. Thank you for joining us today.

□ 1230

REPEAL AND REPLACE THE MEDICARE CATASTROPHIC COVERAGE ACT OF 1988

(Mr. McNULTY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McNULTY. Mr. Speaker, I rise today to address a matter of great concern to me and my constituents in the 23d District of New York, the Medicare Catastrophic Coverage Act of 1988.

I have received almost 1,500 letters on this subject in the last month, the overwhelming majority of them asking that Congress either delay implementation or repeal the program altogether.

I believe the time has come for Congress to reexamine this issue in depth. While we strive to provide protection from the financial devastation a serious illness can bring, we must not—and cannot—achieve this in a manner that penalizes the intended beneficiaries.

Estimated revenues far exceed what was projected to create the fund reserve. I am encouraged that serious consideration is now being given to cutting the premiums.

But we must go further. This is the first entitlement program to be funded entirely by its beneficiaries. It is just not fair to our seniors, who have borne heavy costs throughout their lives with the hope and belief that in their later years they would bear a lesser burden.

Mr. Speaker, I think we should repeal the Medicare Catastrophic Coverage Act of 1988, and it should not be replaced unless, and until, a plan is developed which has the support of America's seniors.

LET US END THE OUTHOUSE EFFECT

(Mr. SAXTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SAXTON. Mr. Speaker, we have all been hearing about the "Greenhouse Effect." Today I want to talk about the "Outhouse Effect."

The outhouse effect is what we have subjected our oceans to by allowing the dumping of pollutants—most particularly, sewage sludge.

Not long ago we looked on in horror as hundreds of dead dolphins washed up on the beaches of the Atlantic coast. A Government report said they got sick from algae—despite the fact that they were so full of dangerous pollutants that they could qualify as superfund toxic waste sites.

And in my own State of New Jersey, we are subjected to new advisories, new cautions, on the consumption of bluefish.

In the last Congress we enacted a new law to stop ocean dumping by 1991. Now we have to see that the new law is enforced. Dumping in the ocean must stop, period.

But that is just a starting point. This year I introduced H.R. 403. It will crack down on the discharge of pollutants into our bays and estuaries through pipelines.

This is important legislation. It is timely legislation. I ask my colleagues to cosponsor H.R. 403, and move us a step closer to ending "Outhouse Effect."

OPPOSITION TO FSX AGREEMENT

(Mr. HARRIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HARRIS. Mr. Speaker, I share the concerns of many of my colleagues over the administration's announced agreement with Japan for development and coproduction of the so-called FSX fighter aircraft. We all recognize the military need for Japan to take a larger role in providing for air defense in the Northern Pacific, and the need for replacement of Japan's F-1 fighter. But Mr. Speaker, agreeing on the need does not mean that we have to agree on the administration's proposed solution. For that reason I am also disappointed by yesterday's vote in the other body.

The administration's solution does not meet present military needs. Even if the FSX as an aircraft were the best plane available, and clearly it is not, it will not be available until the mid to late 1990's. The development from scratch of this new aircraft does nothing to address the air defense needs of today's Japan. According to reports, the plans for this FSX aircraft show it best suited for the close air support role rather than serving as an air defense or air superiority fighter. When facing the large array of modern aircraft the Soviet Union has stationed in Northeast Asia, you would expect Japan to be concerned with obtaining an aircraft specifically designed to defeat that threat today.

Mr. Speaker, there are other airplanes now available to Japan, which are superior to the proposed FSX. The McDonnell-Douglas F-18 is a fighter aircraft widely used by the United States, its NATO allies, and other countries throughout the world. This twin engine aircraft offers a measure of safety for its pilots not found in single-engine aircraft, and this is especially important given that these planes will operate over open ocean for much of the time. Japan itself already operates the McDonnell Douglas F-15 air superiority fighter, and additional procurement of this aircraft would certainly meet Japan's air defense needs. The F-16 is a relatively inexpensive fighter aircraft which is available for immediate purchase. For years the Japanese have denied their purchasing policies and economic market were closed to the United States' goods and services. They have said repeatedly, "when you make a better product at a low price, we will buy it." Now we have a variety of such products, and Japan still refuses to buy from the United States and is giving preference to their own product. In sum, Mr. Speaker, the FSX is not the best plane at the lowest cost, and available at the earliest date.

Those who support this agreement criticize opponents as protectionist. However, Mr. Speaker, they cannot explain how that basic tenet of free trade, selection of the best product at the lowest price for earliest delivery, regardless of source of origin, has been totally rejected by Japan in this case. The burden is on those who support

this agreement to convince the Congress and the American people that the FSX is not just another example of Japan's strategic approach to export economics. Is Japan's real concern its own legitimate military security needs? Or, is it seeking new technology so as to enter the commercial aircraft production market using technology it has taken us years of research and billions of dollars to develop?

Mr. Speaker, I oppose this agreement and will vote against it because it clearly is not in the best interests of either the United States or Japan.

WHERE IS THE SUPPLEMENTAL BUDGET?

(Mr. SOLOMON asked and was given permission to address the House for 1 minute.)

Mr. SOLOMON. Mr. Speaker, yesterday I stood in this well and I asked all of the Members to pick up the telephone, call the veterans' hospital in their district, and find out the dire financial situation there. Many Members did, and I thank them for it. Many of them did not.

Mr. Speaker, if they had, they would have found out that the veterans' hospital serving their district, is on average $4 million short for this year. That means veterans are being turned away for their prescription drugs, nurses are being laid off, doctors are being laid off, hospital wards are being closed down, and the situation worsens every day we delay in passing a supplemental budget to help alleviate this shortfall. I ask you, Mr. Speaker, where is the supplemental budget? There is $700 million available and already agreed to. The money is there. All we have to do is pass it. Stop holding this supplemental hostage. Get it on the floor today. Let us pass it.

The Senate is going home next week and they will not be here. We are going home the week after, and we will not be here.

Think of what is happening to those veterans out there, and get that supplemental budget on this floor.

BRING NORIEGA BACK HERE TO JUSTICE

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, while everybody keeps shouting wolf in Nicaragua, we have a war raging right here in the Nation's Capital, right here on the streets of what is becoming Dodge City. The murder rate here is beginning to compare with that of all of Canada.

Meanwhile we have a dictator in Panama who holds the locks of that canal in the palm of his hand. He smuggles drugs into America. We keep looking at Nicaragua and shipping them money. I say that Nicaragua is like a fly on our face compared to Panama, which is beginning to look like an elephant eating our behind.

I urge the President to go after him, No. 1, and, No. 2, I urge Congress on both sides to support the President in going after him and bringing him back here to justice.

BATF SHOULD NOT DECIDE WHICH GUNS AMERICANS MAY OWN

(Mr. MARLENEE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MARLENEE. Mr. Speaker, the Bureau of Alcohol, Tobacco and Firearms has in the past displayed Gestapo tactics. We ought not to allow an agency which has displayed Gestapo tactics in the past decide for the American public which guns they may own or may not own.

Mr. Speaker, I am including in my text here in my 1-minute speech an editorial. Let me quote from it:

[From the Washington Times, May 9, 1989]

THE VICTIM: "I AIN'T DEAD"

"If it weren't for [my stepson] and his gun, I'd been dead. We'd all been. Sure of that," the victim of an attacker who broke into his home told The Washington Post.

Congress is worried about guns owned by victims.

"He grabbed me and pushed me over the bed and held my cane against my neck," The Post reported, until the man's 48-year-old stepson arrived to begin a death struggle with Ernest Lamont Chase, the intruder.

"In the living room, the stepson managed to reach under the cushions of his easy chair and get his gun, a 9mm Smith & Wesson pistol. . . . 'I only tried to clip the guy. Hit him low in the gut first, but he was crazy up on drugs or something and he just kept coming.'"

Congress says law-abiding citizens "don't need" guns.

"Officers found a folding knife with an eight-inch blade in Chase's pocket," The Post reported, adding that "Chase had two convictions, a misdemeanor narcotics charge in 1985 and a burglary charge for which he received a six-month suspended sentence and three years' probation last September."

But instead of tossing Ernest Lamont Chase in jail, Congress would disarm his victim.

"'It's not a very good feeling to have to shoot someone,' the stepson said. 'Don't like it a bit, but I knew either he was going to be dead or I was going to be dead. I ain't dead.'"

No you ain't, but no thanks to Congress. Rather than giving police the power to toss criminals in jail where they belong, Congress is going to take guns away from old men with canes and joggers in Central Park.

Mr. Speaker, I do not think that we ought to allow BATF to decide for the American public who should and should not own what revolver.

VETERANS' ADMINISTRATION HAS DENIED AGENT ORANGE CLAIMS FOR TOO LONG

(Mr. JONTZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JONTZ. Mr. Speaker, I was very pleased with the announcement last week by Secretary of Veterans' Affairs Derwinski that his department will not appeal a Federal district court ruling that orders the Veterans' Administration to rewrite agent orange disability compensation regulations. This is welcome news to the 34,000 Vietnam veterans who have filed claims, and all of the veterans who fought in that war.

This day has been a long time in coming. For too long, the VA has denied the claims of veterans exposed to agent orange. The VA prides itself on being the veterans' best friend, but unfortunately, this has not been the case with veterans exposed to agent orange.

The decision by Secretary Derwinski to prepare revised claim rules indicates that our Nation is, at long last, starting to recognize our responsibility to the veterans "who have borne the battle," in Vietnam. There is so much that we owe the Vietnam veterans. We can only ask for the continued patience of these men and women and their families, as we work to correct the agent orange injustice.

MINIMUM WAGE INCREASE EXPECTED TO COST 650,000 JOBS

(Mr. DELAY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DELAY. Mr. Speaker, we have seen this body pass a minimum wage increase, an increase from $3.35 to $4.55. The objective may seem praiseworthy, but the result will be lamentable. The increase is expected to cost approximately 650,000 lost job opportunities.

What costs, directly and indirectly, will society have to pay for this increase? To get some idea, look at who is sure to suffer most from the loss of job opportunities: The uneducated, unskilled, minority youths. The toll will be heaviest among inner-city youth. Can society withstand this loss? Look at the present unemployment levels of these groups:

Black teens in Detroit, approximately 52 percent;

Black teens in Chicago, 53.7 percent;

Teenagers in New York City, 23 percent;

Hispanic teenagers in New York Central City, 28.8 percent.

These figures are not unique to these cities; they reflect the unem-

ployment problems of our large metropolitan areas.

If this is enlightened thinking, if this is social and economic progress, please someone explain it to the individuals that I have just mentioned.

THE 21ST CENTURY AIRPORT APPROVED FOR DENVER

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, I am very proud to rise in this Chamber today to say that my city of Denver, CO, yesterday voted a very, very strong mandate to move forward with a 21st century airport. This, indeed, will be the world's largest airport, and it is one of five that the FAA says we definitely need to be able to keep up with the infrastructure in our lead in air transportation in the next century.

We all know that it is easy to say what it is that we need, and most communities tend to say, "But not here; thank you very much." So I am very proud of the tremendous, resounding majority of the people in my district who voted and said, "Yes, we need it and, yes, we are willing to put it here."

I think now that we get on with building it and doing it and getting ready.

□ 1240

SUPPORT THE PRESIDENTIAL VETO OF H.R. 2

(Mr. BALLENGER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BALLENGER. Mr. Speaker, unemployment in our country is just over 5 percent, the lowest it has been in 15 years. But leave it to Congress to try and stop the current economic expansion by mandating a wage increase to $4.55 an hour. An increase of this magnitude will destroy thousands of job opportunities for the young, the low-skilled, and the disadvantaged. In addition, raising the minimum wage will adversely affect small businesses, which create 70 percent of all new jobs.

H.R. 2 will also result in higher inflation and interest rates. The direct cost to consumers will be over $12 billion. There will also be an impact on the Federal budget to the tune of $2 billion. Indirectly, we could expect to see the Federal budget increase another $5 billion through higher interest costs and higher benefits costs on programs. With a budget deficit of at least $147 billion, we don't need to be looking for ways to further increase the deficit, nor do we have the resources to pay for such an increase.

A workable alternative to the minimum wage does exist. The Family Living Wage Act shares an identical goal with that of increasing the Federal minimum wage. It would provide direct financial assistance to workers at the bottom rung of the income ladder and it would accomplish that goal without a harmful effect on the American economy.

Unfortunately, this sensible solution has not been considered by the Congress.

Support the Presidential veto of H.R. 2 and give the Family Living Wage Act the serious and thoughtful consideration that it deserves.

RAISE THE MINIMUM WAGE

(Mr. POSHARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. POSHARD. Mr. Speaker, imagine the kind of courage it takes to keep your family together when you're working at a minimum wage job and absolutely every penny counts.

And imagine the kind of decisions the working poor in this country have to make—whether to pay the rent or clothe the kids.

It's not hard to imagine if—like I have—you have ever spent any time with people on the verge of disaster because they are working for a minimum wage that has too much minimum and not enough wage.

If we do not act now, to bring people up to a respectable standard of living, how can we ever expect them to feel fully included in the American dream—when—on this kind of wage—a dream is all it will ever be.

I urge my colleagues in the Senate, and the rest of us in public service who have something to say about what happens here, to show the same kind of courage these workers show every day of their lives.

CONGRESS SHOULD STOP PLAYING POLITICS WITH OUR VETERANS

(Mr. KYL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KYL. Mr. Speaker, Congress should stop playing politics with the veterans of this country. It is time to pass a clean supplemental appropriation bill, one that funds the health care needs of our veterans but does not play politics with other important problems.

There is near unanimous agreement that the VA hospitals need this emergency relief. There are no other dire emergencies that need to be addressed at this moment, and that includes funding for the war on drugs. So let us stop playing politics with the war on drugs as well. We have increased spending for drugs 39 percent to $5.3 billion this year, much of it still unobligated. There is no dire emergency to appropriate money here in the next few weeks, and especially if the only way to pay for it is to steal the money from the defense budget in violation of the bipartisan budget agreement enacted into law in the Omnibus Budget Reconciliation Act of 1987.

Mr. Speaker, this body found out a couple of weeks ago that the supplemental appropriation is like the old Army mule, it can carry a lot for our veterans, but if it is loaded down with unnecessary baggage, it will buckle. Let us have a clean supplemental appropriation bill for our veterans today.

SUPPORT JENKINS AMENDMENTS TO CARIBBEAN BASIN INITIATIVE

(Mrs. LLOYD asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. LLOYD. Mr. Speaker, I rise today to encourage my colleagues on the Ways and Means Committee to support Representative ED JENKINS amendments to the Caribbean Basin Initiative. The United States is in desperate need of consistent policies that will insure that our domestic textile industry is not wiped out. In its present form, the Caribbean Basin Initiative does nothing to further this goal. The 92 members of the congressional textile caucus object to the Caribbean Basin Initiative on three grounds. First, that the bill contains no requirement that any increases in textile and apparel imports from the Caribbean must be offset by cuts in Far Eastern quotas. Second, that the Crane amendment reducing duties on Caribbean Basin Initiative apparel made from non-United States fabric by 50 percent will encourage Far Eastern companies to relocate more of their manufacturing operations to the Caribbean. And third, that the bill permits textiles and apparel articles made from fabrics in critical shortage in the United States to receive favorable trade treatment. Representative JENKINS will be leading the strike to close this vague loophole and replace it with a specific list of fabrics not manufactured in the United States. He will also be offering amendments to provide a Far Eastern offset and to strike the Crane amendment. I would like to remind my colleagues that the textile industry employs over 2 million people in this country. America was built on the sweat of hard working people in our basic manufacturing sectors, including textile, apparel, and footwear. These domestic industries continue to play a vital role in our society. They have dedicated themselves to America and America must dedicate herself to their survival. Do this by

supporting Representative Jenkins amendments to the Caribbean Basin Initiative.

NATIONAL D.A.R.E. DAY

(Mr. INHOFE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. INHOFE. Mr. Speaker, today Congressman LEVINE and Congressman WOLF are introducing legislation to make September 14 "National D.A.R.E. Day." I am proud to be an original cosponsor of this bill and encourage all of my colleagues to support this effort.

D.A.R.E., an acronym for drug abuse resistance education, focuses on reducing the demand for drugs by educating young people about the dangers involved. A unique feature of D.A.R.E. is the role of police officers as instructors. The message these officers convey to the students rests four principles: First, providing accurate information about alcohol and drugs; second, teaching students decisionmaking; third, showing students how to resist peer pressure; and fourth, giving students ideas for alternatives.

Many schools implementing the D.A.R.E. Program report decreases in school vandalism and truancy, improved attitude toward police and an improved outlook toward school. Participation in Project D.A.R.E. brings about significant changes in student attitudes and knowledge concerning drug and alcohol use. Without a doubt, D.A.R.E. has already achieved a high degree of success both in its impact on students and its unqualified acceptance of the part of educators.

In my home district of Tulsa, the police department in partnership with Tulsa public schools has aggressively attacked the problem of drug abuse through the D.A.R.E. Program. The Tulsa Police Department has been so successful that they have taken on the job of training law enforcement officers from across the country. The most recent graduating class included officers from 23 States.

The Tulsa Police Department's success in implementing the D.A.R.E. Program is nationally recognized. They are leaders in the battle against drugs in our Nation's schools. Tulsans are proud of and support our police department's continued efforts.

SUPPORT AN INCREASED MINIMUM WAGE

(Mr. BILBRAY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BILBRAY. Mr. Speaker, I rise today in strong support of the conference report on H.R. 2. Since it was first enacted during the New Deal, the minimum wage has lifted millions of Americans out of poverty, and guaranteed that they will receive a just wage for their work. However, today we find that the minimum wage provides for an income of only $6,698 per year, which is 29 percent under the poverty line for a family of three.

Many of these workers, along with their families are homeless, since their minimum wage income is not enough to provide for both food and shelter. By raising the minimum wage to $4.55 per hour, we will almost close that gap, and restore the minimum wage to this historical standard. Clearly, the key issue here is fairness: If we truly want a kinder and gentler nation, we must provide our least fortunate workers with a fair wage that will give them a meaningful and dignified existence. If President Bush vetoes this kinder, gentler measure as promised, I think we must ask if he has been blinded by his thousand points of light.

HAWAII FIRST STATE TO BAN RELEASE OF OZONE-DAMAGING CHEMICALS

(Mrs. SAIKI asked and was given permission to address the House for 1 minute.)

Mrs. SAIKI. Mr. Speaker, I am pleased to report that last week the State of Hawaii became the first State to enact landmark legislation to ban the release of ozone-damaging chemicals which contribute to the problem of global warming.

This bill, which was introduced by Hawaii State Senator Mary Jane McMurdo, was signed into law by Gov. John Waihee on May 11. Specifically, the bill bans the over-the-counter sale of chlorofluorocarbon refrigerants and requires recovery and recycling of automobile air-conditioner chemicals.

I commend the Hawaii State Legislature, and the Governor for their leadership on this important issue. This legislation represents the cumulative efforts of political leaders, industry, environmental groups, educators and scientists, and demonstrates that where the will to address difficult problems exists, significant results can be accomplished.

It is my hope that other States, as well as the Congress, will follow Hawaii's lead and act quickly to halt the continued damage to the ozone layer.

□ 1250

SUPPORT OF CONFERENCE REPORT ON H.R. 2

(Mr. LIPINSKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LIPINSKI. Mr. Speaker, I rise to urge the President to sign the minimum wage bill this Congress is sending to his desk. Mr. President, this increase is fair and is long overdue. I ask you to look ahead, look ahead to an issue which we have rarely had to face in our history. The issue of labor shortages. Today, in the context of this debate, we have a chance to address this issue before it becomes a crisis, a chance to act instead of react.

A report by the Department of Labor on the impending shortages reveals that many in the labor force lack basic skills. Potential employees are found lacking in spelling, writing, mathematics, initiative, attitudes, and work habits. The pool of laborers in the best position to fill this critical void are today struggling and failing to stay afloat earning $3.35 an hour. Could a wage earner possibly be inspired to make a real effort for a wage that yields no more than a welfare payment? Mr. President, I ask you to take a look back and see that increases in the minimum wage have been effective. I ask you to take a look forward and see how costly a veto would be. And I ask you to take a look at your desk, your pen and this bill, and do the kind, the gentle, and the right thing.

PUBLIC HOUSING RESIDENT EMPOWERMENT ACT

(Mr. PORTER asked and was given permission to address the House for 1 minute.)

Mr. PORTER. Mr. Speaker, today I am introducing the Public Housing Resident Empowerment Act to encourage tenant management and ownership of public housing.

This legislation would extend two provisions of current law, one, to allow resident management corporations or RMC's to apply to HUD for technical management assistance, and the other allowing competent RMC's and individuals to purchase their public housing units.

This legislation, without reducing the low-income stock, gives public housing residents a chance to rebuild their neighborhood.

Kenilworth Parkside, a public housing complex in Washington, DC, organized under the resident management 8 years ago; led by Kimi Gray, they dramatically reduced crime rates, brought in social services, employed unemployed residents and were so successful that last month their RMC bought the entire complex from the housing authority and took it private.

Earlier this year Kimi Gray walked into my office, banged her fist on my desk and told me, "You politicians have to stop thinking of us as the problem. Why don't you start thinking of us as the solution." She is right. Without tenant involvement, solutions are impossible.

I urge my colleagues to join me in cosponsoring the Public Housing Resident Empowerment Act.

FAIR LABOR STANDARDS ACT

(Mr. AKAKA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. AKAKA. Mr. Speaker, I am here today to urge President Bush to sign H.R. 2, the Fair Labor Standards Act. As you know, the House passed the conference report last week, and the Senate is expected to take up the measure soon.

President Bush has threatened to veto this momentous legislation because we could not compromise on a difference of 30 cents. I can not believe that in a kinder and gentler nation an individual or family would be denied the opportunity for economic self-sufficiency because of 30 cents.

Yet, at the same time the President proposes a reduction in the capital gains tax which, according to the Committee on Joint Taxation, primarily benefits Americans earning over $200,000. This soak-the-poor scheme would provide a windfall to each of our wealthiest Americans four times greater than the total annual income of Americans who must depend on minimum wages.

Congress compromised its original proposal in hopes that President Bush would negotiate on this issue. However, the President has refused to discuss any proposal which would raise minimum wage over $4.25. Instead, he has insisted that this issue be his way or else.

Mr. Speaker, America is based on democracy, not dictatorship. The President needs to work on a kinder and gentler nation for all Americans, and not for just a privileged few. It is my greatest hope that President Bush will revitalize this and support the Fair Labor Standards Act that will be passed by Congress.

LET US NOT ENACT A MINIMUM WAGE WHICH DENIES YOUNG PEOPLE JOBS

(Mr. RAVENEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RAVENEL. Mr. Speaker, the biggest negative impact of increasing the minimum wage too much will be on our young people. Youth unemployment has long been a problem in our country, particularly among minorities and the disadvantaged. Over the past 6 years our economy has created more than 19 million new jobs. Last year, summer youth employment reached a record high. Happily, employment levels for black teenagers reached new highs also—more than doubling since 1982.

But we still have a long way to go. Youth unemployment is three times the overall unemployment rate, and for minority youth it is much, much higher.

Let us not make the problem worse by enacting a minimum wage which denies young people jobs. When the time comes, let us support the President's veto.

THE MINIMUM WAGE BILL WILL HAVE POSITIVE CONSEQUENCES

(Mr. OWENS of New York asked and was given permission to revise and extend his remarks.)

Mr. OWENS of New York. Mr. Speaker, "outrage" is the only word which expreses my sentiment when I behold the President's pledge to veto the minimum wage bill while at the same time he has sent a bill calling for $157 billion to bail out the crooked S&L/banks.

The S&L bailout will definitely have negative consequences on the economy. It is the biggest spending bill in peacetime history, $157 billion.

On the other hand the minimum wage bill will have positive consequences.

The minimum wage bill means that money will flow into the hands of poor peole who have a large amount of necessities to meet and they will spend the money immediately to meet those necessities and the money will turn over in the economy.

The minimum wage will allow some people also to not have to depend so heavily on Government for other needs; they will go off the welfare rolls, not need Medicaid and a number of other things will happen which will lessen the burden on the Federal Government.

At the same time also it is possible when two people earn a minimum wage they will also pay additional taxes.

Mr. Speaker, I urge the President to recall and revise his $157 billion bailout of the S&L/banks and at the same time sign the minimum wage bill.

WE NEED TO ENACT EMERGENCY SUPPLEMENTAL FUNDING FOR VETERANS' HEALTH CARE NOW

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker, the supplemental appropriations bill has gotten messier than the beaches of Alaska. And while we continue to dicker over the bill, our Nation's veterans are being turned away from veterans hospitals. They are being denied medication. Every day that we spend struggling with this bill is a day that our veterans are subjected to needless suffering.

We need to enact emergency supplemental funding for veterans health care now. If the only way to do that is by pushing through a separate bill for the VA medical account, then let us do it. We cannot afford to mess around with this any longer. It is wrong to deny these needed funds to veterans any longer, so let us get the job done now—and use a separate vehicle if necessary. Accordingly, today I have dropped into the hopper a clean supplemental bill House Joint Resolution 272 limited to veterans medical care.

I ask my colleagues to joint me in cosponsoring House Joint Resolution 272.

This is what is happening:

Employment at veterans medical care centers will drop by approximately 200 full-time employees per pay period until supplemental funding is received. The VA is terminating temporary employees and is unable to hire replacements for departing staff.

On May 19—this Friday—VA capital accounts will be frozen.

If supplemental funding is not received within the next few weeks, then the VA will not be able to provide for 930,000 visits by ill and disabled veterans.

The VA emergency is real. It is now. It is today. Let us quit messing around and pass a clean supplemental for VA health care. The people are demanding it, and the veterans deserve it.

THERE IS NOTHING WRONG WITH THE MINIMUM WAGE GOING MAINLY TO YOUNG PEOPLE AND STUDENTS

(Mr. WISE asked and was given permission to revise and extend his remarks.)

Mr. WISE. Mr. Speaker, I rise today to urge the President not to veto the minimum wage bill agreed upon by Congress.

For the 38 percent of minimum wage workers who are between the ages of 18 and 24, the decline in the real value of the minimum wage drastically reduces their ability both to provide for themselves and to start and sustain families.

Mr. Speaker, some argue that the minimum wage goes mainly to young people and students. What is wrong with that? When I was in college I worked my way through the last 2 years on the minimum wage. I suspect there were a lot of young people and are today who are providing for future upward mobility. Who was their collective bargaining agent? The Federal Government.

The only raise I received and that they get today is when Congress raises the minimum wage.

For a family of four we tell them go to work, do it right. They do, and if they earn your proposed minimum wage of $4.25 an hour for doing things the way we want, they are going to be 30-percent below the poverty level.

Mr. President, please help people help themselves, sign the minimum wage bill.

NO SUPPLEMENTAL AGAIN

(Mrs. SMITH of Nebraska asked and was given permission to address the House for 1 minute and to revise and extend her remarks and include extraneous matter.)

Mrs. SMITH of Nebraska. Mr. Speaker, once again, consideration of the supplemental appropriation measure is uncertain.

What are we to tell the veterans of this country?

There are thousands of veterans who cannot get an appointment to see a doctor and cannot get a prescription filled.

There are thousands more who are waiting for surgery and prosthetic devices.

This is truly a dire emergency.

The veterans need our help now, and this delay is absolutely inexcusable.

□ 1300

INCREASED RESOURCES FOR ANTICRIME PACKAGE

(Mr. HUGHES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUGHES. Mr. Speaker, I am pleased that the President, in developing his latest anticrime package, has not confined his recommendations to creating new crimes and increased penalties.

He has recognized that fighting crime is labor and resource intensive, and has called for increasing these resources. The central problem in our criminal justice system is not inadequate penalties. It is the lack of certainty—certainty that criminals will be caught and certainty that they will be convicted and sentenced. The lack of certainty that there will be space to incarcerate them where appropriate, or that, because of overcrowding, they will not be released before it is safe to release them.

Let me give just one example. The President suggests that we double the maximum penalty—from 5 years to 10 years—for lying on the Federal form that all gun purchasers must fill out. These forms are availble at the gun shops. These forms enable us to identify persons who lie about their criminal records, mental histories, and the like. Less than 3 years ago, the Reagan-Bush administration supported by the gun lobby which, among other assaults on our ability to trace weapons used in crime, severely restricted the authority of law enforcement to inspect dealers in order to identify persons who commit the offenses the President now wants to punish more severely.

With no help from the administration, we were able to reduce the damage proposed in that bill, but the result was that BATF can only go in once a year to check a dealer's books for violations such as this.

While I am disappointed that the President did not face up to the problem of assault weapons and the need for a national waiting period for gun purchases, I am pleased that he does see the need for additional resources to enforce existing gun laws. The $19 million additional funding proposed for BATF at least restores the cuts he earlier proposed for BATF this budget year, although it still falls short of the funding necessary to maintain current services at the same level.

STATE COOPERATION IS VITAL

(Mr. SCHIFF asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHIFF. Mr. Speaker, this week the President introduced a comprehensive anticrime package, but what I did not see, noticed by the news media in terms of the President's package, was this call for State cooperation. Mr. Speaker, State cooperation is vital in the fight against crime because most violent criminals, indeed, most criminals, are prosecuted in State courts by State prosecutors and not in Federal courts by Federal prosecutors.

I call upon the States to join with the President in his proposals for improving the laws and for adequately funding criminal prosecutions, because without State cooperation a Federal program will only have limited effectiveness.

VOTE TO UPHOLD THE PRESIDENT'S VETO OF H.R. 2

(Mr. FAWELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FAWELL. Mr. Speaker, there are a lot of fictions about the minimum wage. One is that it helps the working poor who support families.

But most workers earning the minimum wage are young, 80 percent are not poor, 93 percent do not maintain families, over 90 percent are part-time, and over one-third of the 3.9 million reported minimum wage earners work in restaurants, where most of their incomes are supplemented by tips. If they receive tips, counting them as minimum wage workers is another fiction.

For instance, a young waiter in Washington is paid $2.01 per hour. With tips, he makes $12 per hour, or about $25,000 a year. He says, "I'm doing pretty well for a 22-year old who just graduated from college." He is counted as a minimum wage earner.

Admittedly, this person makes more than most waiters. But this is a true story told to make a point: The vast majority of minimum wage workers are not poor and supporting a family. There are, however, two absolute, nonfiction guarantees about mandating an increase in the minimum wage, about which all economists agree and they seldom agree on anything. One is guaranteed lost jobs and the other in inflation. And who will be hurt the most by lost jobs and inflation? You can guess that it won't be my waiter-friend.

Vote to uphold the President's veto of H.R. 2, and let's really target our efforts to the working poor supporting families who need it the most.

VETERANS' PROGRAMS NEED EMERGENCY FUNDING

(Mr. LAGOMARSINO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAGOMARSINO. Mr. Speaker, I join my colleagues in expressing deep concern about the important, desperately needed funding for veterans' benefits being held hostage by the supplemental appropriations statement.

The real concept behind, the dire, emergency supplemental is to provide only desperately needed funds to vital programs facing real, critical shortfalls. Clearly, veterans' medical care and other mandatory veterans' benefits fit into this category. Today, we are turning away veterans in need and providing inadequate medical care to these brave Americans who selflessly answered our Nation's call during its time of need because of budgetary shortfalls. That is just not right.

I am disturbed that the Democrats controlling the Appropriations Committee and the House continue to load up the supplemental with other less critical—and in some cases unneeded—budget busting funding. President Bush has vowed, correctly I believe, to veto such a bill. It is time to stop playing games. Our veterans' programs need this emergency funding now. I urge my colleagues to pass a clean supplemental that takes care of the veterans now—one that the President will sign. We can resolve the other issues afterwards and not at the expense of our veterans.

COMPROMISE ON MINIMUM WAGE

(Mr. STEARNS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STEARNS. Mr. Speaker, much has been said about the failure of the administration on the minimum wage issue. I would suggest that the President has compromised on minimum wage and he is not the one who has refused to give up any ground. The fact is, the present minimum wage of $3.35, the President has come before the Congress with a proposal for a $4.25 minimum wage, an increase of 90 cents, approximately 27 percent over last years. That is not a decision by the President to refuse to raise the minimum wage. If there is a veto of the minimum wage increase, it will not be the President's fault, it will be the fault of those people in the Congress who have refused to meet the President half way.

The fact is, and we all know that there will be some 650,000 job opportunities lost by the proposal being sent to the White House. That proposal is losing jobs mainly for young people who otherwise would have been given that opportunity.

TEENAGE UNEMPLOYMENT

(Mr. GUNDERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GUNDERSON. Mr. Speaker, much has been said about the failure of the administration to compromise on the minimum wage issue. The President, they claim, has refused to give up any ground. This cannot be true. The minimum wage rate is $3.35, and the President has proposed $4.25, an increase of 90 cents.

The President's proposal of $4.25 was designed to take into consideration lost job opportunities. Supporters of the $4.55 wage rate contained in H.R. 2 will cause 650,000 individuals to suffer lost job opportunities. The hopes and dreams of 650,000 people will be shattered when they cannot find a job. These are people who already face huge hurdles in gaining employment. They are our minorities, our uneducated, our unskilled. If you need examples of who they are, take a look at some of our major metropolitan areas: Detroit black teen unemployment, 52 percent; Chicago black teen unemployment, 53.7 percent; New York City teen unemployment, 23 percent; New York central city Hispanics unemployment, 28.8 percent.

Clearly, we would be making a bad situation worse. Let us take a more comprehensive look at the problem and its possible solutions before we create more problems than we solve.

DROUGHT ON MINIMUM WAGE

(Mr. CARDIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CARDIN. Mr. Speaker, I understand that the only obstacle that remains in order to end an 8-year drought in adjusting the minimum wage is for the President to sign the legislation that will shortly be on his desk. I urge the President to do that. This bill is a modest bill, increasing the minimum wage from $3.35 an hour to $4.55 an hour.

Mr. Speaker, that increase will not even make up for the cost of living over the last 8 years. That increase does not even take into consideration the productivity increase of the American worker during the 8-year period. We even provide the compromise for short-term training wage. For the sake of the American people, for the sake of the working people, men and women of this Nation, I urge the President to sign the legislation.

DIRE EMERGENCY FOR VETERANS' PROGRAMS

(Mr. GOSS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GOSS. Mr. Speaker, shortly we will decide whether to provide sorely needed funding to crucial veterans health care programs—or whether to hold that funding hostage to a laundry list of nonemergency spending.

In 1987 the Congress and the administration made a deal—supplemental funding bills would be reserved for dire emergencies.

The Veterans' Administration has all but run out of money for its medical care programs. There is no question that we are facing a dire emergency.

Without additional funds, the VA will be forced to lay off employees—and critically important medical services already at a bare-bones level will be cut even more. This is a vital situation for veterans and their families.

But the President's request for relief has suffered the usual fate of a supplemental funding bill—it's been weighted down with millions of dollars of spending in areas where emergency spending just isn't justified.

If we don't scale back this appropriations bill, we will deal a crippling blow to our veterans—who have already given so much of themselves for the good of this country. I urge my colleagues to support a clean supplemental appropriations bill that addresses the true emergency at hand—our veterans needs.

MINIMUM WAGE—DIRE EMERGENCY SUPPLEMENTAL

(Mr. HOUGHTON asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. HOUGHTON. Mr. Speaker, I would like to make two quick points. First of all, supporting the President's position on minimum wage is not a vote against the minimum wage as some people have implied. It is a vote for minimum wage, but it is also a vote for those people who have to support the minimum wage and supply those wages. I think it is a bill that is fair to both forces.

Second, Mr. Speaker, I am totally in agreement with H.R. 272, the bill introduced by the gentleman from Massachusetts [Mr. CONTE]. We have fiddled and fooled around with the supplemental long enough, and our veterans are getting very badly damaged as far as the medical care provision is concerned. I support this legislation, and I hope my colleagues will also support it.

DIRE EMERGENCY SUPPLEMENTAL DELAYED—PLIGHT OF THE VETERANS WORSENS

(Mr. SMITH of Vermont asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. SMITH of Vermont. Mr. Speaker, the first meeting that I had as Vermont's new Member of Congress in January after I was sworn in was with a group of veterans in Vermont. The problems that they told me about then are unhappily worse today than they were in January, not better.

The litany of wrongs that our delay on the supplemental appropriations bill puts on their backs is almost endless: reduced nursing care services, reduced drug rehabilitation services, and reduced outpatient services. These are men and women with whom this country and this Government and this Congress have a contract, a contract that says, "You served us when we needed your help. Now we will serve you when you need ours." The supplemental bill does that.

Mr. Speaker, I urge this House to pass that bill today, as quickly as possible, so that these men and women will get the services they so badly need and they so richly deserve.

EARNED INCOME TAX CREDIT INCREASE WOULD BENEFIT THE WORKING POOR

(Mr. PETRI asked and was given permission to address the House for 1 minute.)

Mr. PETRI. Mr Speaker, to increase the minimum wage would merely look good. To increase the earned-income

tax credit would do good. That is what the New York Times says. And that is the conclusion of a wide array of economists, policy experts, journalists, interest groups, and Members of Congress from both sides of the aisle.

President Bush made a good offer on the minimum wage. He came 70 percent of the way toward what was originally asked, and included provisions to minimize the harmful side effects of lost jobs and inflation. That offer was rejected. Now we will have a veto fight filled with efforts to score political points. And at the end, the working poor will get nothing.

When we are through with all this politics, please let us address substance. Let us find a compromise that includes EITC reform. That way we can do far more for those who need help than even a $4.55 minimum wage, with less damage to our economy.

RESTORE THE V-22 "OSPREY"

(Mr. BURTON of Indiana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BURTON of Indiana. Mr. Speaker, Congress has let the defense budget shrink 4 years in a row. Because of this, Defense Secretary Cheney has been forced to cancel the V-22 "Osprey."

The tilt-rotor V-22 is critical for the future of the Marine Corps. The days when marines could storm the beaches in amphibious troop carriers are over.

The V-22 will allow the Marines and our Special Operations Forces to perform over-the-horizon ship-to-shore assaults quickly and with fewer casualties. It can go twice as fast and twice as far as our standard helicopters.

Tilt-rotor aircraft also represent the future of commercial aviation. They are ideal for use at overcrowded airports because they takeoff and land vertically like helicopters.

Without the Osprey, the Marines could become a very hollow fighting force in the future. There are also thousands of jobs at stake. If we don't move ahead with the V-22, Europe or Japan will beat us to it. We must find a compromise to keep the Osprey alive.

FAIR LABOR STANDARDS AMENDMENTS OF 1989 CONFERENCE REPORT

(Mr. STENHOLM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STENHOLM. Mr. Speaker, I urge my colleagues to sustain the President's upcoming veto of H.R. 2, requiring an increase in the minimum wage.

This bill presents the worst of both worlds. For working poor breadwinners, it does not do enough. Because it applies across the board, most of those it helps do not need it. It will destroy entry-level jobs and raise prices for consumers, including the poor.

The bill also includes one industry-specific provision that is unfair. Agriculture—and only agriculture—is prohibited from employing the training wage the bill says all other employers and industries may use. This was not in the committee-reported bill in either House—it just "appeared" here in a floor substitute.

I realize H.R. 2 doesn't include a real training wage, but farmers and ranchers in west Texas—and elsewhere—are concerned and confused as to why they were singled out for this unfair and discriminatory treatment. Contrary to the perception of some, hired labor is becoming increasingly employed in the farm sector and H.R. 2 will have an adverse impact on some 250,000 farmers.

The really sad note is that we could do better. Instead of a minimum wage hike unjustified by economics in many regions, we could target help to working poor families by expanding the current earned income tax credit into a living income tax credit. Workers would take home more with every pay check. At worst, the cost to the Treasury would be about $3 billion a year, the same as H.R. 2.

Let us sustain the veto on H.R. 2. We can do better.

SUPPORT CITED FOR PASSAGE OF A CLEAN SUPPLEMENTAL APPROPRIATIONS BILL

(Mr. GINGRICH asked and was given permission to address the House for 1 minute.)

Mr. GINGRICH. Mr. Speaker, Larry Rivers, national commander in chief of the Veterans of Foreign Wars, said in a letter to the Honorable JAMIE WHITTEN, chairman of the Appropriations Committee, as follows:

> On behalf of the 2.7 million members of the Veterans of Foreign Wars of the United States and its Ladies Auxiliary, I wish to state our frustration and concern in that the "Dire Emergency Supplemental Appropriation" for fiscal year 1989 is still languishing in your committee.

H.F. "Sparky" Gierke, national commander of the American Legion said this:

> The American Legion strongly supports immediate action on a "clean" supplemental appropriations bill for fiscal year 1989. This measure must include not less than the amounts of veterans program money as contained in the original supplemental bill.
>
> These funds are urgently needed to continue essential VA services nationwide. Further delay will produce serious consequences, particularly in veterans health care.

Gordan Mansfield, associate executive director for Government Affairs of the Paralyzed Veterans of America said this:

> On behalf of the membership of Paralyzed Veterans of America, I am writing to request your support for quick passage of a clean fiscal year 1989 supplemental appropriations bill to include desperately needed funding for veterans' health care services.

Mr. Speaker, let us pass a clean supplemental bill today.

LACK OF LEADERSHIP BLAMED FOR DELAY IN SUPPLEMENTAL APPROPRIATION BILL

(Mr. FRENZEL asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. FRENZEL. Mr. Speaker, in Minneapolis there is a large, very new, veterans hospital which serves the needs of the veterans of my area. That hospital is laboring under great fiscal difficulties, primarily because this House has not passed the dire emergency supplemental bill. That bill is hung up, in my judgment, because of lack of leadership in this House in getting it out.

We need a clean supplemental bill, with the necessary offsets for reductions in spending to cover the increases. It seems to me that passing a clean supplemental bill is not a monumental chore. But, instead, we are wasting much time while the people who are the intended beneficiaries, the veterans of the United States, are suffering.

Mr. Speaker, let us get some leadership and move that supplemental bill.

MINIMUM WAGE

(Mr. PALLONE asked and was given permission to address the House for 1 minute.)

Mr. PALLONE. Mr. Speaker, despite their best efforts, there are nearly 2 million working Americans who continue to live below the poverty level. I dare say that few of us in this Chamber could fully appreciate how a family might survive and meet their financial obligations on a minimum wage salary. A $134 a week for a full time 40 hours per week job simply will not pay the bills, indeed, it borders on indentured servitude.

If we are sincere, Mr. Speaker, in our efforts to promote self sufficiency and to reward hard work, we must create incentives for the working poor to get ahead and to break the cycle of dependency on Government assistance. This effort to raise the minimum wage is the very least that we can do. Assuming that a salary earned provides a living wage, seems from my perspective, to be a requirement too fundamental for us to ignore any longer.

If we are bound to continue the suffering of our most needy working citizens then, Mr. Speaker, something is

dramatically wrong with our national priorities. It is high time that we take action to assure that all working people have the opportunity to achieve the American dream and earn the rewards of their labor.

CONFERENCE REPORT ON HOUSE CONCURRENT RESOLUTION 106, CONCURRENT RESOLUTION ON THE BUDGET—FISCAL YEAR 1990

Mr. PANETTA. Mr. Speaker, pursuant to the order of the House of Tuesday, May 16, 1989, I call up the conference report on the concurrent resolution (H. Con. Res. 106) setting forth the congressional budget for the U.S. Government for the fiscal years 1990, 1991, and 1992, and ask for its immediate consideration.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore (Mr. LEVIN of Michigan). Pursuant to the order of the House of Tuesday, May 16, 1989, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of Monday, May 15, 1989, at page H1880.)

The SPEAKER pro tempore. The gentleman from California [Mr. PANETTA] will be recognized for 45 minutes, and the gentleman from Minnesota [Mr. FRENZEL] will be recognized for 45 minutes.

The Chair recognizes the gentleman from California [Mr. PANETTA].

□ 1320

Mr. PANETTA. Mr. Speaker, I yield myself as much time as I may consume. I rise in support of the conference report on House Concurrent Resolution 106, the concurrent resolution on the budget for fiscal year 1990. It is very similar to the House version of the budget resolution, which was adopted on a vote of 263 to 157. I hope my colleagues will give it their support because the resolution essentially reflects the same elements that were contained in the House resolution.

If we approve this conference report, it will be the earliest that the House has approved a conference report on a budget resolution in this decade. I think this is a tribute to the cooperative spirit that has been displayed by both parties in Congress, as well as the White House.

While there was by no means a wide gulf between the House and Senate budget resolutions, there were some important issues and funding differences to be resolved. In all matters, I believe my colleagues will find that the House conferees protected the House position. In virtually all cases where there were differences, we either ended up with a position similar to or identical to the House version, split the difference with the Senate, or simply agreed to disagree.

Like the House-passed budget, this conference report adheres to the bipartisan budget agreement between the White House and the Democratic and Republican congressional leadership, and it meets the Gramm-Rudman deficit-reduction target for fiscal year 1990. Given the narrow constraints under which this budget has been developed, I believe it represents our best possible budget for fiscal year 1990 as well as our best chance for more comprehensive deficit reduction in the future.

This budget provides for real deficit reduction. It is bipartisan, and it is achievable.

It also places the Congress on schedule with regard to its legislative agenda. The Committee on Appropriations can now proceed to bring their bills to the floor. Reconciliation will proceed to implement this budget resolution with the date of July 15 for reporting, and this Congress, as we have in the last Congress in the second session, can avoid the problem of a large continuing resolution on appropriations for the Federal Government.

To let my colleagues know that this obviously does not represent the bold approach is not news. We need ultimately to face the deficit issue head on. Everyone who worked on this agreement acknowledges that this is not the bold approach that we need to ultimately implement with regard to deficit reduction, but solving the deficit problem is a marathon, and with this budget we have taken the first mile.

While we have barely broken into a sweat, there are still many miles that remain to go in developing what I think is the necessary deficit reduction package for the Congress and for the country. The real task will come when we try to consider the budget for fiscal year 1991, and hopefully one that will be multiyear.

We have met with the President yesterday morning to again discuss the situation with regard to the budget resolution and where we go from here. I believe all of the participants in that meeting found it very encouraging that, not only did we acknowledge that there is a new and cooperative spirit between the Congress and the White House with regard to budget issues, but that beyond that we need to begin discussions now to try to implement a bolder package with regard to deficit reduction as soon as we can.

Mr. Speaker, this budget sets that framework and gives us that opportunity. The budget agreement calls for continuing negotiations between the White House and the Congress on a budget for fiscal year 1991.

I want to assure my colleagues that I have no intention of sitting down and negotiating a minimal budget with regard to 1991 or beyond. I will push hard for a bold approach which includes taxes and restraints on both defense and entitlement spending. If these elements are not on the table, we will get nowhere. I have no interest in negotiations that are destined to fail, but, if we put all of these issues on the table, and if we continue the spirit of good will and cooperation that we have begun with this process, if we continue to give and take, that is essential to the kind of compromise that we need in this area, and I am convinced that we can successfully take the next step with regard to the budget.

In light of that I want to again thank my ranking minority member on the House side, the gentleman from Minnesota [Mr. FRENZEL], for his hard work, and cooperation and support during the conference and throughout this difficult process. I also want to thank the leadership on both sides of the Hill for the cooperation and support that they have provided throughout this very difficult process, and in particular I would like to thank the administration and the President for the cooperation that they have shown in developing these versions of the budget and helping us to resolve our differences as quickly as possible.

There were, as I stated at the beginning, differences that needed to be resolved. As this budget is implemented, we will need continuing cooperation between the Congress and the administration to achieve the savings, to achieve the revenues that are part of this budget, and to a large extent that will test the relationship for the future. If it is successful, if it works, then I think it lays the right framework for the future.

I also want to thank in particular the House conferees on both sides of the aisle. Their support enabled us not only to protect the House position on the critical issues that we face, but their input throughout the process has been invaluable to making our budget process work and work effectively.

Let me briefly summarize the conference agreement for my colleagues.

Overall, the conference agreement provides for fiscal year 1990 outlays of $1,165 billion and revenues of $1,065 billion, with a deficit of $99.7 billion. It provides for $27.7 billion of deficit reduction from the baseline. Entitlement and other mandatory spending is cut by $8.3 billion in outlays, while Social Security and other retirement program cost-of-living adjustments are protected and Medicare cuts are limited to half the amount proposed in the President's budget. All of these figures comply with the bipartisan budget agreement, as do total spending levels for defense, international affairs, and domestic discretionary programs.

The differences in functional areas between the House resolution and the conference agreement can be placed into four categories.

The first category is functions in which there is little or no change because of the similarity between the House and Senate numbers. Functions falling in this category are: 050, national defense; 150, international affairs; 270, energy; 370, commerce and housing credit; 450, community and regional development; 550, health; and 800, general government.

The second category is functions in which the conference agreed to greater spending than the House-passed budget. This category includes functions 300, natural resources and environment; 350, agriculture; 400, transportation; 570, medicare—for administration, and 750, administration of justice—for antidrug abuse programs.

The third category is functions in which the spending levels agreed to by the conference are lower than the House but closer to the House figure than to the Senate. Functions in this category are 250, general science, space, and technology; 500, education, training, employment, and social services; and 700, veterans' benefits and services.

Finally, in function 600, income security; spending is below the level in the House resolution and represents an approximate splitting of the difference between the two bodies.

Like the House resolution, this conference report reverses the trend of the last 8 years by providing full inflation protection for low-income programs, allowing overall domestic discretionary spending to rise with inflation, and reducing defense spending from the baseline by $4.2 billion.

□ 1330

The conference report, like the House budget, provides an increase of $3.6 billion in budget authority above the baseline in domestic discretionary programs.

The conference report also provides increased funding for the Democratic leadership's children's package for programs such as Headstart; Child Care; Education, including such programs as Compensatory Education and Student Financial Assistance; and the WIC Nutrition Program for Pregnant and Nursing Women, Infants, and Children is also fully funded under this proposal.

Like the House-passed resolution, the conference report includes $200 million for expanded Medicaid coverage of pregnant women and children, hospice case, and community-based services for the frail elderly and mentally retarded. It also fully funds the McKinney Act for the homeless and includes $15 million for liberalization of child nutrition programs.

Like the House-passed resolution, the conference report fully funds the President's anticrime initiative and improves upon the President's proposed funding for combating the Nation's separate but related epidemics—drugs and AIDS. The budget also provides funding for NASA, NSF scientific research, and the superconducting super collider in line with the House proposal.

Funding for veterans medical care is increased $1.05 billion in budget authority above last year's level and $0.85 billion above the President's budget request. This also matches the House-passed resolution.

The conference report also follows the House resolution and the bipartisan budget agreement in other areas. In entitlements and other mandatory programs the conference report would achieve $8.3 billion in deficit reducton. Revenues would be increased by $14.2 billion, including $5.3 billion in increased tax revenues, $0.5 billion from building upon the President's IRS compliance initiative, $2.7 billion in increased user fees, and $5.7 billion from asset sales. Policies to produce the $5.3 billion resulting from changes in tax law will have to be negotiated by the White House and the tax-writing committees of the Congress.

The conference agreement is enforced by 2-year reconciliation instructions to 10 House committees. The committees are to report legislation to achieve $1.1 billion in user fee increases, $6.7 billion in entitlement and mandatory program reductions, $0.4 billion in unspecified ways and means committee deficit reduction, and revenue increases of $5.3 billion, for a total of $13.5 billion in fiscal year 1990 and about $10.5 billion in fiscal year 1991, and about $10.5 billion in savings in fiscal year 1991. Eight Senate committees are instructed to report legislation reducing the deficit by $13.8 billion in fiscal year 1990 alone.

Two of the key differences that the House and Senate did not resolve involve reconciliation. The Senate, but not the House, includes asset sales in reconciliation. However, the Senate provides only 1-year reconciliation instructions, while the House provides 2-year instructions.

The Senate agreed to drop its "fencing" provision for low-income housing and Internal Revenue Service funds based upon the assurances provided by the House Democratic leadership of full support for funding in this area during the appropriations process.

Mr. Speaker, I again urge my colleagues to support this conference report. It provides an opportunity not only to implement the budget process, but to achieve deficit reduction, which is within the Gramm-Rudman targets, that does achieve deficit reduction, that does provide for a bipartisan and cooperative spirit between both the House, and the Senate, as well as the White House, but more importantly, lays the groundwork for further deficit reduction for 1991. For all those reasons, I would urge adoption of the conference report.

Mr. FRENZEL. Mr. Speaker, I yield myself 4 minutes.

Mr. Speaker, ever since we began this budget exercise, or rather since the budget summiteers came out of their meetings, it has been obvious that fiscal year 1990 is a "get along" year.

This budget, as many observers have remarked, contains nothing heroic. We have all understood that from the very beginning.

As we have contemplated this budget, we have been too eager to bestow that description on it. We have been too quick to say this budget resolution is an ignoble achievement, or perhaps not even an achievement at all.

In my judgment, we have not been eager enough to talk about the strong points in this budget. What is important is that the budget resolution gives us a good probability of meeting the Gramm-Rudman-Hollings target.

The budget resolution was accomplished under a process which has been the most successful in the history of the budget resolution. It was done with bipartisan cooperation, which has been achieved very rarely, particularly in this House.

It has been achieved with cooperation between the administrative and the legislative branch, which is very rare. It has been accomplished in a timely fashion, which is another great rarity.

Finally, Mr. Speaker, it does make good on the President's tax pledge to the people of the United States.

While we can readily acknowledge that it does not reduce spending nearly as much as I, or as some other members, would have it, I think we need to stress the advantages of this particular budget resolution more than we have.

A majority of Republicans and Democrats in both bodies supported the bills when they passed the respective Houses. The conference committee made minor adjustments in the bills to produce a conference compromise.

Neither the House nor the Senate budget resolution was subjected to much violence, because both of them going into the conference were in accordance with the bipartisan budget agreement.

In general, it was a good agreement for the House and I think no less good an agreement for the Senate.

In the House, we were interested in science, in veterans and in Justice functions. The conference committee

took care of those closer to the House number than to the Senate number.

We were also interested in preserving function 500, education, particularly Members of the majority party in this body. The education function came out much closer to the House number than to the Senate number.

We were also instructed, although not a binding instruction, not to bring back a gas tax. I am pleased to announce to the House that we have done no such thing. There is no gas tax attached to this resolution.

In general, I think it is a good resolution. It is understandable that all 15 House conferees supported it. I hope the House will support it in similar proportions.

Mr. PANETTA. Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan [Mr. KILDEE].

Mr. KILDEE. Mr. Speaker, I rise today in strong support for the conference report on House Concurrent Resolution 106, the congressional budget resolution for fiscal year 1990—a budget resolution which places the highest priority on the needs of America's children.

This resolution makes desperately needed investments in the education, care, health and nutrition of our Nation's most precious resource and greatest hope for the future—our children.

Mr. Speaker, I would like to commend House budget chairman, LEON PANETTA for his patience, his tenacity and his good humor throughout this budget process.

In his budget negotiations with the White House, with the minority in the House and now with the Senate in conference, Chairman PANETTA has steadfastly defended the domestic discretionary portion of the budget, particularly function 500, education, training, employment and social services.

For most of the functions, the conferees split the difference between the House and Senate position.

However, on function 500, Chairman PANETTA and the House conferees managed to convince their Senate counterparts to come up two-thirds of the way toward the House function 500 number.

The function 500 total of $41.5 billion in budget authority and $38.9 billion in outlays is sufficient to provide:

A $1.7 billion increase for education programs, enough to provide the Department of Education with a $1 billion increase over baseline; $1.4 billion in discretionary funds for child care authorization legislation currently pending in the House Education and Labor Committee; a $265 million increase over baseline for Head Start; and a $200 million increase over baseline for job training programs for displaced workers.

Increased funding is also provided in various functions for the other programs on the House leadership's initiative for children including WIC, community health service and other health and nutrition programs.

Mr. Speaker, I am particularly pleased that the conference report before us today assumes $1.4 billion in discretionary funds for new child care legislation which addresses the pressing national need to increase the availability of affordable, quality child care.

This is sufficient to fully fund the new Child Care Program starting in the second half of fiscal year 1990.

Mr. Speaker, America faces a child care crisis that grows daily.

In today's economy, more and more parents must work outside the home, but they find it nearly impossible to find or afford decent care for their children.

As a result, far too many children, especially low income and disadvantaged children, are left home alone or left in unsafe, inadequate care that jeopardizes their early development and, in some cases, their very lives.

It is difficult enough for working parents to leave their children in the care of others.

But when they must spend the day worried about their children's care and safety, when they miss work days or when they avoid taking certain jobs because they cannot find decent child care, then it becomes a tragedy for our society as well as a drain on our economy.

I am also pleased that the conference agreement includes the Packwood amendment which allows the tax-writing committees to pursue complementary legislation for children, such as expansion of the earned income and dependent child care tax credits and of title XX social services block grants, on a deficit neutral basis.

Mr. Speaker, this year, both participants and observers of the budget process have said that this budget resolution is not bold enough on revenues and entitlements, is not tough enough on cutting defense, and maybe is too optimistic on economic assumptions.

Mr. Speaker, it may very well be all of those things, but within the financial and political constraints imposed on us by the President, Chairman PANETTA and the House Budget Committee has managed to craft a balanced and fair budget resolution which protects and enhances those programs aimed at improving the education, early development, health and nutrition of our children and provides room for the enactment of desperately needed new programs like child care.

Once again, I commend Chairman PANETTA and my fellow members of the House Budget Committee for a budget which is truly kinder and gentler and I strongly urge my colleagues to support the conference report.

Mr. PANETTA. Mr. Speaker, I yield 3 minutes to the gentleman from Montana [Mr. WILLIAMS].

Mr. WILLIAMS. Mr. Speaker, I make several inquiries of the chairman of the Budget Committee.

Mr. Speaker, I would ask the chairman of the Budget Committee, am I correct in assuming that the resolution before us requires the Education and Labor Committee to achieve $40 million in reconciliation savings in entitlement programs within its jurisdiction, but that there are no specific assumptions in this resolution as to how those savings will be achieved?

Mr. PANETTA. Mr. Speaker, if the gentleman will yield, as always in reconciliation instructions, we provide a number to the committees and obviously make some suggestions, but as to how that is achieved, that is left to the jurisdiction of that committee.

Mr. WILLIAMS. Mr. Speaker, I thank the distinguished chairman of the Budget Committee for that assurance. I asked the question, I tell my chairman, because there is considerable concern in the high education community about the contents of this budget conference agreement. Previously there had been discussion of a 5-percent origination fee on SLS and PLUS loans, or the imposition of lender risk sharing to the GSL program, or a reduction in the special allowance paid to GSL lenders. None of these proposals are assumed in the conference report under consideration today. If we adopt this conference agreement, it will be for the Education and Labor Committee to determine and report whatever changes are needed to reach the $40 million savings that are required. This might be accomplished by legislatively adopting the guaranteed student loan default regulations that will be published soon by the Department of Education. Or it might be accomplished by other changes that the Education and Labor Committee might decide to make. But am I correct in assuming that the decision will be that of the authorizing committee, and nothing in this conference agreement binds us to any specific course of action?

Mr. PANETTA. Mr. Speaker, if the gentleman will yield further, that is absolutely correct. The purpose of the conference report agreement is basically to say to the Education and Labor Committee that we need $40 million in entitlement savings within your jurisdiction. It is up to the Education and Labor Committee to determine how that is to be done. The only concern of the Budget Committee is to insure that the Congressional Budget Office counts whatever you report out as meaningful savings.

Mr. WILLIAMS. Mr. Speaker, I thank the gentleman.

□ 1340

Mr. FRENZEL. Mr. Speaker, I yield 1 minute to the gentleman from New York [Mr. HOUGHTON], a member of the Committee on the Budget.

Mr. HOUGHTON. Mr. Speaker, in a word, I support the budget resolution, the budget conference report, Concurrent Resolution 106.

A few days ago I said my piece on this document, so I will mercifully spare the House repetition of those words.

This is, though, an important document, and all of us have different views on the budget, but let me just say this: The 1990 budget has been pored over and argued over, and it has been adjusted; it has been approved in

conference, and it passes the test of reasonableness.

Mr. Speaker, it is now our turn to pass this resolution, to approve the document. We have other financial and longer term issues to tackle, and they will take our firm attention. Let us pass this resolution. Let us do it now, and let us do it quickly.

Mr. FRENZEL. Mr. Speaker, I yield 4 minutes to the gentleman from New York [Mr. SOLOMON].

Mr. SOLOMON. Mr. Speaker, I thank the gentleman from Minnesota, for yielding me this time.

Mr. Speaker, I want to rise and commend both the gentleman from California and my good friend, the ranking member of the Committee on the Budget, the gentleman from Minnesota [Mr. FRENZEL], for the good battle they fought on function 700 of the veterans' budget, because as I looked through these figures, the Senate version had $13,224,000,000 in it, and it looks like you compromised it out at $13,300,000,000, and that is an increase of $76 million over the Senate version. I know the terrible strains that were on both of the gentlemen and the entire Committee on the Budget and the demands for all of these functions, so the gentlemen really are to be commended, and I want to commend them for it.

I would like to take just a minute to point out why we needed this additional funds, though. Throughout the 172 veterans' hospitals throughout this country and 220 outreach VA medical clinics throughout the country, there is a shortfall out there right now in this fiscal year of over $700 million, and that means that veterans are being turned away for prescription drugs, that nurses are being laid off, where we cannot even compete now in the private sector because of the salary structures, and we have doctors being laid off for the same reason. We have hospital beds being shut down, wards being shut down. Mr. Speaker, we are taking care of next year's budget and picking up most of the shortfall for next year, for 1990, but we are not dealing with the problem that exists in this year's budget.

It is even more important that we pass the supplemental than it is to pass this budget here today. I point out to all of those who are listening that, yes, the Committee on the Budget has done a great job in bringing this budget before us. They have taken care of much of that shortfall for next year. With the appropriations in the budget that they are making here today, there will be a shortfall in 1990, but it will be a much smaller shortfall which we can deal with in next year's supplemental.

Right now we need to pass this year's supplemental budget, because it picks up the current $700 million shortfall.

Mr. Speaker, the Senate is going home next week. They will not be here. We will not be able to pass the supplemental. The following week all of us are going home. We cannot wait another 2 weeks, because a month will go by, and we will not be serving the needs of these veterans.

I would urge us to use all the pressure to get that supplemental on the floor and let us pass it before we go home this weekend.

Mr. Speaker, I commend both of these gentlemen for the great job that they did on next year's budget.

Mr. PANETTA. Mr. Speaker, I yield 5 minutes to the gentleman from Ohio [Mr. TRAFICANT].

Mr. TRAFICANT. Mr. Speaker, I want to start out by commending one of the fine chairmen of the House. I probably would not support this bill if it were not for the gentleman from California [Mr. PANETTA], and the gentleman from Minnesota [Mr. FRENZEL]. They are two of the most capable Members, and they deserve our support.

I would like to just tell it like it is in a little way today. Everybody heard about the fact that my district, northeast Ohio, lost 55,000 jobs in the last 15 years. They averaged $12 and $15 an hour. They shipped those jobs overseas, and we got the $3.50 to $5.50 an hour jobs, and they said, "Be patient."

Meanwhile, Members do not realize this, that the companies that have gone overseas, American companies, now ship back to us these, and these are imports, and the Members realize on this section 954 of the Tax Code, many of them do not even pay taxes on their profits to Uncle Sam. I tried to change that with the Foreign Subsidiary Tax Equity Act, and the Committee on Ways and Means finally realized we should. They passed it. When it got into conference, the lobbyists killed it with the other body.

Mr. Speaker, I am here today just simply sick and tired of it. I have been told to be patient. Meanwhile, I need housing. I need a veterans' outpatient clinic. "Half a million dollars? TRAFICANT, you are going to bust the bank." I need roads. "Roads? My God, we have a deficit." I need a bridge. "Bridge? We have got financial problems."

But there is $17 billion in this turkey for foreign aid. There is $120 billion for NATO countries. We are protecting oil in the Persian Gulf that is going to Japan, and they are shipping us Toyotas and toasters and saying, "Keep your products out."

I am tired. I do not want any more political rhetoric. I do not want any more think tank people and economists giving me advice. I do not need any more cerebral stimulation. I want money for America first, and I want money for my district. I need an outpatient clinic, and I want the Committee on Appropriations to help me. I have two highway projects that are desperately needed, and all those steel mills that closed down, I want to open them up so that we can get some business in there. I want that, and I want those two projects.

I am going to make this statement, and this is going to be very unpopular, and I am going to get some powerful people after me: I plan to cut the foreign aid appropriation and use that money for America. I do not know if I will be successful. There is going to be a fight in the House.

I want something changed; all the money going to NATO, I want it to go to America. It is time they start paying their bills. We have rebuilt their countries, and they come over here after the war. They took pictures and photographs. We even gave them the blueprints. They went back, and they built the factories. We now have photographs and they have the jobs, and we have photographs. I want money for my district, and if there is anybody else who wants it, they had better start speaking out, because it is going to Singapore, the Philippines, Japan, Panama, and Nicaragua.

Mr. Speaker, we look for problems, and we find them, and we ship them money. Let us start taking care of America.

Mr. Speaker, America is falling apart with waterlines that are 70 years old, sewerlines falling in, bridges that need repair, roads desperately needed, Americans who need jobs. How about some incentives in our Tax Code for America?

Mr. Speaker, I am going to vote for this bill, and I do not like it, but I am going to try and cut it with a razor, and I do not have much support, I will be honest.

□ 1350

But I am going to try and get that foreign aid and cut it to death. I am going to try and take that NATO money and get on it. I am tired of the free toll road business for Japan, and they built a toll road on our side. I am hoping that the Members of Congress who are looking at this deficit not only realize it is a deficit, but our greatest cost is because we are supporting everybody around the world and we are forgetting about No. 1 and that is Uncle Sam.

I am saying today good luck. I want some Members to help me to cut that foreign aid and change the focus on that NATO support, and let them start paying their own way.

I thank the chairman for the time and close out by saying if there is any finer chairman around here, there may be a few, but not many. I think the guy on the other side, BILL FRENZEL, is as sharp as there is when it

comes to the economy of America, and I hope we take a look at those items because we have cut UDAG's, revenue sharing, anything that was American we cut it.

I am saying let us start putting some good old money into the accounts of Uncle Sam and start cutting that money overseas.

Mr. FRENZEL. Mr. Speaker, I yield 7 minutes to the distinguished gentleman from California [Mr. DANNEMEYER].

Mr. DANNEMEYER. Mr. Speaker, I would like to thank the gentleman from California [Mr. PANETTA], chairman of the Budget Committee, and the ranking minority member, the gentleman from Minnesota [Mr. FRENZEL], for the work they have done with what I classify as almost an impossible situation. They are attempting to add Band-Aids to the whole process to keep it from hemorrhaging, and from their perspective they have done a decent job, and I commend them for the work product that they have produced, given the ground rules on which they have had to work.

I take this time to suggest to my colleagues that the responsible thing for us to do is to vote against this budget resolution, and I hope I can convince my colleagues of the reasons for that statement.

We all have heard the statement that the deficit will be under $100 billion, that this will be within the confines of the Gramm-Rudman-Hollings target. I guess that depends on how we define the deficit. To me the deficit is how much do we intend to increase the national debt by, and the answer is if we look on page 49 of the conference report we find that when Members vote for this budget resolution, this will automatically result in an increase in the national debt to $3.122 trillion. That represents an increase over the existing debt of $262 billion. That means we will be adding $262 billion to the national debt with the adoption of this budget resolution.

Then Members may ask how do we reconcile this increase in the debt by $262 billion with a statement that the deficit is a little under $100 billion, and the answer is quite simple. In order to get the projected deficit to under $100 billion we are reducing from the general fund deficit of some $241 billion about $140-some billion in trust fund money. That is the amount that we are scheduled to borrow from the trust fund in fiscal year 1990.

To give some idea of just where our debt is today, the general fund to date owes the civil service retirement fund $181 billion; it owes the Social Security trust fund $191 billion; it owes the military retirement fund $52 billion; and even more startling is the fact that in just the next fiscal year nine-tenths of a trillion dollars of this national debt will come due.

Of this amount $675 billion is represented by marketable debt and $230 billion is represented by nonmarketable debt held by trust funds. Just in 1 year the Treasury has to refinance almost a trillion dollars of our national debt, plus also selling enough debt to finance the deficit for fiscal year 1990.

Members should also be advised that there is still in this budget conference report $19 billion of unspecified reductions, which means that we are just placing under the table the problem of how we are going to reduce $19 billion of spending in fiscal year 1990. This means that when we get around to discussing the budget for the next year we will have raised the whole level of Federal spending by an additional $19 billion. What that all means is that the pressure to increase taxes when we are going through this process a year from now will be all the more difficult to resist.

I have previously spoken to the House on the necessity of reexamining the whole premise of how we are attempting to proceed. America went down the road of a dollar backed by nothing in 1968 when we separated the link between the dollar and gold. President Nixon shut the gold window in August 1971. He said when he did that it was only temporary.

We Americans today should be aware of the consequences of the actions taken in 1968 and 1971. We are today paying extraordinarily high interest rates. I think the way out of this dilemma is to begin to refinance the national debt through the issuance of gold-backed bonds. The Treasury of the United States should offer to the world the opportunity of investing in a bond backed by gold. We believe that the interest rate on that bond would be about 1½ percent a year. That contrasts with the interest rate the Government is currently paying on the debt of about 8½ percent a year.

If we reduce the interest costs of maintaining the national debt by 7 points on a national debt of some $3 trillion, Members can readily extrapolate that we will be reducing the interest cost of the expense of maintaining fewer debts by roughly $200 billion. We do not get that savings in 1 year. It would take about 10 years to refinance most of our debt. But this is the means whereby we can reduce the interest costs on the national debt which in fiscal year 1990 will total close to one quarter of a trillion dollars.

If the U.S. Government is able to reduce the interest costs of carrying the national debt, then the Federal Reserve Board will be able to reduce significantly the cost of interest that all Americans must pay. That means that young couples coming into the marriage market, forming their families, will have a chance to participate in the American dream of owning their own home with an interest rate of 5 or 6 percent, which is what their parents were able to enjoy in owning their own home. College students will be able to pay off their loans at 5 or 6 percent, and American business people would no longer be penalized in attempting to compete with West Germany, and Japan, our major competitors, by paying an interest rate in this country which currently is twice what our major competitiors in West Germany and Japan have to pay. In other words, we would be a long way toward the goal of restoring honest money in this country with a consequent reduction in interest cost expense, which redounds to the benefit not only of the American Government but of every consumer in this country who has to pay interest to some bank in some form.

Mr. PANETTA. Mr. Speaker, I yield 3 minutes to the gentleman from Wisconsin [Mr. MOODY].

Mr. MOODY. Mr. Speaker, I thank the gentleman for yielding time to me.

Mr. Speaker, I rise to ask my colleagues to consider what we are doing today in light of the long-term consequences of this budget resolution. I do not plan to vote for it, but I am not here to urge Members not to vote for it, simply to commit themselves to doing something more serious about the deficit when we have to revisit this, and we may have to revisit it more quickly than we think.

On this deficit task we start out with $146 billion in deficit and we waive away $19.9 billion, almost $20 billion, simply by using rosy economic assumptions. We chose the OMB assumptions which have interest rates plunging to 5½ percent, while real income surges to 3.4 percent, a combination that is almost literally impossible; yet we cling to that as a way of hiding almost $20 billion of the deficit.

Then we engage in about $11 billion in accounting gimmicks, pushing payments from one fiscal year, 1990, back into 1989 to enlarge the 1989 deficit, but we pretend that we have handled the problem.

□ 1400

Postal Service, we take that off budget; it is an accounting gimmick. Asset sales of various kinds which are equivalent economically and accountingwise to simply adding more debt. We pretend we have cut another $11 billion out of the deficit and then we achieve $2.4 billion by simply extending current law which is scheduled to lapse, such as treatment of Medicare premiums, which means that when we really get right down to it the only two really hard things in this budget are $5.3 billion in revenue increases, which are easy to vote for in abstrac-

tion because the body has not been asked to vote for any specific revenues.

I hope all of you who vote for the resolution today are committed to voting for that package of revenues. Anything else would be irresponsible.

So that is No. 1. No. 2, the only other hard thing we have is $4.1 billion in military spending off of the CBO baseline.

Most of the other stuff is pretty small and some of it is questionable.

There is $1.7 billion in user fees; again it is easy to vote for them in principle. Whether or not we can pass them in practice remains to be seen.

The point I would make is this: We have a very serious problem in our country. We are not addressing a number of issues: Child poverty, homelessness, the S&L crisis; we are going to try to hide that again by putting it off budget unless our committees vote is sustained on the floor and through the whole Congress to put it on budget. A number of other times we are either not addressing or hiding or pretending they do not exist. If we are serious about the things that count in this country, if we are serious about competitiveness, if we are serious about meeting our national priorities, we have got to get serious about the deficit.

Today's exercise is just that, an exercise.

I hope this body will summon up the political will to make serious cuts in the deficit in the next go-round which may be quite soon. I think the people are with us. I think they understand how serious it is. I think we are trailing behind the popular opinion in this country on this deficit.

Mr. Speaker, I think it is time to get really serious, jacking up these numbers that I say are so inadequate today.

But I commend the committee and the chairman for doing the best he could under these difficult circumstances.

Mr. FRENZEL. Mr. Speaker, I yield 6 minutes to the distinguished Republican whip, the gentleman from Georgia [Mr. GINGRICH].

Mr. GINGRICH. Mr. Speaker, I wanted to take some time to talk about this conference report because I think that it is vey helpful to see this particular report in a much longer story.

The Gramm-Rudman process I think is very slowly working. It is not working as fast as some people would like; it is not working very elegantly. But the fact is that very slowly we are beginning to get control of spending in the Federal Government.

It has had a clear and decisive impact on the defense budget. At the same time I think it has begun to have an impact on both discretionary spending and yet there is a whole other zone that people do not look at which is the impact that it has had on the programs that would have existed without Gramm-Rudman.

The fact is that the tendency to centralize power and spending in Washington has been dramatically curbed in the last 3 years. Gramm-Rudman has slowed down the rate of invention of new programs and it is beginning to bite, it is beginning to have an effect.

Are there smoke and mirrors? Yes. There have been smoke and mirrors I suspect in every budget starting with Alexander Hamilton.

Are there things we would like to do differently? Yes, on both sides of the aisle. We would like more defense, our Democratic friends would like more domestic spending.

But the fact is that both of us have come together and have fashioned a bipartisan compromise that is a step.

I was very taken with the analogy drawn by the Director of the Budget, Richard Darman, on a television show when he said, thinking in terms of baseball which was this President's major sport in college and one the President follows carefully, he said:

> You have to think of this particular agreement as a single. It is not a home run, it is not even a triple, it is a single. But it is a step in the right direction. You now have a runner on base.

I think what we have to come to recognize in the Congress and in the country is that the process of getting to a balanced budget is not going to occur in some magic moment, there is not going to be some decisive exciting moment. But the process of getting to a balanced budget occurs every day.

I would argue that 2 weeks ago when we stripped out, voted to strip out unnecessary spending by rejecting a supplemental appropriations bill which had gotten too big, that was a step toward a balanced budget.

I would argue that if we had the courage to bring forth and pass the veterans dire emergency supplemental with only the requested money for veterans, that would be frankly a 2 for 1, a good step in helping the veterans and a good step in helping us get toward a balanced budget because it would show a level of discipline about spending that this Congress needs to get to.

Now I think this budget is also good because it has a revenue number in it, $5.4 billion, which can be met in large part by passing the capital gains reduction.

I think it is important for us to look at the central lesson of the last 10 years. That is, if we continue to take steps to create jobs, to have more people at work, to increase the take-home pay so that people in fact are wealthier, they pay more taxes because they are richer, not because we have raised taxes.

The fact is that economic growth gave us a windfall of almost $90 billion in this budget from the budget of a year ago. That is $90 billion extra. Part of it was spent toward meeting the Gramm-Rudman budget requirements. Part of it was spent on a handful of small new programs.

I think that the No. 1 cause for hope is that you have in the Bush administration a number of Cabinet officers and a number of staff people working very diligently to pull together the new ideas for a trimmer, more effective, more reformed Federal Government.

I think with people like Jack Kemp and Bill Bennett working on their programs, with Dr. Sullivan working on his programs, with the Secretary of Education, Cavasos, working, together they can offer us a package of reforms so that by the time we get to the fiscal 1991 budget we can begin to see how we are going to get toward a truly balanced budget over the period of another 3 or 4 years.

Mr. MOODY. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I yield to the gentleman from Wisconsin [Mr. MOODY].

Mr. MOODY. I thank the gentleman for yielding.

Mr. Speaker, the gentleman uses the baseball analogy. But this is not a home run, you are right, it is not a triple, it is not even a double, in fact it is not even a single. This is like bunting when you are behind by eight runs in the ninth inning or the eighth inning even; that is not good public policy. I think the gentleman should use the analogy properly and more accurately.

Mr. GINGRICH. Well, Mr. Speaker, I realize that my colleague has a neighboring State which has had a tradition of home run hitters in baseball games, but I do not think in all honesty we can get to a home run right now.

I do think what Mr. PANETTA and Mr. FRENZEL helped us get to is a nice solid single. As an Atlanta Braves fan and we have had a winning streak recently, I think singles help. They are a lot better than foul balls and striking out.

So I want to close by saying to my colleagues: Vote "yes" today, not because this is a magic panacea but because it is one more small step in the right direction. It is not the best possible step, it is not the best or most elegant possible step, but in fact it is a step.

If we vote "yes" today and if we are tough all summer as appropriation bills come to the floor and if we are willing to pass the reforms that are necessary to get us a Federal Government we can afford, if we are willing to have the dire emergencies that are real such as the veterans but not load them up with a lot of of pork, then I think over the next 3 or 4 years in fact

we can be proud of having helped work our way to a balanced budget.

So I do urge my colleagues to vote "yes" on this conference report.

Mr. FRENZEL. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Oregon. [Mr. DENNY SMITH], a member of the Committee on the Budget.

Mr. DENNY SMITH. I thank the gentleman for yielding.

Mr. Speaker, somehow or other during the conference process we expect that the Members from both bodies are going to sit down together and come to some special wisdom. Unfortunately this bill is not any better than it was when it left the House a couple of weeks ago.

It in fact is not going to really solve our deficit problem. It is paving over the holes in the road.

It is interesting when I came to the Congress we had a budget of $678 billion, 1981. We now have a 73-percent increase to $1.17 trillion. The report also contains revenues of $1.07 trillion. So we have a 78-percent increase in revenues in that same period of time.

Our problem is that we spend more money than we take in and we are unwilling to change our spending habits.

I guess the key to it—and the previous speakers have talked about this—that is the supplemental or the appropriation bills that will follow are going to be overloaded and they are not going to comply with this budget.

The tragic thing in my estimation is that we have between $80 billion and $90 billion of increased revenue without raising taxes in this fiscal year budget which could have gone toward more deficit reduction had we simply not spent too much money.

□ 1410

I think the only way we are ever going to solve our problem, and maybe the previous speaker's analogy to baseball, "and this is just one small step, this is a single," is a good way to look at it.

I am going to vote "no" on this bill, but I do think that we are doing better, and with the prospect of having a continuing effort right after this budget is passed in our committee working on the 1991 problems, trying to come to agreement not to spend too much money, this comes closer to our 2-year budgetary process that a lot of Members think are going to be necessary to really get a long-term handle on this budget and this spending. But with increased revenues that we have, $14 billion called for in this document plus the $80 billion in the estimate for next year over this fiscal year, we have a situation where we could have done better, and I think that that is the key factor here. There was not any more wisdom here, although I certainly do not mean to speak ill of the ranking gentleman from Minnesota [Mr. FRENZEL] or the chairman, the gentleman from California [Mr. PANETTA]. I think they have done a good job, and we have had good cooperation out of the administration and long term with people working together, I think we will come to a better conclusion and get to the balanced budget.

Mr. FRENZEL. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Michigan [Mr. UPTON].

Mr. UPTON. Mr. Speaker, I very reluctantly support the conference agreement on House Concurrent Resolution 106, the first concurrent budget resolution for fiscal year 1990. Because it is a step in the right direction. Both the President and the Congress should have and could have done much better in the bipartisan budget agreement announced in April. That agreement was a weak attempt at true and courageous deficit reduction.

I did not think it was possible, but this conference agreement is even weaker. And it comes at a time our constituents are demanding courageous action against the Federal budget deficit.

We needed a courageous budget. But instead of a profile in courage, this budget is a silhouette in silliness. It has silly numbers, silly economic assumptions, silly reconciliation instructions, silly reserve funds, and a silly delay of real progress against the deficit. What is worse, there is no provision for the future, even the not-too-distant future of this July, when new economic assumptions will be presented by the administration.

The problems with this budget package are numerous. One problem is the functional totals. Take for example, function 570, the Medicare function. In this function, the House resolution had $123.85 billion in budget authority, and $98.35 billion in outlays. The Senate had $122.4 billion in budget authority and $98.2 billion in outlays. The conference agreement settles on $123.9 billion in budget authority and $98.5 billion in outlays. These numbers are outside the scope of the House and Senate versions. The rules of this institution, as I understand them, do not allow a conference committee to do this.

Take a look at the reconciliation instructions. In the conference report the House and the Senate authorizing committees supposedly reconcile some of the savings. But the House and Senate have different reconciliation targets. In all, Senate reconciliation instructions total $13.8 billion in outlays, while the House provides only $13.5 billion.

And each body reconciles different items. Are we going to auction off rights to produce chlorofluorocarbons? The Senate says yes; the House says no. Sometimes, the House and Senate are told to reconcile the same item, but different savings amounts are tagged on that item. Fees to be collected by the Nuclear Regulatory Commission are assumed by the House to increase revenues by $299 million. The Senate assumes NRC fees will take in an additional $50 million. Which is it, or is it neither?

Look at asset sales. The Senate provides reconciliation instructions to its committees on asset sales, making it likely that the Senate will act on this excellent way to reduce the involvement of Government in activities it should not be undertaking. But the House has no reconciliation instructions related to asset sales. Will asset sales occur? Will the Senate approve them; and the House not? What happens in a reconciliation conference?

The U.S. Postal Service [USPS] provides another interesting case. For fiscal year 1990 the Postal Service is expected to run a deficit. This Postal Service deficit results mostly from the fact that it has been a long time since the USPS raised the price of postage. Therefore, the Postal Service deficit creates a budgetary savings if it is taken off-budget.

What happens when the Postal Service hikes the price of stamps and runs a surplus? Shall Congress put it back on budget?

The conference agreement also has a few entitlement program expansions cloaked as "reserve funds." First there is a $200 million additional amount assumed for Medicaid expansions. This may be well and good public policy, but an explicit entitlement expansion does not belong in a conference agreement on a budget resolution.

A more ironic reserve fund is the "Reserve Fund for Children," which fences off about $1.8 billion for a child care package. This sounds like a lot of money for a very good cause. But the real "reserve funds" for children are the 12 digit deficit and the $3.1 trillion national debt that we are leaving for our children to pay. This is a lot more money, and not a very nice thing to leave to the next generation.

Mr. Speaker, my point is that this budget conference agreement is a poor budget and a poor agreement. We do not have much of a budget; and we do not have a true conference agreement. What we have is an agreement between the House and the Senate to delay the toughest choices and to disagree on even the easy ones.

We have solved nothing, only put off the tough decisions for a few more weeks. What happens this summer when new economic assumptions are available, when there are no appropriations bills enacted, when the debt limit is breached, and when reconciliation is stalled in conference?

This silly situation cries out for procedural and substantive reform. I have cosponsored and worked hard on a number of budget reform bills which

ought to be considered promptly, perhaps in conjunction with the reconciliation, spending, or debt limit debates later this year.

There are a number of things we should do. We must take the partisanship out of the underlying economic assumptions, and base a budget on realistic economic projections. We need a joint rather than a concurrent budget resolution to lessen the likelihood of shabby resolutions like the one we have before us today. The President should have enhanced rescission authority on all omnibus appropriations bills which include more than 1 of the 13 appropriations bills. And, finally, we should have a balanced budget amendment to the U.S. Constitution.

Many people are defending this conference because it is a first step in a "trust building" process which needs to be established between Congress and the administration. I can understand that argument, but it only goes so far. Our greater trust is the "public trust," and that trust is breaking down. The only way to restore that public trust is to take real steps to solve the real budget deficit problem. Let's stop being silly, and let's get down to work.

Mr. PANETTA. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Mississippi [Mr. MONTGOMERY], the chairman of the Committee on Veterans' Affairs.

Mr. MONTGOMERY. Mr. Speaker, I do rise in support of this conference report and will vote aye when I have the opportunity. I want to thank the chairman of the Committee on the Budget, the gentleman from California [Mr. PANETTA] and the ranking minority member, the gentleman from Minnesota [Mr. FRENZEL], and I also want to thank all the members of the Committee on the Budget for their support of our veterans' programs in this budget.

Members never get enough money that they need to run the different departments, but we do feel that we have enough funds for the veterans' account to carry on the current services for 1989. I want to follow up on what the gentleman from New York [Mr. SOLOMON] was talking about. What we really need now for veterans' programs is to get this dire supplemental bill out here on the floor where we can vote on it. We have a shortage of funding right now to fund compensations which is an entitlement for veterans, and closing up hospital beds in our veterans' hospitals, and cannot buy enough beds, cannot get enough professional people to run these hospitals like they should be run.

This administration, for the first time in a long, long time, sent up a supplemental to take care of the veterans and take care of the veterans' programs. We need this dire supplemental out here, Mr. Speaker, and I hope the Members will help get the opportunity to vote on the supplemental before we go home at the end of the week.

Mr. FRENZEL. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Missouri [Mr. BUECHNER], a member of the Committee on the Budget.

Mr. BUECHNER. Mr. Speaker, I certainly want to compliment the work that was done by the able chairman, the gentleman from California [Mr. PANETTA] and by his vice chairman, the gentleman from Minnesota [Mr. FRENZEL].

As I take a look at the budget, which for the first time the revenues of this great Nation will exceed $1 trillion, and as we listen to speakers who are both For, with a capital "F," and for with a small "f," this small budget we hear constant criticism about, "Oh, we could have done more here, and we could have done a little less here," and moved things around.

Let us take a real candid look at what this budget is. This budget is the clearing of ground. This budget is not a foundation, nor is it an edifice that will last through the 1990's. This was a bipartisan agreement in a meeting of the executive and the legislative branches to go forth and to get rid of a lot of the brush and misconceptions that have been out there about what we were going to do as a body, and yes, we are going to meet Gramm-Rudman. Maybe right by the very hair, but we will meet it.

So what I think we have done here, we have cleared off the ground and we are prepared to lay the foundation for the 1991 budget and to do it soon. Why is that important? It is important because it is a commitment we have made to the American public. We have made it not only to all the branches, we made it to all the people with their hand out, those that need, and some that think they need. We have made it to the taxpayers, not of just this generation but of the future generations. If we are to do anything, if this budget is to mean anything, it must be that what we have done is prepared it for an immediate 1991 healing and building, and this is vitally important, Mr. Speaker, because if we do not do this, then we will have kidded ourselves, and that all the worst things that the speakers have said about this bill will come true.

□ 1420

If we do not admit that what we are doing here today is getting a running jump at 1991, then we will have failed and we will have done the most disservice that we could ever do; we will have lied not only to the people of this Nation but to ourselves. So I would say that we should view it as it is—a joining, a clearing, and a preparation for what will hopefully be the 1991 foundation for a balanced budget within the next couple of years. If it is anything less than that, then we will have failed.

This is not a perfect budget, and it was never intended to be a perfect budget, not from down the street or inside these hallowed Halls. It is simply a step to 1991. We must admit that we must be prepared to deal with it, and if we deal with it, then we will have given our people the confidence that we have the right to govern this Nation. And if we have not, we do not have that right; we will have forfeited that right.

Mr. FRENZEL. Mr. Speaker, I yield 3 minutes to the distinguished minority leader, the gentleman from Illinois [Mr. MICHEL].

Mr. MICHEL. Mr. Speaker, it is said that those of us who legislate should have high ideals and moderate expectations.

The conference report on the budget, embodying the bipartisan budget agreement between the Congress and the executive branch, is an example of this truth.

It might be said of the process that led to this report that the negotiations seemed endless, the differences seemed insoluable, and the result is, well, not exactly inspiring.

But if we have not achieved legislative perfection we have at least avoided legislative gridlock.

The process of budget-making continues.

We have wrestled with the numbers and with the assumptions behind those numbers and, we have finally pinned down enough of them to enable us to go on.

There is perhaps nothing less edifying than a legislative action that inspires neither great love nor great hatred, but merely a kind of exhausted acceptance.

This is one of those cases.

But before we condemn it for not being all things to all special interests, let us at least admit that what we have done is to move the process along. And in the judgment of history, that mundane, uninspiring, workaday triumph may be seen as one of the best things that has happened here in a long time.

We can go with the appropriations process. We can continue to the subsequent reconciliation bill. There will be no raise in additional taxes in the next fiscal year in order to reach agreement on targets. And, if we stay within the path we have charted, we will avoid the great fever swamp of a continuing resolution, in which we have wandered for so many years.

And so I say: Two cheers for this agreement.

In an imperfect world, where high ideals must be measured against moderate expectation, I think we did the best we could—the best, in fact, that

could have been done, given the circumstances.

My congratulations go to the President for reaching such an agreement in the early days of his first year in office.

My thanks go to my colleagues on both sides of the aisle for keeping the process going.

Mr. McMILLEN of Maryland. Mr. Speaker, I rise today in reluctant support of House Concurrent Resolution 106, the conference agreement on the congressional budget resolution for fiscal year 1990. I do so because it implements the budget accord reached between the President and Congress in April, and it establishes what seems to be a good, working relationship between the executive and legislative branches for next year's budget negotiations.

At the same time, I am disturbed by the continued use of smoke and mirrors budget trickery to comply with the Gramm-Rudman deficit reduction law. The fiscal year 1990 budget agreement may formally meet the $100 billion deficit target established by Gramm-Rudman. But, in reality, it does little to reduce the Federal deficit. Indeed, the real fiscal year 1990 budget deficit will probably grow to about $163 billion, an $8 billion increase from the fiscal year 1989 deficit.

Let me cite a few examples of the fiscal year 1990 budget agreement's smoke and mirrors.

First, we have accepted President Bush's very optimistic economic assumptions regarding economic growth and interest rates. Yet we know they will never be met.

The administration's economic forecast for fiscal year 1990 assumes 3.4-percent real growth in an economy that is near full employment. To attain this growth rate, productivity growth must accelerate. However, in all other post-World War II expansions, productivity growth slowed as the economy approached full employment—and productivity growth for the past 2 years has been 1 percent or less.

Similarly, the administration's forecast assumes that interest rates will fall to 5.5 percent. But this estimate is very unlikely as it is based on two false assumptions: That our economy can attain accelerated growth in fiscal year 1990, and that it can do so—in an economy nearing full employment—without a substantial increase in inflation.

A comparison between the administration's economic forecast and that of the Congressional Budget Office [CBO] is instructive. CBO—due to its more cautious assumptions—projects a deficit $19.9 billion higher than the administration. And based on the performance of the economy so far this year, even the CBO projections seem optimistic. An economic forecast equal to the average of the latest survey of 39 private blue chip economists would put the deficit another $3 to $5 billion higher.

Second, on the spending side, we have used some pretty innovative budgetary gimmicks. My favorite part of the budget agreement is the $1.9 billion savings that is supposed to accrue from agriculture program spending reductions. We save $850 million from shifting certain advance deficiency payments for the 1989 crop year from fiscal year 1990 to fiscal year 1989. And we save $420 million by keeping the farm credit program off budget instead of moving it on budget, as originally planned.

Third, on the revenue side of the ledger, the conference budget agreement calls for $14.2 billion in revenue increases. However, the agreement assumes $5.7 billion in asset sales that probably will not occur—since asset sales can no longer contribute to avoiding the Gramm-Rudman sequestration trigger, Congress has not been enacting them; assumes $2.7 billion in user fees—which year after year are proposed and rejected by Congress; and assumes $0.5 billion from better tax compliance—the perennial nontax favorite that never—in the real world—increases revenues.

Mr. Speaker, I understand how difficult it is to forge a congressional budget resolution. I also understand why the Federal budget deficit problem was not resolved during the Reagan years. What I do not understand is why this Congress and the new President have failed to come up with a more substantive and rational budget resolution for fiscal year 1990.

Next year in Washington we must be prepared to make the essential tough spending and revenue choices to reduce the Federal budget deficit. We must do so if we want the United States to be economically strong and internationally competitive.

Mr. DREIER of California. Mr. Speaker, today we are going to vote on the so-called bipartisan budget resolution—a resolution which may have the support of a majority of my colleagues in this body. The crux of this issue is whether we vote yes on a mere acceptable resolution, which does not make any real headway toward cutting our budget deficit: Or do we make a stand and reject the resolution and send it back to the conference committee for corrective surgery. This budget needs a major overhaul.

Sure, this resolution comes in under the Gramm-Rudman deficit-reduction targets. But let's face it, we're not fooling anyone. Everyone knows at the end of the year we will be $20 to $30 billion over the target. When you examine the fiscal year 1990 budget resolution, you find discretionary spending cuts that come from the use of smoke and mirrors. Except when it comes to the defense budget. This budget makes it very clear that the majority of all discretionary cuts will come from our national defense.

And, once again, we are faced with a tax increase, or as many of my colleagues like to describe, revenue enhancements. This budget resolution, which calls for $5.3 billion in new taxes, is a direct slap in the face of voters who read George Bush's lips last November. No new taxes.

If this body is serious about making real and lasting reductions to the Federal deficit, we would be enacting the recommendations of the congressional Grace Caucus and Citizens Against Government Waste which, last week, announced a list of 10 spending programs belonging to the "Government Waste Hit List."

Together, the 10 waste targets stand to save the Federal Government $19.1 billion in fiscal year 1990. Included among the proposals are measures to revamp the Federal procurement process at a savings of $7 billion in fiscal year 1990, give rental vouchers to low-income families instead of subsidies to developers and investors at a savings of $1.9 billion, and reduce wasteful farm subsidies at a savings of $1.1 billion.

Mr. Speaker, this budget resolution is flawed and should be rejected. By doing so, we can send a message to the American taxpayers that Congress is serious about reducing the Federal deficit, which is a major burden on our efforts to increase economic opportunity.

Mr. NELSON of Florida. Mr. Speaker, I am opposed to this budget because its numbers are not real and its projections are not realistic. Although the committee has worked hard and I commend them, and although the fresh breeze of bipartisanship is beginning to blow and I am grateful; this work product is an exercise in budgetary slight of hand to suggest a conclusion that is not correct.

The real budget deficit is nowhere near $100 billion.

The economic assumptions are, in truth, not nearly so rosy.

The spending priorities expressed, lowering research and development as well as science and technology, are misguided.

This budget is one of, to use the vernacular, blue smoke and mirrors. The American people deserve better. They deserve a realistic budget.

Mr. HAMMERSCHMIDT. Mr. Speaker, I rise in support of the conference report on the budget resolution as it applies to function 700, veterans benefits and services. However, I want to state my reservations regarding the final amount included for veterans health care programs.

Earlier this month, the chairman of the Committee on Veterans' Affairs, Mr. MONTGOMERY, and the ranking minority member, Mr. STUMP, met with the chairman and ranking member of the House Budget Committee, Mr. PANETTA and Mr. FRENZEL. Together, they worked out an agreement to add $264 million above the CBO baseline for a total of $13.35 million in discretionary spending for veterans programs.

With the addition provided by the House Budget Committee and agreed to by the entire House, it was hoped the Department of Veterans Affairs would be able to provide in fiscal year 1990 the same level of services as in this past year. Essentially it would have provided for current services, plus a little left over for high priority improvements, such as facility renovations.

Now it appears that even this amount would be insufficient and that more is needed to attract and retain essential health care personnel, such as nurses, into the DVA. Many of the medical centers are in dire need of equipment and physical renovation.

A number of my colleagues have expressed their concern to me regarding the crisis in veterans' health care delivery as it affects their own districts. Despite well-documented needs, the conference report on the budget reduces the House-passed resolution by approximately $125 million.

Unfortunately, veterans have been living with a straight line budget in terms of inflation for about 10 years. As the ranking member of

the Veterans' Affairs Subcommittee on Hospitals and Health Care, I am convinced that we just cannot continue to provide the quantity and quality of health care services that all my colleagues and the veterans they represent have come to expect, unless there is more money in the budget.

It is important to emphasize the health care crisis which is beseiging veterans' health care, because continuing the current trend of underfunding is impossible without seriously considering the realignment of the health care system as we know it today. This would include mission changes and facility consolidations.

I want to thank my colleagues, Chairman MONTGOMERY and ranking member BOB STUMP, for their hard work and support in trying to achieve the best possible funding level for veterans' health care.

I also want to recognize the efforts of Mr. PANETTA, Mr. FRENZEL, and all the members of the House Budget Committee.

I will support this conference report. Nevertheless, a declining budget will perpetuate the difficulties of the Department of Veterans Affairs and limit its ability to carry out the commitment this Nation has made to the men and women who have served.

Mr. OWENS of New York. Mr. Speaker, I rise against the conference report offered here today. Education is the mother's milk of all activities related to our national well-being. This conference report has chosen to cut our mother's milk. This means that we will have an escalation of our difficulties in the commercial and military arenas in the future.

Present and future space programs will continue to suffer from a lack of qualified technicians. We will lag further behind in our other scientific achievements when compared to other nations.

We will fall further behind commercially, and thus economically.

Our students are already falling behind those of other nations in science and math—this budget condemns them to further academic stagnation.

This budget ensures that this Nation will become more and more dependent on foreign engineers and technicians.

In the military sector, our B–1 bombers will continue to fall from the sky. Our Trident missiles will continue to blow up.

This does not bode well for our all-important national security.

This budget does not put education as a first priority. It is not enough to say that some education programs will be able to do a little better than last year. We need all of our education programs to do much better than last year and the previous 8 years. We must catch up and surpass our foreign academic competitors if we want to ensure our Nation's future scientific and economic competitiveness.

This conference report effectively takes away $400 million from education, employment, and social services.

This $400 million could serve 168,000 more children in Head Start, which is proven to dramatically increase a child's possibility for future academic success.

Less than half of children eligible for chapter 1 programs were served last year. We could serve 670,002 more students. We could serve 255,720 more students in bilingual education and 268,002 more students could receive Pell grants.

This is some of what could have been done with the $400 million cut out in the conference report.

We must address our ever-worsening education deficit. We have been challenged by our "Education President" to be an "Education Congress." This budget falls far short of that challenge.

Mr. RANGEL. Mr. Speaker, I rise in support of the conference report on House Concurrent Resolution 106, the congressional budget resolution for fiscal year 1990.

As chairman of the Select Committee on Narcotics Abuse and Control, I am especially interested in the funding this resolution provides for Federal antidrug efforts.

In adopting its version of the 1990 budget resolution, the House assumed an overall funding level for drug programs of $6.15 billion. This amount was $60 million above the amounts requested by the President.

The conference report before the House today assumes an additional $200 million above the President's 1990 budget requests for drugs. Even with this increase, however, the amount assumed for drugs is still about $1.2 billion in budget authority less than the amounts needed to fully fund the Anti-Drug Abuse Act of 1988.

As I said when the House originally debated the budget resolution, I am extremely disappointed that drug funding has not received a higher priority. After Congress passed, and the President signed into law, the Anti-Drug Abuse Act of 1988 last fall, and after President Bush vowed in his inaugural address to end the scourge of drugs, I had hoped we would have a commitment to a real war on drugs. The conference report before us today shows that we still have a long way to go. Until the administration agrees to join with the Congress in seeking the additional resources that are needed to fight a true war on drugs, the current resolution is probably the best that can be done.

Now the President is proposing a new $1.2 billion initiative to combat violent crime. As chairman of the Narcotics Committee, I am generally supportive of the President's crime package. Clearly, drugs are responsible for the greatest increase in violent crime in recent years.

But when we cannot find room for $1.2 billion in the budget resolution to fully fund drug programs enacted by Congress and the President, I do not understand how President Bush expects to finance a $1.2 billion violent crime program.

The White House fact sheet on the President's crime plan says that the total increase he proposes can be accommodated within the overall domestic discretionary spending cap set in the bipartisan budget agreement negotiated by the administration and Congress earlier this year. But that agreement did not include the crime initiatives the President announced on Monday, May 15.

The budget resolution conference report, agreed to last week before the President unveiled his crime proposals, already assumes full funding of the anticrime initiatives President Bush requested in his original budget. It also assumes that amounts available under the bipartisan budget agreement for new domestic initiatives will be allocated to certain other high-priority, low-income programs. It does not leave room for the President's new violent crime program without doing violence to the priorities already assumed in the resolution.

President Bush proposed no offsets and no new taxes on Monday to fund his violent crime package without breaking the bipartisan budget agreement. Congress should not make those hard choices for him. The President has a responsibility to do more than just take the credit for being tough on crime. He has a responsibility to tell Congress and the American people how he will pay for his programs.

Mr. FRENZEL. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. PANETTA. Mr. Speaker, I yield myself such time as I may use.

Mr. Speaker, let me take a few moments to conclude the debate.

First of all, Mr. Speaker, on a personal note, I want to draw attention to the fact that this is the last budget resolution that will be worked on by the chief counsel of the Budget Committee of the House, Pat Quealy, who is here next to me.

Pat has been with the Budget Committee since 1980 and has served as its chief counsel since 1985. Besides assisting the Budget Committee on its yearly budget resolution, she has been instrumental in the budget reconciliation process and has also provided invaluable assistance to the House leadership during the Gramm-Rudman conferences. So Pat has served the committee in the House with great distinction over these 9 years. We will miss her, and we wish her a great deal of luck in her new endeavors.

Mr. Speaker, in summary, let me add this: To those who say that we can do better, let me say that they are right, we can do better. But the choice here is whether we take this first step or take no step at all. To those who say that we have got to be tougher, let me say that they are right, too. We do have to be tough with regard to taxes and spending and revenues and other areas that need to be looked at. But, frankly, without the support of the President, the votes are not here to accomplish those kinds of tough choices. Ultimately we have to build that foundation between the Congress and the White House, working together.

To those who say that we can do more, I would say that they are right, too, and, very frankly, the Members have my commitment and, I think, the commitment of the ranking member, the gentleman from Minnesota [Mr. FRENZEL], that we will bring to this body the opportunity to make those kinds of tough choices. We are going to work on the tough choice for 1991 and hopefully beyond, and we hope to bring that kind of package to this

body in order to give this body the opportunity to do what needs to be done with regard to deficit reduction.

Mr. Speaker, I urge the support of the Members for the conference report on the concurrent resolution because it is the only alternative at the present time. It meets the Gramm-Rudman deficit targets, it provides deficit reduction, and it allows us to proceed with the appropriations process. It fulfills our part of the agreement with the White House, it protects the priorities we care about, and it sets the stage for the second round of discussions for a bolder package for 1991. If we pass this conference report, it will mark the first time in a decade that we have been able to put this resolution in place this early, and I think all of that marks a significant achievement for both sides of the aisle.

With that, Mr. Speaker, I yield back the balance of my time, and I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore (Mr. LEVIN of Michigan). The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. FRENZEL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 241, nays 185, not voting 8, as follows:

NOT VOTING—8

Bateman	Molinari	Roybal
Courter	Pepper	Udall
Meyers	Pickle	

□ 1445

Messrs. KANJORSKI, INHOFE, and STOKES changed their vote from "yea" to "nay."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

GENERAL LEAVE

Mr. PANETTA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous material, on the conference report on House Concurrent Resolution 106, just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

PERSONAL EXPLANATION

Mr. PICKLE. Mr. Speaker, I missed rollcall 57 because I was conducting a tour for National Historic Week. Had I been present, I would have voted "aye."

□ 1450

DIRE EMERGENCY SUPPLEMENTAL APPROPRIATIONS, FISCAL 1989

(Mr. WHITTEN asked and was given permission to address the House for 1 minute.)

Mr. WHITTEN. Mr. Speaker, I expect later to make a unanimous-consent request to return to H.R. 2072, the dire emergency supplemental appropriations bill. In the meantime, I would like to describe it if I may.

As the Members may recall, we had the supplemental appropriation bill up in the Committee of the Whole, at which time we had taken quite a bit of action when the Committee rose in the course of business.

Mr. Speaker, I do not call it up as of now in order to continue it as it was reported to the House. I want the Members to know that because of the

attitude of the House, we have tried to cooperate with what the intent of the House was. I asked each subcommittee to go back and review the actions that they had taken and to either limit it to dire emergencies which is within the rules, or that they offset the increases by cuts or by other means where actions proposed would not increase expenditures.

May I say that each subcommittee has cooperated in that respect, and there was one subcommittee that did not have the means whereby, or the money whereby, they could offset it enough. Therefore, I would treat that differently.

I will ask the Members to go along with a unanimous-consent request, that amendments to reduce or provide offsets for the remainder of the bill, or the major part of the bill, having to do with everything except the drug section be considered en bloc, to permit us to proceed. What the subcommittees have done is cut back in excess of $1 billion in line with what we considered the attitude of the House.

We have reduced that, and yet by the same token, essential items are left. Let me repeat again: My amendment will cover everything except drugs, which remain in the bill, subject to amendment. So, without further ado, I want to tell the Members that we are asking their support to proceed and to show that we are ready to proceed and take care of this thing now. It includes veterans medical care and pensions, it includes guaranteed student loans, it includes firefighting, migration and refugee assistance, international peacekeeping, trade adjustment assistance, payments to States for foster care and adoption assistance and processing tax returns.

May I also explain in the limited time that I have that much of the cause for this supplemental comes because this time last year our friends on the other side of the Capitol, at the last minute, asked us to cut the budget for discretionary budget authority by $1,900,000,000. It was agreed to on the House side primarily because they expected to take care of the supplmental.

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I am happy to yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, as the Members know, we were in a tremendous dilemma over this supplemental and how best to proceed.

The chairman was kind enough this morning to call me, and I visited with him. We discussed this matter, and what he intends to do is to ask for unanimous consent to lop off over $1 billion from this supplemental, leaving everything that is dire emergency in the bill with one exception, and that is the $821 million for drug enforcement, et cetera. I would then be in a position to offer an amendment later on as we debate this bill today, if we get this unanimous consent, to strike the $821 million in the bill for drugs, because there is no offset and it is strictly veto bait.

Mr. Speaker, we have made that agreement. I just want the House to know, and I want my side to know, that I thought it was a fair proposal and one that I could live with, and I am ready to debate the issue of the $821 million for the drugs here today and let the Congress determine whether we should put this money in without any offset, which I feel we should not.

If the unanimous consent is not agreed to, then this bill will go back to the Committee on Rules, and there, I understand, are any number of amendments pending, such as the Miller amendment on SDI, and the drug money will be there and we will all have these other things coming back here to debate. As the old saying goes, "A bird in the hand is worth two in the bush," and I would rather have had the $1 billion, but I understand there will be objection.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I am happy to yield to the gentleman from Iowa.

Mr. SMITH of Iowa. Mr. Speaker, to make it clear, as I understand it, many of the items in the bill except the part on the war on drugs and crime would be changed by the gentleman's amendment to try to make the bill acceptable to the White House. The administration is opposed to any more money for the war on crime and drugs. Funds in the bill for that purpose would not be reduced by the amendment. However, a motion to strike, or a motion to reduce the amount, either one, would be in order. I do not know what more anyone could ask.

I have no qualms, no hesitancy at all, to give anybody who wants to a chance to vote to reduce or to strike the additional funds for the war on drugs. If they are opposed to it, they have an opportunity to do so. I do not know what anybody could want more than to vote their conscience on this matter.

Mr. WHITTEN. Mr. Speaker, I thank the gentleman.

Mr. Speaker, may I proceed to say that what we have done here is meet the demands or the requirements made by the executive branch with which we agreed under the present conditions, but I repeat again, unless we proceed on this, we provide no funds—a drastic cut in appropriations for education, for veterans, for just about everything else included in the bill.

Mr. Speaker, may I repeat again, that it has not been easy. Our subcommittees have scaled back their original bill in what I proposed to offer here by $1,005,611,000 in line with the demands of the executive branch. We have cooperated fully.

There is objection to the money that is carried here for drugs. May I point out that the President himself in recent weeks has come out strongly for $1.2 billion to meet the law enforcement thing, which is largely what the money is in here for. I do not want to argue that point at this time.

I will tell the Members that we have done everything they demanded except with regard to drugs, and that will be subject to such action as the House itself, sees fit to do. It will be like it is in the original bill we reported to you, and I do not ask to touch that, but leave it up to the general rules of the House, which means a motion to strike would be in order.

I urge the Members to go along with us, because we need to show the country that we are going to do this, and may I say that this veterans' situation is terribly important right now, as are some of these other things.

The worst thing that we could do to education is to keep from passing this bill.

Mr. VENTO. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I am happy to yield to the gentleman from Minnesota.

Mr. VENTO. Mr. Speaker, is it my understanding that this unanimous consent would strike the $150 million for the homeless and that because there are no offsets for it, that it is my understanding also that there are no offsets for the Veterans' Administration money, and the administration is not demanding offsets for that but it is demanding offsets for everything in the bill the committee put in? Is that a correct understanding?

Mr. WHITTEN. Mr. Speaker, may I say the position I am in, if I may say so, I kept what is left. If the Members do not pass this bill, we do not get any of it. If we pass this bill, we get some reductions in some cases, but we had to do that to meet the demands.

I just would say that my amendment will provide $88,000,000 for operation of low-income housing projects and $15,000,000 for the FEMA emergency food and shelter program. But, without this bill, we do not get anything, and that is something we have to think about.

The SPEAKER pro tempore (Mr. FOLEY). The time of the gentleman from Mississippi has expired.

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent to proceed for an additional 5 minutes.

Mr. FRENZEL. Mr. Speaker, reserving the right to object, the gentleman asked permission to address the House for 1 minute, and he has addressed the House for a good deal more than that

and had a good deal of help from his friends.

Mr. Speaker, might I inquire from the distinguished chairman, what does the chairman intend to do with the next 5 minutes?

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I am happy to yield to the distinguished chairman, the gentleman from Mississippi.

□ 1500

Mr. WHITTEN. Mr. Speaker, I have always found I did better if I explained to my colleagues what was involved. So I am telling the gentleman what is involved before he makes his decision.

Mr. FRENZEL. Hearing that response, Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore (Mr. FOLEY). Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The SPEAKER pro tempore. The gentleman from Mississippi [Mr. WHITTEN] is recognized for 5 additional minutes.

REQUEST FOR PERMISSION TO CONSIDER AMENDMENT TO H.R. 2072, DIRE EMERGENCY SUPPLEMENTAL APPROPRIATIONS, FISCAL YEAR 1989

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that, during the further consideration of H.R. 2072, the dire emergency supplemental appropriations bill, it be in order to consider an amendment to be offered by myself which is at the desk. That points of order under clauses 2 and 6 of rule XXI be waived against said amendment, and that said amendment not be subject to amendment, except pro forma amendments for purposes of debate, or to a demand for a division of the question in the House or in the Committee of the Whole.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

Mr. FRENZEL. Mr. Speaker, reserving the right to object, under my reservation I would simply like to point out that in the last 48 hours we have heard, those of us in the House who are not privy to the insider discussions, about half a dozen versions of what this unanimous consent request was going to be.

I would refresh the House's memory and indicate that the dire supplemental was reported out of committee on April 18; it languished for another 8 days; was finally considered on April 26. That was 21 days ago when the House rejected at least some of the ideas that were suggested in connection with that bill.

It was quite clear I thought at the time that the House felt there should be offsets, and that we should be dealing with a cleaner bill than we were given.

The request by the distinguished chairman of the Appropriations Committee is an interesting one, but it strikes the House without any kind of preparation after a long bit of discussion. It has been quite clear through this whole last 3 weeks that an easy way to get the job done and to get the money moving to the veterans' hospitals, which all of us want to do, is to report a clean supplemental with offsets.

There is such a bill pending. It is House Joint Resolution 272, sponsored by the wonderful gentleman from Massachusetts [Mr. CONTE], the ranking member of the Appropriations Committee.

It is my intention to object to the request of the gentleman from Mississippi [Mr. WHITTEN], the distinguished chairman of the Appropriations Committee, and if I could be recognized for the purpose to request of the House that House Joint Resoution 272 be brought up for immediate consideration, I mention that now, Mr. Speaker, because I suspect I will not be recognized for that purpose, but I simply want Members to know that there is a way to solve this problem.

The way that the gentleman from Mississippi suggests is not satisfactory to me. It imperils the bill and may cause it to be veto bait. I believe the chairman of the committee could have made the same resolution, or could have brought forth the same kind of resolution that the distinguished gentleman from Massachusetts did. I do not think this is a fair or reasonable or a responsible way to approach the problem.

Therefore, Mr. Speaker, I object to the request.

The SPEAKER pro tempore. Objection is heard.

REQUEST TO CONSIDER HOUSE JOINT RESOLUTION 272

Mr. CONTE. Mr. Speaker, I have a unanimous-consent request.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Massachusetts [Mr. CONTE].

Mr. CONTE. Mr. Speaker, I ask unanimous consent that the House consider House Joint Resolution 272.

The SPEAKER pro tempore. The Chair will state to the gentleman such a request does not comport with the established guidelines for the consideration of legislation which requires prior consent by both floor and committee leaderships before the consideration is made in order. The prior request was a case in which an amendment was sought to be made in order by unanimous consent to an existing bill pending in the Committee of the Whole. The gentleman's request is to bring by unanimous consent a bill to the floor of the House which has not been cleared for such consideration and, consequently, the Chair will not put the unanimous-consent request.

PARLIAMENTARY INQUIRY

Mr. WALKER. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. WALKER. Mr. Speaker, if the leadership of the Congress that is all present on the floor at the present time would make this in order, it could be done fairly quickly, could it not?

The SPEAKER pro tempore. The gentleman from Pennsylvania knows that the established procedure is to have prior clearance from floor and committee leadership on both sides of the aisle before such a unanimous-consent request is entertained. The Chair has stated the fact that there is no such clearance that the Chair is aware of and, consequently, the Chair will not recognize the gentleman from Massachusetts for that purpose.

Mr. WALKER. I have a further parliamentary inquiry, Mr. Speaker. Since as I understand it there is consent by the leadership on our side, what would be necessary then is for our leadership to confer with the Democratic leadership in order to get this done?

The SPEAKER pro tempore. The gentleman is correct.

Mr. WALKER. I thank the Chair.

CONSIDERATION OF DIRE EMERGENCY SUPPLEMENTAL APPROPRIATION

(Mr. GINGRICH asked and was given permission to address the House for 1 minute.)

The SPEAKER pro tempore. Without objection, the gentleman from Georgia is recognized for 1 minute.

There was no objection.

Mr. GINGRICH. Mr. Speaker, I just want to make the point to the House that we have an opportunity to have some kind of an agreement, and clearly this particular resolution could be replaced by one authorized by the gentleman from Mississippi [Mr. WHITTEN], which would probably fit the majority's desire more. But we do have an opportunity to bring to the floor a clean supplemental which provides precisely for helping the veterans, and to then be in a position where we could move that through the House quickly before we leave this week, and that the Senate, the other body could take that up prior to adjourning.

If we do not pass something today or tomorrow, the other body will in fact leave and we will not be able to take anything up until after Memorial Day.

Mr. OBEY. Mr. Speaker, will the gentleman yield on that point?

Mr. GINGRICH. I am glad to yield to the gentleman from Wisconsin.

Mr. OBEY. Mr. Speaker, I would ask the gentleman from Georgia, is he opposed to providing the assistance needed to the democratic forces for the elections in Poland?

Mr. GINGRICH. Not at all.

Mr. OBEY. Is the gentleman opposed to providing the needed assistance for Soviet refugees, Jewish refugees who are trying to get out of the Soviet Union?

Mr. GINGRICH. I am confident that over the next few weeks the House will be able to solve many problems in an orderly manner. At the present time it would be useful to pass the veterans' money in a way which makes it meet the requirements of a dire emergency supplemental.

Mr. OBEY. If the gentleman will yield further, is he aware of the fact that the date of the Polish election is fixed, and that it must be dealt with now or not at all? Is the gentleman aware of the fact that we have 3,000 Jews now who need to get out now or they will run into trouble with their visas expiring?

Mr. GINGRICH. I am confident that if the House were to produce a truly small, truly emergency bill of the kind the gentleman just suggested, that everyone on our side of the aisle would try to help pass a truly small, truly emergency bill.

But I would just suggest when one starts to pass money for the next fiscal year in a dire supplemental, that somehow misses the whole purpose of dire supplementals, and the gentleman and I probably are in fairly close agreement.

Mr. SOLOMON. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I am glad to yield to the gentleman from New York.

Mr. SOLOMON. Mr. Speaker, we know this supplemental was reported April 16 and today is May 17. There is a dire supplemental need here.

Let me tell my colleagues what is going to happen. If we let the Senate go home this coming weekend, and we go home the following weekend, we are going to lose Veterans' Administration nurses to the private sector which we will never get back in our hospitals in our districts. This is a dire supplemental, and all of those things the gentleman from Wisconsin [Mr. OBEY] mentions can be taken care of one way or another. There is no way that the veterans' hospitals can be taken care of if we walk out of here this weekend without taking care of it.

We can go up to the Rules Committee, get a rule and come back right down here while all of my colleagues are sitting here, and we can do it in 20 minutes, and we can pass this supplemental, and that is what we ought to be doing.

DIRE EMERGENCY SUPPLEMENTAL APPROPRIATION

(Mr. SMITH of Iowa asked and was given permission to address the House for 1 minute.)

Mr. SMITH of Iowa. Mr. Speaker, let me make this crystal clear: There is only one thing holding up this supplemental. The administration does not want the Congress to appropriate any more money for crime and drugs. That is a fact. Everything else in this bill has been agreed to, everything else.

The President came up here and got on the steps of the Capitol on Monday and called for twice as much money as we have in this bill for additions to function 750; that is, for law enforcement and justice. He asked for twice as much money as we have in this bill, but they do not want the bill to come up, and they do not want the House to vote its will on whether or not they want more money for crime and drugs. Everything else has been agreed to in this bill.

It is the political operators down at the White House who say we do not want you to send us any more money for crime and drugs, and we do not want the House to have a chance to vote on it.

□ 1510

Now if the amendment of the gentleman from Mississippi has been permitted to come up, all you would have had to do, if you want to vote against it, is to move to strike, vote the money out. If that is your will and if that is the will of the House either move to strike the provisions appropriating more money for the war on drugs or offer an amendment to reduce the amounts in the bill for such funding.

IRRESPONSIBLE SPENDING DOES NOT MAKE SENSE

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, we have just heard an interesting dialog on the position we find ourselves in. I am always amazed at how kinder and gentler gets translated in this House. We always seem to find a partisan edge these days for kinder and gentler

But let me say to the gentleman that I think that the problem we have on our side is with the nature of the way in which the money is to be handled on drugs. The drug money is not being sought for the rest of this fiscal year. The drug money is being sought for the next fiscal year. It is an attempt to do a job against the whole process of a supplemental and we think that that kind of irresponsible spending does not make sense.

There is $500 million still in the pipeline for drugs. This administration would like to spend that in an orderly manner and do the job right.

Mr. Speaker, I would suggest to the gentleman that the proposal that he brings before us is not orderly and will do more harm than good in the drug fight.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Iowa.

The SPEAKER pro tempore (Mr. FOLEY). The time of the gentleman from Pennsylvania [Mr. WALKER] has expired.

Mr. SMITH of Iowa. Mr. Speaker, I ask unanimous consent that the gentleman have 1 additional minute.

The SPEAKER pro tempore. Let the Chair explain, if the gentleman will permit, that the Chair allowed some indulgence in the 1 minute with respect to the distinguished gentleman from Mississippi [Mr. WHITTEN] and countered that by some indulgence for the distinguished gentleman from Georgia [Mr. GINGRICH] on the minority side.

Now the Chair intends to hold Members to the relative exact time of 1 minute.

Mr. SMITH of Iowa. Mr. Speaker, after the gentleman from Pennsylvania is through, is that right; is the Chair going give him another minute or not?

The SPEAKER pro tempore. If there is any other Member seeking recognition, the Chair would prefer to recognize other Members before that.

THE THRESHOLD QUESTION: WHEN WILL WE SPEND THE MONEY?

(Mr. DURBIN asked and was given permission to address the House for 1 minute.)

Mr. DURBIN. Mr. Speaker, I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. Mr. Speaker, I just want to point out that the $500 million you are talking about is not in function 750. It is not in the money that the President asked for. It is in education and in rehabilitation programs. We got the list from OMB and they are short of money, as a matter of fact, for the war on drugs. They need more money in law enforcement.

So the $500 million is not an answer to this problem. This money in this bill was only for law enforcement. It was not for any drug education or rehabilitation program that the administration says has a low rate of obligation at this time.

Mr. DURBIN. If I might reclaim my time, we have a lot of speeches about drugs and crime and I think there will be quite a few more.

But is not the threshold question whether we are willing to spend the money to fight the drug war in America? Whether we are willing to spend the money to fight the crime in our streets? If we are not going to consider the question of spending the money on an appropriations bill, when will we spend it?

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair would now prefer to recognize Members on the Republican side if they seek recognition.

STATUS OF UNOBLIGATED FUNDS

(Mr. CONTE asked and was given permission to address the House for 1 minute.)

The SPEAKER pro tempore. Without objection, the gentleman from Massachusetts is recognized for 1 minute.

There was no objection.

Mr. CONTE. Mr. Speaker, this is really unfortunate that we are getting into this thing. This supplemental is getting messier than the shorelines of Alaska.

The gentleman from Iowa and I came into the Congress together. He is a smart cookie. Last year, he got a bad rap on a 302(b) subcommittee allocation, and they put the straitjacket on him. He wants to get some drug money in this supplemental so they will loosen up that straitjacket this year. It's that simple.

We appropriated $3.8 billion in fiscal year 1988 for drug money; that's billion, yes, billion. And in fiscal year 1989 we appropriated $5.3 billion, yes, billion dollars.

Do you know how much money is unobligated in all of these accounts that he is talking about? U.S. marshals, 52 percent, unobligated. Support of U.S. prisoners, 54.5 percent, unobligated.

The SPEAKER pro tempore. The Chair regrets to say that the gentleman's time has expired.

Mr. CONTE. FBI, 51.9 percent, unobligated. DEA, 51.9 percent, unobligated.

The SPEAKER pro tempore. The gentleman's time has expired, unobligated.

WE ALSO DEAL WITH A NUMBER OF ADMINISTRATION REQUESTS WE FIND EQUALLY COMPELLING

(Mr. OBEY asked and was given permission to address the House for 1 minute.)

Mr. OBEY. Mr. Speaker, I am always happy to be entertained by the gentleman from Massachusetts [Mr. CONTE], we all are.

Let me just simply suggest that I think everybody on this side of the aisle and everybody on that side of the aisle wants to deal with the issue of veterans health care; everybody understands that.

We think it would be kind of nice if while we do that we also deal with the number of administration requests which we find equally compelling.

We think, for instance, that it would be nice if we would deal with the guaranteed student loan shortage which has to be dealt with. We think it would be nice if we dealt with the fire fighting funding which everybody understands we need. We think it would be nice if we dealt with the Federal unemployment benefits and trade adjustment items which have been agreed to as far as I understand by the administration as well as the House.

We think we should not proceed without providing that assistance as well because they need it every bit as much as we need the money for veterans.

We also think it would be nice if we dealt with the FAA operating expenses shortfall, which is what the committee is trying to do.

I would point out if we are worried about unobligated funds, the defense budget right now has unobligated budget of $42 billion and I do not see anyone on that side of the aisle suggesting we should not provide any further money for defense.

WE ARE BEING TOLD THAT THIS ADMINISTRATION HAS BEEN UNABLE TO ALLOCATE THE MONEY

(Mr. MILLER of California asked and was given permission to address the House for 1 minute.)

Mr. MILLER of California. Mr. Speaker and Members of the House, I think we have arrived at a crucial moment here. Yesterday in the Select Committee on Children, Youth, and Families, we listened to witnesses who represented law enforcement, chiefs of police, judges, people in schools who told us about young people shooting up the neighborhood, killing other young people in record numbers, who told us about the inability to prosecute the war against drugs and the war against crime and the war against youthful offenders in this country.

We listened to judges who have a reputation, who have been nominated by this administration, to prosecute that war against drugs, telling us about the inability to deal with these problems.

What this supplemental is about and what this fight is about is whether or not we are serious. For you to stand up and to suggest that there is money that is available to this administration that has not been obligated is to suggest malfeasance, is to suggest that this administration does not care, because let me tell you there are drug clinics, there are chiefs of police, there are drug squads all over this country that are asking for help.

We listened to the chief of police of Houston, we listened to the chief of police of Los Angeles last night talk about the resources that they need, and you are telling us that this administration has not been able to obligate the money.

What you are telling us is that they are not going to fully fund this bill when all of us voted for this bill, went out and campaigned on this bill and immediately came back and started slashing the money. You are not keeping your compact with the American people, you are not keeping your compact with America's children and you are not willing to prosecute the war against drugs and the war against crime in this country by this attitude of the Republican administration.

And that is what this fight is about, over the supplemental.

LOOKING FORWARD TO A BIPARTISAN EFFORT IN THE FIGHT AGAINST CRIME AND DRUGS

(Mr. SCHIFF asked and was given permission to address the House for 1 minute.)

The SPEAKER pro tempore Without objection, the gentleman from New Mexico is recognized for 1 minute.

There was no objection.

Mr. SCHIFF. Mr. Speaker, I am glad to hear that there is an interest in fighting crime and drugs. I have just arrived at the U.S. Congress from a career of fighting crime and drugs as district attorney of Albuquerque, NM, for the last 8 years and a number of years before that.

However, we are addressing here a dire emergency bill. Dire emergency means not only an immediate need but an immediate ability to spend the money if it were to be appropriated.

The Veterans' Administration hospitals need the money and could spend it right now. I can tell you as a career law enforcement official that if the money were appropriated for law enforcement although there is an immediate need it could not be spent before October 1 to any great use.

I look forward to the majority party joining with us in the fiscal year 1990 budget for an adequate appropriation to fight crime and drugs.

EMERGENCY SUPPLEMENTAL

(Mr. BURTON of Indiana asked and was given permission to address the House for 1 minute.)

The SPEAKER pro tempore. Without objection, the gentleman from Indiana is recognized for 1 minute.

There was no objection.

Mr. BURTON of Indiana. Mr. Speaker, I would like to say we have been talking about every issue under the Sun for the past few minutes, but the fact of the matter is we are here to discuss an emergency supplemental for veterans. I met with the Director of the Roudebus VA Hospital in Indianapolis about 2 weeks ago and the people on the staff there told me that they needed additional funds quickly, otherwise nurses that they need so much right now would not be hired. The people on the staff there told me about the dire need for nurses and the shortages that have occurred. They said that these problems would not be solved unless these emergency supplemental funds were appropriated.

Now we are here today tinkering and fiddling around while this situation continues. Now I submit to Members that if we wait until after the Memorial Day recess we are going to lose a lot of those nurses and other people permanently. So I think we ought to get to the Committee on Rules today as has been suggested previously, to get the bill back to the floor and let it pass before we leave and before the Senate leaves for the week.

PASS THE DIRE EMERGENCY SUPPLEMENTAL

(Mr. TRAXLER asked and was given permission to address the House for 1 minute.)

Mr. TRAXLER. Mr. Speaker, it might help if my colleagues understood the exact situation for the Veterans' Administration and the dire emergency supplemental as it relates to the veterans' medical care appropriation.

We all share the same concern. We want very much to augment that account to a level that will allow them to increase their employment about 4,000 FTE, bring it up to about 195,000, and we are hopeful that in the coming year we will be able to maintain that level which everyone agrees is the minimum necessary. What is happening now is that in order to maintain even the current employment level, which is below that by several thousand, they are robbing Peter and paying Paul.

I want to tell Members that no employees are being laid off, no one has been displaced. What is occurring is that they are using moneys from their drug and equipment accounts to maintain current personnel. It is to our advantage to pass this supplemental including the veterans as quickly as possible.

REMOVAL OF NAME AND MEMBER AS COSPONSOR OF H.R. 876

Mr. SUNDQUIST. Mr. Speaker, I ask unanimous consent that my name be removed as a cosponsor of H.R. 876.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

VOTE NOW ON DIRE SUPPLEMENTAL

(Mr. McCOLLUM asked and was given permission to address the House for 1 minute.)

Mr. McCOLLUM. Mr. Speaker, we have been speaking a lot about the drug war here today and about the need for more money. There is no question we need more money if we want to fight it. I think the gentleman from New Mexico put it right, though, and that is we do have the opportunity in the coming fiscal year to provide the answers in an adequate and responsible way.

The drug bill we passed last year has an authorization in it quite padded, quite frankly, in some areas like rehabilitation. It does not make sense to tie up veterans' money, in my judgment, and I had a lot to do with the drug issue, but it does not make sense to tie up veterans' moneys when there is really an emergency out here in the next couple of days on the question of whether or not we vote right now for additional moneys for rehabilitation, education, and so forth in the drug area.

So I hope with very common sense in the next few minutes and next few hours and get the veterans' money out for the dire emergency supplemental appropriation and let Members vote on that before we go out for the Memorial Day recess, and come back and address the issue of drugs in the orderly fashion we are used to doing in this body.

EQUAL RULES FOR ALL

(Mr. VENTO asked and was given permission to address the House for 1 minute.)

Mr. VENTO. Mr. Speaker, I was on the floor and listened to some of the comments of my colleagues, and I would just like to point out that in this appropriation proposal we have before us this afternoon that some Members would like to stand up, vote, and be counted on important issues. Somehow, whether the money is offset or not offset for certain spending purposes, the VA hospitals, I agree, need their funding. That represents appropriate action. Because somehow when the money is for some specific purposes such as drugs or such as the homeless, it then requires different rules in order to be considered. In other words, we measure some people's spending with a yardstick and others with a ruler. They have different calibrations on them. I am just suggesting that since as candidates, President Bush and the Vice President QUAYLE both said they wanted full funding for the McKinney Act, and then when action was attempted to partially fund McKinney in 1989, Secretary Kemp of HUD supported that action, all of a sudden, when Congress has that proposal on the floor, we are not supposed to move on that measure.

In other words, they do not want to face up to these particular issues. They made good campaign slogans, but somehow when it comes time to implement that policy, the attitudes of some public officials change, and that is really what this debate is about. Whether we will lend credibility to the statements that were made, whether Congress will deal with the rhetoric only or with the substance in this House with regard to supplemental appropriations.

I think it is time that we deal with the substance. I think that the homeless, of which many are also veterans, deserve our help to attain shelter. All homeless deserve our assistance, and we have an obligation to vote on these issues. They are in dire need of assistance. They are an important issue. Otherwise, people are simply going to be in the streets. They are going to be vulnerable; 159 Members of Congress in this House of Representatives have signed House joint resolution and said they want to see full funding of the McKinney Act and full funding of the programs, within that authorization and they ought to have an opportunity to vote on such program funding and on the other issues. I do not think we should have a different test for money needed for the homeless than what we might have for others who have been identified as in dire need.

I think the homeless are citizens that have great need in this Nation, Mr. Speaker, and there ought not to be two sets of rules, one for the homeless and one for other groups seeking supplemental appropriation.

VETERANS NEED FUNDING

(Mr. RHODES asked and was given permission to address the House for 1 minute.)

Mr. RHODES. Mr. Speaker, I thought I would come over and engage in some sort of colloquy. I do not suppose Members want to talk about long-term renewal of the Bureau of Reclamation's water contracts or anything of that nature.

Mr. Speaker, with all seriousness, we have had an opportunity to have a little fun out here to demagogue a few things, to make some political shots at

each other. The important thing for Members to do here today is to proceed with the business of the House and to proceed to provide these desperately needed funds for the veterans and to come back at a later time and consider these other items that are emergencies but not dire emergencies. I would hope that this stratospheric conversation going on to my left would lead Members to a solution to this problem.

LEGISLATIVE PROGRAM

(Mr. SMITH of Iowa asked and was given permission to address the House for 1 minute.)

The SPEAKER pro tempore. Without objection, the gentleman from Iowa is recognized for 1 minute.

There was no objection.

Mr. SMITH of Iowa. Mr. Speaker, I just want to point out to fill out the RECORD here that we had earlier. Some of the speakers earlier today said that some money for the war on drugs is not yet obligated. Well, the fact of the matter is, we have an antideficiency law that prohibited obligating more money than what is appropriated. Therefore, OMB and the Treasury make money appropriated for salaries and expense accounts available on a quarterly basis. Most of the accounts in the Justice Department are salaries and expense accounts which are used to pay the salaries of the FBI and DEA agents, the U.S. marshals, U.S. attorneys, and all the other law enforcement personnel and supporting staff. So of course, there is unobligated money in the accounts for those agencies when we are 7 months through the fiscal year, but as a matter of fact these law enforcement agencies are right where they should be concerning funds obligated at the end of the seventh month of the fiscal year. So when we say that there are unobligated funds, of course, technically that is true. It sounds as though they have more money than they can use, but the law enforcement agencies do not have more money than they can use.

□ 1530

I have talked to the people at the FBI, at DEA, and at the Bureau of Prisons, and a number of these other agencies, and there is not 10 cents in this bill that we have before us that they cannot use before the end of this fiscal year.

In the case of the Bureau of Prisons, for example, they need the money, although it will not all be outlayed. Only about 10 percent of the funds in the bill will be outlayed in fiscal year 1989. But they need to get started so they can do their planning and get a jump of 6 months in completing some new prisons. So it is important that they have the money now and proceed even though the money will not be outlayed necessarily in this fiscal year.

Mr. Speaker, to say that there is unobligated money left is to me very, very misleading.

THE DR. MARTIN LUTHER KING, JR. CEREMONY—THE NEED FOR INCREASED PAY FOR NURSES

(Ms. OAKAR asked and was given permission to address the House for 1 minute.)

Ms. OAKAR. Mr. Speaker, I wanted to say that this afternoon we have witnessed an interesting signing of the Martin Luther King, Jr. Commission. A number of people from across the country were there. The President signed it into law, and Dr. King's widow, Coretta Scott King, was part of the ceremony.

I wanted to especially pay tribute to some of the people that I felt had been instrumental in bringing that bill to this point. Certaintly I refer to Congressman CONYERS and others, but when I first came to Congress, I remember that the Member who held the hearings relative to the holiday commemorating Dr. King was Representative ROBERT GARCIA. I have to say that sometimes his fortitude in forging ahead stood out. He had a lot of odds against him, but he was able to get the support of some Members on the other side of the aisle. I recall that our distinguished Secretary of HUD was pursuaded to change his mind and vote with him.

The fact is that this was a wonderful bipartisan event. I wish, frankly, that some of our discussions would not get so partisan, particularly in the climate that we are sometimes experiencing today. I think that there are some very beautiful things that Members do, like this ceremony today, and it would seem to me that would be the kind of tone that we on occasion ought to take more often.

Mr. Speaker, in reference to another topic, I wanted to discuss the shortage of nurses. I would point out that Congressman ACKERMAN, as the chairman of the Subcommittee on Compensation and Employee Benefits, has an omnibus bill related to the problems that nurses experience. I am, of course, the author of the pay equity study relating to the shortages of Federal employees in cetain categories. Not only are we losing senior employees, but we are losing individuals like nurses who work for the Federal Government, because their pay is capped, and they can go down the street to other hospitals, and so on, and make more money. The fact is that they work because they need to work. Very often they are the head of the household, and as we know, Mr. Speaker, we have 26 million women in this country who are part of a 2-owner couple situation and we have 12 million women who are heads of their own households. Many of them happen to be nurses. That is one of the more undervalued jobs that we have, and I would think, Mr. Speaker, that we would hopefully get on with the study at hand and pay our nurses decently.

Mr. Speaker, that is one of the reasons why we have such a critical shortage in this country.

CORRECTION OF THE RECORD

(Mr. SMITH of Florida asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. SMITH of Florida. Mr. Speaker, yesterday I filed H.R. 2378, a bill regarding the ad valorem tax. It appears in the RECORD of yesterday's proceedings at page H1976.

Through an error of the Government Printing Office, after the names of the cosponsors, Mr. FISH, Mr. HUGHES, and Mr. HYDE, 20 additional cosponsors were added on that belonged on a different bill.

Mr. Speaker, I ask unanimous consent that those names, the names appearing after the name of Mr. HYDE of Illinois, be stricken from the bill. They were included as a result of the mistake by the Government Printing Office. They are not cosponsors and their names were not submitted when I submitted my bill.

The SPEAKER pro tempore. (Mr. DICKS). Is there objection to the request of the gentleman from Florida?

There was no objection.

A TRIBUTE TO THE PRESIDENT ON HIS HANDLING OF THE PANAMA SITUATION—ANNOUNCEMENT OF HEARING ON WAR POWERS ACT

(Mr. HOPKINS asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. HOPKINS. Mr. Speaker, I want to take this opportunity, if I may, to first of all thank the President of this country for the marvelous way that he has, in my view, handled the situation as it currently exists in Panama, particularly the manner in which he has taken suggestions from both sides of the aisle as they relate to the issue in Panama.

Not only is this Congress, in my opinion, firmly behind the President on that issue, but, I think, the country is as well.

I also take this opportunity, Mr. Speaker, to inform my colleagues that within a few days the Subcommittee on Investigations of the Committee on Armed Services will be holding a hearing on the War Powers Act, and I would urge my colleagues who have an

interest in this subject to submit materials to that hearing or attend that hearing.

□ 1540

Unfortunately, it seems to me, Mr. Speaker, that the only time that we address the War Powers Act is at the worst possible time, and that is when our boys' lives are on the line. As we all know, peace is breaking out all over the world. We, in my view, have a flawed law on the books right now as it relates to the War Powers Act.

Mr. Speaker, while our boys' lives are not on the line, this is the time, in my view, for us to address that issue. It will be an extremely important hearing conducted by the gentleman from Massachusetts [Mr. MAVROULES], the chairman of the Investigations Subcommittee. I think this is the time for us to debate that issue.

There are those who feel that the War Powers Act should be repealed. In my honest opinion this Congress is not going to repeal the War Powers Act. Therefore, if it is flawed, then I think now is the time for us to repair it.

Mr. Speaker, I appreciate this opportunity to inform my colleagues of the hearing which will be held in a few days under the auspices of the Investigations Subcommittee.

GIVE THE VETERANS THE HELP THEY SO BADLY NEED

(Mr. SMITH of Vermont asked and was given permission to address the House for 1 minute.)

The PRESIDENT pro tempore (Mr. TAUZIN). Without objection, the gentleman from Vermont is recognized for 1 minute.

There was no objection.

Mr. SMITH of Vermont. Mr. Speaker, I think what we may be missing in this debate, and I will refer specifically to the veteran population in the State of Vermont with which I am most familiar, is that for them, while we can talk about moving money from account to account and how, in fact, the hospital administrator may have enough cash on hand to run the hospital, that what it translates into is that every day that we delay is another day, and we are really talking here, not about a day or two or a week or two, but we are talking about a month. However every day that we delay we leave hundreds and thousands of men and women in a state of uncertainty in terms of the kind of treatment they can expect. Can they expect nursing home care? Can they expect outpatient services? Can they expect access to the drugs they so badly need in order to be cured? Can they expect access to other rehabilitative services? How will they get to the hospital?

Mr. Speaker, it is issue, after issue, after issue like that that speaks directly to the confidence that these men will or will not continue to have in our commitment, the depth of our commitment, and our willingness to make good on this contract which we have made with them.

So, Mr. Speaker, I hope earnestly that this House will be able to get beyond its disagreements which are political, and I might say, although it sounds totally partisan, and it has been addressed in a partisan manner, the last time I looked when this bill was voted down, it was voted down in numbers that spoke very heavily to the fact that both parties had significant membership who opposed the supplemental appropriation.

So I hope we will be able to get past a difficult situation in which I think a minority is trying to manipulate the will of the majority, and we will continue with a clean dire straight supplemental appropriations bill that gives service to the veterans that they so badly need.

"WILDING" VICTIM

(Mr. GARCIA asked and was given permission to address the House for 1 minute.)

Mr. GARCIA. Mr. Speaker, I think that in view of the circumstances that we are waiting to see what action we take here on the floor, I would just like to take 1 second.

Mr. Speaker, in the city of New York today the young lady that was jogging in Central Park that was brutalized and was so badly hurt, the report on her is that she has taken her first steps in several weeks.

But more important, today I ask that the Members of this House and the people all over the country pray for her because she is going through surgery today for the first time. I think that what has happened to that particular case with this young lady has just been felt throughout, not only the country, but throughout the world.

So, Mr. Speaker, let our prayers and our hearts go out to her and to her family for a speedy and quick recovery.

COMMISSION TO STUDY THE GREAT SHORTAGE OF NURSES IN AMERICA

(Mr. PURSELL asked and was given permission to address the House for 1 minute.)

Mr. PURSELL. Mr. Speaker, appropriately tomorrow I am introducing a bill to establish a commission on the nursing shortage problem. Dr. Boland, former previous Secretary of Health, commissioned an 11-member group who have traveled the country and are studying the problems, not only economic, but other regional urban problems concerning the great shortage of nurses in America. This bill will establish an 11-member commission which will be in existence for 5 years. We will work the appropriation out; it is very minimal, with the Committee on Health Appropriations on which I serve, but, more importantly, if anybody would like to help cosponsor that bill on behalf of the nurses of America, I will be introducing that bill to establish that commission tomorrow.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. SMITH of Vermont) to revise and extend their remarks and include extraneous material:)

Mr. GILMAN, for 60 minutes, on May 24.

Mr. GINGRICH, for 5 minutes, today, and 60 minutes, on May 18.

Mr. DREIER of California, for 5 minutes, today.

Mrs. BENTLEY, for 30 minutes, today, and 60 minutes, on May 23 and 24.

(The following Members (at the request of Mr. TORRES) to revise and extend their remarks and include extraneous material:)

Mr. TORRES, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. SMITH of Vermont) and to include extraneous matter:)

Mr. PORTER in two instances.
Mr. GREEN.
Mr. RITTER in two instances.
Mr. PARRIS.
Mr. SHUSTER.
Mr. HANSEN.
Mr. SOLOMON in two instances.
Mr. GEKAS.
Mr. COURTER.
Mr. MCDADE.
Mr. RINALDO.
Mr. PAXON.
Mr. BLILEY.
Mr. GALLO.

(The following Members (at the request of Mr. TORRES) to revise and extend their remarks and include extraneous material:)

Mr. BEILENSON.
Mr. RICHARDSON.
Mr. MFUME.
Mr. HAWKINS in two instances.
Mr. SIKORSKI.
Mr. SKELTON.
Mr. GARCIA.
Mr. DERRICK.
Mr. CARDIN.
Mr. FLORIO.
Mr. FEIGHAN.

Mr. ERDREICH.
Mr. MATSUI.
Mr. MILLER of California.
Mr. BORSKI.
Mr. WILLIAMS in two instances.
Mr. HAMILTON.
Mr. ANDREWS.

SENATE JOINT RESOLUTION REFERRED

Joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 113. Joint resolution prohibiting the export of technology, defense articles, and defense services to codevelop or coproduce the FSX aircraft with Japan; to the Committee on Foreign Affairs.

ENROLLED JOINT RESOLUTION SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a joint resolution of the House of the following title, which was thereupon signed by the Speaker:

H.J. Res. 170. Joint resolution designating May 1989, as "National Digestive Disease Awareness Month."

SENATE ENROLLED JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled joint resolution of the Senate of the following title:

S.J. Res. 58. Joint resolution to designate May 17, 1989, as "High School Reserve Officer Training Corps Recognition Day."

ADJOURNMENT

Mr. COELHO. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 47 minutes p.m.), the House adjourned until tomorrow, Thursday, May 18, 1989, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1207. A letter from the Secretary of Defense, transmitting the Secretary's certification with respect to the Army Ground Station Module portion of the JSTARS program, pursuant to 10 U.S.C. 2433(e)(1); to the Committee on Armed Services, May 17, 1989.

1208. A letter from the Secretary of Defense, transmitting the Secretary's certification with respect to the Tacit Rainbow Program, pursuant to 10 U.S.C. 2433(e)(1); to the Committee on Armed Services.

1209. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. ACT 8-31, "District of Columbia Hospitalization of the Mentally Ill Amendment Act of 1989," pursuant to D.C. Code section 1-233(c)(1); to the Committee on the District of Columbia.

1210. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of D.C. ACT 8-30, "Public Assistance Act of 1982 Amendment Act of 1989," and report, pursuant to D.C. Code section 1-233(c)(1); to the Committee on the District of Columbia.

1211. A letter from the Administrator, General Services Administration, transmitting a draft of proposed legislation to amend the requirement that long-distance telephone bills be certified by agency heads; to the Committee on Government Operations.

1212. A letter from the Clerk, U.S. House of Representatives, transmitting the quarterly report of receipts and expenditures of appropriations and other funds for the period January 1, 1989 through March 31, 1989, pursuant to 2 U.S.C. 104a (H. Doc. No. 101-65); to the Committee on House Administration and orderd to be printed.

1213. A letter from the Deputy Associate Director for Collection and Disbursements, Department of the Interior, transmitting notice of proposed refunds of excess royalty payments in OCS areas, pursuant to 43 U.S.C. 1339(b); to the Committee on Interior and Insular Affairs.

1214. A letter from the Deputy Associate Director for Collection and Disbursements, Department of the Interior, transmitting notice of proposed refunds of excess royalty payments in OCS areas, pursuant to 43 U.S.C. 1339(b); to the Committee on Interior and Insular Affairs.

1215. A letter from the Deputy Associate Director for Collection and Disbursements, Department of the Interior, transmitting notice of proposed refunds of excess royalty payments in OCS areas, pursuant to 43 U.S.C. 1339(b); to the Committee on Interior and Insular Affairs.

1216. A letter from the Deputy Associate Director for Collection and Disbursements, Department of the Interior, transmitting notice of proposed refunds of excess royalty payments in OCS areas, pursuant to 43 U.S.C. 1339(b); to the Committee on Interior and Insular Affairs.

1217. A letter from the Attorney General, Department of Justice, transmitting the Department's annual report on the assets forfeiture fund for the fiscal year ending September 30, 1988, pursuant to 28 U.S.C. 524(c)(6)(A); to the Committee on the Judiciary.

1218. A letter from the Executive Director, American Chemical Society, transmitting the Society's annual report and financial audit for the calendar year 1988, pursuant to 36 U.S.C. 1101(2), 1103; to the Committee on the Judiciary.

1219. A letter from the Secretary of Commerce, transmitting the Department's report, "Driftnet Impact Monitoring, Assessment, and Control Act of 1987," pursuant to Public Law 100-220, section 4005(a) (101 Stat. 1478); to the Committee on Merchant Marine and Fisheries.

1220. A letter from the Assistant Secretary of the Army (Civil Works), transmitting the Department's third annual report on the list of incomplete water resources studies authorized but unfunded during the 5 full fiscal years preceding the submission of the list (fiscal years 1984-1988), pursuant to 33 U.S.C. 2264; to the Committee on Public Works and Transportation.

1221. A letter from the Administrator, Environmental Protection Agency, transmitting the Agency's first annual report on Superfund implementation entitled, "Progress Toward Implementing Superfund: Fiscal Year 1987," pursuant to Public Law 99-499, section 120(e)(5) (100 Stat. 1669); jointly, to the Committees on Energy and Commerce and Public Works and Transportation.

1222. A communication from the President of the United States, transmitting a report on developments concerning the continuing national emergency with respect to Panama, pursuant to 50 U.S.C. 1641(c) (H. Doc. No. 101-66); jointly, to the Committees on Foreign Affairs and Merchant Marine and Fisheries, and ordered to be printed.

1223. A letter from the Assistant Secretary of State for Legislative Affairs, transmitting a draft of proposed legislation in support of the people and nation of Poland, and to amend the Trade Act of 1974 and the Foreign Assistance Act of 1961; jointly, to the Committees on Ways and Means and Foreign Affairs.

1224. A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to establish a domestic liability and compensation system for oil pollution from vessels and facilities and to implement the 1984 Protocols to the 1969 Civil Liability and 1971 Fund Conventions concerning seagoing tanker—source oil pollution; jointly, to the Committees on Merchant Marine and Fisheries, Public Works and Transportation, Ways and Means, Interior and Insular Affairs, and the Judiciary.

REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 1549. A bill to authorize appropriations for the Nuclear Regulatory Commission for fiscal years 1990, and 1991, and for other purposes; with an amendment, referred to the Committee on Energy and Commerce for a period ending not later than June 16, 1989, for consideration of such provisions of the bill and amendment as fall within the jurisdiction of that committee pursuant to clause 1(h), rule (Rept. 101-56, Pt. 1). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BURTON of Indiana (for himself, Mr. STUMP, Mr. MOORHEAD, Mr. DANNEMEYER, Mr. DREIER of California, Mr. APPLEGATE, and Mr. YOUNG of Alaska):

H.R. 2383. A bill to require a treaty for any relinquishing to any country of any territory, exclusive economic zone, or fishery conservation zone of the United States, and for establishing international boundaries; to the Committee on Foreign Affairs.

By Mr. CONTE:

H.R. 2384. A bill to terminate the importation of ivory and other elephant products by classifying the African elephant as an endangered species under the Endangered Species Act of 1973, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. COYNE:

H.R. 2385. A bill to provide that the 10-percent additional tax on early distributions from qualified retirement plans shall not apply to distributions from certain plans; to the Committee on Ways and Means.

By Mr. GEJDENSON (for himself, Mr. SHARP, Mr. PETRI, Mr. DURBIN, Mr. WOLPE, Mr. FAUNTROY, Mrs. MARTIN of Illinois, Mr. PENNY, Mr. MORRISON of Connecticut, Mrs. ROUKEMA, Mr. EVANS, Mr. HAMILTON, Mr. ATKINS, Mr. UPTON, Mr. JONTZ, Mr. GREEN, Mr. HUGHES, Mr. HAYES of Illinois, Mr. HENRY, Mr. KOSTMAYER, Mr. HORTON, and Mr. OWENS of New York):

H.R. 2386. A bill to amend the Agriculture Act of 1949 to establish eligibility requirements for agricultural commodity price support programs with respect to the delivery of irrigation water; to the Committee on Agriculture.

By Mr. GREEN:

H.R. 2387. A bill to amend the Hazardous Materials Transportation Act to restrict the transportation of radioactive materials through high-density metropolitan areas; to the Committee on Public Works and Transportation.

By Mr. McDADE (for himself, Mr. RIDGE, Mr. BEREUTER, and Mr. KANJORSKI):

H.R. 2388. A bill to expand home ownership opportunities for low- and moderate-income families in rural areas; jointly, to the Committees on Banking, Finance and Urban Affairs and Agriculture.

By Mr. PORTER:

H.R. 2389. A bill to amend the Agricultural Act of 1949 to repeal the sugar price support program; to the Committee on Agriculture.

By Mr. PORTER (for himself, Mr. WOLF, Mr. HENRY, Mr. BERMAN, Mrs. MARTIN of Illinois, Mr. DANNEMEYER, Mr. KOLBE, Mr. GUNDERSON, Mr. LAGOMARSINO, Mr. FAWELL, Mr. UPTON, Mr. HYDE, Mr. SCHULZE, and Mr. BUECHNER):

H.R. 2390. A bill to amend the United States Housing Act of 1937 to empower public housing residents, through resident management and ownership programs, to attain the American dream of home ownership; to the Committee on Banking, Finance and Urban Affairs.

By Mr. QUILLEN:

H.R. 2391. A bill to amend titles XVIII and XIX of the Social Security Act to provide that clinical social worker services are covered under part B of Medicare and are a mandatory benefit under Medicaid; jointly, to the Committees on Ways and Means and Energy and Commerce.

By Mr. RAHALL (for himself, Mr. MILLER of California, Mr. VENTO, and Mr. CAMPBELL of Colorado):

H.R. 2392. A bill to amend section 37 of the Mineral Leasing Act relating to oil shale claims, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. RICHARDSON:

H.R. 2393. A bill to amend the Internal Revenue Code of 1986 to provide incentives for the removal of crude oil and natural gas through enhanced oil recovery techniques so as to add as much as 10 billion barrels to the United States reserve base, to extend the production of certain stripper oil and gas wells, and for other purposes; to the Committee on Ways and Means.

By Mrs. SMITH of Nebraska:

H.R. 2394. A bill to provide assistance to producers affected by extreme weather conditions; to the Committee on Agriculture.

By Mr. THOMAS of California (for himself, Mr. DORGAN of North Dakota, Mr. FLIPPO, Mr. SHAW, Mr. BROWN of Colorado, Mr. LEWIS of California, Mr. BOSCO, Mr. HERGER, Mr. MURPHY, Mr. HUNTER, Mr. DORNAN of California, Mr. LAGOMARSINO, Mr. MOORHEAD, and Mr. PASHAYAN):

H.R. 2395. A bill to amend the Internal Revenue Code of 1986 to extend for 3 years the energy investment credit for solar energy and geothermal property and to allow such credit against the entire regular tax and the alternative minimum tax; to the Committee on Ways and Means.

By Mrs. VUCANOVICH (for herself, Mr. STUMP, Mr. KOLBE, Mr. KYL, and Mr. RHODES):

H.R. 2396. A bill to amend the Federal Mine Safety and Health Act of 1977 to permit State administration and enforcement of Federal mine safety and health standards, to permit States to retain fines and forfeitures collected pursuant to such standards if the Secretary of the Interior approves a State plan pursuant to such act, and for other purposes; to the Committee on Education and Labor.

By Mr. WILLIAMS:

H.R. 2397. A bill to establish the Fighters Institute for Support and Training, Inc.; to the Committee on Education and Labor.

H.R. 2398. A bill to provide for the establishment of an occupational safety and health standard applicable to boxing under the Occupational Safety and Health Act of 1970, and for other purposes; to the Committee on Education and Labor.

H.R. 2399. A bill to provide for money damages for injury or loss as a result of the 1988 Canyon Creek Fire in Montana; to the Committee on the Judiciary.

By Mr. CONTE (for himself, Mr. MICHEL, Mr. SCHIFF, Mr. HOUGHTON, Mr. FAWELL, Mr. LAGOMARSINO, Mr. STEARNS, Mr. GUNDERSON, Mr. GOSS, Mr. SMITH of Vermont, Mr. SKEEN, Mr. GINGRICH, Mr. HAMMERSCHMIDT, Mr. MARTIN of New York, Mr. OXLEY, Mrs. VUCANOVICH, Mr. DUNCAN, Mr. WALSH, Mr. GALLO, Mr. KYL, Mr. HEFLEY, Mr. WELDON, Mr. SOLOMON, Mr. DELAY, Mr. SUNDQUIST, Mr. BILIRAKIS, Mr. CLINGER, Mr. MCCOLLUM, Mr. GILLMOR, Mr. WALKER, Mr. HANCOCK, Mr. ROHRABACHER, Mr. DONALD E. LUKENS, Mr. ROWLAND of Connecticut, Mr. MCCANDLESS, Mr. BARTON of Texas, Mr. RAVENEL, Mr. MCMILLAN of North Carolina, Mr. GRANDY, Mr. WOLF, Mrs. MORELLA, Mr. COURTER, Mr. RHODES, Mr. SCHULZE, Mr. KOLBE, Mr. COBLE, Mr. FRENZEL, Mr. ROTH, Mrs. SMITH of Nebraska, and Mr. MCCREERY):

H.J. Res. 272. Joint resolution making dire emergency supplemental appropriations for Veterans Medical Care; to the Committee on Appropriations.

By Mr. BEILENSON (for himself, Mr. FIELDS, Ms. SCHNEIDER, Mr. PANETTA, Mr. KASICH, and Mr. DONNELLY):

H. Res. 158. Resolution calling upon the President to support international efforts to stop trade in ivory and to encourage the conservation of the African elephant; jointly, to the Committees on Foreign Affairs and Merchant Marine and Fisheries.

By Mr. GREEN:

H. Res. 159. Resolution expressing the sense of the House of Representatives that the Commission on the Bicentennial of the United States Constitution and the Secretary of Commerce should observe the bicentennial of the census of the United States with appropriate ceremonies and activities; to the Committee on Post Office and Civil Service.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

90. By the SPEAKER: Memorial of the Senate of the Commonwealth of Pennsylvania, relative to low income energy assistance block grants; to the Committee on Appropriations.

91. Also, memorial of the General Assembly of the State of Maryland, relative to the commemoration of African American middle passage and slavery; to the Committee on House Administration.

92. Also, memorial of the Legislature of the State of Nevada, relative to fees for grazing on Federal land; to the Committee on Interior and Insular Affairs.

93. Also, memorial of the General Assembly of the State of Maryland, relative to the Social Security notch year benefit cut repeal; to the Committee on Ways and Means.

94. Also, memorial of the House of Representatives of the State of Illinois, relative to binary chemical munitions; jointly, to the Committees on Foreign Affairs and Armed Services.

95. Also, memorial of the General Assembly of the State of Maryland, relative to the Medicare Catastrophic Expansion Act of 1988; jointly, to the Committees on Ways and Means and Energy and Commerce.

96. Also, memorial of the General Assembly of the State of Maryland, relative to financing the cost of the Medicare Catastrophic Coverage Act of 1988 and prescription drugs; jointly, to the Committees on Ways and Means and Energy and Commerce.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. WILLIAMS introduced a bill (H.R. 2400) for the relief of Edward E. Donohue; which was referred to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 17: Mr. LAFALCE.

H.R. 118: Mr. SCHIFF, Mr. CRAIG, and Mr. MOORHEAD.

H.R. 317: Mr. LEWIS of California.

H.R. 318: Mr. NEAL of North Carolina.

H. Con. Res. 115: Mr. RICHARDSON, Mr. VISCLOSKY, Mr. MCCLOSKEY, Mrs. KENNELLY, Mr. DEFAZIO, Mr. STALLINGS, Mr. EVANS, Mr. WEISS, Mr. HAYES of Illinois, Mr. JONTZ, Mr. SAWYER, Mr. MCHUGH, Mr. BEILENSON, Mrs. BOXER, Ms. PELOSI, Mr. MILLER of California, Mr. COLEMAN of Texas, Ms. SLAUGHTER of New York, Mr. ATKINS, Mr. MRAZEK, Ms. KAPTUR, Mr. FEIGHAN, Mr. PERKINS, Mr. GRAY, Mr. FRANK, Mr. SHARP, Mr. LEWIS of Georgia, Mr. BURTON of Indiana, Mr. HERGER, Mr. SKELTON, Mr. HENRY, and Mr. SIKORSKI.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 876: Mr. SUNDQUIST..

SENATE—*Wednesday, May 17, 1989*

(Legislative day of Tuesday, January 3, 1989)

The Senate met at 1 p.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. BYRD].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

*Owe no man any thing, but to love one another: for he that loveth another hath fulfilled the law. * * * Love worketh no ill to his neighbor: therefore love is the fulfilling of the law.*—Romans 8:8,10.

Gracious God, our loving Heavenly Father, give us grace to heed and obey this big word in the Bible: "Love one another." Help us to treat those with whom we work with the dignity, the respect, and the care each deserves, whatever position.

Deliver us from the abuse of power, remembering that those who have little power are often more abusive than those who have great power. Give special comfort to those among us who have been battered by others. Remind us of Isaiah's image of a true leader as a suffering servant and Jesus' definition that the one who would be greatest is the servant of all. Help us to see that "throwing our weight around" is not leadership but ego. Strengthen us all with the will to love, to honor, to respect the value of each person with whom we have to do. Fill us with Your love and let love prevail throughout this place.

In the name of Him whose love is unconditional, universal, and eternal. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The acting majority leader is recognized.

THE JOURNAL

Mr. CONRAD. Mr. President, I ask unanimous consent that the journal of proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

THE SCHEDULE

Mr. CONRAD. Mr. President, following the time for the two leaders there will be a period for morning business not to extend beyond 1:30 p.m. with Senators permitted to speak therein for up to 5 minutes each.

CONSIDERATION OF CONFERENCE REPORT ON H.R. 2

Mr. CONRAD. Mr. President, under a previous consent agreement the Senate was to begin consideration of the conference report on the minimum wage bill, H.R. 2, at 2 p.m. today.

I now ask unanimous consent that the Senate begin consideration of the conference report on H.R. 2 at 1:30 p.m. under the same conditions and limitations as previously ordered.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. CONRAD. Therefore, Mr. President, the vote on final passage of the conference report will occur on or about 4 p.m. today.

RESERVATION OF LEADER TIME

Mr. CONRAD. Mr. President, I ask unanimous consent that the remainder of the majority leader's time be reserved.

The PRESIDENT pro tempore. Without objection, it is so ordered.

RECOGNITION OF THE ACTING REPUBLICAN LEADER

The PRESIDENT pro tempore. The acting Republican leader, Mr. WILSON, is recognized.

RESERVATION OF LEADER TIME

Mr. WILSON. I ask unanimous consent that the remainder of the Republican leader's time be reserved.

The PRESIDENT pro tempore. Without objection, it is so ordered.

MORNING BUSINESS

The PRESIDENT pro tempore. Morning business is now the order of the Senate.

Mr. CONRAD. Mr. President, I ask unanimous consent to proceed for approximately 10 minutes in morning business.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from North Dakota is recognized for not to exceed 10 minutes.

Mr. CONRAD. I thank the Chair.

(The remarks of Mr. CONRAD pertaining to the introduction of legislation are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. CONRAD. May I inquire, Mr. President, as to the time remaining?

The PRESIDENT pro tempore. The Senator has 3½ minutes remaining.

SYTTENDE MAI

Mr. CONRAD. Mr. President, today is "Syttende Mai," Norwegian Independence Day. In commemoration, I rise to salute the citizens of Norway and the millions of citizens of this country who are of Norwegian descent.

This morning, I visited Ambassador Kjeld Vibe at the Norwegian Embassy to extend my best wishes on this festive occasion. I also presented him with a letter to King Olav V of Norway from North Dakota Gov. George Sinner congratulating the people of Norway and inviting all Norwegians to participate in North Dakota's centennial festivities this year.

Mr. President, I ask unanimous consent that this letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

STATE OF NORTH DAKOTA,
Bismarck, ND, May 15, 1989.

HIS MAJESTY KING OLAV V,
Oslo, Norway.

YOUR MAJESTY: On behalf of the State of North Dakota, I extend my congratulations to the people of Norway on the occasion of the 175th Anniversary of the signing of Norway's Constitution at Eidsvoll, Norway, on May 17, 1814. This day is especially significant because of the many important ties that exist between Norway and the United States and the State of North Dakota in particular.

The year 1814 was a year of great uncertainty in the world. Much of Europe was in great turmoil because of the Napoleonic war, and because the United States was embroiled in the long, bitter War of 1812 with England. Much of America, and all of what is now North Dakota, was an almost undiscovered country known but to only a few trappers and fur traders, missionaries and explorers. It was indeed "the year of miracles," as the Norwegian historian Jens Arup Seip has written.

Professor Knut Mykland of the University fo Bergen, Norway, has written that the years from 1770 until 1814 covered a period of history during which the Atlantic world witnessed a wave of constitutions, many of which lasted only a few years. The American and Norwegian Constitutions are the only two democratic constitutions that survived that era. There are perhaps many reasons why these constitutions succeeded when so many others failed, but the guaranatees of political independence, sovereignty of the people and balance of power were important features common to the constitutions of both of our countries that assured their survival for so many years.

At various times in our history North Dakota has been referred to as the most Norwegian of all the states of the United States of America. This unique feature of our state had its beginning on May 13, 1869, when Nelson E. Nelson became the first of many thousands of Norwegian immigrants to come to North Dakota. Nelson was not only the first Norwegian to take up permanent residence in North Dakota, but he was also our first homesteader. Within the next few years after Nelson's arrival, Norwegians became one of the largest of the many ethnic groups to settle here, and even today approximately thirty percent of our population is of Norwegian ethnic background.

One hundred years ago the people of North Dakota had just finished electing 75 delegates to a North Dakota Constitutional Convention to prepare for North Dakota to be admitted as the 39th state of the United States of America on November 2, 1889. Eight of the delegates that wrote North Dakota's constitution were Norwegians and many of the features of our constitution that we cherish today were initiated by them. This year as we celebrate the 175th Anniversary of the signing of Norway's Constitution and the 100th Anniversary of North Dakota's Statehood, Norway can look with great pride on the contributions its people have made in forging the state of North Dakota.

The sons and daughters Norway sent to North Dakota have left an indelible mark on North Dakota in ways almost too numerous to mention. In the 100 years North Dakota has been a state, six of my predecessors in this office and thirteen Lieutenant Governors have been of Norwegian ancestry. Moreover, there is not one of the many elective offices in state government that has not been headed by an official with Norwegian ancestry. In addition, several Norwegian descendants have represented North Dakota in the United States Congress. Education, good government, community involvement, a strong church life, and a high sense of morality are only a few hallmarks with which North Dakota's Norwegian population, along with other ethnic groups, has been identified.

Your Majesty, North Dakota's present-day Norwegians have not forgotten the great sacrifices their ancestors made when they left their families and friends in Norway to set out to build a new life in an unknown frontier—a life that was often filled with untold hardship, danger, and adversity—to do their part in building not only the great state of North Dakota, but also to play an important role in making a better world for all of us today. The descendants of those courageous pioneers who came to North Dakota are today also celebrating Syttende Mai all across North Dakota, and they are being joined by hundreds and thousands of people from many other ethnic groups.

In bringing you these glad tidings, I bring them not from the Norwegians alone, but the men and women of all our nationalities who extend to you their kindest and most cordial greetings. Syttende Mai takes on a special significance in North Dakota this year because of our own Centennial celebration. Between now and the end of this year, several events are planned, many of which will focus on the ethnic diversity of our people. All North Dakota people join with me in extending an invitation to Your Majesty, the Royal Family, officers of your government and all of the people of Norway to visit North Dakota for a Syttende Mai, "Day of Days," that will never be forgotten.

Respectfully,

GEORGE A. SINNER,
Governor.

Mr. CONRAD. Mr. President, this year's celebration is particularly notable as it marks the 175th anniversary of the signing of the Norwegian Constitution. This historic document was modeled after our Declaration of Independence and Federal Constitution of 1787 and inspired by the cherished ideals and values upheld by our forefathers.

The common threads of democracy continue to bind the United States and Norway. Our friendship with this Nordic land is based on common interests, values and enduring family ties.

Mr. President, nearly 4 million Americans living in all 50 States are of Norwegian descent. I count myself as one of them. But no State has a higher percentage of citizens who can trace their heritage to Norwegian roots than those in my State, North Dakota—where about 30 percent of the population has a Norwegian background.

North Dakota has been known as the most Norwegian of the 50 States at varying times in history. We are proud of our Nordic heritage. In fact, one of our communities, Fairdale, is known as Little Norway because it is home to so many Norwegians.

Across the State today, North Dakotans will be joining their Nordic cousins in celebration of independence day. Norewegian flags of red, white, and blue will be proudly displayed, waving along side their American counterparts in the North Dakota breeze.

It is my sincere privilege to salute the people of Norway and all Norwegian Americans as they celebrate this historic day.

RECOGNITION OF THE ACTING REPUBLICAN LEADER

The PRESIDENT pro tempore The acting Republican leader, Mr. WILSON, is recognized for not to exceed 5 minutes.

Mr. WILSON. Thank you, Mr. President.

(The remarks of Mr. WILSON pertaining to the introduction of legislation are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

The ACTING PRESIDENT pro tempore. The Senator from Nebraska [Mr. EXON] is recognized for not to exceed 5 minutes.

Mr. EXON. I thank the Chair.

(The remarks of Mr. EXON pertaining to the introduction of legislation are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

The ACTING PRESIDENT pro tempore. The senior Senator from Nevada [Mr. REID] is recognized for not to exceed 5 minutes.

INDEPENDENT EXPENDITURES

Mr. REID. Mr. President, during the 1988 Presidential election, a PAC representing Japanese automobile dealers spent over half a million dollars in my State of Nevada.

The money was spent on advertising and direct mail, which was disseminated throughout the State.

The message from the automobile dealers focused on the issue of Social Security—which frankly has little direct relationship to the automobile dealers' concerns.

We have 389,000 registered voters in the State of Nevada. That means that the independent expenditures of half a million dollars represented an investment of nearly $1.50 for each voter.

Imagine if a group were to commit that kind of investment to an independent expenditure in California, where there are about 13 million registered voters. At the rate of $1.50 per registered voter, they would be spending about $20 million to influence the campaign.

Mr. President, the Federal Election Campaign Act has not been changed for 10 years.

We have attempted to revise the act to better reflect the reality of campaigns. But such attempts have been divisive. Debate over proposed legislation is fraught with clashes and conflicts.

I would sincerely like to see a successful negotiation of a comprehensive campaign finance reform package. But, until that happens, why can we not move to the issues on which we all agree?

I have looked at most of the legislative proposals introduced to date this session. An inordinate number of them mention independent expenditures. For example, Senators HOLLINGS and DANFORTH introduced a bill relating to independent expenditures. Their bill certainly looks like a good one.

These bills contain language such as "tightening the definition and improving the disclosure of independent expenditures."

The frequency with which independent expenditures is mentioned, in legislation introduced by both parties, indicates an opportunity—an opportunity for this Congress to make some progress on campaign finance reform.

Independent expenditures represent perhaps the most threatening of the current campaign finance flaws—which is why we need to address the issue with some immediacy.

Let me tell you why independent expenditures can hurt everyone. By definition, independent expenditures must be made for communication with voters, and they must be made with-

out any consultation with the candidate's organization.

In other words, PAC's or individuals can spend as much money as they are able to raise to communicate with the voters.

There are no limits. With other expenditures, there are limitations—$1,000 for individuals, and $5,000 for PAC's. But there are no limits on independent expenditures.

Those making independent expenditures may raise their money in the name of the candidate.

This was done during the recent Presidential election, when organizations such as Americans for Bush and Citizens for Dukakis emerged, raising money allegedly to support the respective candidates.

But they were competing with the Presidential contenders' own campaign organizations and national party fundraising efforts.

Furthermore, they each had their own agenda. Just consider what might happen if such organizations were raising money for independent expenditures because they wanted to help a candidate with the election?

They can buy media time and produce advertisements that say whatever they want to say.

Their decisions on what voters will hear is, by definition, independent of your campaign.

Such a situation has the potential for real damage, if those responsible for the independent expenditures have a different agenda than your own, or they choose to create a message that is counter to your own campaign strategy.

Using the example I discussed earlier, imagine what could happen if somebody did make an independent expenditure of $20 million in one State? Under the present law they could. When independent expenditures become the prominent force in the campaign, there is a danger that outside parties can effectively buy elections. Unless we do something soon, they could well become the dominant force in our election process.

In a recent conference on campaign finance, a director of one of the two PAC's who have spent the most money in elections on independent expenditures said his PAC would continue its practice of heavy independent expenditures.

He advocated the use of independent expenditures over contributions directly to a candidate's campaign.

He said that independent expenditures were preferable because they provide "total control over your dollar."

If we do not address the issue of independent expenditures soon, I am afraid that when we wage elections in coming years, there will be outside parties controlling our campaigns.

For the sake of those seeking election or reelection, and the voters who must make hard choices, we must impose greater controls on independent expenditures. I encourage my colleagues, both Democrat and Republican, to work together to resolve the issue of independent expenditures.

The ACTING PRESIDENT pro tempore. The Senator from Washington [Mr. GORTON] is recognized.

The Chair calls to the attention of the Senator that under the order, at 1:30 p.m., the Senate proceeds to the consideration of the conference report on H.R. 2. Would the Senator like at this point to ask unanimous consent that he be accorded 5 full minutes?

Mr. GORTON. The Senator would like to ask unanimous consent to make that request.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator is recognized for not to exceed 5 minutes.

THE WASHINGTON STATE APPLE INDUSTRY

Mr. GORTON. Mr. President, 2 weeks ago I took the floor to criticize the irresponsible nature with which the Alar issue has been handled by certain environmental groups, particularly the Natural Resources Defense Council, and certain segments of our media, including CBS. In response to criticism like mine, CBS in a followup segment of "60 Minutes" entitled "What About Apples" this past Sunday presented a more balanced discussion of the issue, at least when compared with its previous broadcast.

While I am still not satisfied with CBS's treatment of the Alar issue, and am bitterly critical of the actions that CBS and NRDC together undertook to needlessly frighten American consumers, I do not intend to focus my comments today on their behavior. Rather, Mr. President, I would like to commend the responsible course of action pursued by the apple industry in my home State of Washington in response to the Alar controversy.

Washington State grows about half of the Nation's apples. In 1987, Washington harvested more than 100 million boxes of apples, or about 2.3 million tons, worth in excess of $300 million. This is a remarkable feat when you consider the risk an apple crop faces from unseasonable heat and cold, hail, drought, and disease.

Nevertheless, Washington State apple orchardists—most of whom are family farmers trying to make a living from 40 or so acres of trees—have been blessed in their ability consistently to deliver the highest quality product possible to health-conscious consumers.

Indeed, apples are rich in fiber, contain no cholesterol or fat and very little sodium. At about 80 calories each, apples fill you up without filling you out—a plus for any serious weight watcher. In addition, they taste good and kids love them. It is no wonder that the apple is the world's most perfect health food.

As you are aware, Mr. President, I have the privilege of hosting the Senate "candy desk." I enjoy this privilege because it gives me the opportunity to visit with many of my colleagues throughout the day as they stop by for a snack. Today, I have refreshing news. In the spirit of promoting good health among my colleagues, I am converting the Senate's "candy desk" to the "apple desk" for a day.

My point is that the folks who provide us with an apple a day are caught in a crossfire which threatens their very livelihood. In 1985, when the Alar issue first emerged, the Washington Apple Commission anticipated consumer concern by recommending to its growers that, despite its unproven risk, they forgo the use of Alar on their apple crop.

Washington growers have acted responsibly. They have led the Nation in funding research that, in turn, has enabled them to reduce their use of agricultural chemicals by 33 percent; Washington growers helped pioneer the development of integrated pest management as part of an overall effort to minimize the use of chemicals; and Washington growers accomplished these tasks while continuing to produce premium apples that put those of our world competitors to shame.

Most Washington apple growers voluntarily stopped using Alar fully 3 years before the Government and the rest of the industry took action. They continue to lead the way in dealing responsibly with Government agencies and the scientific community in trying to sort fact from fiction.

Despite their efforts, growers in my State have already reported losses in excess of $90 million as a result of the great Alar scare. The biggest loser in this unfortunate shootout may be the American public, particularly children who have substituted "junk food" for fresh fruits and vegetables.

The hysteria caused by this controversy threatens to derail a process for reviewing the safety of agricultural chemicals that should be based on sound scientific study rather than fear. Under this scenario, the term "political science" is given an entirely new meaning.

I would caution my colleagues against succumbing to the temptation to act for the sake of expediency without regard to responsibility.

Rather, I would encourage my colleagues to provide our Government agencies—FDA, EPA, and USDA—with the resources necessary to develop an adequate scientific basis for regulatory

action, and effectively to monitor and enforce food safety standards. I would further invite my colleagues to join me in demanding that all imported agricultural products be required to meet the same high standards established for our own agricultural commodities. Finally, I would emphasize the need for an atmosphere of cooperation rather than confrontation among producers and consumers in which neither will be harmed and on which both can rely.

Mr. President, I yield the floor.

Mr. WIRTH addressed the Chair.

The PRESIDENT pro tempore. The Senator from Colorado is recognized. The Chair calls to the attention of the Senator, the order of the Senate provides for the close of morning business.

Mr. WIRTH. Mr. President, I ask unanimous consent that I be allowed to speak for 5 minutes.

The PRESIDENT pro tempore. Without objection, the Senator from Colorado [Mr. WIRTH] is recognized for not to exceed 5 minutes.

THE EAGLE AND THE BEAR: CAN THEY DANCE TOGETHER?

Mr. WIRTH. Thank you very much, Mr. President. I wanted to comment, Mr. President, on what I found to be an extraordinarily unfortunate statement made or alleged to have been made yesterday by the press secretary of the President of the United States calling Mr. Gorbachev a drugstore cowboy. It seems to me that this is a kind of demeaning language and certainly not a very appropriate way for us in the United States to conduct mature relationships with the other superpower in the world.

It seems to me this is an appropriate time to put in the RECORD a very interesting presentation given at the Wirth Washington Seminar, which I hold every year at the end of April, by Suzanne Massie, called The Eagle and the Bear: Can They Dance Together?

Ms. Massie is a very distinguished scholar of Soviet studies; a fellow of the Harvard Russian Research Center; the author of a variety of very distinguished scholarly pieces on the Soviet Union and Soviet culture and has been described by many as the most important person in advising former President Reagan on the Soviet Union and getting him to think differently about the Soviets.

Let me, if I might, in light of the drugstore cowboy comment, quote a little bit from Ms. Massie's speech:

> Today after many years of confrontation in the 20th century, it is perhaps time to consider the question: Could the eagle and the bear dance together again? * * * Somehow we always seem to be one leader behind: We treated Khrushchev as if he were Stalin, Brezhnev as if he were Khrushchev and now—Gorbachev as if he were Brezhnev. Because of this unfortunate predilection we have often missed opportunities in the past. I believe that this is the greatest opportunity we have had to try to forge a new relationship with the Soviet Union and it would be tragic if we were to muff this one now. We moan a lot about Gorbachev's successful "peace" offensives. What are we suggesting that is better? We have clung to our model of a Soviet foreign policy so entrenched that it could never evolve, while at the same time remaining convinced that we, because of our more flexible and responsive system have a greater aiblity for change. Yet now, it is our leaders who seem curiously paralyzed. * * *
>
> The Soviet Union is in the process of wrenching change—coping with deep and perilous troubles—physically, psychologically, ecologically and economically. The outcome of all this ferment is as yet unknown, but I think we should no longer be talking so much about "intentions" but rather more realistically about the "possibilities" of the Soviet Union.

Ms. Massie goes on to list a whole variety of areas where she believes we should be working closely with the Soviet Union, and I note one of those:

> We should, I believe, energetically propose a generous and comprehensive plan to join forces with the Soviet Union to combat the problems of environmental degradation which threaten our common planet.

That is one of many suggestions. She goes on to say:

> It might also be helpful if we stopped talking about how long Gorbachev will "last." He has already lasted 4 years—the full term of an American President—and is now entering his second. Instead of worrying so much about what will happen to him and how long and who next (a fruitless exercise since no one can predict this anymore than we can predict with certainty who our next President might be) we might perhaps better deal with what we have now. One has only to thing how strange it would be to say that there was no certainty in dealing with President Bush since he might not last longer than 4 years.

Finally, quoting, Mr. President, Ms. Massie goes on to say:

> I believe that today we should be working with a new and changing Soviet Union to develop a mutually beneficial relationship, one which sees the gradual strengthening of forces which are friendly to the United States and the world:
>
> In order to achieve this, we need patience and a little perestroika and self-criticism of our own. We must rigorously reexamine our old prejudices and stereotypes, and understand the complex forces and problems at work in the U.S.S.R. * * *
>
> Perhaps most of all, we must strive to get over our often provincial ignorance of some of the most basic facts of Russian history and the complexities of Soviet life and society.

Mr. President, this is good advice for us all. It is good advice for the administration. I hope that the White House spokesman was misquoted yesterday. Whether he was or not, I would commend to him and his senior officials at the White House these remarks, "The Eagle and the Bear: Can They Dance Together?" as delivered by Suzanne Massie, and I ask unanimous consent that these remarks and her biography be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE EAGLE AND THE BEAR: CAN THEY DANCE TOGETHER?

(Remarks before the Wirth Washington Seminar Washington, DC, April 21, 1989, by Suzanne Massie)

I deeply love my own country and people—and it has happened that I have come to know and love another country and people who we regarded as enemy. I began my work twenty three years ago. Since then I have come to know hundreds of Russians from every walk of life. The Russian people and culture have enriched my life and have now become as familiar to me as my own. When I began it was not easy and sometimes even dangerous for us to be friends. It was definitely not a time of glasnost. Shadowy men who frowned on such contacts skulked in corners. We were often harassed and frightened, and passed through some very dark days. Yet somehow we managed to reach out, to trust each other and to maintain friendships—friendships made all the more precious because they were forced to survive barriers, long separations, enforced silence and distance. Many years have now gone by. Some of those who I first met when they were babies are now married and having children of their own. I am proud to have a godchild in the Soviet Union born on Christmas day two and a half years ago and six other children who call me aunt—one, who calls me "Aunt America," a name that particularly delights me.

Through these years I understood how fortunate I was to have the opportunity to go through the dark looking glass that separated our nations and I always hoped that our two peoples would one day have a chance to know each other as I had. I tried to make this happen in my own way by speaking out against what I thought was wrong and writing about what I found beautiful—and there was much of both. My efforts were not always regarded benignly by either side. The bureaucracy of both countries has at times regarded me as dangerous, curious and a little mad.

Perhaps this is understandable for as I am a writer and a historian I have a little different perspective—a worm's eye view if you like. I am interested first and foremost in people—their dreams, sorrow, aspirations, their past. My father was a very independent Swiss and from my earliest childhood I was taught to believe in the power of the individual. He instilled in me the belief that each of us can affect the world we live in for good or evil. For me, history is made by people, not by impersonal economic and political forces beyond our efforts to control and we can all change and affect it.

Certainly one thing that one observes as a historian is that history has a funny way of doing flip flops: today's guerilla fighter is tomorrow's patriot; yesterday's wartime enemies, today's treasured allies, and vice versa. Even national symbols are not sacrosanct. Teddy Roosevelt once proposed that the United States change its national symbol to the Grizzly Bear—a brave, independent animal said he, much better than that "dandified vulture" we had adopted. In those days, Russia's symbol was the Eagle: a double-headed one, that faced both East

and West, a symbol still useful to remember today.

Since during the past fifty years—with the exception of a brief flirtation during World War II—the Eagle and the Bear have been glowering and rattling swords at each other it has been difficult for we Americans, who have very short memories, to recall that throughout our history, with the exception of recent times, Russia and the United States enjoyed the most amicable relations. In the era of Imperial Russia, gestures between the land of the tsars and our young republic abounded and the United States considered Russia to be one of its firmest supporters in the international community. These friendly relations reached a peak in the 1860's and 70's during the reign of Tsar Liberator Alexander II. This Emperor who instituted many social, economic and political reforms, in addition to his crowning achievement—the liberation of the serfs in 1861, two years before Lincoln freed the slaves in the United States—was an object of respect and even veneration in the United States.

During those decades, Russian interest in the United States also increased greatly. Russians eagerly read the works of Edgar Allan Poe and James Fenimore Cooper, as well as those of Washington Irving, Hawthorne, Emerson, Longfellow, Whitman, Lowell, Holmes and Bret Harte. Russians soaked up American adventure novels, and learned the names of our states, cities and rivers. Young Russians dreamed of America as the land of excitement and romance. The great novelist Ivan Turgenev hailed Americans, as "the greatest poets of our time—not the poetry of words—but of action."

In 1860, Alexander II wrote admiringly of the United States as "presenting a spectacle of prosperity without example in the annals of history" and the Tsar and his ministers were firm in the belief that the Union must be preserved. When the French urged the British and the Russians to join them in full recognition of the Confederacy, the Imperial Government refused. And when, in 1863 at a critical moment in the Civil War a Russian frigate and two Russian corvettes steamed into New York Harbor, the event caused as much joy in the United States as it did surprise and consternation in France and England. Mrs. Lincoln paid a visit to the frigate *Oslabyia*, the first time a First Lady had set foot on a foreign warship. Toasts were drunk to Tsar and President. In New York, the Russians were greeted by cheering crowds and ecstatic newspaper headlines which proclaimed "New Alliance Cemented." At an elegant ball given at the Academy of Music, tables were decorated with huge figures of Peter the Great, Washington, Lincoln and Alexander in sugar and cake. Russian officers, among them Rimsky-Korsakov, then eighteen years old and a naval cadet, whirled hoopskirted New York ladies who wore on their bodices buttons from the coats of Russian officers.

When the overland telegraph brought additional good news that another Russian fleet that arrived in San Francisco, jubilation reigned all over America. Years later one gentleman recalled that his mother had clasped him to her bosom exclaiming, "We're saved! The Russians have come!" Lincoln referred to the Russian visits in his Thanksgiving Proclamation as one of "God's bounties of so extraordinary a nature that they cannot fail to penetrate the heart."

The timely appearance of the Russian fleet caused the French and English to hesitate in giving support to the Confederacy. And, after the war, a grateful America did not forget. In 1866 after an assassination attempt on the life of Alexander II, President Andrew Johnson sent a formal message to the Emperor and the House and Senate passed a joint resolution congratulating the Russian people on his escape. This was a unique event in American history; never before had a message been sent to a foreign nation expressing personal feeling for its sovereign.

Assistant Secretary of the Navy Gustavus Fox personally delivered the message, crossing the Atlantic in a new Monitor class ship which anchored in St. Petersburg. He was nearly overwhelmed by the spontaneous outpouring of enthusiasm by the Russian people. The flag of the United States flew everywhere, people sang American songs and in the city of Kostroma, people threw their coats on the road for the American visitors to walk on. Fox was made an honorary citizen of several Russian cities.

Alexander's letter to President Johnson thanking him for the resolution of Congress was suffused with warmth and I think bears repeating today:

"The two people find in their past no recollections of old grievances, but on the contrary, memorials only of amicable treatment . . . These cordial relations which are as advantageous to their reciprocal interests as to those of civilization and humanity conform to the views of Divine Providence, whose final purpose is peace and concord among all nations.

"It is with a lively satisfaction that I see these bonds continually strengthening . . . I pray you to express them to Congress and to the American people, of which that body is their organ. Tell them how much I—and with me all Russia—appreciate the testimonials of friendship which they have given me and how heartily I shall congratulate myself on seeing the American nation growing in power and prosperity by the union and continued practice of the civic virtues which distinguish it.

Your good friend,

ALEXANDER.

It was in the glow of these good feelings that Russian-American negotiations for the sale of Alaska were completed in 1867. And because of that purchase we are today still only three miles distant from each other.

Today after many years of confrontation in the twentieth century it is perhaps time to consider the question: Could the Eagle and the Bear dance together again? Today we see a new liberalizing Russian leader who is extending many invitations. Over the past four years he has with quite astonishing speed moderated Soviet foreign policy, promoted economic reforms, courageously increased openness and self-criticism, allowed greater autonomy for the national republics within the Soviet Union, introduced a measure of democracy and made significant moves in human rights and increasing religious freedom. But where is our Abe?

Over the past twenty five years I have observed a curious phenomenon in American policy. Somehow we always seem to be one leader behind: We treated Khrushchev as if he were Stalin, Brezhnev as if he were Khrushchev and now—Gorbachev as if he were Brezhnev. Because of this unfortunate predilection we have often missed opportunities in the past. I believe that this is the greatest opportunity we have had to try to forge a new relationship with the Soviet Union and it would be tragic if we were to muff this one now. We moan a lot about Gorbachev's successful "peace" offensives. What are we suggesting that is better? We have clung to our model of a Soviet foreign policy so entrenched that it could never evolve, while at the same time remaining convinced that we, because of our more flexible and responsive system have a greater ability for change. Yet now, it is our leaders who seem curiously paralyzed. Perestroika (restructuring) and glasnost (openness) may be on the front pages of our newspapers and passed into our language, but not into our policy or our actions. Instead, we have responded with a bureaucratic sounding phrase "status quo plus" which sounds suspiciously like an American translation of "Brezhnevian stagnation."

Certainly there are many who have a large investment in old policies. Careerists are reluctant to link themselves to any Soviet leader by making definite pronouncements. After all, who knows what might happen between now and a future confirmation hearing? Careers in Washington are made by stressing one's "hawkishness," "vigilance," "prudence"—not by going out on a limb and expressing the need for new approaches toward policies, some of which are now almost fifty years old.

By arguing that "we can't do much" or "America should act only in American interests" the establishment seems to be treating the whole issue as a spectator sport in which it need not play a role. There is an astonishing lack of creativity, initiative and vision on our part. Bureaucratic equivocation seems to be our only answer to ferment and action on the part of the USSR. I was personally astonished to read a few weeks ago that after three months of the combined work of the NSC, the State Department, the CIA and the Pentagon pronounced, and I quote, that "the hardest task is to probe Russian intentions and tactics"! The elephant seems to have labored only to bring forth a mouse. It is not such a mystery and there is no need to examine the entrails of a rooster to divine the facts. The picture is clear and spread out for all to see and read on the pages of Soviet newspapers. The Soviet Union is in the process of wrenching change—coping with deep and perilous troubles—physically, psychologically, ecologically and economically. The outcome of all this ferment is as yet unknown, but I think we should no longer be talking so much about "intentions" but rather more realistically about the "possibilities" of the Soviet Union.

Now as they struggle to resolve their problems what should we do? Gloat? Bash them? Or reach out a hand? Many of Gorbachev's invitations to the dance have been rebuffed. A good example is Afganistan, which the Soviet Union regarded as a turning point in its relations with the new administration.

It is clear that we made an incorrect assessment that the Communist regime would collapse as soon as the Soviet armies pulled out. It is now evident that we were mistaken. We could have concluded that we had not made a correct assessment and responded to Soviet initiatives. Two months ago, the Soviet Union was proposing a solution which looked very much like the status quo before the invasion—a coalition of all parties including the former King with strong United Nations participation. Instead, it was our reaction to push harder, thus escalating the conflict again. Because of our negative response, the Soviet Union has perhaps has to reassess their policy and we may not be able to get what we could have only a short time ago. Our mutual goal after all, should

be to see an end to a bloody conflict in which the principal victims are innocent civilians—not a continuation of a war through proxies.

Considering our actions it has seemed to me a little ironic that we have been asking the Soviet Union as a test of its good intentions to help out in Central America. What are we doing to help them out in an area which is of vital concern to them?

Another kind of missed opportunity occurred recently. A week ago the New York Times reported that the Soviet Union, dipping into an emergency fund of foreign currency had begun a major push to buy Western consumer goods—razor blades to soap powders, shoes and pantyhose. These would have retail value of 5 billion rubles, perhaps equivalent to 1 billion dollars. Most of these contracts, now already concluded, were signed with Japanese and European companies—not with the United States. This is perhaps not so much because of MFN but because of the generally negative political climate. In both of these very different cases, we missed the lead.

We all know that in order to dance one needs to hear the same tune and learn complimentary steps. As citizens, we should all think about what these steps might look like; but, while we are retooling and studying our broad policy there are some mutually beneficial tangible moves that we might consider that come to my mind:

1. We should I believe, energetically propose a generous and comprehensive plan to join forces with the Soviet Union to combat the problems of environmental degradation which threaten our common planet. We are being told today by environmental experts that we have ten years to turn the situation around. In the Soviet Union the situation may be even worse; their experts are saying that for them it is now and perhaps even yesterday. In the course of a conversation I had last June with a high-ranking Soviet official he remembered that President Reagan once said that if our planet were to be suddenly threatened with danger by aliens from outer space, we would quickly join together to fight the common enemy. "I believe," said this Soviet official, "that the enemy is here—and it is the destruction of the environment."

2. We should more vigorously explore the possibility of joining forces to combat terrorism as was proposed recently at an international police conference.

3. We could perhaps be a little more sensitive to certain pressing regional concerns of the Soviet Union. As one speaker at a recent conference I attended asked, "How would you like to have Iran on your border?" The Soviet Union is the fourth largest Muslim country in the world and, along with the United States and Brazil, one of the three largest Christian countries. The Double-headed Eagle looking both toward East and West symbolized this concern.

4. The Soviet Union has enormous problems of health. According to Soviet statistics 38% of Soviet children do not receive DPT shots. The Soviet Union has 140,000 cases of turberculosis in children vs. our forty. The Soviet Union is fiftieth in infant mortality. There is no point in dwelling on the reasons for this—more importantly, I believe it is an area where we could perhaps reach out the hand of cooperation without the slightest fear of jeopardizing our national security. I myself am hoping to study the problems of handicapped children in the Soviet Union.

5. Although I am not an expert in the field of arms control, I hope that we could use the opportunity that is being presented now to pursue and conclude arms agreements. For one reason or another the Soviet Union seems ready to put a great deal on the table. Why linger incessantly to explore and test these overtures?

6. More cultural exchange: there are excellent films being made in the Soviet Union today—we see very few. The theater is vigorous and provocative yet the Taganka Theater has never been to the United States, or has Efreimov's Moscow Art Theater. We have no regular exchanges of television programs although there are now many interesting programs being made and shown in the Soviet Union.

7. The Soviet Union is eagerly looking for agricultural technology and knowhow, among other things for cattle feed additives rather than grain purchases. Nothing much has been done by our side. We have demonstrated little flexibility and just don't seem to be listening.

8. It might also be helpful if we stopped talking about how long Gorbachev will "last." He has already lasted four years—the full term of an American President—and is now entering his second. Instead of worrying so much about what will happen to him and how long and who next (a fruitless exercise since no one can predict this anymore than we can predict with certainty who our next president might be) we might perhaps better deal with what we have now. One has only to think how strange it would be to say that there was no certainty in dealing with President Bush since he might not last longer than four years. The old saying goes: the Past is over; the Future unknown; Today is all we know for certain.

We all know it is hard to adjust to changing human relationships. In our own personal lives we know that when a partner—or an adversary—changes it is often easier for us to deny the change than it is to wrestle with the personal growth that a new adaptation demands.

Change in the Soviet Union has come faster than anyone could have possibly predicted a few years ago. Only two years ago I gave a speech on the surprising happenings of that year in the Soviet Union. These ranged from the serious to the frivolous: an Yves St. Laurent show in the Hermitage, Pizza Hut . . . and could one believe it, even talk of a baseball team in Kiev. Everyone laughed. One man in the audience jovially declared "But we already have the Red Sox!" I ended my talk then by musing, "A baseball team in Kiev. If we are sensitive enough and imaginative enough to recognize change when we see it we may one day be playing a new kind of World Series." Well, the baseball team from Kiev has just played Annapolis "Peetchers" and "beizball bets" have now entered the Russian vocabulary along with "beezness" and "democratizatsiya." The Russians lost, but cheerfully said, "It's your game and we came here to learn." Which of their games are we trying to learn? It seems that we are dropping the ball, and if we are not careful it is we who may end up losing not only the chance to play with a new team, but the whole world series.

It might be useful for us to remember sometimes that we are not always at the center of their radar screen as we rather vainly like to believe—but sometimes only at the far corner. The Soviet Union is an Empire of one-hundred nations which covers eleven time zones. Russia is only one of fifteen republics. The Empire's frontiers are loosening, and as they do Russia and the Soviet Union are not only faced with extraordinary problems, but will have to consider new relationships and directions.

We have another serious problem to consider. A Soviet diplomat once said to his counterpart at one of the arms talks, "We are about to do a terrible thing to you. We are about to deprive you of an enemy." We need to ask ourselves: Can we live without an enemy? Engagement seems to be easier for us than disengagement.

Now in Abe and Alex's time the United States and Russia got along fine and yet no two systems could have been more different than an ancient autocracy and a young Republican democracy. So the difference in systems is not the problem. The problem has been a militant, expansionist Marxist-Leninist ideology.

In over twenty years even while Soviet newspapers and officials were reviling us almost daily, I have never heard an expression of hostility from any Russian man in the street. Curiosity, bewilderment—apprehension sometimes—but basically, the Russians really like us. I have been told, "Tell your countrymen we love you more than the Europeans do." The Russian people do admire us—and for the right reasons. They admire our energy, our spontaneity, our imagination and our knowhow.

Even the Soviet government and Soviet officials often pay us the compliment of trying to behave like us. They dress like our bureaucrats, talk like our bureaucrats, use incomprehensible acronyms just like ours.

The Russians are not our enemy. It has been the Soviet Government that has called us enemy and today, even they are no longer doing so.

Russians today, as they were in Abe Lincoln's day, are still fascinated by America. The United States—not Europe, not Japan—remains the standard of all excellence, the standard by which they measure everything. Many Russians still look to us as a model. Gorbachev's new step of creating a Congress of People's Deputies is an attempt to separate the executive from the legislative branch of government. One of the recently elected delegates to this new congress is a man who happened to be here last summer. He watched the Bush-Dukakis debates in Peoria and took home a video tape, and his wife recently reported by phone that he used it to good effect in his successful campaign.

The word "democracy" is now on Russian lips everywhere used by officials, printed on posters and in the pages of newspapers. Yet it obviously does not mean the same thing to them as it does to us. For however encouraging glasnost may be and the steps away from totalitarianism toward a greater pluralism it certainly is not and will not be our system, and if we are going to be satisfied only with a mirror image, we are bound to be disappointed, for Russia is different, has always been different and her way will not be ours. And what do we expect? Primaries in Minsk? Psychologists say that only narcissists want mirror images. Perhaps we should explore the differences—we might learn something.

We are a country of impatience, they of patience. We are a country of rationality, they of emotion. They are comfortable with contradiction and mystery, we are not. We may not know it yet, but we need the strength of the Russian people, their profound spirituality, and the wisdom and perspective they have so dearly won through their suffering.

29-059 O-90-33 (Pt. 7)

We might be as enriched by this contact in the future as we have been in the past. One has only to think how much Russia has given to our common western cultural heritage; to name but a few of a long, long list: Dostoevsky, Tolstoy, the ballet, Diaghilev, Stanislavsky, Tchaikovsky, Gershwin, Stravinsky, Chagall, Balanchine.

It may be time for us to start dancing together again. A Hindu proverb says: "When two bulls fight, the grass gets crushed." We are both exhausted from our fighting and while we have been occupied with this expansive struggle former adversaries are getting stronger at our mutual expense.

We Americans have a short history. It is hard for us to understand a country with a long history. And in Russia everything is long—their roads are long, their queues are long, their names, church services, novels and their history is long. I think we need to take a little longer view. Seventy years is a drop in the historical bucket for a country that is over a thousand years old. Russia has seen many leaders, many have passed into the mist, but Russia is still there.

I believe that today we should be working with a new and changing Soviet Union to develop a mutually beneficial relationship, one which sees the gradual strengthening of forces which are friendly to the United States and the world: the growing freedom of the press, the broader political participation, the strengthening of universal ethical and religious values and the law as the moral base of society.

In order to achieve this, we need patience and a little perestroika and self-criticism of our own. We must rigorously reexamine our old prejudices and stereotypes, and understand the complex forces and problems at work in the USSR. We need to bring a far more nuanced and compassionate approach to Russian national aspirations and concerns and no tar all of these as being extremist and retrograde as we have a tendency to do now. Perhaps most of all we must strive to get over our often provincial ignorance of some of the most basic facts of Russian history and the complexities of Soviet life and society. Only when we do this can we perhaps start looking down the road to a day when we will not be adversaries, but perhaps even partners—not enemies, but friends—as in other periods of history when we once were.

This may still sound Utopian today—although less than it did four years ago—yet it is possible, and perhaps looking at the problems which are coming at us from the rest of the world, even necessary for us both.

Before we too quickly dismiss such a possibility let us think for a moment about what has happened already. Who could have predicted, what odds would you have given two years ago that we would be playing baseball and eagerly scanning the front pages of the New York Times for the results of Soviet elections?

President Reagan's favorite Russian proverb was Trust But Verify. It is a good principal, but the first word is trust. Without that there is nothing to verify.

The bear has gotten up on its hind legs and has started to move quite friskily, even more insistently tapping out a rhythm that says in the words of Lewis Carroll "Will you, won't you, will you won't you, will you join the dance?" It is time to think, for the Eagle to stop sitting it out, to get up and lift its wings. The movements might look a bit awkward at first, but with the time and practice the result might just be a creditable waltz.

In Russia, this week following Orthodox Easter which fell this past Sunday is known as "Bright Week" to symbolize the joy of hope returned after a dark season. We should rejoice that today the Russian and other peoples of the Soviet Union are seeking a new relationship between themselves, their government and the rest of the world. In this Easter season of spring, which brings with it the promise of rebirth in both nature and man, it is possible to hope, and I do.

As for the future, I would like to leave you with a thought expressed to me by a Russian poet:

"Perhaps we are all witnesses in a gigantic trial whose outcome is determined and yet still hidden from us, but whose outline we can sometimes glimpse as we can sometimes, behind a driving rain, glimpse the silhouettes of angels."

SUZANNE MASSIE

Suzanne Massie, author and lecturer, is presently a Fellow of the Harvard Russian Research Center. She is one of our nation's leading specialists on the Russian people and their culture as well as the contemporary Soviet Union. She lectures all over the country and has been called to advise President Reagan, Secretary Shultz, and many members of the House and Senate.

Mrs. Massie was the editor and researcher of Nicholas and Alexandra, the best-selling biography written by her husband, Robert K. Massie. She co-authored with him, Journey, an account of their experiences with their son's hemophilia. Her own books include The Living Mirror: Five Young Poets from Leningrad and Land of the Firebird: The Beauty of Old Russia. She is presently at work at Harvard on her forthcoming book on the history and contemporary restoration of the palace of Pavlovsk which is located outside of Leningrad and was destroyed during World War II.

Mrs. Massie travels frequently to the Soviet Union, most recently as a guest of the Patriarch of the Russian Orthodox Church for the celebration of the Millennium of Christianity. She served as consultant to the opening of the Wyeth Exhibit in Leningrad, sponsored by AT&T and the Bradywine Museum, and as consultant to the Philip F. Anschutz Collection "Masterpieces of the American West", which will be exhibited in the Soviet Union in 1989. She is a member of the Council on Foreign Relations and a board member of the International League for Human Rights.

Mr. WIRTH. I yield the floor.

MIDEAST PEACE PROCESS

Mr. SPECTER. Mr. President, today, I speak on a part of the world that all too often defies description and confounds logic. It is an area of chronic instability that has a history of drawing foreign powers into conflict, and an unsurpassed ability to export violence. I refer to the Middle East.

Five wars later, there still stands Israel, 1 year past 40. It's neighbors, the Arab east, consists of half a dozen countries from Egypt on the west to Iraq in the east that collectively contains 110 million people and half the world's proved oil reserves. I have traveled in this region for almost 10 years, met the leaders there and learned some important lessons. One of the most critical, is that what may be truly significant is probably not obvious.

For the past 17 months, world attention has focused on the problem of the Palestinians who reside in the West Bank and in Gaza. I am concerned that the relentless repetition of street battles on the evening news is obscuring the less photogenic, but perhaps even more important new prospects for peace.

This preoccupation with the Intifada has prevented adequate public consideration of some potentially significant changes in the region—possibly profound changes in attitudes in Iraq, Syria, Saudi Arabia, and other Arab nations. Because the implications of these subtle, but significant changes in attitude can have a direct impact on the prospects for peace in the Mideast, but have been substantially unexplored, I would like to discuss my experiences with you.

My travels in the region and meetings with Arab leaders suggest to me the prospect of a recent shift in the Arab attitude on Israel's right to exist as well as a potential willingness to abandon the continuing state of war with Israel. President Sadat made the quantum leap with his visit to Jerusalem in 1977. The signing of the Camp David accord opened the door for a revolutionary change in Arab attitudes toward Israel once Egypt, the most powerful Arab nation, formally recognized and signed a peace treaty with Israel.

In my travels to Egypt, Jordan, Syria, Saudi Arabia, Iraq, Tunis, Morocco, Kuwait, Bahrain, the United Arab Emirates, and Oman, I have sensed a potentially significant shift in the Arab attitude toward Israel. For instance, when I visited Syria in 1984, ranking officials were antagonistic toward Israel, suspicious of the United States and cool to me. That attitude changed markedly 4 years later, when I visited Damacus in January 1988 and had an opportunity to meet for over 4½ hours with President Assad. The discussion this time was consistently candid and cordial, although occasionally contentious.

Perhaps President Assad's more conciliatory attitude may have stemmed from his Moscow meeting with General Secretary Gorbachev in the spring of 1987. Reportedly, the General Secretary insisted that Syria cool its hostility toward Israel. Perhaps Syria's economic problems are contributing to this new attitude; or perhaps it has something to do with the passage of time and Israel's continued strong presence. In any event, President Assad showed a very real interest in discussing Syrian/Israeli relations as well as Syrian/United States relations.

One year later, this past January, I found an even friendlier, even cordial President Assad. While he continued to express concern over Israel's alleged biblical aspirations to control territory from the Nile to the Euphrates, he appeared willing to accept the reality of Israel's presence and control of a more limited area. While tentative and conditional, President Assad talked of normalizing relations with Israel, although he continued to refer to Israel as the enemy. What I found particularly encouraging was that other, younger Syrian officials talked favorably about U.N. Resolutions 242 and 338 which recognize Israel's right to exist.

My visit to Iraq was delayed until January 1989, shortly after the Iran-Iraq war ended. Once again when I met in Baghdad with older diplomats, I found a hostile attitude toward Israel and the United States for supporting Israel.

However, in rather dramatic contrast, the younger generation of Iraqi diplomats expressed much different, less ideological sentiment regarding Israel and United States-Israeli relations. They expressed a keen interest in seeing the peace process move forward, and in considering U.N. Resolutions 242 and 338 recognizing Israel's right to exist.

Shortly after these meetings in Iraq last January, I flew to Cairo for discussions with President Mubarak. I raised the issue of Iraq's real attitude toward Israel out of a concern that my own impressions were in error. President Mubarak took pains to assure me that Iraq had abandoned its formerly hostile intentions toward Israel. I hope this represents a long-term shift in Iraqi policy rather than a short-term breather after their exhausting 8-year war with Iran; but only time will tell what Iraq's real interests are.

Further evidence of a changing mood came from my visits to Saudi Arabia in 1984 and 1989. In 1984 the Saudis were polite as always, but very cool toward Israel and totally noncommittal about using their influence to advance the peace process. This January key Saudi officials talked, albeit guardedly, of using Saudi financial influence to moderate Syrian and PLO behavior. I must say that is it difficult to analyze Saudi Arabia's role and intentions in the Middle East. But my meetings there suggest that the Saudi attitude is becoming less recalcitrant than it once was.

Although Saudi Arabia continues to provide substantial financial assistance to the PLO and Arab countries potentially hostile to Israel, they now concede Israel's right to exist, and they insist they are trying to act as a moderating influence in the region.

Are we to take all these assertions of Arab leaders at face value? Of course not. Their real attitudes have yet to be fully tested. But I do believe that we may be missing significant opportunities to advance the Mideast peace process by remaining preoccupied, indeed mesmerized, by the problems with the Intifada. It is a problem of some real significance for our society if the media causes us to focus one place while the real forces of history are moving some place else.

Let me move now to another related issue. The problems on the West Bank and in Gaza have regrettably opened the door to the PLO which materially complicates the Mideast peace process. I am firmly convinced that the United States should not pressure Israel to deal with the PLO because of the abundance of evidence that Arafat and the PLO are terrorists, absolutely unreliable and continue to have the goal of waging a war of destruction against Israel.

Israel alone must decide whether to deal with the PLO directly or indirectly. On an issue of survivial, a nation may confer, but it must not concede. Israel is obviously much closer to the situation; Israel can best judge if there has been a real change in PLO objectives; and only Israel can truly assess whether it should undertake the real risks in dealing with the PLO.

While all United States citizens and all people for that matter have a right to speak out as they choose, I suggest there is grave potential damage when leaders of the National Jewish Community or Congressmen and Congresswomen press too hard on telling Israel what to do. Of course, that is a matter of definition.

Last year I refused to sign a letter written by 30 of my U.S. Senate colleagues criticizing Prime Minister Shamir for refusing to trade land for peace. In my judgment, we are too far removed in both distance and danger to lecture or lean on the Israelis about the PLO.

The PLO's long, ugly record of terrorism is a well established part of the public record. The PLO planned the Olympic massacre in Munich in 1972, murdered our Ambassador and Chargé D'Affaires in the Sudan in 1974, and in 1985 was involved in the hijacking of the *Achille Lauro* and the murder of Mr. Leon Klinghoffer.

Arafat's pledge last December to forego terrorism virtually had to be wrung out of him. His reluctance was such that it took three tries before he could spit out the magic words. Accordingly, I give little credibility to his so-called pledge.

In a broader sense, it is simply wrong to assume that the Palestinian Liberation Organization has abandoned its longstanding goal of destroying Israel. In countless statements since last December, mostly in the Arab press, Yasser Arafat and his lieutenants have stated repeatedly that the PLO's latest initiatives are a part of a strategy to deceive the world and to liquidate Israel in stages.

As Abu Iyad, Arafat's deputy and the architect of the PLO's current strategy explains, the PLO has merely revived the "Phased Plan" adopted in Cairo in 1974. At a conference in Algiers in 1988, Arafat and Abu Iyad lined up the main PLO factions behind the concept of the gradual destruction of Israel—and the potential combination of diplomacy and thinly disguised terrorism to achieve that purpose.

Despite his pledge to refrain from terrorism, Arafat almost immediately threatened to kill the mayor of Bethlehem, who had the audacity to suggest an end to the bloodshed in the West Bank and Gaza. Soon after Mayor Freij, a christian Arab, proposed a truce, Arafat was quoted as saying: "Whoever thinks of stopping the Intifada before it achieves its goals, I will give him ten bullets in the chest."

Mayor Freij then withdrew his proposal. Last January 14 I met with Mayor Freij in his office in Bethlehem. We discussed the threat and his withdrawal of his truce proposal. From my discussion with Mayor Freij, there was no doubt in my mind that Arafat's threat caused Mayor Freij's change of position. Clearly terrorism is not only a PLO product for export. They are prepared to use it at home, and on their own people.

The Freij incident does not stand alone. In late December 1988, PLO affiliated terrorists attempted to infiltrate Israel from the northern border and by sea. Several were killed. During February of this year there were at least three separate attempts to infiltrate Israel by PLO affiliated terrorists armed with automatic rifles and grenades, rocket propelled grenades, pistols, a gun silencer, and wirecutters. These attempts were thwarted by Israeli Defense Forces. Last month, there were four similar attempts to infiltrate and attack targets within Israel. The attacks were made across Israel's borders with Lebanon, Jordan, and Egypt. This continuing escalation of violence refutes the PLO's stated intentions.

In view of the PLO's long record of terrorism and deceit, I believe that Secretary of State Schulz made a mistake in opening the dialog with Arafat and the PLO last December. That error was compounded by Secretary of State Baker's testimony before our Foreign Operations Committee this March when he said Israel should deal with the PLO if no other Palestinian representation emerged. I then asked Secretary Baker if that was an implied invitation to the PLO to terrorize other potential Palestinian representatives as they had Mayor Freij. He then

insisted that we should not close the door on the PLO.

I then asked if he would rule out the PLO if proof was forthcoming that they terrorized other Palestinians away from the bargaining table with the United States. Secretary Baker declined to answer that question stating it was hypothetical. Of course, he had initiated the hypotheticals by saying Israel should deal with the PLO if other Palestinian representatives did not emerge.

The recent visits of Prime Minister Shamir, President Mubarak, and King Hussein to Washington, DC, worked out reasonably well. I personally felt there was a bad start after the first of the meetings with President Mubarak when President Bush said Israel should withdraw its "occupation forces." But President Bush's statements after President Shamir's visit were positive supporting the Israel proposal for elections.

President Mubarak met with a group of Senators and seemed sincere in expressing his continued interest to bring other Arab nations into the Mideast peace process. Some of us pressed President Mubarak to meet personally with Prime Minister Shamir and to expand trade, cultural and diplomatic exchanges between Egypt and Israel to light a fire under the cold peace which has prevailed for a decade. While his words were ambiguous, the music was to the effect that President Mubarak would do so when the time was right.

From this meeting and others over the past several years, it seems to me that President Mubarak is more concerned with winning Egypt's reentry into the good graces of the Arab League than in expanding its relationship with Israel. In the long run, this Egyptian strategy may well be in the best interest of the United States, Israel, and the Mideast peace process. But, I continue to think that President Mubarak should be pressed to expand his role. Egypt is a nation with a long, proven history. It's role is critical. Speaking about the Arab nations, an Egyptian diplomat observed: "Egypt is the only real state in the Middle East. All the rest are tribes, with flags."

Prime Minister Shamir's proposal for elections in the administered territories was well received. When Mr. Shamir met with a group of Senators and Representatives, he seemed relaxed and confident. He appears determined to take the process one step at a time without making any concessions until he sees the whites of the Arab eyes in negotiations, and perhaps then in only very measured terms, depending on the specific reciprocal concessions and the attendant guarantees. Prime Minister Shamir repeated a comment which I had heard him make a year earlier in Jerusalem to the effect that others, rather than he, would be handling later rounds of negotiations with the Arabs. He seems totally dedicated to a slow, meticulous step-by-step approach which appears wise.

King Hussein's meeting with a group of U.S. Senators in Washington was marked by the same determination to succeed in the peace process which he has evidenced for many years. The only difference was that he seemed a little more drawn, a little more tired. When he spoke to us, he was entirely noncommittal on Israel's plans for elections. I was pleased to see King Hussein take a more positive tone in his final statement after meeting with President Bush the next day when he spoke encouragingly of the Israeli election plan provided it was part of an overall settlement approach.

There is obviously no quick fix in the Mideast. The real question is whether there is any fix at all.

Until last January, I had always felt that time was on Israel's side with each passing day, week, month, year, finding Israel stronger. Now, I am not so sure.

Israel's economy continues to have serious problems. In my trip to Jerusalem and Tel Aviv last January, I found more differences among the Israelis than ever before on fundamental questions about dealing with the Intifada, the PLO, the growing Arab population, and strong dissension within Israel's Government. Their razor thin elections and the continuing controversy between Likud and Labor, with the minor parties holding the balance of power, raise serious problems of national unity.

I am personally concerned about the future of the $3 billion annual allocation from the United States to Israel. While congressional support remains generally strong, the potential is present for erosion, especially given the deficit, U.S. budgetary constraints, and the relentless adverse media coverage. For the first time since I have been in the Senate, my view is that Israel's interests are not well served by maintaining the status quo. Rather than growing stronger, each passing day contains the very real risk of a potentially weaker Israeli position.

My own strongly felt view is that Israel must answer the tough issues for herself without undue pressure from the United States Government or the American or world Jewish community. It is uncertain how Prime Minister Shamir's proposals for elections will work out. Perhaps the stage is set for back channel negotiations between the Israeli Government and the PLO. Perhaps the current negotiations anticipate Palestinian interlocutors with close connections to, if not actual membership in, the PLO. That process must be evaluated and determined between the parties themselves.

The United States should continue to support Israel and do all within our power to implement the peace process. It may be that some form of international umbrella will be useful in bringing the parties together.

The Arab nations would like a formally structured international conference. Prime Minister Shamir appears to be willing to have a meeting convened by the United States and U.S.S.R. providing it does not result in the dictation of terms or pressure. The Soviet Union has shown some willingness to be helpful although Soviet motives are far from clear. Foreign Minister Shevardnadze's meetings with Foreign Minister Moshe Arens were constructive, but diminished by Shevardnadze's postmeeting comments.

The continuing worldwide rapproachment between the United States and the Soviet Union bodes well for the Mideast peace process. Slowly but surely agreements are being hammered out in Afghanistan, Angola, and Cambodia. Perhaps a breakthrough is imminent in Nicaragua. Whatever agreements the United States and U.S.S.R. may make, enormous problems remain in civil strife in all of the affected areas.

The United States should continue to urge the U.S.S.R. to defuse the Mideast situation by withdrawing or diminishing Soviet aid to the PLO or Syria.

It may be that the United States and Soviet Union should encourage a Mideast peace settlement with guarantees, perhaps even backed by the United Nations, to enforce the terms of a peace treaty. Such a possibility would have to be carefully evaluated by all sides, especially the Israelis, to be certain no Trojan horses erupted. The experience of guarantees on peace treaties historically demonstrates the questionable nature of such assurances. Those newsreels of our helicopters lifting off from the American Embassy on the last days of Saigon are seared into the memory of many Israelis. And a generation earlier in the World War II era, guarantees and mutual defense treaties proved to be meaningless. Some carefully crafted guarantees, however, might be of some assistance in formally committing the Soviet Union not to support potential agression by any Mideast Arab factions against Israel.

For the immediate future, however, Israel's only course is to remain strong and self-reliant. A strong, united Israel offers the best hope for peace and stability in the Mideast. The United States should continue to support Israel with aid, assistance, and perhaps suggestions but without undue influence.

As I conclude, I return to two words which stung me so deeply, "occupation forces." If Israel is accused of occupy-

ing anything, it is not and must not be territory. It must occupy only that special place in the conscience of mankind which David Ben-Gurion envisioned when he called Israel "a light unto the nations." Every day, far away Israelis look deep into their souls and down the barrel of terrorist guns to address the issue of survival as a nation. We must remain steady in our support and fast in our determination to encourage anyone, Arab or Israeli, whose good faith goal is a just peace. Israel will endure—this Nation, rising from the ashes of the Holocaust, must leave nothing to chance and takes nothing for granted, nor should we.

The time will come, soon I hope, when great risks will be run to attain a lasting peace—Israel will be ready—so must we.

CONVICTION OF MOHAMMAD HAMADEI

Mr. SPECTER. Mr. President, recently I addressed the Senate on the occasion of the conviction of Lebanese terrorist Fawaz Yunis in Federal district court. Today, I take this opportunity to call to the attention of my colleagues another important development in the battle against international terrorism. On May 17, a West German court convicted Mohammad Ali Hamadei of murder and air piracy and sentenced him to life imprisonment. The conviction of Hamadei, like the conviction of Yunis before it, sends an important message to terrorists around the world about the determination of the civilized world to root out and punish terrorist acts.

The facts of the Hamadei case shock the conscience. On June 14, 1985, Trans World Airline flight 847 departed Athens International Airport enroute to Rome, Italy with 153 passengers and crew on board, most of them Americans. Approximately 10 minutes into the flight, two hijackers, later identified as Mohammad Hamadei and Hasan 'Izz-al-din, commandeered the aircraft and ran through the plane brandishing hand grenades and a pistol while randomly striking the seated passengers on the head, neck, and shoulders with their weapons. The hijackers forced chief stewardess Uli Derickson to the flight deck area and gained access to the cockpit. The hijackers then pistol-whipped the flight crew inside the cockpit and ordered the pilot to fly to Algiers. The aircraft ultimately flew between Beirut and Algiers several times during the next 2 days while the hijackers retained control of the plane.

Once in control of the aircraft, the hijackers ordered Derickson to collect all passports and separate those of U.S. citizens and military personnel. The terrorists then ordered the military personnel into the first-class section one at a time for questioning, beginning with Navy diver Robert Stethem. The hijackers bound his arms together with an electrical cord, cutting off his circulation, and beat him until he was unconscious. Several other passengers were also beaten. Stethem regained consciousness, only to be shot in the head in cold blood. The hijackers dumped his body onto the tarmac in Beirut before several more hijackers boarded the plane for its flight back to Algiers.

The terrorists eventually abandoned the plane after its final landing in Beirut. Thirty-nine passengers were removed from the aircraft and held hostage in various locations in Beirut for 17 additional days before they finally were freed on June 30, 1985.

Hamadei, a Lebanese Shiite Muslim, was arrested in Frankfurt, West Germany. A number of the Members of this body, including this Senator, believe that the West Germans should have extradited Hamadei to the United States to stand trial in Federal district court, but that did not come to pass. While I regret the West German decision not to honor our extradition request, I commend the Germans for bringing this terrorist to justice and I applaud the West German court for imposing the maximum sentence of life imprisonment upon Hamadei.

Mr. President, the Mohammad Hamadei case has significant ramifications for our ongoing efforts to thwart terrorism. At my urging, the 99th Congress passed the Terrorist Prosecution Act, a law extending the reach of American criminal jurisdiction to extraterritorial acts of violence against American nationals (P.L. 99-399, title XII, codified at 18 U.S.C. 2331). Because of the ex post facto clause of the Constitution, Mohammad Hamadei could not have been prosecuted for his 1985 terrorist acts under this 1986 criminal statute. Had he been extradited, Hamadei would have faced other charges. Nonetheless, there is now a more complete set of criminal statutes designed to safeguard Americans overseas by deterring those who would contemplate violence against American nationals.

There is another important lesson to be learned from the Hamadei and Yunis cases. The time is ripe for the United States to enter into multilateral treaty negotiations to define terrorism as an international crime and to establish an international forum in which such offenses may be prosecuted. The West German Government came under tremendous pressure to reject the American request for extradition of Hamadei. West German citizens were even taken hostage in the Middle East during this period. The German Government decided to try Hamadei itself, but it would not have been faced with this difficult choice had there been an international forum to which Hamadei could be extradited.

In 1986, the Congress adopted my amendment to the Omnibus Diplomatic Security and Antiterrorist Act calling on the President to pursue negotiations to establish an international court to try terrorists. I also authored section 4108 of the Omnibus Anti-Drug Abuse Act of 1988 which calls upon the President to pursue negotiations to establish an international court with jurisdiction over international drug trafficking and other violations of international criminal law.

I am pleased that this particular case has reached a satisfactory conclusion, but the effort to bring such international outlaws to justice must be institutionalized. My discussions with a variety of foreign leaders persuade me that the civilized international community is prepared to speak with one voice to condemn terrorism. The creation of an international criminal court with jurisdiction over terrorism, hijacking, crimes against humanity, and international drug trafficking would be an eloquent expression of that condemnation.

For today, I commend Judge Heiner Mueckenberger and the West German criminal justice system for convicting Mohammad Hamadei and imposing the maximum sentence of life imprisonment. For tomorrow, I pledge to continue my efforts to bring the force of international law to bear upon the scourge of international terrorism and urge my colleagues to join me in this effort.

AN ENLIGHTENING EXPEDITION

Mr. PRESSLER. Mr. President, I rise to pay tribute to a group of fine South Dakota students who are visiting Washington this week in order to gain a better understanding of our political process. They come under the tutelage of two of South Dakota's great educators, Dr. W.O. Farber and Dr. Loren Carlson, both of the University of South Dakota.

I must confess at the outset a particular fondness for these two professors. Both taught me while I attended the University of South Dakota. They continue to inspire our State's most talented youth toward greater goals—constantly encouraging them to reach beyond any conventional bounds. In addition, Dr. Carlson was my first administrative assistant when I came to Congress in 1974. In addition, both are valued friends and trusted confidants.

They have been jointly conducting this tour for a number of years—to the point where it has now become an annual, institutionalized event. This year they have brought with them a particularly talented "crop" of students. I visited with them this afternoon. My wife Harriet and I have the honor of hosting them in our home this evening. And tomorrow we will

host a reception for the group in my Washington office, which is designed to give other South Dakotans living in Washington a chance to meet this talented group of individuals.

Mr. President, this seems a fitting opportunity to bring to the Senate's attention an article recently written about Dr. Farber. As you can see, he has an impressive following of highly successful former students who he has developed since their college days. He is truly a South Dakota institution, and I am honored to call him my friend.

Mr. President, I ask unanimous consent that an article by Mr. Jeff Iseminger from the Wisconsin Alumni magazine be printed in the RECORD at this point, followed by a list of the talented students these two terrific professors brought to Washington this year.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ICONOCLAST OF THE IVORY TOWER

(By Jeff Iseminger)

On a fine summer evening, when the prairie light slants through the arching elms, you can see him sitting there in the campus garden, under the arbor, looking like the kind of complacent man that he isn't.

He's short, about five-foot-six, but so exuberant and compelling that you feel, in a way, that you're looking up to him.

He's an eclectic dresser, this evening in a mix of checked shirt, bolo tie, and walking hat, but he once had tea in the private chambers of the House of Lords.

He's seventy-eight years old, but age—instead of dimming his ability—has ripened him into a lively sage, a reservoir of acumen. He's full of banter and bluff, but underneath lie burning ambitions.

This garden visitor is sitting in the heart of the University of South Dakota in Vermillion, where he's taught since 1935, when he earned his Ph.D. at Wisconsin. His name is William O. Farber, USD professor emeritus of political science, and he's a man who has shaped his life to suit his vision.

That vision is spangled with iconoclastic surprises. Here's a professor who considers an ivory tower a gilded prison . . . who drives a student 240 miles for a job interview . . . who takes students abroad—at his own expense—to show them that the American way is but one hue on the human palette.

The student whom Farber drove to an interview did get the job, by the way. He signed on at KMT-TV in Omaha in 1962 and rose rapidly. You've watched him anchor NBC's Nightly News: Tom Brokaw.

"Dr. Farber is one of the brightest, most enthusiastic, most curious friends I have," said Brokaw, "and from him I've learned that life isn't meant to be a passive experience. He charges through every day giving off energy, ideas and inspiration to everyone in his wake."

Farber has followed his own advice to students: "The important thing is to do what you want to do." In his fifty-three-year career he's marshalled his formidable talents for the sake of his students and the common good—an almost quaint notion when public discourse has been dancing to the whip-crack of private prosperity.

Farber's two aims for over-achievement—to make students his family and the nation and the world his community—were sparked as a graduate student at the UW-Madison. Here he joined the political science program in 1933 after earning two degrees at Northwestern University. "It was a time of ferment," he said. "People thought more broadly then about alternatives, and minds were bold. It wasn't the incrementalist approach so common today."

He says he studied under "great professors" at Madison, like Grayson Kirk (later president of Columbia University), Frederick A. Ogg (editor of the American Political Science Review), Llewellyn Pfankuchen, Walter Sharp, John Gaus, and Harold Groves. And his teachers taught in more than classrooms. They invited Farber and other students into their homes, where they could socialize and free themselves intellectually from classrooms and curricula.

When Farber left Wisconsin with his doctorate to teach at the University of South Dakota, he opened his doors as wide as those he had entered in Madison. He arrived in Vermillion with a potent concept of the Wisconsin Idea, the tenet that a university's campus is its state and beyond. And he transplanted that idea to South Dakota, where he not only kept it alive but made it thrive for the thirty-eight years he was to chair USD's department of government.

South Dakota Governor George Mickelson calls Farber one of the state's greatest resources because of his experience and "passion for his own continuing education in government." The state's largest newspaper, the Sioux Falls Argus-Leader, recognized Farber last spring when it named him one of the ninety-nine most influential people in South Dakota's ninety-nine years of statehood.

Farber's concept of public service has spanned the spectrum from municipal to global. In Vermillion he chaired the city planning commission for ten years, and in Congress he advised South Dakota Senator Karl Mundt. In the North Atlantic Treaty Organization, as Mundt's aide, he was secretary of the Committee on Education, Cultural Affairs and Information, where he proposed a seminar in public administration for NATO officials later conducted in Bruges, Belgium.

All the while, Farber wrote a spate of articles (beginning in 1934 on chain store taxation) and worked tirelessly as a charter member of the American Society of Public Administration. In 1983 he was inducted as an honorary member into the National Academy of Public Administration, joining a group of nineteen that includes former Supreme Court Chief Justice Warren Burger and former Secretary of Defense and World Bank President Robert McNamara.

But where were Farber's students in this welter of public service? At the very center, just where their professor wanted them.

"Bill Farber has produced an unusually large number of students who've gone on to become outstanding political scientists," said Leon Epstein, professor emeritus of political science at the UW. Among Farber's may proteges are Kenneth Meier and Charles Jones, who earned advanced degrees at Madison and now serve on our political science faculty. This means a lot to Farber. "They're returning what was given to me," he said.

At USD Farber pulled Meier out of a class of 250 students for a personal talk and gave him a research job. He saw promise in Charles Jones too, but that presented a problem. Farber had to pick the department's top junior in 1953 for a twenty-five dollar award, but there were two excellent candidates: Jones and Sam Patterson. "So I dug into my own pocket for another twenty-five dollars and gave the award to both of them, one of the smartest things I ever did," Farber said.

Both Jones and Patterson, who teaches at Ohio State University, became distinguished political scientists, each chosen at different times as editor of the *American Political Science Review.* Two more of the Farber veterans in academic are Michael Rukstad, associate professor in Harvard's Graduate School of Business Administration, and Robert Legvold, director of the Harriman Institute for Advanced Study of the Soviet Union of Columbia University.

Other USD students who felt Farber's influence are Phil Odeen MS'59, former assistant to Henry Kissinger in the National Security Council; Joe Robbie, owner of the Miami Dolphins football team; South Dakota Congressman Tim Johnson; and CBS sportscaster Pat O'Brien.

O'Brien said he was "on the verge of juvenile delinquency" as a USD freshman. "I had no real goals, like lots of kids in the '60s." Then Farber asked O'Brien to drop by his house, and two hours later he was a political science major. Farber invited O'Brien as a junior to accompany him on a trip to NATO countries and the Soviet Union. "He told me all I had to do was carry his bags and learn something," said O'Brien.

On another European trip Farber took Kevin Schieffer, now an assistant to U.S. Senator Larry Pressler of South Dakota. When they visited the House of Lords in London, he sent in a note to a friend from his NATO days, Lady Elliot, the Baroness of Harwood. "Lady Elliot answered through a liveried messenger that she'd be delighted to have tea with us. She did—with Kevin in blue jeans—and he's never forgotten it," Farber chuckled.

Schieffer's boss, Senator Pressler, is one of four Rhodes scholars to major under Farber—a phenomenal number, especially for a teacher at a school with 5,500 students. Since a Rhodes Scholar must show wide-ranging interests, Pressler says USD political science students had an edge in the competition: Dr. Farber. He wanted students to piece together "the big picture," so he helped them land internships and summer jobs in Congress, the State Department and NASA, for example.

Farber often tried to ratchet up his students' goals so they could gain more influence and do more good. He's been called "a down-to-earth guy who makes you want to reach for the stars" by Allen Neuharth, who studied under Farber before switching to journalism at USD. Neuharth reached high himself: today he's founder and chairman of *USA Today* and chairman of Gannett, the nation's largest newspaper company.

Farber put extra zip in his students by redrawing the usual parameters of his profession: "The teacher's role today is not primarily to provide information—students can get that through a variety of media—but to stimulate. I try to be a motivator, a counselor, even a placement officer. And I try to teach by example."

In the classroom Farber recorded his lectures and placed copies on library reserve. Freed from note-taking, students could consider the day's topic and speak their minds as Farber bounced on the balls of his feet, gestured with sweeping arms and jabbing fingers, and talked and laughed in a boom-

ing crescendo. Like a leprechaun in a business suit, one student said.

The doors to Farber's office and his home across from campus were wide open and widely used by students seeking advice or just a sympathetic ear. He paid attention to their hopes and fears and confusions because he believed that each of them needed one thing above all: recognition as an individual.

Farber traces his counseling style to the ten years he clerked in his family's grocery store in Geneseo, Illinois, during the 1920s and '30s. "In those days the clerks would fill the requests of customers as they came in," Farber explained. So he asked himself: What can I get Mrs. Peterson to put on her list that isn't on it now? As a professor, Farber saw Mrs. Peterson in each of his students. He widened their intellectual swath by suggesting new options for a term paper, a semester, or a life.

Many former students of Farber's would agree with UW professor Charles Jones when he says Farber is "an extraordinary man." And extraordinary is the way they've honored him since his retirement in 1976, pouring $300,000 into what's called the Farber Internship and Travel Fund. Created to give USD students the experiences they miss in the classroom cloister, the fund supports internships, trips to conferences, and guest lectures.

Farber's "retirement" was simply a segue into teaching less, traveling more, and making just as large a wake. A typical two-day slice of Farber's life last summer showed him saying farewell to a recent USD graduate, sifting through correspondence, upgrading his computer, tipping off a newspaper editor about a colleague's work, giving a visitor a tour of campus in 100-degree heat ("It's invigorating!" he said with a smile), driving 250 miles to "help a student in a bit of trouble" and . . . sitting under the arbor in the campus garden.

In that rare moment of repose, Farber muses sometimes about the world's great problems and what can be done to meet them boldly and bare knuckled, without an increment in sight. He also wonders about the image that young people have today of public service, and whether he can do something new, maybe tomorrow, to give it a boost. No doubt he will.

COMMUNITY LEADERSHIP

Mr. PRESSLER. Mr. President, we hear a great deal of talk from politicians these days on the subject of economic development. But often, the most important ingredient for economic development is frequently a quiet, unheralded force in the community. Noel Hamiel, the former publisher of the Yankton Daily Press and Dakotan, was such a force. He has now left our State, sadly enough. He has moved to Grand Island, NE, where I understand he will join the paper there. South Dakota's loss is Nebraska's gain. But at least his departure allows the opportunity to appropriately credit him for the tremendous contribution he made to Yankton and to our entire State before he left.

Many years ago in 1974, when I first came into politics, there were three or four divergent groups in Yankton—as is the case with many communities. If one were to work on economic development, it was very difficult to get all these groups together. Since that time, they have come together for the most part. They are working together now. Part of that reason is because of the leadership provided by Noel Hamiel. As editor and publisher of the Press and Dakotan, Noel really worked at bringing the community together. Too often the local press forgets its public interest role in the rush to sell newspapers or advertising. Mr. Hamiel used the paper to accomplish things for the community—and he accomplished a great deal.

I was involved in a minimum security prison project for Yankton. The local paper could have criticized it, it could have gone out of its way to stir up controversy to sell newspapers. It could have done a lot of things. Too often, in my view, that is what happens. I am not suggesting that the media should not report controversy. Indeed, the prison proposal was controversial and was reported as such. It is the media's duty to report controversy. But too often the media creates controversy. In the example of the prison proposal, the Press and Dakotan reported the facts accurately, gave everyone the opportunity to air their views and then provided very thoughtful, credible editorial leadership. This is unlike certain other newspapers that care more about sensationalized headlines than actually accomplishing something for the community they serve.

Today the prison is heralded as a great success for Yankton. As one who has worked on a number of similar projects and has had extensive experience in this area, I feel confident in saying that it could not have happened without Noel Hamiel's professionalism and leadership. Such a proposal probably would not have been successful, for example, in the largest city in my State, where circulation figures and headlines seem to be more important than the community.

Another example of Mr. Hamiel's leadership was the Riverside Park project, which we just dedicated last month. This new recreation facility is going to provide tremendous opportunities for Yankton. Again, Noel Hamiel and the Press and Dakotan were instrumental in making it happen.

He also spearheaded the Territorial Capitol replica project through the Sertoma organization. It now stands in the new park as a centerpiece of Yankton's proud history in our State's development.

Noel Hamiel was an ingredient for economic development in our State. Yankton is on a good path. There are many other people in Yankton who deserve credit. But I want to take this opportunity to pay credit to Noel Hamiel. We are in his debt and we shall miss him. Grand Island is a fortunate city.

NORWEGIAN INDEPENDENCE

Mr. BURDICK. Mr. President, May 17, 1989 is an important date in the history of the free world. It marks the 175th anniversary of the signing of Norway's Constitution. I ask my colleagues in the Senate to join me in congratulating the Norwegian people on this historic day as they celebrate Syttende Mai.

The United States and Norway have always enjoyed cordial relations. There are currently nearly 4 million Americans of Norwegian descent living in this country. My State of North Dakota has been referred to as the most Norwegian of all of the States. The Norwegians were the largest of the many ethnic groups that settled in North Dakota. Approximately 30 percent of our current populationse go is of Norwegian ethnic background, enjoying lefse and lutefisk and using Uffda and other Norwegian expressions.

Because of the special ties that bind many of the citizens of North Dakota to Norway, the 51st Legislative Assembly of the State of North Dakota passed Senate Concurrent Resolution 4072. This resolution, introduced by Senator Evan Lipps of Bismarck, congratulates the people of Norway on the 175th anniversary of Norway's Constitution. I ask the consent of the Senate to have this resolution printed

in the CONGRESSIONAL RECORD following my remarks.

The year 1814 was a year of great uncertainty in the world. On this side of the Altantic Ocean, the United States was embroiled with England in the long, bitter War of 1812. In Europe there was great upheaval and turmoil because of the Napoleonic wars. Norway had been in union with Denmark for 434 years. Sweden had fostered plans to disperse this union and develop closer ties between Sweden and Norway. Following the defeat of Napoleon's army at Leipzig, Denmark was forced to renounce Norway to Sweden in the Treaty of Kiel, signed January 14, 1814.

Norway was not willing to be pawned off as a piece of land by the victors. It was determined to have its own constitution and a voice in its own destiny. On February 25, the Norwegian people were called to assemble in their churches where they took an oath to maintain their independence of their country, and if necessary, give their life. On the same day, 112 delegates were chosen for a constitutional convention. It is noteworthy that 53 of the 112 delegates were farmers and small businessmen. The delegates met at Eidsvoll, Norway, and completed their work in just 10 days. The new constitution was unanimously approved and signed on May 17, 1814. Norway had become a sovereign state and an equal partner in the union with Sweden, which lasted until 1905.

Norwegian research has established that this historic document was inspired, inter alia, by our Declaration of Independence and by our Constitution. Prof. Knut Mykland, writes that many constitutions were developed between 1770 and 1814, but only two survived—the Constitutions of Norway and the United States.

Syttende Mai is observed in Norway much like we observe the Fourth of July in the United States. In earlier days the Syttende Mai celebrations in Norway often centered around large political demonstrations directed against foreign domination and control. Today the emphasis centers around the family and especially the children, with parades, games, folk dances and other cultural events. The students of the University of Oslo celebrate around the statue of Abraham Lincoln in Frogner Park. The people of North Dakota presented this statue as a gift to the people of Norway in 1914, in commemoration of Norway's centennial.

On this day 75 years ago, North Dakota Gov. Louis B. Hanna wished the Norwegian people Godspeed and prayed that in the years to come Norway's star might grow even brighter. It is gratifying to observe that Norway's star continues to shine brighter than ever.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

SENATE CONCURRENT RESOLUTION No. 4072

Whereas, Syttende Mai, May 17, is Norwegian Independence Day; and

Whereas, on May 17, 1989, Norway will celebrate the 175th Anniversary of its Constitution, and on November 2, 1989, the state of North Dakota will celebrate the 100th Anniversary of its admission as the 39th state of the United States of America; and

Whereas, relations between Norway and the United States are based on a solid foundation of extensive family ties, many common interests, and a strong dedication to common values, including open and democratic government, respect for human rights, independence and self-determination, and a dedication to peace among all nations of the world; and

Whereas, special ties exist between North Dakota and Norway because thousands of Norwegian immigrants were important in the development of North Dakota, including Nelson E. Nelson who came to America from Norway in 1849 and in 1869 established the first homestead on land that in 1889 became part of the state of North Dakota, and because approximately one-third of North Dakota's present population has a Norwegian ethnic background; Now, therefore, be it

Resolved by the Senate of North Dakota, the House of Representatives concurring therein:

That the Fifty-first Legislative Assembly extends its congratulations to the people of Norway on the 175th Anniversary of the Constitution of Norway and requests the Governor to transmit to Norwegian Ambassador Kjell Eliassen and Consul General Bjarne Grindem a message congratulating the people of Norway on May 17, 1989, the 175th Anniversary of the Constitution of Norway; and be it further

Resolved, That the Fifty-first Legislative Assembly urges the Governor to extend to Ambassador Kjell Eliassen and Consul General Bjarne Grindem an invitation to the people of Norway to participate in events celebrating the 100th Anniversary of North Dakota's statehood; and be it further

Resolved, That the Secretary of State forward copies of this resolution to the Governor for transmittal to Ambassador Kjell Eliassen and Consul General Bjarne Grindem.

CONCLUSION OF MORNING BUSINESS

The PRESIDENT pro tempore. Under the previous order, the time for morning business has expired.

FAIR LABOR STANDARDS AMENDMENTS FOR 1989—CONFERENCE REPORT

The PRESIDENT pro tempore. The Chair lays before the Senate the conference report on H.R. 2, which the clerk will report.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2) to amend the Fair Labor Standards Act of 1938 to restore the minimum wage to a fair and equitable rate, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDENT pro tempore. Without objection the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of May 8, 1989.)

The PRESIDENT pro tempore. Under the order, the time of 1 hour and 15 minutes is under the control of Mr. HATCH. Forty-five minutes is under the control of Mr. KENNEDY. Thirty minutes is under the control of the majority leader.

Mr. WIRTH. Mr. President, I note the absence of a quorum and ask that the call of the quorum be equally charged against all of the parties to whom time has been allocated.

The PRESIDENT pro tempore. Without objection, it is so ordered. The time will be so charged. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, is is so ordered.

Mr. KENNEDY. Mr. President, how much time remains?

The PRESIDENT pro tempore. The Senator has control of 45 minutes. Mr. MITCHELL has control of 30 minutes. Mr. HATCH has control of 1 hour 15 minutes.

Mr. KENNEDY. I yield myself such time as I might use.

The PRESIDENT pro tempore. The Senator is recognized.

Mr. KENNEDY. Mr. President, today the Senate will consider and vote on whether to adopt the conference report accompanying H.R. 2, the Fair Labor Standards Act Amendments of 1989.

We have had extensive deliberations on this minimum wage legislation on the Senate floor. During this debate, we have debated all the arguments surrounding the minimum wage, and it has been a good debate.

But the fundamental issue, the overriding issue, is whether the Congress of the United States will once again make the minimum wage a living wage, and thereby ease the burden of poverty pressing down on millions of our fellow citizens on the lowest rung of the economic ladder.

Both Houses in this Congress have answered that question with a resounding yes, and today we will vote on adopting the conference agreement embodying our consensus.

I believe the conference report before us is a sound agreement, carefully balancing the positions represented in the bills adopted by each

Chamber. During Senate consideration of the minimum wage bill, 12 amendments were adopted. Six of those 12 amendments are contained in the conference agreement, and 5 of those 6 are amendments offered by members from the other side of the aisle.

Of the six Senate amendments dropped in the conference, four were in the exclusive jurisdiction of the House Committee on Ways and Means, and their conferees were unalterably opposed to these additions.

What the conference report proposes is an 8-year overdue increase in the minimum wage. It will go from its present level of $3.35 an hour, to $3.85 on October 1, to $4.25 in 1990, to $4.55 in 1991.

The bill also contains a major concession to the White House—a training wage for inexperienced workers. Its provisions are nearly identical to the training wage adopted by the Senate last month. With this training wage, the Congress, for the first time in the 50 year history of the minimum wage, will be establishing a two-tier minimum wage, under which inexperienced workers can be paid a lower wage for up to 60 days while receiving on-the-job training.

This legislation will significantly improve the lives of millions of low-wage workers. Some 14 million persons will benefit from this bill. Two-thirds are women; 72 percent are adults; almost half are full-time workers; 3.8 million are heads of households; and over 4.5 million workers and their children who live in poverty will be helped.

But this bill is not about numbers. It is about people—hardworking people who would rather work for a living than live on welfare, people who want to make ends meet, provide for their families and for their children's future. It is about how we as a nation value human labor, and whether there is to be some semblence of dignity in even the most thankless jobs in our society.

The President has said that if we send him this bill, he will veto it. The President claims that he has compromised already, that he has come 70 percent of the way toward our position by favoring an increase in the level of the minimum wage to $4.25 an hour.

But with whom has the President compromised? Possibly with himself, but certainly not with Congress, for he has never once even talked with us about the minimum wage. He has only talked at us.

All through last year's campaign, the President repeatedly reassured the Nation that he was in favor of an increase in the minimum wage. So his position then was not $3.35 an hour. And we believed him.

This spring, President Bush finally told us in dollars and cents the specific increase he favored: $4.25 an hour over 3 years, no further discussion, take it or leave it.

When Secretary of Labor Dole testified on March 3 before the Senate Labor and Human Resources Committee and presented the administration position, she requested four changes in current law.

First, the administration requested an increase in the tip credit provision, from 40 to 50 percent. Despite our misgivings over the impact on these employees, Congress accepted that request, and it is included in the conference report before us.

Second, the administration asked for an increase in the small business threshold before firms are covered by the minimum wage. We had included a smaller threshold in the bill we introduced, but we expanded this provision to accede to the administration's request.

Third, the administration asked for a level of only $4.25 an hour, over 3 years. That was rejected by the committee and by both the House and Senate as unfair. On the Senate floor, however, we went part way to administration's position. We reduced the level in our bill to $4.55 an hour, from the $4.65 reported by the committee.

Fourth, the administration asked for a training wage. In her testimony before the committee, Secretary Dole spoke of the concerns we share about training today's workers for tomorrow's jobs, and she outlined her justification for the administration's training wage proposal. As she stated:

> Most of us can remember from our own early experience with a new job how much of the basics we had to learn. Not only skills specific to any new job, but basics about showing up on time, taking no more than 10 minutes if we had a 10 minute break, showing good faith with coworkers and a good face with customers. Simple things, yes, but not automatic. They have to be learned.

I agree that showing up on time, limiting breaks, working with others, and dealing with customers are important attributes of any job. I would go further, and suggest that if America is going to regain its competitive edge, our workers need to be learning a lot more than these skills.

But these basic skills are learned in your first job, or your first few jobs. Yet, to learn how to smile and show up on time, the administration is proposing a so-called training wage of 6 months duration. Six months of subminimum subpoverty pay to learn lessons like that.

The administration's proposal is not limited to a total of 6 months subminimum pay. If you change jobs, if you are laid off, if your company moves or goes out of business, you go back to "Go" and start your 6-month training wage clock again.

No mention of training, no requirement of training, just less pay whenever you switch jobs, for whatever reason.

Let us apply this so-called training wage to the low-wage work force. By their very nature, many of these jobs turn over more rapidly than every 6 months. Restaurant workers, fast food workers, retail workers, and food store workers all work in jobs which turn over in less than 6 months.

Almost 17 million workers would be eligible for the Bush subminimum wage. 13.8 million of them are adults; 12 million are full-time workers; and almost 10 million are women.

According to a report released by the Urban Institute, among low-wage workers who would be affected by the administration's proposal, over 40 percent would get the subminimum wage instead of the higher minimum wage. That is 5½ million workers who would get no increase for the first 2 years of the bill because they will never escape from the 6-month sentence of the training wage.

The pockmarked prosperity of the 1980's has been harsh on millions of Americans, but it has been harshest of all on the lowest wage workers.

For 8 years, the Reagan administration stonewalled any increase at all in the minimum wage. Inflation increased from 1981 to 1989 by 40 percent but the wages of 3 million food store workers increased only 5.6 percent; the wages of 640,000 gas station workers increased only 24 percent; the wages of 6 million restaurant workers increased only 20 percent; and the wages of 20 million retail workers increased only 25 percent.

While the wages of those 3 million food store workers were being ravaged by inflation, the compensation of food store CEO's skyrocketed. Giant Food employees received a 5.6-percent increase in pay, but Giant's CEO received a fivefold increase, from $601,000 to $3.4 million.

Burger King employees received a 20-percent increase, yet Burger King's CEO received a threefold increase from $515,000 to $1.4 million.

K-Mart employees received a 25-percent increase, while K-Mart's CEO received a 95-percent from $506,000 to $989,000.

While Disneyland workers were receiving Mickey Mouse pay increases, the Disney CEO went from $450,000 to $7.5 million.

Yet the Bush administration is telling us that the sky will fall if we pay low wage workers a living wage. And as we all know, no one fears more for the future of the country than a well-paid executive being required to do right by his low-paid employees.

And, to add insult to injury, what does the administration say to workers in jobs which last less than 6 months?

Kinder and gentler does not mean you—you do not deserve any increase in pay at all.

For you, under the Bush subminimum wage, you will not get an increase this year. You will not get an increase next year. And in the third year, 1992, 11 years after the last increase in the minimum wage, we will give an increase in pay of one nickel.

In 1992, the subminimum wage for any employee who has started a job or switched jobs in the last 6 months, will rise from $3.35 an hour to the grand total of $3.40 an hour—an increase of one nickel.

One nickel is all that President Bush is proposing for the 5½ million workers condemned to the Bush subminimum wage.

Wait 11 years for an increase in the minimum wage, they are told, and then be grateful for the nickel extra an hour they will receive. "Let Them Eat Cake' is the message from the White House. I suggest that everyone concerned about the unfairness of the President's training wage mail a nickel to the White House; it will cost 25 cents more to mail. But it is a message that the President may finally understand.

"Mr. President, we do not want your wooden nickel; we want a fair day's pay for a full day's work." No one is fooled by the administration's subminimum wage. In all likelihood, it was specifically designed to ensure that large numbers of workers, who deserve an increase in the minimum wage, will never get any increase at all.

The administration's proposal is a sham. I urge my colleagues to pass this legislation and send it to the White House and override the President's veto, if he goes through with his threat.

Fifty years ago, a depression-era Congress enacted the minimum wage as a simple understandable promise to the American people. If you work for a living, you will not have to live in poverty. In the half century since then, Presidents of both parties, Republicans and Democrats alike, have kept that promise and raised the minimum wage. I hope that President Bush will continue this long tradition of bipartisan cooperation in maintaining an adequate wage for America's lowest paid workers, and I urge the Senate to approve this essential legislation.

Mr. President, I withhold the remainder of my time.

Mr. HATCH addressed the Chair.

The PRESIDENT pro tempore. The Senator from Utah.

Mr. HATCH. Mr. President, I have listened with a great deal of interest to the remarks of my distinguished friend from Massachusetts. I see no reason to unreasonably delay the business before us. I think it is important, however, that I reiterate a few points before moving forward, so there will be no misunderstanding about the dark side of this legislation.

Despite my own reservation about any increase in the minimum wage, I supported the President's position to increase the minimum wage, because I thought it was a fair position and was a genuine effort to reach a compromise on the minimum wage issue. Congress does need to move on to more important issues, such as how to deliver skills and needed training for a dynamic work force, which should be preparing for the dynamics and the challenges of the new century about to come upon us.

Those of us who supported the administration's position did so because we were not blind to the tragedy we would bring into the lives of people who would lose jobs and job opportunities, if the minimum wage is increased across the board. The bill we passed in the Senate and the conference report we are considering today failed to balance the help we want to extend to some individuals with the harm we know will be thrust upon them—I might say, which will be thrust upon others.

My name does not appear on this conference report, because this legislative product failed miserably to strike a needed balance. Instead, the product before us illustrates the cold indifference to the dilemma of those who will be denied the opportunity to work because of the approach of the distinguished Senator from Massachusetts.

This lack of sensitivity is exemplified in the description of the differences between the administration's position and the legislation we are being asked to endorse by the proponents of this bill. The difference, we are told, is merely one thin dime in each of 3 years. That is not the difference. The difference is about a quarter of a million jobs—and I should say lost jobs—which will occur. It should surprise no one then, given both the whitewash of the minimum wage's negative impact on unskilled, inexperienced workers, and the restrictive nature of the two separate measures passed by the House and Senate, that we are today considering a training wage which is meaningless.

This conference report's training wage is meaningless. Its sole purpose is to create an illusion, an illusion that a balance between the help and the harm that has been struck, a false illusion that something has been done to save jobs. It should surprise no one, then, given the descriptions of this bill we have heard, as nothing more than three dimes of difference that the Senate receded and accepted the House provision, which would establish a minimum wage board, which suggests backdoor indexing.

The board's task is predetermined. Each year, they are to transmit to the Congress an official recommendation for a minimum wage increase. I wonder how many of my colleagues are anxious to vote every year in perpetuity on a minimum wage bill. Just a few weeks ago an article appeared in the Washington Times which describes the consequences of a failure of policymakers to be sensitive to the harm we effect upon real people, when we blindly increase the minimum wage without balancing the help with the harm.

The article was written by Dr. Paul Craig Roberts, professor of economics at Georgetown University for strategic and international studies, entitled "Doing Good With the Minimum Wage."

I ask unanimous consent that this article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Times, May 5, 1989]

"DOING GOOD" WITH THE MINIMUM WAGE

(By Paul Craig Roberts)

With Congress pressing for a higher minimum wage than President George Bush is willing to accept, it is worth recalling an encounter in the Kennedy administration with this tool for doing good.

As an economics graduate student at the University of Virginia, I had two professors from Harvard who responded to my liberal idealism by helping me land a spot in a new White House program started by the Kennedy administration. I drew a job in the Labor Department and reported for work in the summer of 1962.

By that time minimum wage laws had been on the books long enough for economists to study their effects. Most had concluded that they hurt the people they were supposed to help.

At the Labor Department I was assigned to look into this, specifically with regard to the impact of the minimum wage law on the lesser-developed economy of Puerto Rico. The law required that the minimum wage in Puerto Rico be raised as rapidly as possible to the U.S. mainland level, with the proviso that the minimum wage increases avoid a substantial increase in unemployment.

Industry boards were set up which routinely raised the minimum wage and a reported no adverse effects on employment. By the time of my investigation, entire industries had been wiped out.

It soon became apparent that the people who served on these boards were pleased with the opportunity to "do good" by raising wages. Whenever unemployment resulted, some other explanation was found to account for it.

For example, there had once been a thriving art needlework industry on the island with embroidered handkerchiefs and linens. Though there were some production shops, it was basically a household industry that provided some of the poorest people with a money income.

It was also an industry whose capital equipment was easy to remove, and as wages were forced up, the entrepreneurs began moving their machines to other locations. Puerto Ricans were saved from working for "substandard wages" by unemployment.

When I pointed this out, I was confronted with the argument that the handkerchief industry had been wiped out by technological change—the advent of Kleenex.

Curious, I checked the import statistics and found that the product was now streaming in from foreign locations not subject to the U.S. minimum wage. When I pointed this out, I was told these foreign imports were a different product.

More determined to get to the bottom of the issue than the Labor Department wanted, I found samples of the Puerto Rican product in an old report and sent them to the customs inspectors in New York, who had been classifying the product for years. A written affidavit came back that it was the same product.

By now the people who were proud of how much good they had done by raising wages were angry at me. The administrator of the Wages, Hours and Public Contracts division slammed his fist on the table and accused me of being against "bread and shoes for the workers." Dumbfounded, I replied that I had merely reported on the process that had deprived poor people of money wages.

There was an uproar, and I was told that my report would not be published. My idealism flashing, I replied that in that case I would publish an article about the episode. With that, things calmed down, and I received some half-hearted pats on the back for having done such a thorough job. After all, I had two sponsors who were in with the Kennedys.

I went to the University of California at Berkeley to study more economics. At Christmas a Labor Department economist with whom I had worked came to visit his parents. I asked if my study had been published, and he replied in the affirmative. Had it stopped the process of pricing Puerto Rican labor out of markets? I eagerly asked.

No. He explained I had made one mistake. By so thoroughly proving the case, my report was too long and opponents were able to seize on its length and demand editing. As paragraphs and tables disapproved, the message became confused.

Outraged, I threatened to protest, but my friend assured me that in his experience no one ever looked at the reports anyway, as the prospect that a person could be hurt by higher wages was not easily perceived by most people.

Years later I told this story to a governor of Puerto Rico. He thought it was a good thing that the low wage jobs had been lost. Puerto Rico had replaced them, he said, with high wage pharmaceutical jobs.

Had the needleworkers become chemists? I asked. No, he replied, they were on welfare or had moved to New York.

Mr. HATCH. I would like to share an overview of this article. Each Member of the Senate ought to read this article in its entirety. It points out there is much more to this issue than a few dimes of difference.

Dr. Roberts describes his experience as a young graduate student in economics, working at the U.S. Department of Labor during the Kennedy administration. He was given the specific task of investigating the economic impact on the lesser-developed economy of Puerto Rico following an increase in minimum wages. In his research the author discovered that a thriving art needlework industry, which had provided income for many of the poorest people on the island, simply disappeared following the minimum wage increase.

After review, he reported to his superiors at the Department of Labor that as wages moved up, entrepreneurs began moving their sewing orders to other countries where labor was less expensive. How was Dr. Roberts' report received? He was told that regardless of the statistics, he was wrong. He was told that the jobs had not disappeared because of wage increases, but rather, because the handkerchief industry had been wiped out by technological change, the advent of Kleenex.

Dr. Roberts did some further research, reviewing import statistics, and discovered that handkerchiefs of an identical nature were still being imported into the United States, except now they were coming from locations other than Puerto Rico.

When he reported this to his superiors, Dr. Roberts says that the Administrator of the Wages, Hours, and Public Contractors Divisions of the Department of Labor, and I quote, "slammed his fist on the table and accused me of being against bread and shoes for the workers."

Dr. Roberts concludes his article by stating that years later he told this story to the Governor of Puerto Rico, who responded that he thought it a good thing that the low wages jobs had been lost. Puerto Rico had, the Governor stated, replaced the low wages jobs with high wage pharmaceutical jobs. The author asks, "Did the needleworkers become chemists?" "No," the Governor replied, "they were on welfare or had moved to New York."

Well, that was more than 25 years ago, Mr. President. Still, when any Member of Congress is bold enough to point to the concrete evidence of job loss or point out the certainty of employment opportunity being denied, we are scolded for being against bread and shoes for workers. After all, we are told, there are only a few dimes difference between the President's approach and this approach. So are we supposed to stick our heads in the sand and ignore facts? Are we supposed to forget the notion that some balance ought to be forged? Are we supposed to accept phony explanations as to why entry level jobs disappear? Are we supposed to pretend that this training wage in the conference report, which we all know is meaningless, is going to stop those losses from occurring?

Well, let me just make a few points about some of the specific concerns which I have on this conference report, but let me say just one other thing: It is interesting that we have made an exception for Puerto Rico in this particular bill. As we recognize the minimum wage increases have been devastating to Puerto Rico, we make an exception for it; we make an exception for them.

Now, keep in mind, we do not do anything for all of those countless communities in this country who are in the same straits as Puerto Rico that are going to lose jobs for the very people who need them the most. This is the first time in all the years that we have debated minimum wage where I do not know of one economist who has not come out and said the minimum wage increases are a negative effect on the economy of this country. And especially the very people they claim they are trying to help.

Why Puerto Rico and not the rest of our underskilled, undereducated, undertrained economy? Why is it we are not concerned about elsewhere in the United States?

I agree with the Puerto Rico amendments to this bill. I think they are intelligent amendments, although they would be more intelligent to not increase it and allow the markets to bear the burden.

In this area to be honest with you any people with most training, any education, any experience and any skills are going to start at more than the minimum wage anyway.

It is only those who cannot get a job otherwise who will be totally denied a job the rest of their lives and they will be on welfare and each one will cost us through their lifetime about $1 million a person over a lifetime because of bills like this continued outworn, outmoded, old fashioned ideas that we cling to because one segment of the economy, one of the special interest groups wants this idea and, of course, it accords it Holy Writ consideration.

Let me make some points about some of the specific concerns I have with this conference report.

First of all, the training wage, the distinguished Senator from Massachusetts says is a concession to the President of the United States is a meaningless training wage. A training wage is a good bargain from the public policy standpoint if it is a real training wage. If it is real it is a way to save almost half of the jobs that are certain to be lost following the minimum wage increase.

I wish we were offered a real training wage, but this bill does not. Instead we are being offered a provision which is very restricted. For instance, coverage of first jobs and only first jobs will prevent use of the training wage for nearly all adult low-wage workers and for a majority of youth low-wage workers?

Who benefits from this provision?

The purpose of the training wage is to save jobs and provide entry level opportunities, but the conference report authorizes the training wage few will be eligible to utilize.

Is there a way to mitigate the count of lost jobs?

At 60 days or less, and for first hires only, an employer has no incentive to use the training wage; regulations and records requirements would be onerous as provided for by this bill and you can count on it and, for the Government, enforcement would be difficult. So, we have created a training wage which will be unavailable to unskilled workers because the burdens outweigh the benefits for employers. Is this a bargain? No.

Lastly, limiting the training wage to one-fourth of current employment for any employer requires even additional records requirements. At best, this proposal will save only 12,000 of the projected loss of 650,000 entry-level jobs at the level of the bill the distinguished Senator from Massachusetts is sponsoring. So, where is there any hope left for any job savings? This is not striking a balance; this is a smoke screen. It is like throwing a smoke bomb into this debate in hopes that no one will see the ill effects of what we are doing here.

What about back-door indexing?

BACK-DOOR INDEXING

I am also very concerned about instituting a Minimum Wage Review Board for the following reasons:

Their work product is predetermined. This Board will review economic data on wage, price, and other economic indicators and, on that basis alone, send Congress a recommendation for an increase in the minimum wage every year. Only after the Board calculated this recommendation would they consider the negative economic consequences, such as a few hundred thousand lost jobs each time. So, what is the use of a Board that looks at data which is already available through existing governmental statistical agencies and already released every year? What is the usefulness of any highly paid board when its work product is predetermined?

This Board is charged with contracting with the Bureau of Labor Statistics for the conduct of several studies which ostensibly would be used by the Board in making its economic impact assessments. Each of these studies would require a vast expansion of the BLS resources and their survey techniques. However, the conduct of each study is conditioned on the availability of funds. There are no funds available. So, what is the purpose of this provision other than to give the appearance that economic data is wanted when we know there is no money to produce it? If this type of data is really wanted, why has the Congress not paid any attention to the work which has been done by a number of economists over the years? These studies are unanimous in finding job losses and many have cast doubt on the minimum wage as an effective antipoverty tool.

In fact, many come right out and say the minimum wage is a negative effect on the economy, is not an effective antipoverty tool, and for some creates poverty.

Mr. President, I could go on, but I think it is fairly clear that this conference report presents us with legislation that will translate into the loss of hundreds of thousands of jobs and job opportunities for those who most need our help. Moreover, we are presented here with a legislative alternative which will mean that every year—each year—we will face a vote on whether the job loss will continue.

I hope that none of us, regardless of our individual views on the minimum wage, will be deceived into believing that this legislation strikes a balance. We all know, in our hearts, that this legislation falls far short.

I urge every Senator to reject this legislation and send a loud, strong message that this conference report, which would do nothing to save jobs and job opportunities, is unacceptable. I think that we should demand a better balance between help and harm than we are today being offered.

Let me also say that there are some facts that really have not been discussed very well here either. The typical minimum wage earner is young, single, works part time, and lives at home in a household not in poverty. Of a work force over 116 million, 3.9 million or 3.4 percent earn no more than $3.35 per hour in 1988. Those earning no more than the minimum wage include those who report this or a lower hourly wage but also earn tips. About 1.5 million tipped employees are in the work force. Almost 60 percent of minimum wage earners are under age 25. About one in four teenagers earn the minimum wage. More than two-thirds of minimum wage earners work part time. The vast majority of part-time employees prefer to work only part time.

Seventy-two percent of minimum wage earners are located in the South or in the Midwest. The economy has generated more than 19 million jobs since 1982, the last time the minimum wage was increased.

Minimum wage jobs have declined by 2.6 million or 40 percent since 1982. The overwhelming majority of youth who start at the minimum wage has moved to higher wage rates after the initial training period. So the key is not paying a livable wage. The key is finding a job and getting that inception job to begin with, and we are going to foreclose that for millions of young people and others who are underskilled, undertrained, and under educated because of this particular bill should it ultimately be signed into law.

There is an unanimous agreement in the published academic research literature by economists that an increase in minimum wage results in loss of job opportunities. It is unanimous. I do not know of anybody who is competent who disagrees with that statement. For each 10-percent increase in the minimum wage and here we have a 36-percent increase over 3 years, the study suggests a loss of between 100,000 and 200,000 employment opportunities. The congressional proposals contain an increase of about 39 percent, actually it is 36 percent with this particular bill which alone suggests a loss of between 400,000 and 800,000 job opportunities. It is no secret the Labor Department split the difference and came up with 650,000 jobs to be lost. The brunt of the job opportunity losses will be felt by those least able to bear them, young people and those most in need of skills and training.

Today the civilian unemployment rate is 5.3 percent. The teenage unemployment rate is somewhere around 15 percent or a little less than that. Black teenage rate is about 42 percent, that is near 50 percent during the Carter years. Some efforts have been made and some change has been obtained, though we still have a long way to go.

If you increase the minimum wage you foreclose even more the opportunities for some of these young black people to ever hold a job. The impact usually and especially hurts small businesses which are responsible for 70 percent of all new jobs. And two-thirds of all workers enter the work force by way of small businesses.

I just think those points are very important and I wanted to cover them because they are the type of thing that we do not give much consideration to.

But, in any event, I hope that our colleagues will vote this conference report down. We all know there are enough people who are devoted to these outworn ideas of the past that it is very unlikely that we will vote the conference report down today. It probably will pass. In the event it does pass and is sent to the President, then I can guarantee you that the President is going to veto this bill because he has gone better than half way to try and meet the needs of people by agreeing to a minimum wage up to $4.25 per hour over the 3-year period. That is a 27-percent increase over 3 years versus this 36-percent increase over 3 years. And he wants a real, true, training wage.

If he has those two things, then those who desire an increase in the minimum wage, as much as that may still be detrimental to our economy and to the very people they claim it helps, those people, the fact of the matter is they would get an increase in the minimum wage. This President is willing to go that far.

But if we do not do that, he is going to veto this bill and I hope my colleagues will sustain that veto because I

think it is in the best interest of America to do so.

Mr. KENNEDY. Mr. President, we are again addressing some of these same issues that we debated at the time of the Senate's consideration of our original proposal to increase the minimum wage.

If we take the figures of this administration, they estimate that the number of jobs is going to grow, during the time the minimum wage would increase, by 5.2 million jobs by 1991. That is what the administration estimates.

My friend and colleague from Utah says he believes that there is sufficient evidence to demonstrate that there will be a loss of some 250,000 jobs during the period of the increase in the minimum wage. Job opportunities increased by 360,000-jobs 2 months ago alone in the United States of America—a 360,000-job increase. Even if we accept what the Senator from Utah says—he is talking about 200,000 jobs that would not be available over the 3-year life of this increase in the minimum wage—we will still have a surplus of jobs.

Now, the Department of Labor says we will see an increase of 5.2 million jobs by 1991. They also say we will only add 4.4 million workers during that period of time. So using the administration's own figures, there is an 800,000 shortfall of workers—800,000 shortfall, a phenomenal event that will develop as a result of demography in our country.

Business Week itself said that they thought that the loss of jobs was de minimis. But even if we accept the argument of the Senator from Utah, that should not be the decisive factor.

Second, on the issue of Puerto Rico. If I heard the Senator from Utah correctly, I must say that if he would be willing to accept the mandated programs that exist in Puerto Rico, we might have a different proposal. In Puerto Rico they mandate maternal leave for expectant mothers. Instead of time and a half, they have double time. There are mandated Christmas bonuses. This Congress has always treated Puerto Rico somewhat differently because of the various mandated employee benefits that exist in Puerto Rico.

Finally, Mr. President, let us examine the administration's proposal just briefly. They would go from $3.35 to $3.65 to $3.95 and $4.25, their training wage would be 80 percent of each figure; 80 percent of each level for a training wage, or $3.35, whichever is higher.

Now, the fact is, as the Urban Institute has pointed out, 40 percent of the workers that are now covered by the minimum wage would actually drop out of any potential increase for the minimum wage under the administration's training wage. And the result of that is the following: If you take the President's program, it goes up to $3.65. What is 80 percent of that? It is below $3.35. So that worker gets no increase that particular year.

The second year, it goes to $3.95. What is 80 percent of that? It is still less than $3.35. So for 2 years there is no increase for 40 percent of the minimum wage workers in this country.

The third year, it goes to $4.25; very generous of them. What is 80 percent of that? That is $3.40. So for 40 percent of all the minimum wage workers, using the administration's proposal over the same 3-year period, their minimum wage would go up a nickel.

So, Mr. President, I think that the administration's proposal fails to provide any real opportunity for almost half of those who are working at the minimum wage today.

Finally, Mr. President, I think it is important to point out that those that are concerned about the economic implications of an increase in the minimum wage, are not out here suggesting that we should eliminate the cost-of-living increase for the 32 million senior citizens who are receiving Social Security—32 million get a cost-of-living increase—or the cost-of-living increase for the 2½ million men and women who are in the armed services.

I support that cost-of-living increase, as I do for the 32 million senior citizens. We do not hear arguments out here, "Let's take away the cost of living for the seniors because it is bad economics."

But when you talk about the 4 million heads of households that would be affected by our proposal, and the 1.2 million heads of households that are in poverty and would be helped by this bill, we hear, "Oh, the economic impact on our economy, it is going to be devastating."

Mr. President, the best economic indicators are a thorough examination of what has happened to our economy over the period of the last six times that we raised the minimum wage over the last 50 years. Back then we heard the same kinds of arguments, predictions, projections by similar voices in this body who were opposed to any increase, and those fears were just not justified.

This is a simple matter of equity, Mr. President. All we are saying is anybody who wants to work in America ought not to be condemned to a life of poverty. That is what the issue is. And I would hope that the Senate will accept this conference report.

Mr. HATCH. Mr. President, just a couple of thoughts. If I understood the distinguished Senator from Massachusetts correctly, it is the first time I have ever heard him admit that there is probably going to be a loss of at least 250,000 jobs, which he brushes away by saying there will be an increase of 300,000. Heck, we have had an increase of 20 million jobs, since the minimum wage was last increased, under the Reagan administration. I remember in those early years what a pejorative term it was to talk about Reaganomics. Nobody talks about that today. Twenty million jobs.

As a matter of fact, we made the point that there were some 7 million jobs lost that actually went out of existence that were $5 an hour or less and almost the same amount were created between $5 and $10 an hour and 18 million jobs over $10 an hour under the Reagan administration without an increase in the minimum wage.

What he does not say, though, whether he agrees that there will be a 250,000- to a 650,000-job loss if this conference report passes, is that that will be a loss of jobs to the very people that we are trying to help, who will never hold a job as a result of these types of archaic, old-fashioned increases in the minimum wage. That is what is wrong.

Look at the facts. This is the Department of Labor. In 1955, it says—well, let us go back to 1948.

Mr. KENNEDY. 1948?

Mr. HATCH. Let us go back to 1948. In 1948, black youth unemployment was roughly the same as white youth unemployment. For that year, blacks aged 16–17 had an unemployment rate which was less than whites of the same age, 9.4 percent unemployment compared to 10.2 percent whites unemployment.

In every year that the minimum wage has gone up, black youth employment has gone down and black youth unemployment has gone up to the point where it is well over 30 percent now.

The last time it was checked by—well, I will just go to 1955. In 1955, there was one black kid hired for every white kid. It was one for one.

In 1976, the last time that it was done, it was one black kid for every two white kids. And in every one of those particular years there was an increase in the minimum wage through much of that time.

There is a correlation. The very people that those who are supporting this bill claim they are championing, and they have been claiming this for years, they are actually just cutting out of the work force and putting on welfare at $1 million per person for the rest of their lives from every taxpayer in America because we are too doggone stupid to look at this thing for what it is.

And with regard to those who are working poor, there are not 4 million who are on the minimum wage, there are 336,000. Of the 4 million, approximately 4 million people on the minimum wage, 336,000, a little over 8 percent, are working poor. We should get them to a livable wage. There is no

question about that. And a lot of us would do so not by increasing the minimum wage for everybody with the ratcheting effect that triggers inflation as it happened during the Carter years, because there are a lot of other ungodly forces pushing up inflation, too, but this just triggers it. We would not do it across the board. We would have an earned income refundable tax credit that would get these working poor to a livable wage. And let us attack it directly.

The vast majority of people on the minimum wage are people who do not come from poor families. They are people at 150 percent above poverty or better. The vast majority are young people. The vast majority of them are people who literally are part-time workers or otherwise need a job. Many of them choose to work at the minimum wage.

As the labor demographics go down, people with any kind of skills or experience or education or abilities are going to be hired at more than the minimum wage. It is these people at the bottom rung who have no skills, have no education, have no training—they are the ones who are going to be cut out by this type of archaic increase in the minimum wage.

The President himself understands that and even though he does he is going to increase the minimum wage 27 percent over 3 years. I will support that even though he acknowledges that it is not in the best interest of these people. I acknowledge that. But there is still a belief out there, I think because of some of the reporting in this country, there is a belief that this somehow does people good when in fact it does a lot of harm.

We have to look at these last 6 or 8 years and see how much better the economy has been when there has been no increase in minimum wage and how much better it has been for those who really are underskilled, undertrained, and undereducated.

Let me yield such time as he needs to the distinguished Senator from Texas.

Mr. GRAMM. I would withhold, Mr. President, for the Senator from Massachusetts.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. I will just take 2 minutes. Mr. President, on the one hand, the Senator from Utah says there are only going to be a few hundred thousand that are going to be affected. The Senator cannot have he argument both ways. He cannot say there is only a few hundred thousand going to be affected and then predict these dramatic and dire economic impacts on the economy. The argument does not hold. It just does not hold.

Mr. HATCH. That is not what I said.

Mr. KENNEDY. The fact of the matter is we had an increase in the minimum wage by 60 percent between 1961 and 1969. The rate of inflation during that period was 22 percent.

Between 1981 and 1989, a zero-percent increase in the minimum wage, but the rate of inflation was 39 percent.

Let us use the basic traditional economic data when we are trying to talk about the projections and what the impact is going to be in terms of the loss of jobs.

An just finally with regard to the loss of jobs, I put in the RECORD the Business Week article that states that, regarding the loss of jobs, "Indeed, the harm from a higher minimum wage may not only be less than the conservative figure—but even less than the liberals think."

It basically points out that any potential loss of jobs would be de minimis because it correctly points out that what impacts jobs are the economic indicators, not just providing a living wage to the working poor of this country.

Mr. President, I ask unanimous consent that the article, dated October 19, 1987, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DISPELLING THE MYTHS ABOUT A HIGHER MINIMUM WAGE

(By Aaron Bernstein)

Sometimes economists are so busy predicting the future that they neglect to look at the past. This seems to be the case in the current debate over the minimum wage. Liberal and conservative economists alike have churned out predictions of how many jobs will be lost if the $3.35-an-hour minimum is raised. The liberals say very few, the conservatives say a lot. But a close look at how each side reaches its conclusions throws doubt on both their estimates. Indeed, the harm from a higher minimum may not only be less than conservatives figure—but even less than liberals think.

The problem lies in the econometric models on which the projections are based. Lobbying groups ranging from the U.S. Chamber of Commerce to the AFL-CIO buy these computerized profiles of the economy, which they then use to project what happens when variables such as the minimum wage are altered. It turns out that the models used on both sides of the current debate assume that the percentage of workers earning the minimum wage will remain the same.

In reality, the percentage has been dropping. As a result, the pool of workers likely to be affected by a higher minimum wage is smaller than most models assume—some 35% smaller (chart). The implication is a matter of arithmetic: The fewer minimum-wage jobs there are, the less impact on employment if the minimum wages rises.

To be fair, glitch in the econometric models has caught nearly everyone off guard. Even such staunch opponents of a minimum wage hike as Finis R. Welch, a labor economist at the University of California at Los Angeles, now concede that the smaller number puts the matter in a different light. Although he still is against raising the minimum, he agrees "there will be less problems if there are fewer workers at the current minimum."

That may be an understatement. Conservatives point out that if higher labor costs aren't matched by productivity gains, minimum wage workers could be priced out of a job. The Chamber of Commerce predicts that 750,000 jobs could be lost by 1990 if the minimum wage were raised in steps to $4.65, as is called for by legislation being debated in Congress. It predicts a loss of up to 1.9 million jobs by 1995.

Liberals, arguing that employers would offset the wage hike with productivity gains, show far fewer jobs being lost. F. Gerard Adams, an economist at the University of Pennsylvania, puts the loss at 100,000 by 1990. Liberals also argue that it's worth losing some jobs to keep other minimum-wage workers out of poverty.

Whatever the merits of that argument, even Adams' number may be too high. The model he used, from Wharton Econometric Forecasting Associates Inc., assumes a constant proportion of minimum-wage workers vs. all hourly workers in the economy—even though the actual share fell from 15% in 1981 to 8.8% in 1986. Thus "the model could be overcounting [anticipated] job losses," says John Hagens, the head of Wharton's macro unit. The impact could be overstated further because the number of hourly workers above $3.35 but below the proposed new minimum wage has fallen, too.

The Chamber of Commerce used a Washington University econometric model with similar flaws. "We do assume a rise in the number of minimum-wage workers," concedes Chris Varvaes, an economist at Laurence H. Meyer & Associates, which built the model. The chamber's economist, Graciela Testa-Ortiz, apparently didn't realize that. By contrast, Data Resources Inc. used a "very conservative assumption" on how many workers earn $3.35, says Roger Brinner, its chief economist. He sees 87,000 jobs lost by 1990.

Indeed, the opponents' own logic indicates that raising the minimum shouldn't be devastating. If business hires fewer minimum-wage workers when they become more expensive, then it should hire more such workers when they become cheaper. They've become an absolute bargain since 1981, as the real value of the minimum wage has fallen by 25%. Yet there are 2.7 million fewer minimum-wage workers now, while overall employment has risen by some 9 million.

Why did this happen? Many economists say the education and skill requirements of new jobs are rising. While some of these may be low-paid retailing or fast-food jobs, even they are starting to pay more than $3.35. That may be because the number of teens is falling and labor shortages are developing, making it harder to hire workers at the minimum. If these trends continue, the economy will replace more of the lowest-paying jobs with higher-paying ones. So letting the minimum rise shouldn't be so harmful.

There's another point that some economists have missed. Opponents argue that lifting the minimum wouldn't help many poor people anyway. Only 1 million of the 5.1 million minimum-wage workers live in poverty, they say—the rest live with other wage-earners. But few mention that the 5 million counts only hourly workers.

TRADE-OFF

In unpublished surveys, the Bureau of Labor Statistics estimates the number of

piece-rate or daily-rate workers who earn the minimum. They raise the number of those workers to "probably 7 or 8 million," says Welch. Some of them live in poverty. The BLS also found that in 1985, 1.1 million impoverished workers earned $3.36 to $4.35 an hour. A higher minimum would push up their pay, too.

Increasing the minimum wage would raise costs for those companies still paying it. But if the economy is shifting toward higher-wage work anyway, a hike wouldn't cost many jobs—and would help many poor people keep up with inflation. That may well be a trade-off worth making. But before the country can decide whether it is, someone will have to bring those antiquated forecasting models up to date.

Mr. HATCH. Mr. President, if there is any impact it is going to be on those who cannot get jobs. It will be on those who are underskilled, those who have no training, those who have no education or at least relatively little. That is the point we are making here.

The 336,000 people are those who are heads of household who literally are underpaid on the minimum wage and we would solve that. We would directly attack that with a refundable earned income tax credit and we would help them. That is rightly so. But let us help them directly, let us not just ratchet up the whole economy in unfavorable ways just because people are slavishly devoted to an archaic idea that literally almost everybody is criticizing today who has any economic background or experience.

That is the point we are making. There may have been a time when the minimum wage had some value, back in the Depression when they were trying to protect jobs and so forth. But that time is not now. Right now, there will be a tremendous loss and tremendous hurt to the very people that the sponsors of this bill claim they are trying to help.

Let me yield at this time to the distinguished Senator from Texas as much time as he needs.

The PRESIDING OFFICER. The Senator from Texas is recognized.

Mr. GRAMM. Mr. President, let me begin by saying if our objective is really to adopt a living wage, I do not know why we are so stingy with the working men and women of America. Who here argues that $4.55 an hour is a living wage? Surely not our distinguished colleague from Massachusetts. In fact, at $4.55 an hour, if this is the wage being paid to a head of a household of four, when that goes into effect in 1992, the Department of Labor estimates that the family will be $4,661 below the poverty line.

So, Mr. President, we are not talking about a living wage, here. What we are talking about is an action to set into law a wage below which we will not allow people to work. We will not allow jobs to be offered or accepted below that wage.

Mr. President, if minimum wage laws really worked, if, as the Senator from Massachusetts said, they really did not have any impact on employment, they just had impact on the people getting the wage, why are we not debating $10 an hour or $20 an hour or $1 million an hour? If we adopted a minimum wage of $1 million an hour, we could all be rich. Except for the quirk we all learned in the third grade when we learned multiplication and that quirk, Mr. President, was: Anything times zero is zero. And $1 million an hour times zero hours is zero and you are still poor and you are still broke.

Mr. President, it is a great paradox that, as we are here debating this issue today, all over the world, in every other deliberative body on earth, people are talking about perestroika and liberalization and market incentives; in Russian and Chinese and in Spanish people are talking about letting markets work. And yet here in the greatest deliberative body on earth we are talking about passing laws to set wages. The Russians have tried since the October revolution to run the economy by having the Government set policy. Today, everyone except the U.S. Congress has wised up to the fact that this policy does not work.

Mr. President, I am not here to debate the difference between the President's plan and Senator KENNEDY's plan. Both of them are bad plans. Both of them are political plans.

The President has proposed a compromise to try to minimize the impact but his compromise will slow growth, will put people out of work, and will make America worse off.

Mr. President, I have heard many examples of why we should not increase the minimum wage. The best one I ever heard was last year when a group of florists came to see me—people who cut flowers. And this one old florist said: You know, I always hire people at the minimum wage. I always have about four people working for me at the minimum wage. But, he said, what people do not understand is that they are never the same four people. People come to work for me, they learn how to get to work on time, they learn how to work under supervision, and then suddenly they quit to go to work for K-Mart or to go to work for the local exterminator or to go to work for a new manufacturing plant. And then I hire somebody else. And my florist's shop is like a weigh station on the way for people to get better jobs.

The old florist said, for example, that 8 years ago, a young fellow came into his shop and said he was looking for work, and he hired him. The guy was artistic. The florist taught the young man how to cut flowers. The guy was smart, and he taught him how to do his books. Two years ago, the young fellow quit, went across the street and opened his own flower shop. Now this young competitor hires 10 people at the minimum wage to work for him. The old florist said that if we had had $4.65 an hour as a minimum wage 8 years ago, he would never have hired that young guy, that guy would be on welfare, the old florist would have no competition in his neighborhood, and he would be rich.

Mr. President, we can go through these numbers until you are blue in the face with charges and countercharges, but the bottom line is this: Minimum wage laws tend to cut the bottom rung off the economic ladder. The plain truth is there should be no minimum wage law, period, in this great land of free enterprise. Minumum wage laws keep people in poverty, or using the words of our distinguished colleague from Massachusetts, they condemn people to a life of proverty, but they do this by keeping workers from ever getting that foot on the bottom rung of the economic ladder.

Mr. President, I have had an opportunity in my lifetime to work at several jobs at the minimum wage. In fact, I remember one job I had at the Tom Houston Peanut Co. in which I was hired at minimum wage. I thought it was minimum wage. It was $1.10 an hour. I remember that vividly. I did two jobs. One job was to sand these wooden candy display cases in a filling station. The other job involved the metal cases that were coming on to replace the wooden cases, therefore, my first job at that point was becoming obsolete even as I acquired skills by sanding away my fingerprints every day. The new metal cases were covered with grease, so I would sand in the morning, and then in the afternoon, I would tie this chain around these metal cases and dump them in kerosene and then wipe them off. By the end of the morning, my hands had little nicks and then when you stuck them in that kerosene, my hands would burn and I think, Mr. President, it was somewhere on one of those days that the idea hit me that maybe this book learning business was not as bad as I might have previously thought.

I am certain, Mr. President, that I acquired great skill in working at the minimum wage. One of the things I discovered was that I did not want to do it the rest of my life. Had I never had that opportunity, I am not certain that this revelation would have ever reached me, and I do not believe that it would ever reach millions. The plain truth is that most people learn to do what they do for a living by doing it.

On the job training is the only training program that has ever had any real effect. All of these jobs bills we pass around here are nothing as compared to on the job training. In fact, there has only been one legitimate antipoverty program in history, and it is called American capitalism. The

plain truth is you do not eliminate proverty by passing laws setting wages. You eliminate poverty by having an economy where there is opportunity and freedom.

So my frustration, Mr. President, is not in numbers about how you can show that between 1978 and 1981 we raised the minimum wage and the poverty rate went up, or that we did not do anything to the minimum wage between 1983 and 1988 and it went down. The world is not going to come to an end based on what we do here or what we do not do here. It is true that the plight of the people who would like to be part of mainstream America will be made more difficult if we raise the minimum wage law. The minimum wage law is antipoor, antiminority and it is unworthy of consideration by this great deliberative body.

Mr. President, what we ought to be debating is how to make America richer by letting our markets work more effectively, by promoting trade, by lowering interest rates, by promoting capital accumulation and investment, but instead we waste away our time and the time of the Nation by engaging in a political debate with the arrogance that somehow we, in this room here, can pass a law and make wages in our society in a world marketplace.

The plain truth is we cannot do that. The only way we can make wages is by making the economy stronger, and that should be the subject of our debate. I intend, Mr. President, to vote against this bill. I intend to vote to sustain the President's veto. I do not want anyone to ever think that I voted to condemn the poor people of this country to poverty; that I voted to cut off the bottom rung of the economic ladder and deny them the opportunity to get on the playing field and use their God-given talents. Not only is that approach unenlightened, I think it is unworthy of our great Nation. I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. HATCH. I reserve the remainder of my time.

Mr. KENNEDY. Mr. President, I yield 5 minutes to the Senator from Florida.

The PRESIDING OFFICER. The Senator from Florida is recognized.

Mr. GRAHAM. I thank the Chair. Mr. President, we have had a very constructive debate thus far today and in weeks past on this fundamental issue. I rise today to support the compromise plan which has been submitted through the conference committee process. I believe it is a good compromise, and I believe it is good policy for this Nation. The Congress and the administration for half a century have agreed that the minimum wage is an important part of our democratic capitalism in America. Since the 1930's, the minimum wage has been a contract for dignity of American workers.

I believe, Mr. President, there is a fundamental aspect of American capitalism that is at issue here today. The Senator from Texas has made a strong statement for what I would call pure capitalism, and that is to allow the marketplace untouched, undirected, unsoftened to be the determinant of allocation of resources.

I am a capitalist as well, and I believe in the strength of the marketplace and the wisdom of the unguided hand, but I also look at some societies which I think have allowed that unguided hand to be the only hand. Societies to the south of us in Latin America, which with a high degree of almost medieval, feudal capitalism, have seen societies that have grown with tremendous disparities; which have seen societies that did not encourage the entrepreneurial spirit; which have seen societies that emphasize class division where that young child born into the poor barrio knew, no matter what people told him, there was no chance that he or she was ever going to have a real opportunity in that society.

We have taken a different route in the United States, Mr. President. We have believed in the concepts of Jeffersonian and Hamiltonian democratic capitalism, that there is a role for society through democratic institutions in softening, in making capitalism kinder and gentler and more available to all people.

Within a few yards of where we stand is the room in which Abraham Lincoln signed the Emancipation Proclamation. That was a strong economic statement. It was a statement that Government was going to proclaim that the sale of human beings was no longer tolerable in our society. I guess you could say that was an intrusion by Government into what the economic marketplace had said was acceptable prior to our Civil War.

In this room, we have debated in the past child labor laws, laws that have protected those who were defenseless, laws which have created some sense of safety and environmental protection on the worksite. All those are intrusions into a true marketplace. I suggest those are not things which have demeaned or weakened our economic system. Those are the types of measures which have made our democratic capitalism the model of the world today and will be in the future.

It was in that same vein that, 50 years ago, this Government decided there was a minimum wage below which Americans should not be asked to work. It was in that tradition of democratic capitalism, and so what we are talking about today is not any fundamental, radical change of our economic and social history. It is in the tradition of that social and economic history. Our enlightened policy takes into account past experience and tries to shape a better future by applying that past experience.

Mr. President, I suggest that this legislation is an example of taking advantage of past experience, particularly as it relates to the inclusion of a training wage within the conference committee report and recommendations.

While the focus of the debate has been on the difference, I think what is important to also comment on is the fact that the position of the Congress, as expressed in this report, and the administration, as expressed in the statements of the President and his representatives, are actually very close. Both agree that we should increase the minimum wage. I guess even more fundamentally, both agree that we should retain the minimum wage as part of our social economic policy. The difference between the two positions comes down to 10 cents per year per hour over the next 3 years in terms of implementation so that by the year 1992 the administration's program would be $4.25 and this conference committee report is $4.55. Both sides have agreed that a training wage is an appropriate component of this legislation. I believe now is the time to put this debate behind us and for the President to recognize that this is a reasonable compromise which well-minded, patriotic men and women can agree to and let us go on to the more difficult issues that will be before Congress and this administration in the months to come.

I should like to talk particularly, Mr. President, about the training wage which was an issue of particular concern to me because in my experience I have seen many people who were given that opportunity for the first job, given that opportunity to learn and to demonstrate their aptitude.

I believe we should encourage employers to make that first opportunity even more available, and it is toward that objective that the training wage is targeted. The training wage in this conference committee report is essentially the same provision which was adopted by a significant margin in this Senate. The Senate training wage was accepted by the conference committee. Therefore, we have a 60-day training wage that provides an incentive for businesses to bring in newcomers to the job market, to take a chance on those who have not been previously employed.

This training wage compromise is good for business. It is good for the first-time worker. It is good for our capitalist system. Sixty days is a reasonable period to train new employees, to teach them the importance of punctuality, teamwork, and service to customers.

Those were the exact positive goals described by Labor Secretary Dole in her testimony to the Senate Labor Committee when she spoke about the need for a training wage.

As a supporter of the training wage, I appreciate the President's desire to create this incentive for employers to take a chance on the relatively inexperienced employee. I am concerned, however, that the President's current proposal fails to fully achieve this goal; that the training wage which he proposes, 180 days, would last far beyond the time actually required to learn both the skills of the job and the culture of the job. I am also concerned that it could be the source of abuse; that it could be the means by which employers who had interests other than advancing the training and preparation of that first-time employee could use it as an abusive means in order to keep a person permanently in a subminimum wage position.

I urge the President to look closely at the training wage in this legislation. We encourage employers to provide substantive training. We encourage employees to remain on the job by providing enhanced wages with continuity of employment. We discourage displacing workers or churning new workers in a training cycle without an end.

Congress has moved, Mr. President, toward the administration's proposal on the training wage and the minimum wage rate. I hope the President will build on this spirit of compromise so that we can reach our mutual goal of providing a just minimum wage. Our goal is to prove the maxim that work means dignity in America. Now is the time for the President to join us in saluting dignity in the workplace.

I thank the Chair.

The PRESIDING OFFICER. The time of the Senator from Florida has expired. Who yields time?

Mr. KENNEDY. Mr. President, I ask unanimous consent that the vote on the conference report occur at 4 p.m.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. KENNEDY. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HATCH. I suggest the absence of a quorum with the time divided equally.

The PRESIDING OFFICER. Without objection, the time will be divided equally. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HATCH. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. LIEBERMAN). Without objection it is so ordered.

Mr. HATCH. Mr. President, in the statement of the managers which accompanies the report, there is a provision which requires the Secretary of Labor to promulgate regulations which interpret section 13(a) of the Fair Labor Standards Act permitting skilled computer operators to qualify for an exemption. I have a question about this language which I hope the distinguished Senator from Massachusetts can clarify. It is a very important question. My question concerns the language directing the Secretary of Labor to promulgate regulations implementing this exemption for highly skilled computer professionals, specifically the earnings test, the exemption which is based on earnings not less than 6½ times the current minimum wage rate. However, language in the conference report states the following: "When the Secretary of Labor adjusts these tests," referring to the administrative, executive, and professional exemption from overtime tests under section 13(a), I assume,"this level of 6½ times the minimum wage should serve as a guide as to the appropriate levels for the salary tests."

I know that this amendment was meant to cover computer professions, but the exemptions from the Fair Labor Standards Act under section 13(a) also covers about 20 million other persons currently working in professional, executive, and administrative positions. I understand that the average annual income of individuals performing in a managerial capacity is about $28,000 a year. The Department of Labor's regulations define this category as individuals whose primary duty is management of an enterprise and who customarily and regularly direct the work of two or more full-time employees.

Here is my question for my friend from Massachusetts, the distinguished Senator from Massachusetts. Are we in this language instructing the Secretary of Labor to increase the entire 13(a) salary tests which are now set at not less than $250 per week to a level which would equal over $870 per week for a full-time manager at the current minimum wage of $3.35 an hour? In annual terms this directive would increase the threshold from $12,500 to $43,500. If that is so, or if that is what we are asking the Secretary of Labor to do, it would mean that if the minimum wage were indeed raised to $4.55 an hour as is being attempted under this bill that any manager would have to earn about $60,000 per year to qualify for an exemption as an executive, as a professional, or as an administrative employee. It would also mean that the vast majority of the approximately 20 million senior level employees currently covered by this bill would no longer be exempt. It would mean that almost every business, and indeed the Senate, given the provisions we have adopted for congressional coverage, would have to start paying people overtime.

Since the Congress of the United States is also written into this bill, it means every Member of Congress and every staff member in Congress would have to be paid overtime if their salaries are $60,000 a year or less because of this bill. If that is what we mean, I think that every Senator should be aware of this before they cast their vote on acceptance of this conference report.

If that is not what we mean, and the language seems to say that, I think we should make sure that this statement of direction is not misinterpreted by the Secretary of Labor or by the many business people who would be affected by a major expansion of the coverage of the Fair Labor Standards Act.

So I ask the distinguished Senator from Massachusetts just what it means, and can we instruct the Secretary of Labor in such a way to make it clear that we are not going to have to pay overtime for everybody who is willing to work extra hours for the benefit of taxpayers in America, and for the benefit of the countless businesses in America without overtime today? And they are willing to do so because they are managers, and they are administrators. They are professionals or they are executives. Because if it means the other, then it is going to be a further deterioration of rights and privileges throughout this country, and a loss of tremendous business expansion in this country. As a matter of fact, I think there will be a lot of businesses going out of business.

So I ask the distinguished Senator from Massachusetts, what does it mean?

Mr. KENNEDY. Mr. President, as the Senator knows, under the regulations regarding the exemptions from overtime which exist under the Fair Labor Standards Act, there are different criteria for determining exempt status. For example, administrative and professional personnel who also meet the duties test are exempt from overtime if they make more than $155 and $170 a week respectively; there are other provisions that provide that even without the duties duty test they are exempt if they make $250 a week.

This particular provision relates to an amendment I supported from the Senator from Minnesota [Mr. DURENBERGER] and it requires the Department to extend the professional definition to computer system analysts and software engineers. It sets as a minimum that they should be making 6½ times the minimum wage, and if both criteria are met, they would not be subject to the overtime provisions.

Basically, there is no requirement for other employees who are subject to the salary tests. The statement of managers does suggest, however, that when the Secretary adjusts these tests this level of 6½ times the minimum wage should serve as a guide. There is no mandate. Since it has not been changed since 1975, it is a guide, and one I hope is followed soon.

So the basic provisions provide the two additional or the additional professional careers which are the computer system analysts and the software engineers in the definition of exempt professionals, this new exception would only apply if these individuals made at least 6½ times the minimum wage but since the other salary tests have not been adjusted since 1975 that this level should serve as a guide, not a requirement, for the Department. And it is in response to the particulars in the computer industry which the Senator from Minnesota brought up with his amendment. But does not mandate that level to other occupations outside of the specific ones described in the amendment.

Mr. HATCH. It would only apply to skilled computer system analysts, software engineers, and other similarly skilled computer professionals, as I understand.

Mr. KENNEDY. That is right.

Mr. HATCH. We are not applying it to any other professionals, executives, or administrators?

Mr. KENNEDY. No. That is correct.

Mr. HATCH. I thank the Senator.

The PRESIDING OFFICER. Who yields time?

Mr. HATCH. I yield 5 minutes to the distinguished Senator from Oklahoma.

Mr. NICKLES. Mr. President, will the Senator give me 8 minutes?

Mr. HATCH. Yes.

The PRESIDING OFFICER. The Chair recognizes the Senator from Oklahoma [Mr. NICKLES] for 8 minutes.

Mr. NICKLES. Mr. President, I rise today in opposition to the conference report to increase the minimum wage from $3.35 to $4.55. That is not because this Senator is not concerned about people on the lowest end of the economic ladder. It is actually because I am concerned about the people who want to have the opportunity for a job. I do not want to pass a bill that almost every economist says is going to take away jobs, it is going to cost jobs, and it is going to put people out of work. I think we should be encouraging economic activity, encouraging job creation, not discouraging it, and by increasing the minimum wage by $1.20, you are going to price a lot of jobs out of the marketplace. There is no other way of putting it. You are going to put a lot of people out of work; Senator KENNEDY said when we debated the bill maybe 60,000 or 50,000.

We have CBO saying it will cost 200,000 jobs. Two hundred thousand jobs are going to be lost. Maybe some people will benefit because maybe their wages will increase marginally. But there are going to be hundreds of thousands of people who are going to lose jobs.

The Chamber of Commerce and others say it will cost 400,000 to 500,000 jobs per year. Why would we pass a law that is going to be putting people out of work? Why do we want to pass a law that says if you make $4.50 an hour, your job is not worth it, and you cannot have the job? Because that is exactly what this is doing. This does not raise everybody's wage. This says if the wage agreed to between employer and employee does not equal this specified level, $4.55, the job is not worth it. It is against the law for you to have this job because we have determined in Washington, DC, that, hey, if the job is not worth $4.55, it is not worth having a job, therefore, it is not economical. We would rather have you unemployed if you cannot have $4.55. Too bad, we would rather have the unemployed than to have the job at $4 an hour. Maybe it does not impact very many people here.

I happen to have a daughter that is working right now for $4 an hour. Maybe by passage of this legislation, maybe she will get a raise, and maybe she will lose the job. I would rather have her have that job at $4 an hour and learn some work ethics. I would like for her to get involved in the economic system. I would like for her to pay for the gasoline bills that she is incurring right now. I do not think we should pass the law that says it is against the law for her to work for $4 an hour. That is what we would do by passage of this bill.

I do not think we should be making it more difficult for small business to survive. Everyone in this Chamber has talked about small business. I think we all wave the flag, we want to say, oh, yes, we are supportive of the small business community. The Senator from Illinois serves on the Small Business Committee. I served with him. We all like to talk about job creation, we are helping small business. This will hurt small business.

Eighty percent of all new jobs created in the United States come from small business, and small business has been doing well, a lot of job creation; and a lot of them are in jobs that pay maybe less than $4.55 an hour. I started a janitor service when I was going through school at Oklahoma State University about 20 years ago, and we employed a lot of people, and we did not start out at $4.55. We ended up paying people more than minimum wage. But, you know, you are going to put a lot of people out of work that want to start or create a small business by passage of this bill. I do not think we should do that.

There are a lot of rural communities that, economically, are struggling right now, and they cannot afford it. I would encourage my colleagues to go to a rural community, stop by the gasoline station, and if they have somebody that is pumping gas, ask them what they pay. Maybe they pay $5 an hour. It may well be, in our area, but maybe they pay $3.50 or $4 or maybe $4.25.

Do we want to tell them that is against the law? Go by a rural grocery store that is having a hard time or maybe a little grocery store competing with the big boys, the Safeways and IGA's. They may be struggling because competition has really passed them by. But it is a mom-and-pop-type operation, and they are trying to continue on, and they may have kind of a tradition where they hire a lot of summer employees, a lot of students. I know I ran a company in Oklahoma, a manufacturing company. We employed a lot of students in the summertime, and we did it as much—if nothing else, we wanted to help them. And, sure, they helped us. Maybe they would paint or clean, or whatever, and yes, we usually paid more than minimum wage; but a lot of companies cannot afford to do that. A lot of companies that have people working for $4 an hour will not be able to pay $4.55, or maybe they are employing people right now at $3.50; they may be losing money. So they will not be able to pay the incremental mandates we are passing by this law, so we are going to put people out of work.

I stopped in Colgate, OK, at a grocery store, and they had several young people stacking groceries. I said, "How much are you paying these young men and women doing this job, stacking the groceries and taking them out to the car?" He said, "We pay most $3.60 or $3.75. They work part time after school, and they work on Saturdays." I said, "Can you afford to pay them $4.55 an hour?" He said, "No Senator, we are not making any money now." He said, "No we cannot afford that." I said, "What are you going to do?" He said, "We will just have to have people bag their own groceries."

They do it in a lot of cities, in big cities, I guess, and a lot of areas, but why should we price that job out of the marketplace?

Why should we pass a law that denies that opportunity for a young persons to really begin climbing the economic ladder? I heard my friend from Massachusetts say, "Well, we want to pay a living wage." This is not a living wage.

If we are going to solve poverty by increasing minimum wage, why not make it $10 an hour. If this is economic theory that really works, let us

make it $20 an hour and make everybody prosperous. Of course, that will not work. Of course, if you follow this kind of Government dictates, it will not work, and it will make the United States less competitive; and it will put millions of people out of work, and it would be very inflationary, and it would punish and penalize senior citizens and other people who are on fixed income. It really makes no economic sense to do that. Yet, again, we have those in Congress who say, "I do not think the present system is working. We have not increased the minimum wage in 8 years, and we have 19 million more people working today than we had 8 years ago—19 million more jobs.

Mr. President, this bill before us today makes no economic sense. This bill before us today is going to put hundreds of thousands of people out of work. This bill before us today is going to pull up—instead of allowing people to climb the economic ladder, it will pull the ladder up, and they will not get started. They will never really become self-sufficient. This bill is antifree enterprise. This bill will deny economic opportunity to hundreds of thousands of people. This bill before us today should not become law.

I urge my colleagues to vote no on the conference report.

The PRESIDING OFFICER. Who wishes to be recognized?

Mr. KENNEDY. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Chair advises the Senator from Massachusetts that he has 6 minutes 30 seconds.

Mr. KENNEDY. I yield 5 minutes to the Sentor from Ohio.

The PRESIDING OFFICER. The Senator from Ohio [Mr. METZENBAUM].

Mr. METZENBAUM. Mr. President, as a member of the conference on the minimum wage, I rise in support of the conference report.

The minimum wage is about basic human decency.

It is about how we treat the poorest working members of our society. Unfortunately, for the last 8 years, we have not treated those workers very well.

Since 1981, the purchasing power of the minimum wage has decreased by nearly 40 percent.

The cost of food has increased, the cost of clothing has gone up, medical costs have skyrocketed, and housing costs have climbed, as well.

But corporate America does not have to worry.

Last year alone, corporate profits soared 32 percent.

Since 1981, top executive compensation has increased over 300 percent.

In 1988, for the first time in the 39-year history of Business Week's salary survey, average annual compensation for top executives jumped to over $2 million per year.

The only thing that has not increased in the last 8 years is the minimum wage.

With this conference report, we have a chance to make amends; to do the right thing; to restore some level of decency to the minimum wage. It is not enough, I am frank to say.

I believe this report does not go far enough toward making the minimum wage a decent, living wage. But it represents at least an effort to move in the right direction.

Last year, the House proposed that the current $3.35 minimum wage should be increased to $5.05 per hour.

According to a Gallup poll, 76 percent of the American public supported such an increase.

This year, the Senate initially proposed increasing the minimum wage to $4.65 per hour over 3 years.

But the conference report represents a compromise: the wage will increase to only $4.55 over 3 years.

The conference report also includes, for the first time in the 50-year history of the minimum wage, a 60-day subminimum training wage for inexperienced workers.

I do not support a subminimum wage. I do not believe it belongs in this bill, but we have accepted it as an effort to compromise. Despite these concessions, President Bush has stated he will veto this bill. He has drawn a line in the sand—an increase to $4.25 per hour with a permanent 6-month subminimum wage. No negotiations, no compromise, no discussion.

Frankly, I have a lot of respect for President Bush. I believe he is a compassionate and decent human being, but I believe there has been engineered a political confrontation over a difference of 30 cents per hour. Apparently, some of his advisers believe that this take-it-or-leave-it approach will show the American people that the President is tough. Let us concede it, the President is tough. Now, let us take care of those workers at the poverty level and give them $4.55 an hour.

I think the President has received bad advice. President Bush, vetoing this minimum wage bill, will not show toughness. It will only show a lack of compassion. It will be a cruel blow for millions of Americans trying to eke out an existence for themselves and their families.

We reached an agreement on a trillion-dollar budget and we are fighting over 30 cents an hour.

The other day we passed a bill for $239 billion as a bailout of the savings and loan industry and we are denying workers $4.55 an hour.

The President is advocating a repeal of capital gains tax to provide the wealthiest Americans an additional $30,000 a year as compared to 30 cents an hour for working people.

I do not understand the President's position. I do not think the American people will understand it.

The President was right in his inauguration speech when he said the people did not send us here to bicker. They certainly did not send us here to bicker about the difference between $4.25 an hour and $4.55 an hour, not when a majority of Americans support a much greater increase.

Mr. President, and to the President of the United States, I say end this confrontation. Sign the bill, Mr. President. It will not be a sign of weakness. It will be a sign of compassion for those who are most in need in this country who are trying to work for a living rather than to be on the welfare rolls. Do not let them down.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. Mr. President, I yield my remaining time plus 1 minute of the leader's time to the Senator from Pennsylvania.

The PRESIDING OFFICER. The Chair recognizes the Senator from Pennsylvania, Mr. SPECTER.

Mr. SPECTER. Mr. President, I thank the Chair and I thank the distinguished Senator from Massachusetts.

Mr. President, it is my hope that we will yet have a compromise on this minimum wage issue. The parties are very close together. There is a difference of some 30 cents an hour. There is a difference of some 4 months as to how long the training wage ought to be in effect and considering that we are dealing with mathematics, and fairly close mathematics, this is the kind of issue which I submit ought to be resolved and ought to be accommodated.

It is my view that the time has come for a change in the minimum wage law. Then-Vice President Bush campaigned on that proposition. I supported him and spoke actively in my State on a variety of issues, including the commitment of my candidate to a change in the minimum wage, and no one can say with precision just what the exact figure ought to be. However, when you talk about the kinds of numbers we have here it is my sense that the matter ought to be accommodated and ought to be compromised.

It is my further sense, Mr. President, that the figure of $4.55 is not too high to put in effect by October 1, 1991. Considering the fact that the last legislation was enacted in 1977, with staged increases through 1981, there has been a considerable period of time which has passed and a considerable increase in the cost of living index. It is my judgment that if we must make a choice as to one figure or another that the $4.55 is the more reasonable figure between the two.

Earlier this year, Mr. President, we had a very contentious issue as to the pay raise for congressional Members and it was calculated at some 51 percent. That was unseemly and most of us, including this Senator, voted against it.

In the context of what has occurred and I would like to speak longer, but there is limitation on time, it is my sense that absent such a compromise which I am hopeful will be achieved, that the conference report ought to be enacted.

I thank the Chair and yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. COCHRAN. Will the distinguished Senator yield to me 30 seconds?

Mr. HATCH. I am delighted to yield 30 seconds.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. COCHRAN. Mr. President, let me point out one thing that is in this conference report which was not in it when it was agreed to by the Senate. There is an exemption here on the training wage that relates to agricultural workers.

I do not think this has been discussed by those who debated the conference report on the floor.

Let me just read you this:

Excepted from the training wage provision are those individuals who are employed in agriculture of a seasonal or other temporary nature and are not required to be absent overnight from a permanent place of residence when employed on a farm or ranch performing field work, or when employed in canning, packing, ginning, seed conditioning or related research, or processing operations, and transported, or caused to be transported, to or from the place of employment by means of a day-haul operation.

Mr. President, that means those working in cotton gins, processing farm-raised fish, in all kinds of agricultural activities are going to be disallowed as eligible workers for a training wage. This discriminates against agriculture, Mr. President, and is another reason to vote against the conference report.

Mr. HATCH. Does the Senator need any more time?

Mr. COCHRAN. I think I made my point.

Mr. HATCH. I think the Senator did.

The PRESIDING OFFICER. Who yields time?

Mr. HATCH. Mr. President, I see the minority leader is coming.

How much time is remaining on both sides?

The PRESIDING OFFICER. The Senator has approximately 10 minutes remaining. The majority leader controls the remaining 26 minutes. The time allocated to the Senator from Massachusetts has expired.

Mr. HATCH. I yield the remainder of my time, the 10 minutes, to the distinguished minority leader.

The PRESIDING OFFICER. The Chair recognizes the distinguished Senate Republican leader.

Mr. DOLE. Mr. President, there is no mystery in the conference agreement. It raises the minimum wage to $4.55 an hour over the next 2½ years. It provides for a 2-month training wage—but just for those people entering the work force for the very first time. And it establishes a Minimum Wage Review Board whose only purpose—it seems—is to institutionalize minimum wage increases in the future.

I voted against this proposal last month. And I will vote against it today. It is that simple.

STAND BY THE PRESIDENT

I want to be clear on one additional point, though: I supported—and I continue to support—a minimum wage increase. I continue to stand by the President. And I commend him for fulfilling a campaign promise by going forward with his own minimum wage proposal.

This proposal was a serious one. It was meant to be a serious compromise. At the outset, the President decided that he was not going to play games with Congress—that he was going to send to Congress—right off the bat—what he believed to be a fair and responsible minimum wage proposal.

This proposal reflected the President's commitment to a substantial minimum wage increase—a 27-percent increase to $4.25 an hour. It also reflected a sense of responsibility about the need to preserve jobs—and job opportunities—for the young and the least skilled. That is the whole point of the President's 6-month training wage for new hires.

Unfortunately, the conference agreement misses the point. It misses the point that an increase in the minimum wage to $4.55 an hour will lead to the loss of many jobs; 600,000 jobs, by some accounts.

These are not my figures. They are the figures of the Department of Labor, the President's Council on Economic Advisers, and a wide range of professional—and reputable—economists.

THE TRAINING WAGE

The conference agreement also fails to realize the importance of the President's 6-month training wage. According to the Department of Labor, a 6-month training wage—not a 4-month or a 2-month, but a 6-month training wage—will save almost 200,000 jobs that otherwise would be eliminated. On the other hand, the Department of Labor estimates that a training wage of less than 6-months will have little offset effect.

So—you can see—that the training wage contained in the conference agreement will not do much to preserve jobs or job opportunity. In fact, it will impose additional burdens on employers with its formal training requirements.

KANSAS EMPLOYMENT

Last month, I stood on this floor and outlined some of the effects of this legislation on employment in my own State of Kansas. I think these remarks are worth repeating here.

If this conference agreement ever becomes law, the chamber of commerce has estimated that Kansas would lose more than 8,000 jobs by 1990 and more than 20,000 jobs by 1995.

I also know who is going to lose these jobs: teenagers and other young people. I have talked to many Kansas employers—mostly small businessmen and businesswomen—who have told me that a large minimum wage increase without a real training wage will force their hand—will force them to lay off workers to offset the increase in labor costs.

Now Kansas has one of the better teenage unemployment rates in the country. According to the most recent statistics, teenage unemployment stood at 10.7 percent. That is below the national average. But a teenage unemployment rate of 10.7 percent is not good enough. And it's going to get worse—not better—if this conference agreement ever becomes law.

MINIMUM WAGE INCREASE WAS IN OUR GRASP

I cannot help but remind myself of a simple fact: A minimum wage increase was in our grasp.

If my colleagues who support this conference agreement really wanted a minimum wage increase, they could have—they should have—supported the President's proposal. A minimum wage increase to $4.25 an hour—a 27-percent increase from $3.35 an hour—would be law today. The ink from the President's pen would be drying this very minute.

Instead, we will be sending a bill to the President's desk that the President himself says he will veto. We all know that. And I can assure you that the President is a man of his word.

CONCLUSION

I can also assure you that there are enough votes in the Senate to support a Presidential veto. Some of you—I know—can recall me waiving a letter on this floor—a letter signed by 35 Senators who have pledged to back up the President. This pledge remains solid.

After a veto, I just hope that we will not have to repeat this exercise again and again. And I hope that those Senators who support this conference agreement will soon come to see the merits of the President's proposal.

Let's be frank with ourselves. We have not accomplished much this session. But we could accomplish something—something really worthwhile—

if we would just put aside our differences and work with the President on a responsible minimum wage increase.

Mr. President, I am sorry I have not been here for the full debate on the conference report. This is a very important issue. I know we have very sharp differences. There is not any mystery about the conference report. It did not take long, frankly, for the conference between the House and the Senate to complete its work.

The conference report raises the minimum wage to $4.55 an hour over the next 2½ years and provides for a 2-month training wage just for those entering the work force for the very first time. It also establishes a Minimum Wage Review Board whose only purpose, it seems, is to institutionalize minimum wage increases in the future.

Now, we have had a vote in this Chamber before. I have said that as a Republican I am not going to stand here and say you can live on $3.25 an hour or $4.55 an hour. But I think we have to have the profile of the average minimum wage worker in mind. The great majority of minimum wage workers are single, they are not heads of households, they are under 25 years of age. A minimum wage increase is not just going to apply to those who we may refer to from time to time around here as the working poor.

I have heard on talk shows and heard on the floor, "Well, President Bush won't give 30 cents an hour to the working poor but he is going to give $30,000 to the rich." That does not make any sense at all.

Are my colleagues on the other side of the aisle going to throw away 90 cents an hour, throw it away, to win a political point? Are they going to deny the working men and women in this country a 90-cent-an-hour increase in the minimum wage over 3 years—that is the Bush proposal—because the President did not offer the other 30 cents? The President has gone three-fourths of the way, but that is not enough.

I believe the President acted in good faith when he made the offer. He said in his campaign he would support an increase in the minimum wage and he has acted on that promise. In fact, some of my colleagues think that the President might have gone too far.

So here we are today no further along than we were before. The President will veto the conference report. The veto will be sustained, and so the working people are going to be denied any increase because some in Congress insist on making a political point.

I continue to support, and supported in the past, an increase in the minimum wage, as does my colleague, the Republican manager of this bill Senator HATCH.

Maybe the President could have done it a different way. Maybe he should have come in with a very low increase in the minimum wage. That way, we could have ended up with a $4.25 an hour increase and everybody could have claimed the victory. But, in this instance, the President felt he ought to be candid, he ought to be upfront and he ought to keep his promise. So he sent his offer, his only offer, his final offer to Congress and it was shot down on pretty much a party-line vote.

The President has kept his commitment, a 27-percent increase to $4.25 an hour. The President's minimum wage proposal also reflected a sense of responsibility about the need to preserve jobs and job opportunities for the young and the least skilled. That is the whole point of the President's 6-month training wage for new hires.

But the conference report, as I said, misses the point. I recite in my statement what this will do for employment in my own home State. It has been estimated we could lose about 8,000 jobs and maybe more than 20,000 jobs over the next few years.

The young people are the ones who will lose their jobs as a result of this bill, the very people we ought to get off the streets, the people who are employed by small businessmen and small businesswomen.

And, again, some might say, "Well, you can't live on the minimum wage." There are some employers, I might say, in small business, who have difficulty making a living, too. When the Federal Government mandates increases, they have one choice: Lay someone off or lower wages for the others. Some small employers simply cannot pass on their costs.

So I would just say finally that the conference report will pass. It will be vetoed. I am certain the Senator from Utah has pointed out that we met with the President earlier today. One thing he made very clear to about 20 of us—again, not in a hostile way, but just keeping his word—is that he will veto the conference report. The veto will be sustained, probably in the House. It may never come to the Senate.

And then what happens? Are we going to go through this exercise again? And every time we go through it, we take another month, 2 months, 3 months, and deny those who should be receiving an increase the increase so that somebody can say, "Well, we had the issue. We didn't get the minimum wage for you, but we got the political issue. We were able to go on talk shows and say, 'Oh, well, the President wouldn't give you 30 cents an hour.'"

These people never say that the President was going to give you a 90-cents-an-hour increase over 3 years.

So I hope the President vetoes this conference report very quickly. If I were President Bush, if it goes to him this afternoon, he ought to veto it this afternoon. He should not wait 1 more day. He ought to put it right back on the Congress to raise the minimum wage to help some of the people who ought to be helped. He should not keep it there any longer than he has to. I hope he is working on his veto message now to send it right back to Congress.

I would be prepared, and I know the Senator from Utah would be prepared, to introduce the President's bill tomorrow, pass it on a voice vote, and send it over to the House. Maybe we could do it by tomorrow evening. I am certain the President would sign it as quickly as we pass it.

So the issue is pretty well spelled out. There are experts on this floor who have debated about the number of jobs that would be lost with a minimum wage increase. There have been some 60 different surveys and studies. Everyone says you are going to lose jobs, some as low as 200,000 or 300,000, some as high as 800,000 jobs.

So I just hope, in the spirit of cooperation, that once we dispose of the conference report, once the veto is sustained, that we will be able to come to grips with this issue and dispose of it, as we should have in the first place.

I thank the Chair.

Mr. MITCHELL. "It was the best of times, it was the worst of times, * * * it was the spring of hope, it was the winter of despair."

So wrote Charles Dickens about England and France in the "Age of Revolution." His words also describe the two nations of Americans which have emerged in this decade.

One is a nation of Americans whose numbers are not growing but whose wealth is.

The other is a nation whose numbers are increasing but whose wealth is not.

One nation looks with confidence to the future. The President and Members of Congress are among those fortunate Americans. We can provide for our children. We do not fear the costs of a medical emergency. We have the education and the skills that assure us a well-paid job and personal security.

The other nation, to which the President and we are too often strangers, is a nation of people living at the margin.

For them, life is a struggle from paycheck to paycheck. An illness, an accident, even a minor auto repair is to these Americans a disaster. They cannot provide for their children's future education because they must struggle just to provide for their children's current meals.

These Americans want to look with hope to the future. But they are so consumed by day to day survival that they cannot see the future.

Dickens wrote the "Tale of Two Cities" about a time of violent revolution in France.

We are also experiencing a revolution, not violent, but a revolution nonetheless.

We are living through the steady erosion of one of the fundamentals of the American dream—the promise of a better tomorrow.

Today, for too many Americans, that promise has been broken. For them, tomorrow will not be better; it will be a wearying, nerve-wracking repetition of yesterday.

For 200 years, America has been a land of opportunity, where effort is rewarded, where hard work pays off, where you know your children can live a better life than you.

We believe that in a free country, free men and women should be able to rise by their own efforts, at least to the point of earning a decent living.

In 1933, Franklin Roosevelt said that:

> No business which depends for its existence on paying less than living wages to its workers has any right to continue in this country. By living wages I mean more than a bare subsistence level—I mean the wages of decent living.

It is a matter of equity, of fairness, that those who work should earn enough money to live decently.

No nation can long survive free where that is not the case. Without equity, without fairness to those who work, free institutions cannot survive.

But in our Nation in recent years, a quiet revolution has occurred that is reducing equity, undermining fairness. That revolution is not yet clearly enough seen to distress most of us.

But by the time it is clear, it will do more than distress us. It will threaten the very basis of our society.

We already have the greatest polarization of our society by income and wealth that we have ever had.

The share of national income received and national wealth owned by those at the top of the income scale is the greatest it has been since we could measure such things.

The share of the national income received and wealth owned by those at the bottom of the scale is the smallest it has ever been.

The average adjusted family income for the one-fifth of Americans at the bottom of the economic ladder was 11 percent lower in 1987 than in 1973. Those who have little are getting less.

By contrast, the average adjusted family income of the one-fifth of Americans at the top was 24 percent higher in 1987 than in 1973. Those who have much are getting more.

Census data confirm these observations. The poorest fifth of American households receive just 4.4 percent of all after-tax income in the country.

The wealthiest fifth of American households receive nearly 10 times as much, 42.6 percent of the after-tax income in the country.

This is a polarization of personal income that endangers the consensus on which our Nation rests. The interests of those who enjoy over 40 percent of the income earned have little in common with the interests of those who subsist on less than 5 percent of the national income.

What commonality can there be between the person whose main preoccupation is tax sheltered savings and the person who has no savings of any kind? What common ideals can motivate the parent whose child must choose between Ivy League colleges and the parent who must choose whether his child can visit a dentist or a doctor?

This is not merely a polarization of income; it is a polarization of the sense of community in our country.

When a conservative weekly magazine like Business Week can editorialize, as it did in its May 1 issue, that "Executive compensation has mushroomed to a level that is difficult to justify," income disparities are reaching proportions that are both embarassing and potentially disruptive.

Business Week reported that while in 1960, a chief executive officer earned 41 times as much as a production worker, today he earns 93 times as much.

In 1960, the earnings gap was such that a CEO earned 38 times a school teacher's salary. Today, it is 72 times as much.

And in terms of today's debate, which is over a modest increase in the minimum wage for the lowest paid of all American workers, in 1960, a CEO's earnings were 91 times the income of a minimum wage worker. In 1988, the average CEO made 291 times as much.

And the ominous fact is that economic analysis predicts that, without change, the polarization of income will increase in the years ahead. The Congressional Budget Office has estimated that by 1990, average family income for the poorest tenth of Americans will be 11 percent less than it was in 1977.

In contrast, CBO has estimated that by 1990, the income of the wealthiest tenth of Americans will be about 23 percent higher. The income of the wealthiest 1 percent will be 45 percent higher.

Ironically and mistakenly, President Bush is now opposing the minimum wage increase because it is 30 cents more an hour 3 years down the road than he wants, but he is at the same time pushing for a capital gains tax cut that will intensify the polarization of wealth that is already occuring.

His proposal would provide, on average, $30,000-a-year tax cut for the very wealthiest 1 percent of Americans—those whose income is $250,000 a year or more. To oppose 30 cents an hour in 3 years' time for our poorest workers and to propose $30,000 next year for our richest people is outrageous. It is a perversion of equity.

These figures and statistics are overwhelming, even numbing. And they mask a brutal reality. Statistics are abstractions which help us measure change. But they also hide from us the human dimensions of what is being measured.

So I ask my colleagues to consider the real people represented by these statistics.

Shirley Slagle, of Kitanning, a small town in Pennsylvania, is a 39-year-old mother with one child. Along with her husband, she works in the kitchen of a small local restaurant. Shirley has worked there for 11 years, between 37 and 40 hours each week. Her husband has worked there for 9 years.

When she began working there, she received $2.65 an hour, the Federal minimum wage. When her husband began there, 2 years later, he started at $2.95, to which the Federal minimum wage had by then risen.

Their son, Derrick, has bronchial asthma. He requires medication and a special diet. Their doctor knows they cannot afford his full fee, so he charges $18 per visit rather than $35. The Slagles are fortunate to have an understanding doctor.

When Shirley Slagle testified before the Committee on Human Resources in 1987, she told the members about an emergency room hospital bill of $524 that she was paying off at $25 a month.

To save the extra money, she testified that "* * * I cut back one of his [Derrick's] medications from four to three times a day. That gives us a little bit more money.* * *"

What a choice! What a decision for any parent to have to make.

Every Senator who today votes against increasing the minimum wage by 30 cents more an hour ought to consider his reaction if Derrick were his son.

In this family Derrick was not taken to the neurologist, although he should have been, because as his mother said, "* * * we just could not afford two specialists, so he does not see the neurologist any longer."

Shirley herself has not had her eyes examined in 3 years, because "There is just no enough money for that. All three of us need to see the dentist and there is nothing leftover for that, either." Her husband was diagnosed with a serious gum disorder but has not been afford to afford treatment.

Mrs. Slagle once had a job in a factory that paid $8 per hour. She has skills. Her husband served in the Armed Forces of our country for 9 years. he has skills. There are simply no well-paid jobs where the Slagles live. So they work at the minimum wage because they have no alternative.

Ironically, Shirley Slagle recently received a pay raise. She was speaking with a staff member of the Committee on Human Resources and mentioned that she now receives $3.75 an hour instead of $3.35. Why the pay raise? Because the State of Pennsylvania raised its minimum wage.

We hear a lot of talk about how hard we work in the Senate. We pride ourselves on our hard work and long hours.

I wonder how many Senators would have the sheer determination, the real work ethic that has made the Slagles go on working without hope of an increase based on merit, or effort, or even seniority?

They have worked hard at their jobs—she for 11 years, he for 9—and they have never gotten a raise, except when the Federal or State minimum wage went up.

Every Senator who today votes against increasing the minimum wage by 30 cents an hour ought to consider his reaction to working 11 years without a raise.

Shirley Slagle is not unique. She and her husband are 2 of the estimated 7 million adult Americans whose full-time work does not earn them enough to keep their families out of poverty. We talk about work ethic but what about social ethics? What kind of social ethic is it when full time work does not even earn you a decent living?

Another woman who testified at that 1987 hearing was Rena Blankenship, of New Castle, VA.

In 1981, Mrs. Blankenship supported her four children on a minimum wage job with child support help from her husband. She was even purchasing her own home, for $233 a month. When her oldest son was diagnosed with a brain tumor, she was forced to quit work.

Her husband's child support stopped. After 10 grueling months of surgery and hospitalization, her son died. By then her home had been repossessed.

After her son's death, she returned to work, earning $3.65 a hour as a delicatessen clerk at the local Safeway. She testified she "* * * could not make it. I realized you pay a bill this month and next month you skip it. It is hard to explain to your kids when they need a new pair of tennis shoes—you've worked for 40 hours and you do not have the money to pay for those tennis shoes."

Rena Blankenship could not make it. She acknowledged that "* * * it is really kind of degrading to sit here and say I am on welfare, but I do not have a choice. I cannot support three children on $98 a week."

Those two women testified before the Congress. But they stand for an army of men and women whose voices will never be heard here, women like a constitutent of mine from Biddeford, who is the sole support of a family of four. Her husband was unlucky enough to suffer a nonwork-related accident—so he is recuperating without compensation.

She works as a waitress from 35 to 40 hours each week, earning the Maine minimum wage of $3.75 an hour. The total household income for this family for the month of May will be $534.

From this, they must find $480 for rent; $95 for utilities; $16 for a telephone; $33 for medication for the husband—that is already $624, $90 more than their total family income, and there's no food included in this budget so far. The family, which includes two children, does not have a car.

Another constituent of mine works as a waitress in Caribou. She earns a little more than the minimum wage. Her gross monthly income is $736, working full time. But at $250 for rent, $150 for electricity, water, trash, and sewer charges, and $250 for daycare for two pre-school children, she has less than $100 a month for food, let alone anything else.

She lives in substandard housing, heated with an unsafe woodburning stove, because it costs too much to use electricity for heat.

She has no medical coverage, of course, and she does not have a car. Large bills at the local pharmacy forced her to ask for assistance—she has no credit left.

These are the people behind the statistics, statistics about income, wealth, work, and the minimum wage. These are lives being sapped of energy, of pleasure, of dignity.

We have before us a minimum wage compromise that does not even restore to workers at this level the rate of equity that the minimum wage represented 10 years ago.

We know that this modest increase is not the full answer. It will do nothing about the crippling health care costs people face, nor will it upgrade substandard housing. It will not overcome the polarization of wealth and income which divides our Nation.

Other and additional steps are needed. The earned income tax credit is sound and broadly supported. But even its proponents know that budget realities make it impossible to adopt that approach now. So instead, we have chosen this small step of upgrading the minimum wage by a modest amount.

Yet we face a veto threat because we have decided, by large majorities in both Senate and House, that these people should be paid 30 cents an hour more in 3 years' time than the President wants them paid.

Today's minimum wage represents the lowest percentage of average hourly earnings since 1949: It represents 36 percent of the average hourly wage.

Even with the increases provided in this bill, the minimum wage by 1991 will still equal only 46 percent of average hourly earnings.

This is a modest bill. It is modest in scope and in effect, and yet it faces a veto threat.

For the differences of 10 cents an hour each year—that is $4 a week; two gallons of milk; a little over three gallons of gasoline—for that, President Bush says he will veto this bill.

The measure represents a compromise. In place of the $4.65 hourly wage that the committees reported, the Senate and House adopted a 3-year increase to $4.55. At the President's insistence a submininum wage, a 60-day training wage has been accepted—a precedent many of us believe to be gravely mistaken.

Yet despite the compromise, a veto is threatened.

By the time it is phased in, the conference report wage would restore 86 percent of the lost purchasing power of the minimum wage. The President's proposal would restore 81 percent.

It is ridiculous to suggest that this tiny difference constitutes a major difference on national goals and priorities. It does not.

So it is obvious that the reason for this threatened veto has little to do with the bill before us.

What is being tested here is political will. Such tests are not uncommon between a President and a Congress. They recur each time a new President takes office.

But when such tests of will occur, it is important that we consider whose interests are being sacrificed for the sake of this test.

When the disagreement centers on the interests of a large or well-represented sector or our Nation's economy or population, those affected know that their interests are at stake. They make themselves heard.

In this case, by contrast, those whose livelihoods are most at stake—the lowest-paid workers in America—are not a majority. They do not employ highly paid lobbyists.

For 8 years the mere threat of President Reagan's veto was enough to keep their concerns off the floor of the Congress. These poor workers had no political clout, so they went unheard, their concerns unheeded.

Sadly, that still seems to be the case. It is their interests that are being threatened by this veto. Nobody in the White House, nobody in the Senate will be affected by no increase in the minimum wage. No one here, no one there will feel the difference between $4 a week or less.

It is unconscionable and unfair to hold the weakest and most vulnerable workers in our society hostage in this way. There should be another, better way for this test of political will to be

conducted than at the expense of the poor.

I sincerely hope that President Bush reconsiders his choice of the minimum wage bill as the place to take a stand. For 8 years poor American workers have been denied any increase in their wages. In that time, inflation has eroded the value of their wages by 40 percent. Now they are about to be held hostage to the President's perceived political needs.

Surely there must be a better way.

The President and most, if not all, Members of Congress have never known hunger, never known need. Neither he, nor we, have ever lacked shelter. Neither he, nor we, have ever had to choose between sending our child to a doctor or a dentist.

Our good fortune and our present offices impose upon each of us a serious obligation. The President's good fortune and his present office impose upon him the same obligation.

And that is to try, to really try to understand and help meet the needs and fears of those Americans who do not share our good fortune, needs, and fears neither the President, nor we, can possibly have known, the needs and fears of people struggling to cope with the demands of day-to-day survival.

The President has not tried. He has not tried at all. If he had, he would not, he could not, veto this bill.

If the President wants to show how tough he is by vetoing a bill, let him veto a bill that does not hurt Shirley Slagle and Rena Blankenship and their children and the millions like them all across this country. They deserve better than that. America deserves better than that. In the name of decency and fairness, we should pass this bill and the President should sign it.

Mr. President, I yield the floor.

Mr. DURENBERGER. Mr. President, I rise today in support of the conference report on H.R. 2, legislation to amend the Fair Labor Standards Act of 1938 to restore the miminum wage to a fair and equitable rate. This conference agreement provides an increase in the Federal minimum wage from its current rate of $3.35 per hour to $4.55 per hour by October 1, 1991; an increase in the small business exemption; and the enactment of a realistic training wage.

As I have stated previously, I believe it is time for Congress to make a substantial increase in the minimum wage. For the last 8 years, we have experienced record economic growth in this country, and yet we have failed to change the current $3.35 per hour minimum wage to reflect that growth and the increased costs that have occurred during that time. Opponents of H.R. 2 cite the possibility that raising the minimum wage over the next 3 years could cause a loss of jobs and job opportunities. Perhaps if Congress had been doing its job over the last 8 years and had made some adjustments in the minimum wage, the effects of this legislation would not be nearly as severe as opponents claim. And, I am not convinced that this legislation will have such adverse effects.

When Congress first enacted a wage floor in 1938, it did so in order to ensure that working, productive Americans receive a wage that is sufficient to sustain them. Unfortunately, the current $3.35 minimum wage does not accomplish the goal of raising working Americans out of poverty, nor does the $4.55 level contained in this bill. However, H.R. 2 will restore some of the value of the minimum wage that has eroded over the last 8 years and will move us in the direction of ensuring a more livable wage.

In addition to the wage increases included in H.R. 2, this report also contains a simplification and increase in the small business exemption. Currently, small businesses with annual gross sales of less than $362,500 per year are exempt from the minimum wage requirements of the Fair Labor Standards Act. However, just as the minimum wage has eroded over the last 8 years, so has the value of the small business exemption. I am pleased that the conference agreement raises the small business enterprise test to exempt firms with annual gross sales of less than $500,000 per year, and provides a much-needed simplification of the small business exemption by eliminating several of the separate enterprise tests. It should now be much less confusing for small employers to determine whether or not they are subject to the minimum wage and overtime provisions of the Fair Labor Standards Act. And, I am hopeful that the small enterprise exemption will also provide relief to those firms, particularly in rural areas, that may be most affected by the increase in the Federal minimum wage.

The third main component of the conference report is the training wage. And it is this new initiative that causes me some concern. The training wage provision allows employers to pay a wage of 85 percent of the minimum for up to 2 months to those employees working in their first job. These 2 months of employment are deemed to be a training period, during which time the employee receives on-the-job training.

Mr. President, as I have stated before I have opposed a subminimum wage, and I disagree with those who believe in the necessity of the so-called training wage. However, unlike other training wage proposals we have debated recently, this one only applies to new entrants into the work force. It seems clear to me that there is an inherent training element and learning process that the new entrant acquires in his or her first job. In that sense I believe an employer should be allowed to pay a modest wage differential to a new entrant who must learn certain basic rules and disciplines about operating in the professional workplace.

For the above reasons, I am willing to support this 2-month first-hire training wage. However, I do so with the knowledge that it is temporary and that the Secretary of Labor will report to Congress on the effectiveness of the training wage after the wage has expired.

In addition to my reservations over the training wage portion of H.R. 2, I am concerned with the overall impact of the bill on rural areas and areas of high unemployment in this country. I see the debate over whether to raise the minimum wage as a regional issue rather than a partisan issue. It is the rural area that generally experiences a higher rate of unemployment, has a lower cost of living and has lower average income levels than does the metropolitan area. Unfortunately, comprehensive data on the minimum wage in rural areas does not exist. Therefore, I am pleased that the conferees adopted a modified form of my amendment requiring a study on the impact of increasing the Federal minimum wage on rural areas and areas of high unemployment. This study will be conducted by the Bureau of Labor Statistics and will provide us with relevant data which will be critical to future minimum wage debates.

I am also pleased that the conference committee agreed to adopt my amendment directing the Secretary of Labor to revise the definition of professional employee as it relates to computer programmers, systems analysts, and software engineers. Under section 13(a)(1) of the Fair Labor Standards Act, professional employees are currently exempt from the minimum wage and overtime requirements of the act. Professionals are defined as employees whose work is predominantly intellectual and varied in character. However, employees in the computer field are not considered professionals, because a 1973 ruling by the Secretary of Labor determined that the variation in standards and academic requirements in the computer sciences were too great. It is clearly evident that the computer science field has advanced dramatically over the last 16 years; therefore, I am glad that my colleagues agree it is time for the Secretary to review the definition of professional employee as it relates to highly skilled computer programmers, systems analysis, and software engineers.

Mr. President, the Senate is acting today to raise the Federal minimum wage from the current $3.35 per hour to $4.55 per hour by 1991. Because the $3.35 wage level has remained un-

changed since 1981, this legislation is vital for the restoration of some sense of equity to those Americans on the lowest rung of the wage ladder. It is not a perfect bill, but I support the conference report on H.R. 2 as the best option available to this Senator today. As I prepare to cast my vote in favor of the conference agreement, I remain disappointed knowing that it will be vetoed and that the long overdue increase in the minimum wage will be delayed once again. I only hope that Congress and the administration will be able to reach agreement on an acceptable increase in the Federal minimum wage and training wage soon.

Mr. JEFFORDS. Mr. President, I rise in support of the conference report now before us.

I do so with some reservations. I do not think that the training wage contained in the bill would prove workable. I do not think we have taken as comprehensive an approach to the real problems of the working poor as we need to take. We are fooling ourselves if we think that an increase in the minimum wage will have much of an impact on poverty in this country.

But my greatest concern is that this legislation will not become law, and that the subsequent debate on this issue will degenerate into empty political posturing.

I hope I am wrong. I support an increase in the minimum wage. Alternative approaches, such as changes in the earned income tax credit, will not reach the single- or two-person households. Those people, at least, need the support provided by a wage floor, and they need our support.

I hope, instead, that the President will work with Congress to reach an agreement on these issues that will mitigate the impact of an increase in the wage rate on the economy and provide for a meaningful training wage.

I hope that the President will exhibit some flexibility on the issue of the training wage. As one who has been interested in training issues for some time, I am not certain that it takes an unrestricted period of 6 months in which to impart minimum wage skills. What are we buying with this wage differential after the first month or two on a job? It seems to me that we are not buying much of any value.

I want to conclude by pointing out that there are some positive aspects to this legislation that I hope we will pursue regardless of the fate of this conference report. Thanks to the help of the distinguished Senator from Kentucky [Mr. FORD], and the distinguished Senator from Alaska [Mr. STEVENS], this body has gone on record, as has the other body, in support of applying the Fair Labor Standards Act to Congress. We have also moved to recognize the realities of the work force by providing an additional incentive to employers who are willing to engage in providing basic skills to their employees.

Mr. President, on balance I think this is a good bill, if not a perfect one. I hope, that in the weeks to come, we will be able to produce an even better one. For the meantime, I urge its support.

Mr. DOMENICI. Mr. President, I support increasing the Federal minimum wage and was pleased to vote for an increase in the minimum earlier this year. An increase in the minimum wage will give a needed boost to many of our poorest paid workers, and will take an important step toward helping move low-paid workers out of poverty.

Yet, I believe increasing the minimum wage should be done so with some caution, and recognition of a broader picture of how we can help the working poor.

We should never lose sight of our Nation's best program for helping the working poor—a strong, vibrant, and growing economy that is producing job opportunities. Strong job growth gives low-skilled, low-paid workers what they need the most—the opportunity to improve their work skills and work experience and improve their earnings.

In my State of New Mexico, workers have been benefiting from this job growth even though times are still tough. Our unemployment rate has dropped from 10.2 to 7.3 percent since January 1987. Over 50,000 more people are now employed from a work force of nearly 700,000.

I believe President Bush outlined an excellent proposal for raising the minimum wage, and I voted for that measure. It was crafted carefully to balance the need to raise the minimum wage, with the need to keep open many job opportunities for low-skilled workers.

Central to the President's proposal is his call for establishing a separate training wage at 80 percent of the full minimum for new hires during their first 6 months on a job.

I believe it is important to include such a training wage as the minimum is increased. It gives workers who are most vulnerable to job loss associated with increasing the minimum wage—low-skilled workers, starting in a new job—the opportunity to gain some work experience and skills, while assuring them the protection of the full minimum wage after they have gained that experience.

Last year I introduced an amendment to grant a similar training wage to participants in the Summer Youth Employment Program. This program is operated under the Job Training Partnership Act and in New Mexico last year helped 16,000 disadvantaged youths get jobs for the summer.

Mayors and Governors only have so much money to spend on these programs. Granting these program managers the flexibility to pay a training wage would give them the ability to give many more youths the very valuable experience of a first job.

In my State, Mr. President, we have roughly 50,000 to 100,000 New Mexicans at or near the minimum wage. Many of these workers are young people, getting experience at their first job. A good number of them are employed in our tourist industry, and by the many small businesses that are the backbone of New Mexico's economy.

An increase in the minimum will help many of these workers, but we should keep in mind the impact this will have on employers' ability to offer jobs to our young and unskilled workers.

The potential impact on jobs concerns me most when we consider the proposal before us today together with some of the other burdens we have placed, and are considering placing, upon employers.

During tax reform we passed the so-called section 89 rules designed to make sure all employees have access to fringe benefits. Many employers are having such a problem with the rules they are dropping benefits, and we are considering repealing that measure.

Proposals are also on the agenda to mandate employee health benefits and parental leave benefits. The cumulative effect of all these mandates would be very detrimental to job growth in New Mexico and across the Nation.

We must consider this legislation in the context of all mandates we are considering imposing on employers.

Mr. President, I am pleased we are acting to increase the minimum wage, but I fear the training wage provisions in this measure are not sufficient to make sure we keep job opportunities for the working poor growing. Therefore, I cannot support this bill, and I hope the Senate will soon move to adopt the President's proposal.

Mr. ADAMS. Mr. President, I support the conference report to accompany the Fair Labor Standards Amendments of 1989. This is a badly needed and long overdue bill. For 8 long years, wage earners at the lowest level of our wage scale have been without an increase. During that period, the purchasing power of the minimum wage has decreased by almost 40 percent.

Department of Labor data indicates there are more than 14 million hourly wage earners in this society who earn less than $4.65 per hour. Sixty-three percent are women. A disproportionate share of these workers are black and Hispanic. And contrary to popular belief, the majority of these workers are not teenagers. In fact only 27 percent of those earning less than $4.65 are teenagers.

We have had ample time to discuss, debate, and amend this legislation. The conference committee has adopted a reasonable training wage insisted upon by the White House. The time has come for this body to vote on a matter of simple economic justice. After 8 years of inaction, we are now presented with a compromise bill which tells wage earners they are valued. That value should not be continually eroded by the forces of inflation and legislative inaction.

We are all aware of the threat of a veto by President Bush. I hope, for the sake of 14 million working men and women that it is a bluff. If it is not, I hope the President will reconsider. I am confident that in sending this legislation to the President we have fulfilled our obligation to those working men and women. Whether the President is prepared to make good on his promise for a kinder, gentler nation remains to be seen, and this long overdue increase in the minimum wage provides him an early opportunity to show his actions are consistent with last autumn's rhetoric.

Mr. BIDEN. Mr. President, opportunity has always been the engine of our society. When Americans are greeted by a horizon filled with possibility they respond to every challenge with energy and enthusiasm. Americans who rise to meet the daily challenges of their workplace deserve the guarantee of a fair day's pay at a decent livable wage. This guarantee provides an opportunity and an incentive for self-improvement. We all benefit when incomes are sufficient to allow workers to apply their own wages toward improving their own well-being.

Since 1981, when the minimum wage was last increased, consumer prices have risen by more than 40 percent. The proposed increase we are passing today, H.R. 2, will not even fully recover the value of wages eroded by inflation since 1981. This is no windfall for workers, but rather a truly minimum fair wage.

Predictions of job loss from an increase in the minimum wage have always been highly exaggerated. Dire predictions have preceded every increase in the minimum wage and they have been consistently wrong. In this instance the administration's job loss statistics are also considerably overstated. They fail to account for the fact that 12 States, including California, have already raised their minimum wage. In addition, they do not take account of the shrinking labor market, which makes extensive job loss highly unlikely.

In order to provide an incentive for minimum wage earners and to offset even marginal job losses, H.R. 2 includes a training wage, which will allow employers to pay a lower wage for up to 60 days. The bill also includes several exemptions for small businesses. Employment statistics have shown that 60 days is more than enough time for the provision of meaningful training to workers.

If the American dream means anything, it is that, when a man or woman goes out and takes a job and works at it day in and day out, that person should bring home a decent wage. Too many Americans today work without the guarantee of a truly decent and fair day's wage. A failure to provide a minimum wage increase will perpetuate this injustice.

Mr. CHAFEE. Mr. President, a little more than 1 month ago in this Chamber I voted for final passage of the minimum wage bill because I believed then as I do now that an increase is long overdue. Today, I will vote for the minimum wage conference report to raise the minimum wage to $4.55 an hour, but I will do so with misgivings.

First, the training wage provision contained in the conference report troubles me. It would apply only to first-time workers and would last only 60 days. I don't believe this training period is long enough. The purpose of the training wage is to improve the skills of workers so as to give them a better chance in life. The President's 6-month training wage proposal, on the other hand, which would apply universally to all new employees whether or not this is their first job, is more meaningful.

Second, the creation of the five-member Minimum Wage Review Board is unnecessary. To my mind, it is inappropriate to create a commission that will cost American taxpayers at least $500,000 a year, given our horrendous budget deficits. In addition, it seems to me inconsistent to pay members of this board an $86,000 annual salary when they will be recommending wage increases for Americans who will make $4.55 an hour. This is a costly and unfair provision.

Notwithstanding these concerns, I will vote for the conference report because America's working poor have waited too long for an increase. But having said that, I want to be clear about the fact that I will also support the President if he vetoes this bill as expected.

The President firmly believes that that a wage increase of this size, without a meaningful training wage, will decrease job opportunities and hurt those very Americans it purports to help. I had hoped the President and Congress would be able to reach agreement on the level of the increase, and am disappointed that it may take a veto to bring about an increase acceptable to all.

If the President's veto is sustained, I am confident that we will still have an opportunity to reach agreement on this issue and help America's working poor.

Mr. LAUTENBERG. Mr. President, I want to express my support for the Fair Labor Standards Amendments of 1989.

Mr. President, the debate over the minimum wage strikes at the very heart of our national consicence. We are asked when and how much the minimum wage should increase, and what kind of training wage there should be. But the fundamental issue is whether our Nation chooses to protect the least fortunate among us by restoring a meaningful wage floor.

The facts are clear for all to see. The current minimum wage is embarrassingly low. Established over 8 years ago, the $3.35 rate has lost more than 40 percent of its purchasing power. In reality, today's minimum is simply insufficent to support a family of three above the poverty level.

The Department of Labor's own calculations reveal that minimum wage jobs rarely require more than 30 days training. The high turnover of these entry level jobs is further evidence that very few days are required to bring new minimum wage employees up to speed. A training wage more extensive than that in the conference report is simply unsupported by the realities of the labor market.

Given this information, on what basis is the bill opposed? Why oppose a significant increase to the minimum wage, and favor a training wage that would lock-in the current minimum for many workers for years to come?

Opponents do not state that the Federal Government has no business mandating a minimum wage that protects workers from exploitation. But defeat of the bill undermines such protection.

Instead, they base their opposition on concern for the very men and women for who the benefits of the minimum wage are intended. In spite of record jobs creation over the past several years, looming labor shortages, and overwhelming historical evidence to the contrary, they contend that a meaningful increase in the minimum wage is unwise because it will result in lost entry level jobs.

Mr. President, this is an argument that at best is misguided. Might not such concern for the Nation's low-wage workers be better served through support for improved public education for our inner-cities, increased spending for job training, improved health care for the needy, more public housing for the homeless—and a minimum wage that reflects today's cost of living?

Mr. President, I urge my colleagues to support this bill and restore the Nation's minimum wage.

The PRESIDING OFFICER. Who yields time?

Mr. MITCHELL. Mr. President, I yield back the remainder of the time,

and I ask unanimous consent that the vote commence now.

The PRESIDING OFFICER. Without objection, it is so ordered.

Under the previous order, the hour of 4 p.m. having arrived, the question is on agreeing to the conference report on H.R. 2.

The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislation clerk called the roll.

The PRESIDING OFFICER (Ms. MIKULSKI). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 63, nays 37, as follows:

[Rollcall Vote No. 68 Leg.]

YEAS—63

Adams	Exon	Matsunaga
Baucus	Ford	Metzenbaum
Bentsen	Fowler	Mikulski
Biden	Glenn	Mitchell
Bingaman	Gore	Moynihan
Bradley	Graham	Nunn
Breaux	Harkin	Packwood
Bryan	Hatfield	Pell
Bumpers	Heflin	Pressler
Burdick	Heinz	Pryor
Byrd	Inouye	Reid
Chafee	Jeffords	Riegle
Cohen	Johnston	Robb
Conrad	Kennedy	Rockefeller
Cranston	Kerrey	Sanford
D'Amato	Kerry	Sarbanes
Daschle	Kohl	Sasser
DeConcini	Lautenberg	Shelby
Dixon	Leahy	Simon
Dodd	Levin	Specter
Durenberger	Lieberman	Wirth

NAYS—37

Armstrong	Grassley	Murkowski
Bond	Hatch	Nickles
Boren	Helms	Roth
Boschwitz	Hollings	Rudman
Burns	Humphrey	Simpson
Coats	Kassebaum	Stevens
Cochran	Kasten	Symms
Danforth	Lott	Thurmond
Dole	Lugar	Wallop
Domenici	Mack	Warner
Garn	McCain	Wilson
Gorton	McClure	
Gramm	McConnell	

So the conference report was agreed to.

Mr. KENNEDY. Madam President, I move to reconsider the vote by which the conference report was agreed to.

Mr. MITCHELL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MITCHELL addressed the Chair.

The PRESIDING OFFICER. The majority leader is recognized.

If the majority leader will withhold, the Senate is not in order.

The distinguished majority leader.

MORNING BUSINESS

Mr. MITCHELL. Madam President, I ask unanimous consent the Senate now enter into a period for the conduct of morning business until 5 p.m., with Senators permitted to speak therein for up to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FORD addressed the Chair.

The PRESIDING OFFICER. The Senator from Kentucky is recognized.

Mr. FORD. Madam President, I thank the Chair. I will only take a few minutes.

(The remarks of Mr. FORD pertaining to the introduction of legislation are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. HEINZ addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania.

HOW TO AVOID TURNING INDUSTRIAL RETREAT INTO SURRENDER

Mr. HEINZ. Madam President, a quite interesting column by Jodie Allen appeared in the Washington Post on May 10, entitled "Regaining America's Dulled Industrial Edge: The Answer Is Right Here at Home." The essence of the discussion can be found in the first sentence of that article:

> If U.S. companies are really worried about this country's retreat in international markets, there is one obvious thing they can do about it: Commit themselves to reducing their dependence on foreign suppliers.

To the extent this is a recommendation for kind of a voluntary Buy America Program, coupled, of course, with a sustained effort by American industry to maintain competitiveness in terms of both quality and price, then I am all for it. More interesting, however, is the column's discussion of why this has become a problem.

Essentially, what we are seeing in the United States is a continuing pattern of industrial retreat. Foreign producers target an industry and through aggressive—and sometimes illegal—pricing practices force down the return on investment for U.S. producers and build up foreign producers' market share. The result is that American firms retreat from that sector, and foreign producers move on to a new one.

In some cases these foreign victories have come about after blatantly illegal dumping and the continued failure of our Government to address it. I refer to the television industry, which has been decimated not through a lack of competitiveness but through unfair trade practices. Other foreign targeting has occurred in critical sectors like machine tools, bearings, and semiconductors, and we are seeing similar efforts in aircraft via Airbus, and, I predict we will increasingly see them in computers. Indeed, the same day this column appeared, the Post also had an article pointing out that for the first time Japanese total electronics production nearly matched that of the United States. In computers, foreign market share rose from 35 to 45 percent last year.

In each of these cases we are seeing a new phenomenon in Washington—the blurring of the distinction between American interests and foreign interests. The new lobbyist on the block, as it were, is the domestic user of foreign parts—foreign chips, foreign bearings, foreign machine tools, and so on. He has an interest in continuing our industrial retreat because he has already surrendered—he depends on foreign sources for his parts.

Fighting back, as we have done with the semiconductor agreement, the machine tool VRA's, and the bearing dumping determinations, to mention three examples, is expensive for those who use foreign parts because it increases their prices. As a result they often oppose these efforts, even if they are mandated by law as in a dumping finding, in the interest of the easier path of continued retreat.

This is part of the classic conflict in our country between short-term and long-term considerations. Our industrial analysts and economists are frequently critical of American business' emphasis on short-term returns and lack of long-term planning. Domestic users of foreign components display exactly this same shortsightedness. They are more concerned with next quarter's prices on their parts than they are with the long-term preservation of viable, technologically competitive industries.

The tragedy of this conflict, as Allen's column points out, is that the cost of our action is high precisely because we have delayed so long in taking it. If we had acted decisively on semiconductors, machine tools, televisions, and bearings when the problems began instead of when it is almost too late, we could have achieved our objectives with minimal disruption. Instead our Government chose to wait until we were in crisis, expecting the market system to solve the problem. In fact, the market will only solve the problem if all parties are using the same set of rules. If the Japanese, for example, and they are involved in most of these cases, do not practice American market principles in their own economy, it should come as no surprise that they do not immediately adhere to those rules here.

The result is what Akio Morita of Sony Corp. has called the "hollowing out" of American industry. Allen's column is correct that part of the solution to that must come from American industry itself—and I agree with that. But there is also a lesson for Government here. We are facing a new generation of these problems in the high value added growth industries of the future: Supercomputers, telecommunication, aerospace, and HDTV—high-

definition television to name only a few.

If we wait for some celestial macroeconomic mechanism to solve these problems, we will find ourselves with no industries at all. Tackling these problems early allows us to solve them with minimal cost and disruption. If we wait, as we always seem to do, the solutions are much more expensive and controversial, but we will have to take them anyway. I hope that when the next such situation rolls around—whether it is computers or something else—that perhaps the many cases that have gone before have indeed taught us a lesson. What I am talking about is not industrial policy. It is simple survival, and it is a lesson we had better learn.

Madam President, I ask unanimous consent that the column and article I referred to be printed in full in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, May 10, 1989]

REGAINING AMERICA'S DULLED INDUSTRIAL EDGE: THE ANSWER IS RIGHT HERE AT HOME

(By Jodie T. Allen)

If U.S. companies are really worried about this country's retreat in international markets, there is one obvious thing they can do about it: Commit themselves to reducing their dependence on foreign suppliers.

Of course, this is far more easily said than done. But saying it—beginning discussion among U.S. corporate executives about the possibility of such a commitment—may be the first step toward a needed correction in this country's industrial structure.

American firms have not turned to foreign suppliers for lack of patriotism. They did it because European and Asian producers offered better quality, faster delivery, lower prices and, increasingly, more advanced technology. This openness to foreign sources has, additionally, put competitive pressure on domestic producers, restrained inflation and introduced new flexibility into the American economy—all of which, in turn, seems to have reduced our vulnerability to recession.

But pursuit of these benefits from foreign sourcing seems to have reached—indeed passed—the point of diminishing returns. What started as a more or less orderly retreat from low-valued-added, low-tech production has now turned into a total rout at the outer reaches of high technology. Curiously, it is a Japanese corporate leader, Sony's Akio Morita, who has been most outspoken in concern that America is becoming overly dependent on foreign sources for key technology.

Morita, who has long warned about the "hollowing out" of American industry—its creeping acceptance of the role of final assembler and marketer to American consumers—recently raised the subject in a meeting at the Japanese consulate in New York with American Express CEO James D. Robinson, Blackstone Group Chairman Peter G. Peterson, international consultant Henry Kissinger and Washington Post Co. Chairman Katharine Graham.

While the U.S. trade imbalance is still heavily weighted by automobiles and consumer goods, Morita pointed out that the fastest-growing imports are sophisticated machine tools and components—the building blocks of industrial strength. This pattern threatens not only further losses of high-productivity jobs, but also the impetus for innovation that flourishes best around the actual production process.

American firms, notes a new report from the MIT Commission on Industrial Productivity, have left themselves vulnerable to easy defeat over a broad front. The sequence of losses, write the authors of "Made in America: Regaining the Productive Edge," have "followed a stylized pattern."

American firms—with their eye on their stock prices and the value of executive options—set high goals for short-term return on investment. Foreign firms take advantage of that focus to "select a market segment and by aggressive pricing force down the return on investment while building market share. Within a short period the American firms retreat from the market segment. The foreign firms then move on to set aggressive prices in some other segment and the Americans once again retreat."

Already this dependence on foreign suppliers is well-established—witness the divided loyalties that brought many U.S. firms to the defense of Japanese suppliers when the U.S. government belatedly tried to retaliate against the dumping of Japanese semiconductors and to punish Toshiba for selling vital technology to the Soviets.

And independence will not be easy to reestablish. As the MIT study suggests, Japan and, to a lesser degree, the other super-surplus countries of Europe and Asia, are well-positioned to block such attempts, thanks to the enormous capital resources that their captive home markets and penetration of the rich U.S. market have earned them.

Still, the greatest block may well be the mindset that U.S. corporate leaders have absorbed from their purchasing agents and middle management. Driven to buy the cheapest components world markets can offer, firms have walked away from enormous investments in U.S. plants and equipment for relatively small unit savings. In his new book, "The Silent War," for example, Ira Magaziner describes how General Electric sent its own engineers to help South Korea's Samsung develop world-class quality in its fledging microwave industry, with the result that GE soon after abandoned its own expensively modernized microwave plant in Maryland in favor of Korean sourcing.

Still, as Magaziner also describes, that course isn't the only one that U.S. companies can take—and, in a few cases, have taken—with notable success. Corning Glass, for example, devoted almost two decades of mammoth investment to establishing its leadership in fiber optics. And in the case of refrigerator compressors, GE chose to stand and fight, investing heavily to develop new technology and retrain Tennessee workers to maintain its competitive edge.

While small unit price differentials can easily be magnified by the standard percentage markups applied at each stage of production and marketing, that's not an unalterable pattern. Companies in both manufacturing and services can, and frequently do, shift savings from outside sources to beef up resources in another area, such as advertising, when such shifts seem a better long-term strategy than cutting prices.

Perhaps it's time to shift resources in the other direction—to buy time to modernize high-cost domestic production just as Japanese manufacturers did after the long overdue rise in the yen squeezed their profits. After all, short-term savings from foreign sources may be tempting, but they can readily disappear if foreign producers decide to demand the higher profits to which their monopoly position entitles them.

What's needed is a genuine commitment to redeveloping home-grown capacity—not just the pious mouthings of determination to restore U.S. competitiveness (followed by a litany of grievances against U.S. tax and fiscal policies) that have become standard fare at industry gatherings. And that commitment might well start with U.S. producers sitting down with their suppliers to develop agreements guaranteeing producers a stable, high-quality supply of components within an acceptable price range in return for the guarantee to suppliers of a stable long-term market for their wares.

Yes, U.S. industry has some legitimate complaints—primarily with the bizarre fiscal policies of the Reagan administration, which pushed interest rates and the U.S. dollar so high that competitive U.S. producers were driven out of well-established markets. And U.S. policymakers have been far too cavalier in ignoring the far more active role that foreign governments play in assisting their industry through protected home markets, assured financing and compliant regulation.

But government policy did not cost U.S. firms their preeminence in world markets and it will not suffice to restore it. That job has to start in corporate boardrooms.

JAPAN CUTS UNITED STATES LEAD IN ELECTRONICS

(By Steve Wilstein)

ALAMEDA, CA, May 9.—Japan approached another milestone in its rise to economic supremacy last year, nearly matching the United States in total electronics production, according to a research firm that forecast a bumpy road ahead for America's biggest industry.

Japan produced $250 billion worth of electronic goods—everything from computer chips to copiers and facsimile machines—while the United States barely stayed ahead with $262.8 billion, Dataquest Inc. said today in its annual industry analysis and forecast.

"This year we have seen some incredible things take place," said Manny A. Fernandez, president of San Jose-based Dataquest, who called Japan's surge toward the top in overall electronics production more significant that its recent dominance of the semiconductor industry.

Apple Computer Inc. passed International Business Machines Corp. in unit sales of personal computers in the United States in 1988, Fernandez said. But the big news in that arena, he said, was the penetration into the U.S. market of South Korean and Taiwanese computer makers.

On a day when Apple announced new software and IBM unveiled a cheaper personal computer and a portable one, Dataquest said both companies lost U.S. market share in 1988 to foreign vendors, whose sales grew from 35 percent to 45 percent of the U.S. total.

The personal computer market, which grew 27 percent worldwide to $51.7 billion and 22 percent in the United States to $28.7 billion, will continue to grow impressively in 1989, Dataquest said. Growth in the U.S. market will be 25 percent in 1989, and 12.6 percent compounded annually through 1993, the company said.

Laptop computers will be the fastest growing part of that market, said Fernandez.

American companies will have to change their marketing strategies, however, to recover lost market share, said Fernandez.

"The era when it was the technology strength of one giant company against another, those days are pretty much over," Fernandez said. "It has become a marketing game. It has become a game of pricing, a game of software supply, service and distribution channels."

The PRESIDING OFFICER. The distinguished Republican leader is recognized.

AMENDMENTS TO THE THRIFT BAILOUT BILL

Mr. DOLE. Madam President, I know that doing "favors" for friends in the thrift industry is a tradition here on Capitol Hill, but I thought we would have learned our lesson by now. Unfortunately, I was dead wrong. The President's S&L reform package—passed by the Senate last month and now being considered by the House—has become so littered with special interest amendments that it would make the local junkyard look like a well-kept lawn.

THE AMENDMENTS

Both the Senate and the House have to share the blame for littering the President's bill. Last month, Members of the Senate were running over each other to offer their own set of special interest amendments. Now, the House Banking Committee has gotten into the act.

The House Banking Committee—for example—has adopted an amendment that would exempt Sears, Roebuck & Co.—and only Sears—from the affiliated transaction provision in the President's package. This exemption may mean millions of extra dollars for Sears and millions of lost dollars for its competitors. So-called affiliated transactions were also responsible for some of the worst abuses in the thrift industry over the past decade.

Still another amendment would allow a savings and loan in Beverly Hills to maintain its junk bond business. And a bank in San Antonio can now breathe a sigh of relief: The House Banking Committee adopted an amendment specifically designed to shield some of the bank's assets from the FDIC.

SPECIAL INTEREST LEGISLATION

Some Members may think that special interest amendments are just part of the game. But I think it is about time that Congress changed some of the game's rules. It's about time that Members of Congress start blushing when they push special interest legislation, particularly on a matter as important as the President's thrift reform package. And it's about time that Congress starts doing favors for the taxpayers, who are going to have to foot a large portion of the bailout bill.

THE COSTS OF DELAY

We have all heard the numbers before. The costs of delay are enormous. Some experts have estimated that each month of delay will cost the taxpayers $500 million. That means about $10 to $20 million each day.

And let us face it. Congress has not done much this session. Here in the Senate we spent a good amount of time on our pay raise, on the Tower nomination, on the minimum wage.

These are important issues. But there are few issues of greater importance today than solving the financial crisis in the thrift industry. So I urge my colleagues in the House to address this crisis by moving swiftly on the President's reform package.

CONCLUSION

I would like to make one final point here. We must remember that special interest legislation was a big reason for the thrift industry's financial woes in the first place. Congress must learn from this experience. Congress—and the taxpayers—cannot afford to repeat the mistakes of the past. And Congress must act responsibly—and swiftly—as it continues its consideration of the President's thrift reform package.

Madam President, I ask unanimous consent that an editorial from today's Wall Street Journal about these special interest problems be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CONGRESSIONAL CRACK

It may be the most horrifying sight in Washington, D.C.

A gang is huddled together conspiring to steal from honest citizens to finance its costly addictions. The damage this activity does to the economy could easily run into the hundreds of billions of dollars. Someone better call Bill Bennett, the drug czar, and get him to send a posse of U.S. marshals after the city's worst addicts—who are holed up in the Rayburn House Office Building.

We're talking, of course, about the Members of Congress now working on the savings-and-loan bailout bill. What they are doing is simply incredible. Faced with the task of trying to clean up this extraordinary mess, many of the Congressmen are instead cutting deals with pushing expensive special breaks for favored constituents. You'd think just once they could resist this crummy behavior. But no, doing deals seems to have become a form of Congressional crack.

Henry Gonzalez (D., Texas) used his post as chairman of the House Banking Committee to benefit the biggest bank in his hometown. He got an amendment to protect Frost National Bank of San Antonio and other insured banks it owns from the Federal Deposit Insurance Corp. in case some of its other thrifts become insolvent. Others added similar provisions to benefit subsidiaries of Chemical Bank of New York and First Interstate Bank of Houston.

Carroll Hubbard Jr. (D., Kentucky) made the day for mortgage bankers by getting an amendment extending federal insurance to the risky escrow accounts of mortgages sold by thrifts. At the request of the mobile home industry, Bill Nelson (D., Florida) joined Rep. Hubbard to require federal regulators to make allowances for bad loans for "low and moderate income housing"—defined to include mobile homes. Peter Hoagland (D., Nebraska) has an amendment that would exempt four specific limited partnerships (including Merrill Lynch and PaineWebber) from liability if thrifts they take over flop. Claude Pepper (D., Florida) got help for affiliates of Citizens Federal Savings of Miami.

Other Congressmen got exemptions from new accounting standards for credit unions, new advantages for insurance companies competing with banks for pension fund deposits and big breaks for insurers who were foolish enough to write liability policies for thrifts.

It's real chutzpah for Members to use the excuse of the S&L crisis to put new burdens on the deposit insurance system. After all, there is a good case to be made that Congress created the problem in the first place. Deposit Insurance is another way of saying Government-Subsidized Risk Taking by Bankers. This can work only when regulators are free to do their jobs. Congress literally broke the banks when—led by Speaker Jim Wright—it encouraged local thrifts to make lousy loans with its defeat of tougher legislation and its intimidation of regulators who warned that things were getting out of hand.

It's not too late for the Bush Adminstration to make the point that banking is too important to let it fall into the clutches of politicians. As we've urged, the thrifts should be fully privatized, with a new system of private deposit insurance. Indeed, the best argument yet for privatization is this spectacle of Congress treating the bailout as mainly a chance to do more deals at public expense.

TROUBLE DOWN ON THE FARM: FEDERAL CROP INSURANCE HORROR STORIES

Mr. DOLE. Madam President, an article on the front page of the Wall Street Journal Monday calls attention to some very serious and disturbing problems with the Federal Government's crop insurance program for America's farmers.

In a time of limited Government resources and a massive Federal debt, it is painful to read how hundreds of millions of the taxpayers' dollars have been lost due to fraud, mismanagement, miscalculation, and unbelievable carelessness at the Federal Crop Insurance Corporation.

As one FCIC manager admitted in the Wall Street Journal report, "We got taken to the cleaners."

The Federal crop insurance is not sold by the Government. Private companies actually sell it, but the Government reinsures these companies against most of the risk and reimburses them for 34 percent of their administrative expenses. Is it any wonder that the program has been labeled a fiasco by the Wall Street Journal.

It is doubly sad because it distorts the very real problems drought, hail, frost, and other natural hardships can bring to America's crops and their producers. Wheat farmers in Kansas this year, for example, are facing one of the bleakest crops in history after a winter- and spring-long drought. These hardworking men and women will need help, including some kind of Federal relief.

For instance, we hear of one farmer who collected a huge check for freeze damage, a month after his crop was harvested; of producers who collected insurance for crops raised on irrigated fields, even when irrigated crops do not qualify for insurance coverage; of miscalculation of crop insurance programs that has resulted in windfalls for scores of farmers; and of other horror stories that cry out for a major program overhaul.

No doubt about it, the costs of a drought—as we saw last year—can be staggering; and there is no cheap way to help cover the cost of natural disasters. We understand that fact.

Yet, in the face of these legitimate needs, the taxpayers of America can't be blamed for turning sour—and angry—at the costly shennanigans of some dishonest producers and bungling bureaucrats; and the taxpayers wouldn't be wrong if they demanded a Federal investigation.

Mr. President, the FCIC is reportedly trying to fix some of these problems. It now has a Compliance Division to help with loss adjustment oversight. The Crop Insurance Commission—established by Congress last fall to review FCIC troubles—has made a preliminary report that already includes 26 recommendations. Its final report is due July 1, and I will be eager to read it.

Unfortunately, the taxpayers have shoveled out $2 billion during the past 8 years to cover the FCIC tab. Of course, Congress is part of the problem, too. It can't say no—to anyone, including uninsured farmers.

So, it is a lethal combination for the taxpayers: too much Congress, too much spending, and too much incompetence at the FCIC.

Let us do all we can to make certain this nightmare doesn't happen again.

Madam President, I ask unanimous consent that the entire Wall Street Journal article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FARM FIASCO: CROP-INSURANCE FRAUD AND BUNGLING COST U.S. TAXPAYERS BILLIONS

(By Bruce Ingersoll)

Buying federal crop insurance really paid off for a Florida tomato grower not long ago. After a big freeze blew in, he collected more than $300,000 in frost damages. But federal auditors found just one problem: They say the grower had harvested most of his crop at least 39 days before the freeze hit.

The taxpayers were the ones who actually got left out in the cold.

Such chicanery, along with a lot of other problems, are dogging the Federal Crop Insurance Corp., a little-known Agriculture Department agency that has quietly managed to lose hundreds of millions of dollars a year. The FCIC is coming off its worst year in half a century of insuring farmers against natural disasters. Fraud, underwriting blunders and errors in paying claims are sapping the program and have been exacerbated by the 1988 drought and the huge number of claims that ensued.

To say nothing of bureaucratic bungling. A single FCIC underwriting error in 1981—still only partly corrected—has helped produce about $600 million in claims so far. The agency made the mistake of calculating crop yields for soybeans based on its experience in the Midwest. The formula, later used to insure soybean growers nationwide, worked fine in places like Iowa. But in the South, where farmland isn't as fertile and yields are normally lower, it was a bust—at least as far as the FCIC was concerned.

OFF TO THE CLEANERS

"We were under pressure to expand the program," says John Marshall, the FCIC manager. "It turns out we were overinsuring. We . . . really got taken to the cleaners."

The General Accounting Office has discovered other, expensive snafus. FCIC rules say farmers can't collect drought claims on crops that are irrigated. But, over a three-year period, that's exactly what the GAO thinks 3,000 farmers did—to the tune of $17.9 million in claims. Had the FCIC been reviewing its computer tapes on loss data, it might have caught these errors.

As a result of such problems, the crop-insurance agency required a $900 million bailout last fall to stay afloat, an event that was unpublicized. That put the total expense to taxpayers for the past eight years at $2 billion, surpassing earlier government aid dispensed to Chrysler Corp. or the troubled Farm Credit System banks.

The situation promises to get worse before it gets better. "We're running enormous losses on a number of crops virtually all across the country," says Michael Forgash, an agency official. At the same time, lawmakers are running out of patience with the agency and mapping plans to try, again, to make it self-sustaining.

A ROLE FOR CONGRESS

Congress revamped the agency nine years ago, and expected it to insure at least half of the nation's crop land and, at the same time, to pay for itself. It hasn't done either.

But Congress is partly to blame for lower-than-expected participation by farmers. It has repeatedly rescued uninsured farmers during disasters, particularly droughts in election years. Last year, Congress voted a record $4 billion drought relief package. To Rep. Glenn English, an Oklahoma Democrat, that package underscores "the glaring shortcomings in a program that was designed to do away with disaster-relief emergencies once and for all."

As frustrated lawmakers move toward yet another overhaul, 8,000 agents are pedaling federal crop insurance for 50 crops, ranging from flax to figs. A farmer can insure 50% to 75% of his normal yields against everything from grasshoppers to grass fires.

But even with the government footing about 30% of the premium costs, federal crop insurance, which began as a New Deal experiment, isn't popular with farmers. Last year, only 26% of the eligible cropland was insured. "It's looked upon as something that maybe just poor farmers take out," says David Nix, a spokesman for a group of Texas cotton growers. Farmers also complain about the program's red tape and high costs.

BUSINESS IS UP

Sales of the insurance have picked up this year, partly because of jitters about another drought. And Congress is now requiring many farmers who collected disaster payments last year to sign up for the minimum level of coverage this spring. The FCIC hopes to hit its target of insuring half of the eligible land this year for the first time, with the value of insurance coverage jumping to $12 billion from $7 billion last year.

Even so, the odds of the agency breaking even are next to nil. Typically, two-thirds of the coverage sold is "actuarially unsound," the FCIC acknowledges. "There are systemic problems," the agency's Mr. Forgash says. "We just don't have adequate information to rate the premiums properly. The rates on two-thirds of our business are out of line with the risks we're assuming."

The prospect of so much insurance boomeranging on the government appalls private insurers. "Their actuarial division in Kansas City has no idea what they're doing," contends W.D. Classen of Rain & Hail Insurance Service Inc., a major insurer based in West Des Moines, Iowa. "The policy provisions they write actually deliver taxpayer dollars by the carload to farmers who don't deserve it."

Though speaking well of Mr. Marshall, the fourth FCIC manager in eight tumultuous years, many insurers disparage the agency's bureaucracy. From the top level on down, argues Eugene Gantz, executive vice president of the American Association of Crop Insurers, "they don't know insurance and don't profess to know it."

Federal crop insurance isn't sold by the government. Instead, most is peddled by private firms called "reinsured" companies. They underwrite their own insurance and handle loss adjustments. But the FCIC reinsures them against most of the risk and reimburses them for 34% of their administrative expenses. The practical result: The government absorbs most of the losses the companies experience.

The reinsured companies now sell about 80% of all federal crop insurance, a share that has grown over recent years, as a result of Ronald Reagan's push to privatize this sort of enterprise. The remaining 20% or so is sold by another group of private companies, called "master marketers," which essentially act as the FCIC's sales arm but, unlike the reinsured companies, don't bear any of the risk.

SLOW TO POLICE

Overpayment of loss claims by the reinsured companies has long been a big problem for the government. But the FCIC didn't set up a compliance division until 1986 to audit adjusters and ferret out abuses by farmers and agents. The oversight efforts still don't measure up, according to a GAO report. Compliance officials were found last year to be reviewing claims from fewer than 10% of the counties where reinsured companies do business. In the case of one major insurer, the officials checked claims from just three counties out of the 1,500 where the company sold policies.

Now, it is evident that taxpayers have been paying for years of sloppy work. In a 1987 audit, the Agriculture Department's inspector general discovered that 70% of 125 loss payments totaling $10.2 million were improperly adjusted, and as a result, farmers were overpaid by $5.1 million. Some company adjusters were caught in flagrant conflicts of interest. One handled his brother's loss claim; another took care of his own farm partnership's claim.

In a sampling of claims, GAO auditors found a similar pattern of errors: Adjusters with reinsured companies incorrectly settled 95% of 134 claims, many of which were overpayments. Of $9.4 million paid out, almost $3 million was underserved. In contrast, underpayments totaled only $32,000.

Many of the errors, according to the GAO, "were so obvious as to appear to have been intentional." One Montana farmer was allowed to buy federal crop insurance after his wheat crop had been devastated. His agent, by insuring a known loss, cost the government $69,000. An Oklahoma soybean producer planted 637 acres, then claimed losses on 897 acres, reaping a $30,000 overpayment. (The government has prosecuted only a tiny fraction of farmers caught defrauding the FCIC.)

FOLLOWING THE RULES

The GAO found the FCIC's own adjusters made numerous mistakes as well, but with one striking difference: Their errors were procedural and didn't cause big overpayments. Of $1.7 million paid on 37 claims, only $26,000 was underserved.

Overpayments "make us look terrible," acknowledges Michael K. Felt, the president of Crop Hail Management Corp., a Kalispell, Mont., reinsured company. But he says the industry's performance is much improved from two years ago.

"It's impossible for a loss adjuster, with these big acreages, to come out right on the mark," he says. It's also difficult to detect scams, such as farmers filing loss claims under the name of one entity and selling crops under another name.

In practice, however, there isn't any great incentive for vigilance on the reinsured companies' part, so long as the government eats the bulk of the losses. One company, for example, took a $17.4 million bath on crop insurance over a three-year period, but the government soaked up all but $55,000 of the loss, according to a House Appropriations Committee report. At the same time, the government paid the company, which the report left unnamed, nearly $35 million in administrative fees for selling and servicing the policies. So the company came out way ahead.

This doesn't sit well with FCIC veterans such as Thomas Link, a field director, who questions the program's direction: "Are we working for the producers out there or are we working to help some companies make money off the program?

THE DEBATE PICKS UP

Now, the program may be fast approaching a critical turning point. Many lawmakers believe that Congress, after years of ambivalence, will have to choose between crop insurance and ad hoc disaster relief. "We are going to do one or the other; we aren't going to continue doing both," asserts Republican Rep. Ed Madigan of Illinois, the ranking minority member on the House Agriculture Committee.

Currently, political sentiment favors revamping the FCIC once again and giving it another chance, if only because crop insurance, in theory at least, is cheaper than disaster payments. A congressional study commission, created under last year's drought law, is working on ways to improve the program and reduce its dependence on tax dollars. One goal will be to purge the program of absurd inconsistencies. Complains Jack Kintzle, an Iowa corn grower: "I cross county lines, and my rate on the same yield goes from $6 an acre to $13 an acre."

Meanwhile, the FCIC is bent on proving its critics wrong. For the first time, it is developing a comprehensive marketing plan to increase sales. To the relief of frustrated agents and baffled farmers, it has quit repeatedly changing its rules and regulations. It is redoubling its efforts to clamp down on loss-adjusters and dishonest farmers. And it is re-evaluating its rates and coverages to avoid "selling out the store from an actuarial standpoint," Mr. Marshall says.

Mr. DOLE. Madam President, let me indicate that as I read the article I think unfortunately the first thing up with the black eye is the American farmer. In probably some cases that is deserved where they participated in some fraudulent scheme to collect crop insurance when they should not have had it.

But many farmers do not like crop insurance. It cost a lot of money. You barely get your expenses.

I hope when the advisory commission makes its report in July we will have an emergency meeting of the Agriculture Committee on both the House and Senate side, take some of the recommendations made by the commission, correct some of the flaws in the FCIC Program, and make it available to farmers, and then rather than to pass a drought relief bill every year make certain that farmers have crop insurance.

We have had some Congressmen suggest we ought to go back after the crop has been destroyed and let farmers buy crop insurance. That is like saying to anybody else if your business burns down or your house burns down you do not have insurance on it, that is all right, you can buy it after the house burns down or after your business is destroyed. It does not make any sense. And most farmers, a great majority, understand that.

So I think Congress is going to have to be a little more responsible. We cannot insure every loss that occurs in America, whether they are farmers or nonfarmers. And farmers have a responsibility to protect their crops through crop insurance.

We need to straighten out the Crop Insurance Program. Once that is done, then Congress needs to come to grips with one basic issue. And that is if we are going to provide benefits to farmers as we do and as we should, in some cases, to preserve the family farmer, and once we straighten out the Crop Insurance Program, then I think it is time we suggest, if you are going to participate in the farm program, if you are going to receive thousands of dollars in Federal benefits because you participate in that farm program, there ought to be a requirement that you buy crop insurance. If you do not want to buy crop insurance, do not want to participate in the program, that is up to the producer. They should not be forced to do anything.

But if the American taxpayers, including farmers—they are taxpayers—are going to participate in Government programs and get Government benefits and we have a good Crop Insurance Program—we do not have one now; we will have one if Congress acts quickly on the advisory committee's recommendations and maybe some of our own—then I believe you would find farmers very willing to cooperate and very willing to make a judgment: If I buy crop insurance, I will go in the program. If I do not buy crop insurance, I am not in the program.

So I urge the Congress, when this commission does report on July 1, that we move very quickly to enact the recommendations to get the Crop Insurance Program under control, to make certain we have it properly staffed, and get rid of some of the incompetent people who have been responsible for the error. And I would suggest and certainly urge Secretary Yeutter to make this a top priority in the next few months.

I yield the floor.

GLOBAL WARMING

Mr. WIRTH. Madam President, the last months and, in fact, now years have been overwhelmed by the growing issue of global warming. People around the globe, from people in the United States to the British Cabinet, Mrs. Thatcher, governments in Europe, and increasingly citizens all around the world, are increasingly alarmed by the fact that the evidence points out that the greenhouse effect is real and the globe is getting warmer.

As that happens, Madam President, we have to look at the causes and begin to think about the solutions. Clearly, this is a problem of trace gases, various gases like carbon dioxide, methane, chlorofluorocarbons, going into the atmosphere and changing the nature of the atmosphere and the atmosphere becomes more and more like a greenhouse. Heat is held in, the Earth gets warmer, with implications that are absolutely staggering for our economy and for life on Earth as we know it.

The question is, what are we going to do about all this? The evidence is clear. What do we do?

The No. 1 problem for us is carbon dioxide, the burning of fossil fuels. And we are burning increasing amounts of carbon dioxide, increasing amounts of carbon dioxide going into the atmosphere. So clearly good public policy would suggest, good rational global

policy would suggest, that we ought to burn fewer fossil fuels and emit less carbon dioxide.

For us in the United States, this presents very significant opportunities, significant opportunities to do better in the way in which we burn fossil fuels to conserve and to emphasize fuel efficiency. For us the two greatest areas that are possibilities are, one, transportation and, second, building standards in which we in the United States waste a great deal of energy.

We are, for example, in our economy about 50 percent as efficient in the use of energy as our trading competitors, the Germans and the Japanese are. In other words, it takes two units of energy to produce a unit of gross national product in the United States; one unit for the Japanese or the Germans. Not a perfect parallel, of course, but it is instructive in the fact that we have a great deal of room, particularly in the area of building standards and transportation.

Today, the Bush administration took, I believe, a very progressive and smart step when they agreed not to roll back the CAFE standards of automobiles. The previous administration, the Reagan administration, had told us that the CAFE standard, or the corporate average fuel economy standards—that is the average-mile-per-gallon standard for a new automobile coming out of Detroit. That standard, which is set in the law at 27.5 miles per gallon, has been rolled back by the previous administration, using the discretion that they had, to around 26.

There has been some debate in the Bush administration as to what they were going to do. And, in a very welcome move, they announced today that they are going to maintain the current standard of 27.5 miles per gallon, certainly a progressive step up from where we have been over the last 8 years and I hope the beginning of a number of indications coming out of the administration of their concerns about global warming, global environmental issues, and the need for us to be much more efficient in the way in which we use fossil fuels and much more attention to the problems of carbon dioxide.

Now, will this increased fuel economy really help? Well, of course it will. For every mile per gallon of increased efficiency for the new cars coming off the assembly line, for every mile per gallon, we save about 400,000 gallons of oil per day and clearly the level of increase can go up pretty significantly.

According to the engineers in Detroit, in their testimony to us, according to them, we can go from the current 27½ to about 34 or 35 with significant ease. No technical hardship, no engineering changes are going to be required in the basic way in which we design and build automobiles. We can go from an average of 27½ to 34 or 35 with ease.

What will that mean? Madam President, if we go to 34 miles per gallon by the year 2000, from the current 27 to 34, or an increase of about 25 percent in fuel efficiency, no hardship, we will be savings about 400,000 barrels of oil per day—400,000 barrels of oil that we are not going to be importing from the Middle East that we are not going to need, a very logical and simple way that the American taxpayer saves money and the American consumer saves money. We become more competitive and we are less dependent on imported oil.

And how much is 400,000 barrels of oil per day? It is more than most estimates suggest we will be getting out of ANWR, the Alaskan National Wildlife Refuge. There has been a great deal of pressure for us to drill in ANWR. If we were to drill in ANWR, effectively what we would be doing is drilling in the last great wildlife refuge on the North Slope of Alaska for the purpose of fueling gas-guzzling automobiles.

If we did not drill in ANWR and went to more efficient automobiles, we have more than a tradeoff and we will save more than enough. That is one example as to how much 400,000 barrels of oil a day is, more than we are getting out of ANWR.

Or, to put it another way, the amount of oil spilled in Prince William Sound by one tanker, the *Exxon Valdez*, was 200,000 barrels. By sheer efficiencies in automobiles, we can save every day twice the equivalent of the amount of oil that was spilled in Prince William Sound last month.

These are just illustrative of how much oil there is to be saved by moving along the simple path suggested by the administration today.

It is my own belief that we also ought to be going further than that 34 miles per gallon. We ought to be going further toward very aggressive exploration of alternative fuels for automobiles by using natural gas. We are rapidly moving into the day and age in which this is going to be a 20- or 30-year period of time of natural gas. The era of natural gas is on its way. It is almost here. We have to be looking at transportation fueled by natural gas, looking at hydrogen, looking at electricity, a whole variety of alternatives.

Finally, we should be looking at other economic incentives. Senator HEINZ and I have introduced legislation providing various alternative economic incentives for rewarding gas sippers and punishing or taxing gas guzzlers, so that the American public has an economic incentive to buy an automobile that is fuel efficient and an economic disincentive to buy an automobile that is fuel inefficient.

In any case, I wanted to use this opportunity, Madam President, to congratulate the current administration, something that we all like to do wherever that is possible. You and I, all of us, want to see this administration succeed, want to see the President do the right thing. And they did the right thing today, Madam President, by not rolling back the fuel-efficiency standard of automobiles maintaining the 27½ miles per gallon. I hope we can take the next steps to make it more efficient in coming years.

I thank the Chair for her toleration of these remarks and explanatory comments.

I yield the floor.

The PRESIDING OFFICER. The Senator from Arkansas.

SCORECARD ON CONSULTING SPENDING

Mr. PRYOR. Madam President, I rise today to report on how various Federal agencies have complied with a requirement that they reduce their budgets for consulting services by a prescribed amount. The agencies are the Departments of Defense, Treasury, Health and Human Services, Transportation, Labor, and Education.

During the consideration of the fiscal year 1989 appropriations bills for these agencies, I attached amendments requiring them to reduce their consulting services spending. The General Accounting Office [GAO] provided me with information regarding what these agencies had reported spending to the Federal Procurement Data System. In order not to drastically impact the agencies, I elected to reduce their consulting budgets by only 15 percent. While I successfully attached this amendment to 11 appropriations bills, unfortunately for the taxpayers, all but 4 conference committees dropped the amendment while the remaining committees modified the reductions.

In other words, only six agencies were required by 1989 law to cut consulting services costs.

Madam President, the potential reduction in consulting spending as a result of my amendments was roughly $220 million. Of the six major agencies involved, five of them faithfully carried out the intent of the amendment. The Department of Defense reduced its budget by $150 million. I have included for the record the itemized list of how DOD achieved this reduction. The other Departments achieved reductions as follows: Treasury, $3.6 million; Transportation, $2.3 million; HHS, $14.3 million; Labor; $1 million.

And, finally, Madam President, there is the Department of Education. I received a nice letter from Education, thanking me for my interest and informing me that it would not be making any reduction in its consulting budget. By their own calculations, it should at least have reduced their

budget by $5 million. But, since it classified this money as ongoing and routine it decided it didn't need to cut it.

While I am a strong supporter of education, as is the present occupant of the chair, I find it hard to believe that while DOD could cut consultants, Treasury could cut consultants, Transportation, HHS, and Labor could cut consultants, the consultants to the Department of Education were doing such vital work that Education simply could not cut its budget.

The second matter that concerns me is that the rationale Education uses to justify not cutting consultants is the very reason that Congress and GAO are most concerned about the Government's use of consultants. Education states that it is above the law, it does not have to cut its consulting spending because these consultants are doing the basic work of the Department. The conference committee added language allowing Education to exempt those consultants who do ongoing and routine tasks and are part of the regular mission of the agency. By my reckoning, this should not apply to most consultant contracts because based on the OMB Circular A-120 which regulates consulting services, consultants should not be doing the regular work of the agency nor should they be hired on an ongoing or routine basis. Consultants should only be hired when the agency determines that Federal workers cannot do the job, or when something very special is needed. They should never be hired to perform inherently governmental activities that should be performed by the Federal employee in the first place.

Madam President, the Department of Education cannot have it both ways. If it cannot cut its consultant budget because consultants are hired on an ongoing and routine basis to perform the regular work of the agency, perhaps we need to have GAO take a close look at the Department's consultant contracts.

Besides saving the taxpayer some money, I had intended that my amendment would force the Federal Government to take a closer look at its consulting contracts. I thought it would be a good idea for the Government to review its spending and decide which of the contracts were necessary for high priority tasks.

While I do not think the other five agencies that fulfilled this requirement have solved all their problems with consultants, at least they have made a beginning. I am deeply troubled that the Department of Education ducked its responsibility and refused to do the work required by the legislation.

The conference committee allowed Education a great deal of flexibility in applying the reduction, as did all the other conference committees. I am disappointed that Education chose to take advantage of the flexibility and not cut one dime from its consultant budget, while the other five agencies made significant reductions. This behavior deserves further attention on the part of the Congress and by the GAO. I can promise the folks over at Education that they will be receiving this attention.

Madam President, I ask unanimous consent that the letter that I have received saying that will not comply with the present law, from the Department of Education, dated April 10, 1989, be printed in the RECORD at the conclusion of my remarks.

Madam President, I also ask that a letter from the Department of Defense, the Office of the Director Of Defense Research and Engineering, a letter dated the 29th of March, 1989, be printed in the RECORD at the conclusion of my remarks. It indicates in those areas of defense contracting, how consulting services will be reduced, to the tune of $150 million.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF EDUCATION,
OFFICE OF THE DEPUTY UNDER SECRETARY FOR PLANNING, BUDGET AND EVALUATION,
Washington, DC, April 10, 1989.

Hon. DAVID PRYOR,
U.S. Senate, Committee on Governmental Affairs, Washington, DC.

DEAR SENATOR PRYOR: I am writing in response to your March 20 letter concerning the limitations on the use of consultants contained in section 515 of P.L. 100-436. You asked about how the Department was implementing the amendment you sponsored and requested all relevant information.

Section 515 prescribes a limitation on 1989 obligations for consultant services contracts at 85 percent of the 1987 obligations, using the recent Office of Management and Budget definition of consultant services. Under Section 515, the limitation for the Department of Education would be $28 million. This limitation excludes amounts for field readers and appointive consultants.

Although it is impossible to know the precise amounts that will be used for contracts until the completion of competitions and negotiations over the best and final offers of bidders, the planned level for consulting services contracts in 1989 is approximately $33 million. These contracts will be used for a variety of purposes, including the collection of education achievement data by State, studying the effectiveness of the Chapter 1 program for disadvantaged students, evaluating the success of the Dropout Prevention Demonstration program, analyzing the Drug Abuse Prevention programs, and obtaining expert legal advice for civil rights litigation.

While the limitation on consultant services could adversely affect the Department's operations, since the $28 million limitation is $5 million less than the amount planned for these activities, it appears that the exemptions included in Section 515 recognized the need for many consultant services. In addition to exempting Inspector General activities, Section 515 exempts activities that are "ongoing and routine" and "part of the regular mission of the agency." Because the Department's consulting services activities generally fall within these broad exemptions, it appears that there will not be major disruption of the Department's operations. It also appears that there will be little, if any, savings from the Section 515 limitation.

Despite the likely exemption of most activities because of their ongoing and routine nature as part of the regular mission of the Department, the Department will make every effort during the year to minimize the amount of money used for consulting services. It is possible that actual spending for consulting services contracts will be lower than planned and below 85 percent of the 1987 level. If there are savings, the Department will use the funds to defray costs of the 4.1 percent pay raise as required by section 515. The pay raise costs for the Department are $5.9 million.

I hope this information, which we have also provided to the Appropriations Committees in our Congressional Budget Justifications, is helpful. If you need further information, please have your staff contact Thomas Skelly (732-5290).

Sincerely,

CHARLES E.M. KOLB,
Deputy Under Secretary for Planning, Budget and Evaluation.

OFFICE OF THE DIRECTOR OF DEFENSE RESEARCH AND ENGINEERING,
Washington, DC, March 29, 1989.

Hon. DAVID PRYOR,
Chairman, Subcommittee on Federal Services, Post Office and Civil Service, Committee on Governmental Affairs, United States Senate, Washington, DC

DEAR SENATOR PRYOR: This letter is in response to your inquiry on the $150 million reduction to the FY 1989 Defense Appropriations Bill for consulting services. The $150 million reduction was allocated to each of the Military Departments and Defense Agencies based of FY 1989 estimates for Contracted Advisory and Assistance Services (CAAS). These estimates were taken from the Contract Support Services Budget Exhibit submitted by the Military Departments and Defense Agencies for the FY 1990/FY 1991 Biennial Budget Review. The Military Departments, in turn, made specific distribution of these general reductions based on their relative priorities. A copy of the final distribution by appropriation was provided by the DOD Comptroller to the Appropriations Committee on February 2, 1989.

Since the amendment was added to the Defense Appropriation Bill just prior to the Bill's being passed, there was, to my knowledge, no documentation of the impact of this reduction on DOD. The components simply applied the reductions to those programs with the least priority within the appropriations guidelines.

Sincerely,

JOHN P. WILHELM,
Acting Director, Contracted Advisory and Assistance Services and OSD Study Coordinator.

Mr. PRYOR. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PRYOR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ROBB). Without objection, it is so ordered.

MEETING OF U.S.-U.S.S.R. TRADE COUNCIL

Mr. DOLE. Mr. President, last evening, I had the pleasure of addressing a meeting of the U.S.-U.S.S.R. Trade Council—probably the leading private sector organization engaged in encouraging expanded American-Soviet trade relations.

The audience, like the council itself, was made up of an about equal mixture of Americans and Soviets. Some 250 prominent American businessmen were joined by an equal number of their Soviet counterparts—an impressive representation of commercial leaders from both countries.

Because our future relations with the Soviet Union—in the economic and the broader strategic and political fields—will be so important to our country and to all Americans, I would like to share with the Senate my remarks last evening. I hope these will be part of a continuing dialog we have here on the Senate floor, and in other forums around the country, on this crucial matter.

I ask unanimous consent that these remarks be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

SPEECH TO U.S.-U.S.S.R. TRADE AND ECONOMIC COUNCIL, MAY 17, 1989

A couple of years ago, when the Gorbachev era was just dawning, Margaret Thatcher shocked a lot of people in the West by declaring that Gorbachev was someone "we can work with."

The initial shock has passed, replaced by images of the General Secretary "working" American crowds in the best traditions of—well, of Bob Dole; by TV shots of Gorbachev and President Reagan, attaching their signatures to the INF treaty; by pictures of Soviet troops and tanks, rolling not into—but out of—Afghanistan.

The initial shock has passed, and in its place has emerged a growing realization that Margaret Thatcher was right. We do have a new style of Soviet leader. And we not only can work with him; we better work with him. Because he continues to move with whirlwind energy—catalyzing major changes in the Soviet system and Soviet policies; destroying long-held ideas, and in some cases myths, about our Soviet adversary; and having an enormous impact on the Global stage—including in the capitals of the countries we call our closest allies and best friends.

GORBACHEV: FACE TO FACE

Gorbachev's Soviet Union represents a unique kind of challenge for us Americans—a challenge made up of equal parts of new opportunities, and potential perils.

That came home to me starkly and personally when I visited the Soviet Union last year, for the signing of the INF Treaty. On that occasion, I had the opportunity to sit next to Mr. Gorbachev for several hours at dinner. Let me tell my countrymen here who have yet had that opportunity: The man is a handful.

He is charming. He is smart. Above all, he is tough, as great leaders should be.

He wants to make the Soviet Union the most powerful and prosperous nation on earth. He has a strategy—a game plan—to do it. And he has the talent and determination to give him a shot at succeeding, despite the daunting challenges he, too, faces.

And, let me add, he believes—I am convinced he genuinely believes—that for the forseeable future, at least, one central element of his strategy for helping the Soviet Union must be finding ways to lower tensions, and increase cooperation with the West.

And let me stress again: He wants to do that not because he has any special affection for us, but because he sees it as the best way to achieve Soviet national goals.

Interestingly, I keep hearing people wanting to debate the question: is it in our interest, American interest, to work with Gorbachev? By working with him, do we nurture a more open, less belligerent Soviet state; more amenable to working with us, less inclined to risk assaults upon us? Or, by working with him, are we really just helping make an adversary even stronger?

THE RACE INSIDE THE KREMLIN

As far as I'm concerned, Gorbachev has it right, from his perspective—and the people who ask these kinds of questions have it wrong, from the American perspective.

Through our policies and actions, we can have some impact on whether or not Gorbachev succeeds. But, fundamentally, what happens inside the Soviet Union will decide his fate.

In my view, Gorbachev's fate depends on the outcome of a daring and dangerous race of which he, himself, was the starter; a contest between, on the one hand, the political reforms and social reforms he instigated, with the rising expectations those reforms have ignited; and, on the other hand, the capacity of the Soviet system—with its first class technology, second rate bureaucracy, (like others around the world) and a struggling economy—to meet those expectations.

It's going to be a tight, tense race. And we can affect the outcome only at the margins.

So I think that trying to fine-tune our policies to make Gorbachev look good—or alternatively, to try to sabotage his success—just won't work; and, anyhow, misses the point. We ought to decide on our policies and actions using the same criteria Gorbachev is using, and we have always used: What is best for the United States of America? How do we deal with the Soviet Union in a way that maximizes our chances to achieve our national goals.

Obviously, that doesn't mean we are blind and deaf to what is happening inside the Soviet Union. On the contrary, our perceptions and conclusions about the Soviet state—its motives, its goals, its capacities—provide the framework for developing a strategy of U.S.-Soviet relations. But we don't develop our policies with the primary aim of changing the Soviet Union, or helping Gorbachev change it, but with the motive of exploiting the changes that are occurring in ways that help us.

Let me say up front: In my view, the changes occurring in the U.S.S.R.—socially, politically, and economically—are very real, and are having far-reaching impact on Soviet policies and actions. In many cases, we cannot yet be sure they are permanent—prudently, we must take that into account; we have seen the pendulum swing back and forth before. But neither can we be so encumbered with past experience, and persisting myth, that we fail to see and appreciate real change.

NEW HORIZONS ON TRADE—AGRICULTURE

One important change is the rapid growth of new opportunities for mutually beneficial economic relations. Increased trade with the Soviet Union in nonstrategic goods is in America's interest—period. A rational, efficient system to determine which exports need to be controlled, for national security reasons, and which can be freely exported to the Soviet Union and other countries—such a system serves America's business interests, without compromising America's security.

And tied credits or other appropriate incentives to facilitate nonstrategic trade, provided on a commercially sensible basis, makes us stronger, even as it might also benefit the buyer.

About 2 weeks ago, in Washington, we witnessed another important milestone in the implementation of such common sense policies. President Bush, at my strong urging and the advice of many who understand

how important it is for America to remain competitive in agricultural exports, decided to approve the use of our export enhancement program—the EEP—to cover 1.5 million metric tons of wheat sales to the Soviet Union.

EXPORT ENHANCEMENT

The Soviet Union needs wheat; we have it to sell. Wheat feeds people, it doesn't kill them. Wheat exports enhance the economic security of America's farmers, without undermining their geopolitical security. American wheat sales to the Soviet Union earns dollars and cents for the United States—and makes great sense for both sides.

I want the EEP Program to be used prudently, but effectively, to boost agricultural sales to the Soviet Union, and other markets where we are faced with severe, and often unfair, competition from other exporting nations. For example, I believe we could expand the existing EEP Program for vegetable oils—to meet what we understand is a substantial Soviet interest in new purchases.

The bottom line is trade with the Soviet Union benefits the United States. When the Soviets buy, for example, American shovels, tractors, elevators, scrap aluminum, pizza and Pepsi, that's good for us. It's a market in which we have a growing interest—and if we are going to compete, we had better be playing to win by being competitive. No doubt about it, agriculture dominates our current trading partnersip, but it is not the only area where we have the chance for expanded exports.

OVERALL TRADE POLICY

And—having broached the subject of trade—perhaps I could also take this opportunity to say just a few words about broader trade questions. I know that all of the American businessmen here have economic interests that go beyond the Soviet market; and I suspect that many of the Soviet businessmen do, too.

The United States remains committed to the removal of barriers and the expansion of world trade consistent with the principles which have guided similar efforts under the GATT: national treatment—in other words, equal international treatment of foreign and domestic competitors; and most favored nation status by which nations can cooperate to lower tariffs and other border controls.

It all boils down to this: We are trying to expand our exports using every fair trade practice available to us. Why? Because it's good for America.

But I don't want to leave anyone with the wrong impression. We are a capitalist country, and most of those here tonight are businessmen. But we have interests with the Soviet Union that go way beyond economics. So perhaps I should end up with some comments on our broader strategic and political relations, and with developments I see in the Soviet Union in those areas.

WINDS OF CHANGE

The winds of change are blowing there, too.

In fact, the social and political liberalization we see in the Soviet Union are even more striking than the economic changes. And even the most hardnosed analysts, I think, are starting to sense that so many genies of change have been let out of so many bottles—that, no matter what happens, things will never again be quite the same.

But I refer again to that race that Gorbachev has started. We don't really know which side will win; and we don't know what will happen if the rising tide of expectations sweeping the Soviet Union is frustrated. Will there be a reversion to an earlier style of Soviet politics and policies; or will even more profound social unrest and change emerge.

We wish for the best, but we just don't know. And inevitably, our uncertainty will condition our views and our actions toward the Soviet Union.

So I want to speak directly and frankly to our Soviet guests. Let me suggest to you that much of the future of our relationship lies in your hands, and in the hands of your national leaders.

I do know how important, and yes wrenching, the decision must have been to withdraw from Afghanistan. But I hope news accounts today are correct about no future aid to a client state on our southern doorstep. We and all the other nations of the region are striving to find a peaceful path in central America as evidenced by the bi-partisan Contra Aid Plan endorsed by Congress and the President.

I appreciate how significant it is that nonparty candidates can stand for and win election to an increasingly vocal and influential parliament. But I still believe all people have the right to complete democracy, and we are hopeful the Soviet people will finally achieve that right.

JACKSON-VANIK REFORM?

I applaud you for undertaking important reforms in your emigration policies. Many of us are prepared to join with President Bush, in his pledge to work for the greater normalization of our trade relations—starting with a Jackson-Vanik waiver of some modification of that law.

I see how frightening it is when people in many parts of the U.S.S.R. long quiescent suddenly rise to vent their frustrations and voice their grievances, it is hopefully there will be a favorable response to legitimate expressions of national, ethnic, and cultural identification.

GLASNOST—AND DEADLY FORCE

And I know that a state has both a responsibility to maintain order for the safety of its citizens, but many are concerned by the excessive force used in one Soviet Republic, to suppress what most reports say were peaceful demonstrations.

I say these things in the spirit of the new word you have brought into our vocabulary—glasnost. I say it as one who says—and said again here tonight—that we want to work with you, more and more, in many areas. I say it because I believe that sincerity, and candor, and truth—in the long run will serve to bring us together, not drive us apart.

And, finally, let me conclude with a few remarks aimed mostly at my fellow Americans.

The Soviet Union remains, still, our most dangerous, adversary. That may change someday—we pray it does—but it hasn't changed yet.

It remains heavily armed; we believe much more heavily armed than we are, and much more heavily armed than it need be, to ensure its own defense. Its intentions in many corners of the world remain unclear; its activities in some unhelpful and destabilizing. There are still many, many more things that divide us—than join us.

THE BOTTOM LINE—FREEDOM

That is a very important part of the reality of our relationship today. And it must shape our defense policies, our arms control policies, our foreign policies. America must remain militarily and politically strong. We must work hard at maintaining the strength and unity of the western alliance. We must stand for freedom, wherever it is at issue. We must never be timid about asserting our legitimate rights and defending our national ideals—against any nation or force which threatens them.

Just as I said in making the case for closer economic relations with the U.S.S.R., we must do all these things because they, too, are in our interest.

So that is my main message tonight. Let us just do what is in America's interest as the Russians do what is in Russia's interests. It is in our interest to face this new Soviet challenge, both its opportunities and dangers, head on; eyes open; feet squarely on the ground.

We not only can work with Gorbachev's Soviet Union, we should. It is in our interest. As I have spoken about at length—our economic interest. And as many others have observed, in our political and strategic interest, too.

But more: We not only should work with Gorbachev's Soviet Union, we must. Because it is the world's other superpower—the one nation on earth whose enmity could bring an end to civilization; the one nation on earth whose good faith cooperation could bring an end to the threat of global war.

THE RESOLUTION OF DISAPPROVAL OF THE FSX DEAL

Mr. KERREY. Mr. President, I have listened closely to the debate on the FSX agreement. Some of that debate has portrayed the FSX agreement primarily as a defense issue with important implications for our and Japan's security in the Far East. While that perspective is important, I find myself in agreement with those of my colleagues who see the FSX as an issue critically important to our trade policy.

I consider trade issues to be of great importance because our trade deficit threatens the economic security of the United States. Instead of financing our own consumption, we are allowing other nations to trade for our economic infrastructure in the form of real estate, Treasury bills, securities, and bank deposits.

This is particularly true in the case of Japan, which explains the scrutiny given to the FSX deal. Japan accounts for the single largest share of our trade deficit. That share grew last year from 35 to 40 percent of our total trade deficit. We have had to borrow a total of $303 billion from the Japanese since 1980 to cover the cost of Japanese products in excess of what we have sold Japan.

The reasons for the magnitude of our trade deficit with Japan are many, and the long-term consequences of these deficits are not fully clear at this point. However, it is clear that Japanese investors now account for a major portion of all Treasury bond purchases. Also, Japanese builders are

major players in the construction of new factories in the United States and purchasers of old ones. The long term prognosis is not good unless we succeed in getting a handle on our trade policy.

It is in this context that I decided to vote for the resolution of disapproval of the FSX agreement. I reached my decision when considering the circumstances under which we started down the FSX path with Japan. The Japanese wished to modernize their air defenses, a policy we supported given our strategic interests in the Far East. Their choices were to build the plane on their own, purchase planes from the United States, or coproduce a plane with the United States.

By deciding against purchasing existing planes, Japan sent an important signal about willingness to cooperate on overall trade policy.

Choosing to purchase existing planes from the United States instead of developing the FSX would have met three important objectives from the Japanese point of view:

First, strategic considerations: The biggest strategic shortcoming of the FSX is the fact that it has only one engine, which limits its range and payload capacity. Even the F-1, which Japan relies on now, has two engines. A group of military experts sent to Japan by DOD in 1987 concluded that the FSX was too narrowly defined, and that any of three United States planes—the F-15, the F-16, or the F-18—would more adequately meet Japan's defense needs than the FSX.

Second, cost: Based on current estimates, the final cost of the FSX for the Japanese will be $48 million for each of the 130 planes proposed to be built. This pricetag makes the FSX more expensive than any fighter ever produced in the United States. It will cost 2½ times the cost of a F-16; 50 percent more than a new F-18; and 20 percent more than the F-15.

Third, trade considerations: Given the growth in our trade deficit with Japan—particularly in light of the fact that our overall trade deficit has been declining—Japan could have taken direct action to reduce that deficit. It would have been in its strategic and fiscal interest to do so, and it would have sent an important signal about their willingness to work with us on overall trade policy.

"FAMILY TIES": A HAPPY HOME LIFE FOR THE EIGHTIES

Mr. CRANSTON. Mr. President, in September 1982, NBC aired the first episode of what would go on to become one of the most loved, most talked about and most successful shows in television history: "Family Ties."

The story of two sixties idealists who are married and parents to three—eventually to become four—very eighties children touched an emotional chord in living rooms all across America. Perhaps some of the reason for that positive reaction stems from the fact that at the time "Family Ties" debuted there were no nuclear families on continuing series television. The show's success, however, helped to change that. Indeed, the Los Angeles Times credits "Family Ties" with "helping revive family oriented programming"—a revival which led to two more recent megahits: The "Cosby Show" and "Roseanne."

Television is often given a lot of credit—or blame, depending on the point being made—for its power to influence the people who watch it. Sociologists and others theorize that hit TV series offer models of behavior that many viewers emulate. If this is true, then the creators and writers of TV programs have an enormous responsibility for the words they put in their character's mouths.

For 7 years, "Family Ties" has been an example of this responsibility taken very seriously and fulfilled very well. I'm not the only one who thinks so either. The respected Human Family Institute presented its prestigious Humanitas Award to "Family Ties" writers Gary Davis Goldberg and Alan Uger for the widely acclaimed episode, "A—My Name is Alex," which concerned a young person's reaction to the death of a friend. In addition, "Family Ties" was nominated three times for the coveted Best Comedy Series Emmy and won an Emmy in recognition of its fine comedy writing.

Week in and week out the scripts provided a virtual primer on how to have a healthy family relationship. In fact, the health section in this Tuesday's Washington Post includes several sections of dialog from "Family Ties" episodes as examples of successful conflict resolution, how parents can best balance closeness with their children with the child's need for freedom, and the importance to the whole family of a happy marriage.

Happy families, however, weren't the only topic the writers took up. They also tackled such noncomedic subjects as housing discrimination, economics, Darwinism, and environmental protection.

Although many people made "Family Ties" the success it became, there truly is one individual who was indispensable to the show from the very start and that is its creator, Gary David Goldberg. Basing the premise of the show on facts from his own life, Gary succeeded in doing what many, if not most, artists seek to do: He translated his own personal experience into characters and situations that others could relate to. He earned his success, and he—along with all the members of the cast and crew—deserve it. Their contributions will be sorely missed—in prime time, that is. We can all continue to watch and learn from the Keaton family in syndication for, I'm sure, many years to come.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Kalbaugh, one of his secretaries

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 1:02 p.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House has passed the following joint resolution, without amendment:

S.J. Res. 58. Joint resolution to designate May 17, 1989, as "High School Reserve Officers Training Corps Recognition Day."

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2) to amend the Fair Labor Standards Act of 1938 to restore the minimum wage to a fair and equitable rate, and for other purposes.

The message also announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 968. An act to provide for the Federal reimbursement of local noise abatement funds.

ENROLLED JOINT RESOLUTIONS SIGNED

The message further announced that the Speaker has signed the following enrolled joint resolutions:

S.J. Res. 58. Joint resolution to designate May 17, 1989, as "High School Reserve Officers Training Corps Recognition Day"; and

H.J. Res. 170. Joint resolution designating May 1989 as "National Digestive Disease Awareness Month."

The enrolled joint resolutions were subsequently signed by the President pro tempore [Mr. BYRD].

At 3:28 p.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the concurrent resolution

(H. Con. Res. 106) setting forth the congressional budget for the U.S. Government for the fiscal years 1990, 1991, and 1992.

MEASURES REFERRED

The following bill was read the first and second times by unanimous consent, and referred as indicated:

H.R. 968. An act to provide for the Federal reimbursement of local noise abatement funds; to the Committee on Commerce, Science, and Transportation.

ENROLLED JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on today, May 17, 1989, he had presented to the President of the United States the following enrolled joint resolution:

S.J. Res. 58. Joint resolution to designate May 17, 1989, as "High School Reserve Officer Training Corps Recognition Day."

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-77. A joint resolution adopted by the Legislature of the State of Maine to the Committee on Commerce, Science, and Transportation.

"JOINT RESOLUTION

Whereas, transportation problems created in the State of Maine by Guilford Industries' railroad operations have left our biggest and best industries without adequate rail services; and

"Whereas, the economic development of the State of Maine has suffered immensely without a safe, dependable and competitive rail system since Guilford Industries reduced rail operations throughout the State of Maine, including the Bangor Yard, in Bangor, Maine and the Rigby Yard in South Portland, Maine; and

"Whereas, employment on Guilford Industries' railroads has been reduced to a level insufficient to provide necessary services and employment to industries served by those railroad operations; and

"Whereas, railroad seniority had provided qualified and experienced personnel to operate Guilford Industries' rail service in the past; however, during the past year Guilford Industries has substituted these employees with newly hired, inexperienced, junior and unqualified personnel; and

"Whereas, this substitution is a threat to the safety of personnel, property and cargo; and

"Whereas, the Legislature of the State has long been concerned with the problems caused by Guilford Industries' railroad operations in Maine and has found it necessary to enact certain legislation to protect the vital interests of its constituents; and

"Whereas, a certain Interstate Commerce Commission decision of January 10, 1989, denied employees of Guilford Industries the benefit of the work rules issued by Richard Kasher after full, fair, and fact-finding arbitration; and

"Whereas, the Interstate Commerce Commission imposed a post-arbitration seniority arrangement which was not subject to any discussion or fact-finding arbitration and which denied employees due process; and

"Whereas, the Chair of the Interstate Commerce Commission conducted all of the activities of the commission, resulting in the deprivation of a full and fair fact-finding arbitration for employees of Guilford Industries; now, therefore, be it

"Resolved, That We, Your Memorialists, respectfully recommend and urge the Congress of the United States to:

"1. Establish and conduct hearings in the Senate of the United States on the decision-making process used by the Interstate Commerce Commission in its oversight of Guilford Industries;

"2. Establish and conduct hearings in the House of Representatives of the United States on the decision-making process used by the Interstate Commerce Commission in its oversight of Guilford Industries;

"3. Decline to confirm any reappointment of the Chair of the Interstate Commerce Commission in light of the recent actions and decisions of the commission; and

"4. Enact legislation requiring that the so-called Kasher Implementing Arrangement decided on June 12, 1988, govern Guilford Industries, its rail subsidies and their employees and labor organizations until amended, changed or abrogated under the provisions of the United States Railway Labor Act; and be it further

"Resolved, That a duly authenticated copy of this Joint Resolution be immediately submitted to the Honorable George H.W. Bush, President of the United States, the President of the Senate and the Speaker of the House of Representatives of the Congress of the United States, and to each member of the Maine Congressional Delegation."

POM-78. A joint resolution adopted by the Legislature of the State of Minnesota; to the Committee on Energy and Natural Resources.

"RESOLUTION No. 3

"Whereas, Minnesota's water is a precious resource that is necessary and claimed for agricultural, domestic, recreational, and beneficial uses; and

"Whereas, Minnesota's lakes and the Mississippi River have suffered drastic drought which has depleted water supplies; and

"Whereas, Minnesota's water rights may be preempted by federal legislation, now pending before the Congress of the United States, that would authorize the use of Minnesota waters to transport coal by slurry pipeline; and

"Whereas, this proposed federal legislation would permit coal slurry pipeline consortiums the right of eminent domain for the transportation of coal, using Minnesota waters, to distant utilities; and

"Whereas, unit coal trains that currently transport vast quantities of coal to Minnesota utilities would be eliminated, causing the loss of permanent Minnesota railroad jobs; Now, therefore, be it

Resolved by the Legislature of the State of Minnesota that it urges the Congress of the United States to reject pending legislation that would authorize the use of Minnesota waters for the transportation of coal and would grant the right of eminent domain of coal slurry pipelines; and be it further

"Resolved, That the Secretary of State of the State of Minnesota is directed to prepare certified copies of this resolution and transmit them to the President of the United States, President and Secretary of the United States Senate, the Speaker and Chief Clerk of the United States House of Representatives, and to Minnesota's Senators and Representatives in Congress."

POM-79. A resolution adopted by the Mississippi Manufacturers Association relative to the adoption of acid rain and air emission legislation; to the Committee on Environment and Public Works.

POM-80. A petition from citizens of the State of New York praying for a redress of grievances; to the Committee on Finance.

POM-81. A concurrent resolution adopted by the Legislature of the State of West Virginia; to the Committee on Finance.

"HOUSE CONCURRENT RESOLUTION No. 45

"Whereas, New underground storage tank regulations are estimated to have a tremdous negative impact on West Virginia's and the nation's independent petroleum marketers, manifested service station and commercial location closures in significant numbers; and

"Whereas, Nearly fifty-two percent of independent marketers have no pollution liability insurance due to availability or affordability problems; and

"Whereas, No insurance company in the United States currently offers a pollution liability policy that meets EPA requirements; and

Whereas, Although approximately twenty states have established trust funds to assist in cleanup at leaking undergrounud storage tank sites, none of these twenty fully meets EPA requirements, and all currently suffer under capitalization problems; and

Wheras, Marketers without pollution liability insurance and those who operate in West Virginia and other states without a trust fund, are particularly vulnerable to claims arising out of underground storage tank incidents and to liability for noncompliance with applicable underground storage tank regulations; therefore, be it

Resolved by the Legislature of West Virginia: That the Congressional Delegation of West Virginia and the Congress be urged to take the following steps to remedy the problems created by the laws and regulations affecting underground storage tanks:

First, to expand the current Leaking Underground Storage Tank trust fund by increasing the 0.1 cent per gallon tax on gasoline and diesel and aviation fuel. Revenues from this increase should be used to assist states in financing their underground storage tank trust funds.

Second, to direct the EPA to invoke its authority to review the enforcement standards of the financial responsibility requirements.

Third, to restructure the current financial responsibility requirements to ensure a more reasonable and flexible program. Options could include revision of the suspension of enforcement procedures and reduction of the minimum amount of financial responsibility required.

Finally, to institute a federal low interest loan program for small businesses to help them comply with mandatory environmental requirements; and, be it further

"Resolved, That the Clerk is hereby directed to forward a copy of this resolution to the President of the United States Senate, the Speaker of the United States House of Representatives, and the members of the West Virginia Congressional Delegation, Washington, DC."

POM-82. A resolution adopted by the House of Representatives of the State of

Kansas; to the Committee on Foreign Relations.

"HOUSE RESOLUTION No. 6125

"Whereas, Members of the House of Representatives of the Kansas Legislature deplore the apartheid system of racial segregation in South Africa; and

"Whereas, There should be universal application of the principle that all people are created equal and endowed with certain inalienable rights of life, liberty and the pursuit of happiness; and

"Whereas, South African apartheid is in direct contradiction of the basic principles of fundamental human rights and violates all aspects of democratic process; and

"Whereas, All of our states demand the democratic principle that guarantees all citizens the right to participate in the electoral process which determines their destiny, their form of government, and their election of political leaders at all levels; and

"Whereas, Racial apartheid in South Africa denies Black South Africans participation in the political process and indeed denies them fundamental human rights; and

"Whereas, On a continuing basis Blacks and other opponents of apartheid in South Africa are detained, arrested, imprisoned, beaten and killed without cause or due process of law; and

"Whereas, The system of apartheid not only represses public participation but also violates the principles of private enterprise by restricting equal access to the market place and to the extensive resources of the South African land and society; and

"Whereas, The continued oppression in South Africa threatens all Black South Africans, compromises the dignity, integrity and humanity of Coloured, Asian and White South Africans, and also threatens the peace and political economic and social well-being of southern Africa, the entire continent and, indeed the entire world: Now, therefore, be it

"Resolved, That the House of Representatives of Kansas hereby urges that the State Legislatures of the United States of America increase actions to end apartheid in South Africa; and be it further

"Resolved, That the House of Representatives of Kansas hereby urges and increased level of activity by the states including, but not limited to, statements, personal testimony and actions by individual legislators, legislative resolutions and statutes condemning apartheid, calling for increased divestment of state funds in companies doing business in South Africa and any other actions to bring about a rapid end to apartheid in South Africa; and be it further

"Resolved, That the House of Representatives of Kansas hereby calls for the end of the state of emergency, release of Nelson Mandela and all other political prisoners, the dismantling of apartheid and establishment of elections free and open to all South Africans without regard to color, race or creed; and be it further

"Resolved, That the House of Representatives of Kansas call upon the President and Congress of the United States to utilize increasingly strong and effective measures to bring about an end to apartheid; and be it further

"Resolved, That the House of Representatives of Kansas note and commend the House of Representatives of the Congress for its passage of the "Anti-Apartheid Act of 1986" and we further note and commend the Senate Foreign Relations Committee of the Congress for its approval of Senator Lugar's "Comprehensive Anti-Apartheid Act of 1986" with the support of the Senate leadership; and be it further

"Resolved, That in light of continuing injustice, despite current United States' Policies, the House of Representatives of Kansas hereby calls upon the President and Congress of the United States to increase pressure on South Africa including support for divestment, application of economic sanctions, and resisting renewal of bank loans to South Africa; and be it futher

"Resolved, That the Chief Clerk of the House of Representatives is hereby directed to send enrolled copies of this Resolution to the President and each presiding officer of each House of Congress, the Secretary General of the United Nations, the President of the Republic of South Africa, the Ambassador to the United States from the Republic of South Africa, the leadership of the African National Congress, the Archbishop of Capetown."

POM-83. A resolution adopted by the Senate of the State of Michigan; to the Committee on the Judiciary.

"SENATE RESOLUTION No. 81

"Whereas, It has recently been made public that Michigan's William Lucas is a candidate for the position of Assistant Attorney General in charge of the Civil Rights Division of the United States Department of Justice. It is our great pleasure to concur with this recommendation for the federal government's top civil rights position. Mr. Lucas has proven his unique qualifications for this role not only through his achievements in Michigan, but also through his great variety of professional experience in the enforcement of the laws that shape our society; and

"Whereas, William Lucas is a graduate of Manhattan College who served the people of New York City for nine years as a police officer. He earned his law degree from Fordham University, and worked with the United States Department of Justice in the early 1960s. He was a key figure in the desegregation of the Tuskegee, Alabama, schools and put together information on the obstacles preventing equal access to voting that was presented to the Congress during its consideration of the landmark Voting Rights Act of 1965. Mr. Lucas later served with distinction as a special agent with the Federal Bureau of Investigation, which brought him to Michigan; and

"Whereas, Over the past quarter century, William Lucas has served the people of Michigan with great distinction in several positions. In 1970, after serving as undersheriff of Wayne County, Mr. Lucas was elected Wayne County Sheriff, becoming the first Black to hold this position. Subsequently, he has been a pioneer as the first elected Wayne County Executive and as the first Black to serve as a major party candidate for governor of Michigan. In each of these tasks, William Lucas has proven himself to be a man of deep personal integrity and commitment to the most cherished ideals of our nation; now, therefore, be it

"Resolved by the Senate, That we hereby memorialize the United States Senate to confirm Mr. William Lucas as the Assistant Attorney General in charge of the Civil Rights Division of the United States Department of Justice; and be it further

"Resolved, That a copy of this resolution be respectfully transmitted to the United States Senate."

POM-84. A joint resolution adopted by the Legislature of the State of Vermont; to the Committee on Labor and Human Resources.

"JOINT RESOLUTION

"Whereas, the federal government, through Public Law 94-142, 'The Education of all Handicapped Children Act of 1975', has required that the state guarantee a free appropriate public education to all handicapped children in Vermont, with special regard to individual needs, and

"Whereas, the State of Vermont, in Act No. 235 of the Acts of 1988, has recently reaffirmed its commitment to provide a free appropriate public education to all children with handicaps, and

"Whereas, Congress made a commitment to increase federal grants for services to children with handicaps from five percent of the national average per pupil cost in the United States in 1978, to ten percent in 1979, 20 percent in 1980, 30 percent in 1981 and 40 percent in 1982, and

"Whereas, the federal share of special education costs has never exceeded 12 percent and is presently at less than seven percent, a full 33 percentage points below the level originally promised under P.L. 94-142, and

"Whereas, the failure on the part of the Congress to properly fund the education of children with handicaps as originally promised has been detrimental to the entire education system, and

"Whereas, the State of Vermont continues to review its eligibility standards and is not over-identifying children with handicaps, as evidenced by the fact that the proportion of children found eligible for special services is consistent with national averages, and

"Whereas, the State of Vermont is making every effort to provide a free and appropriate public education in as cost-effective a manner as possible, and

"Whereas, in spite of these efforts both the State of Vermont and local school districts have experienced severe financial difficulties in attempting to properly budget and provide the services required by P.L. 94-142, and

"Whereas, the states and communities need additional flexibility to be able to administer their responsibilities under P.L. 94-142 most appropriately for each affected child; Now therefore be it

"Resolved by the Senate and House of Representatives; That it is the sense of this General Assembly that the Congress should appropriate its promised share of the funds needed to comply with its commitment to the states and communities to provide a free appropriate public education to all handicapped children, and be it further

"Resolved, That the Congress should not rob existing programs for special education, vocational education, and compensatory education to pay for new educational initiatives, and be it further

"Resolved, That the General Assembly urges that the Congress allow the states additional flexibility in administering the provisions of P.L. 94-142, focusing more on helping children and less on prescription, bureaucracy, and paperwork, and be it further

"Resolved, That the General Assembly of the State of Vermont does hereby urge its Congressional delegation to take prompt action to achieve the foregoing objectives, and be if further

"Resolved, That copies of this joint resolution be forwarded by the Secretary of State

to the President of the United States Senate, the Speaker of the United States House, the chairs of the U.S. House and Senate Education Committees, and the Vermont Congressional Delegation."

POM-85. A joint resolution adopted by the Legislature of the State of Maine; to the Committee on Veterans' Affairs.

"JOINT RESOLUTION

"Whereas, the sons and daughters of Maine have always been generous in bearing arms to defend the United States of America and willingly took an oath to uphold, protect and defend the Constitution of the United States against all enemies; and

"Whereas, the founding fathers took great pains to establish that the military would always be under civilian control; and

"Whereas, a decision of the Supreme Court of the United States which established the Feres doctrine precludes suits against the United States by veterans for peacetime damages and the so-called "Warner Amendment" declares defense contractors to be government employees when sued by a veteran and thus are defended by the Feres doctrine; and

"Whereas, Title 38 United States Code bars an attorney-at-law from charging a veteran more than $10 for that attorney's services at any level in the Veterans' Administration claims process; and

"Whereas, the sons and daughters of Maine have willingly sacrificed their lives to preserve our liberties, been decorated for heroism against an armed enemy and have kept faith with the Constitution of the United States; now, therefore, be it

"Resolved, That We, your Memorialists, respectfully pray, that in keeping faith with veterans of the Armed Forces of the United States of America, millions of whom have given their lives in defense of the Constitution of the United States, that the Congress of the United States, in keeping with the plain language of the Constitution of the United States, grant, reaffirm and forever pledge that the rights accruing to all citizens under this great document shall not be abridged or denied any citizen who bore arms in defense of that citizen's country; and be it further

"Resolved, That a duly authenticated copy of this Memorial be submitted immediately by the Secretary of State to the Honorable George H.W. Bush, the President of the United States, the President of the Senate and the Speaker of the House of Representatives of the Congress of the United States, to each Member of the Maine Congressional Delegation and to the Governors of the 50 United States."

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. BURDICK, from the Committee on Environment and Public Works:

Frank Henry Habicht II, of Virginia, to be Deputy Administrator of the Environmental Protection Agency.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1125. A communication from the Assistant General Counsel of the Department of Defense, transmitting, pursuant to law, a report of individuals who filed DD Form 1787, Report of DoD and Defense Related Employment, for FY 1988; to the Committee on Armed Services.

EC-1126. A communication from the Director of the Defense Security Assistance Agency, transmitting, pursuant to law, the report concerning the Department of the Army's proposed letter(s) of Offer and Acceptance to Bahrain for Defense Articles estimated to cost $50 million or more; to the Committee on Armed Services.

EC-1127. A communication from the Deputy General Counsel of the Department of Defense, transmitting a draft of proposed legislation to authorize appropriations for fiscal years 1990 and 1991 for military functions of the Department of Defense and to prescribe military personnel strengths for such Department for fiscal years 1990 and 1991, and for other purposes; to the Committee on Armed Services.

EC-1128. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Homelessness: Implementation of Food and Shelter Programs Under the McKinney Act"; to the Committee on Banking, Housing, and Urban Affairs.

EC-1129. A communication from the Deputy Associate Director for Collection and Disbursements, Minerals Mangement Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of certain overpayments of offshore lease revenues; to the Committee on Energy and Natural Resources.

EC-1130. A communication from the Deputy Associate Director for Collection and Disbursements, Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of certain overpayments of offshore lease revenues; to the Committee on Energy and Natural Resources.

EC-1131. A communication from the Deputy Associate Director for Collection and Disbursements, Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of certain overpayments of offshore lease revenues; to the Committee on Energy and Natural Resources.

EC-1132. A communication from the Deputy Associate Director for Collection and Disbursements, Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of certain overpayments of offshore lease revenues; to the Committee on Energy and Natural Resources.

EC-1133. A communication from the Chairman of the Nuclear Regulatory Commission, transmitting, pursuant to law, the report of the nondisclosure of Safeguards Information by the Nuclear Regulatory Commission for the quarter ending March 31, 1989; to the Committee on Environment and Public Works.

EC-1134. A communication from the Administrator of the Environmental Protection Agency, transmitting, pursuant to law, the first annual report on Superfund implementation entitled "Progress Toward Implementing Superfund: Fiscal Year 1987"; to the Committee on Environment and Public Works.

EC-1135. A communication from the Assistant Secretary of State (Legislative Affairs), transmitting, pursuant to law, the texts of ILO Convention N. 167 and Recommendation No. 175 concerning Safety and Health in Construction; to the Committee on Foreign Relations.

EC-1136. A communication from the Assistant Secretary of State (Legislative Affairs), transmitting, pursuant to law, the text of ILO Convention No. 168 and Recommendation No. 176 concerning Employment Promotion and Protection Against Unemployment; to the Committee on Foreign Relations.

EC-1137. A communication from the Assistant Legal Advisor for Treaty Affairs, Department of State, transmitting, pursuant to law, a report on international agreements, other than treaties, entered into by the United States in the sixty day period prior to May 11, 1989; to the Committee on Foreign Relations.

EC-1138. A communication from the Secretary of Education, transmitting, pursuant to law, notice of Final Funding Priorities under the National Institute on Disability and Rehabilitation Research for Research and Demonstration, Rehabilitation Engineering Centers, and Research and Demonstration Knowledge Dissemination, and Utilization; to the Committee on Labor and Human Resources.

EC-1139. A communication from the Secretary of Education, transmitting, pursuant to law, Final Regulations—Chapter 1—Migrant Education Coordination Program for State Educational Agencies; to the Committee on Labor and Human Resources.

EC-1140. A communication from the Secretary of the Veterans' Administration, transmitting a draft of proposed legislation to amend title 10 and title 38, United States Code, to make certain improvements in the educational assistance programs for veterans and eligible persons, and for other purposes; to the Committee on Veterans' Affairs.

EC-1141. A communication from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend section 353 of the Consolidated Farm and Rural Development Act to limit delinquent farmer program borrowers to one write-down of loan principal and interest and to prevent fraud and abuse by extending to borrowers who do not qualify for loan restructuring the ten year recapture provision applicable to borrowers who do qualify; to the Committee on Agriculture, Nutrition and Forestry.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. FORD, from the Committee on Rules and Administration, without amendment:

S.J. Res. 98. Joint resolution to establish separate appropriation accounts for the Senate and the House of Representatives for the payment of official mail costs (Rept. No. 101-27).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. BURDICK, from the Committee on Environment and Public Works:

Frank Henry Habicht II, of Virginia, to be Deputy Administrator of the Environmental Protection Agency.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. PELL, from the Committee on Foreign Relations:

Douglas P. Mulholland, of Maryland, to be an Assistant Secretary of State;

Ivan Selin, of the District of Columbia, to be Under Secretary of State for Management;

Peter F. Secchia, of Michigan, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Italy:

(Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.)

Nominee: Peter F. Secchia.

Post: Ambassador to Italy.

Contributions, amount, date, and donee:

1. Self: 1985—July 2, Fry for Guy Vander Jagt, $80; August 26, Henry for Congress, $500; March 4, Republican National Committee, $50.

1986—June 16, Levi for Congress, $100; July 7, Fry for Guy Vander Jagt, $80; July 9, Bunning for Congress, $100; August 15, Friends of Jim Dunn, $100; June 10, Henry for Congress, $500; August 15, Henry for Congress, $500; April 15, Fund for America's Future, $1,000; January 7, Republican National Committee, $90; January 20, Conservative Caucus, $50; May 5, Stanley Grot for Congress, $500; July 7, Traywick for Congress, $50; August 7, Upton '86, $500; August 29, Conservative Caucus, $100.

1987—May 18, George Bush for President, $1,000; January 30, Paul Henry Congressional Task Force, $500; June 12, Fry for Guy Vander Jagt, $80; November 30, Upton '88 Committee, $500; January 20, Republican National Committee, $100; January 30, Conservative Caucus, $15; February 23, Republican National Committee, $50; May 18, Friends of Stanley Grot, $25; June 2, Conservative Caucus, $100.

1988—January 19, Republican National Committee, $50; March 10, Upton '88, $100; March 14, Black American Salute, $150; March 17, Michigan People for Jim Dunn, $500; April 4, Doug Carl for Congress, $1,000; April 20, Dunn for Senate, $500; April 23, Allgaier for Congress, $500; June 20, Vander Jagt Campaign Committee, $80; August 1, Pete Dawkins for Senate, $50; September 13, Buhl for Congress, $100; July 29, Gerald R. Ford New Leadership Council, $2,000; September 12, Quayle for Vice President, $1,000, September 20, Michigan people for Jim Dunn, $1,000; December 8, Republican National Committee, $100.

2. Spouse: Joan Secchia, July 27, 1987, George Bush for President, $1,000.

3. Children and spouses names: Charles Secchia (son) September 25, 1987, George Bush for President, $1,000; Stephanie Secchia (daughter), none; Sandra Secchia (daughter) none; Mark Secchia (son), none.

4. Parents names: Valerie Kelly (mother) and Enoch Kelly (stepfather), 1988, Republican National Committee, $15; Mr. and Mrs. Norm Peterson (in-laws), 1988, George Bush for President, $300.

5. Grandparents names: Marguerite Smith (grandmother), none.

6. Brothers and spouses names: none.

7. Sisters and spouses names: Valerie Gail Secchia (sister), none.

John Cameron Monjo, of Maryland, a Career Member of the Senior Foreign Service, Class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Indonesia.

(Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.)

Nominee: John C. Monjo.

Post: Ambassador to Indonesia.

Contributions, amount, date, and donee:

1. Self: none.

2. Spouse: Sirkka O. Monjo, none.

3. Children and spouses names: Rolf K. Monjo, none; Christina C. Monjo, none.

4. Parents names: Deceased (Ferdinand and Maymy Monjo), none.*

*Notes pursuant to March 8, 1989 telecon between Ambassaor Monjo and Lucy Reed of the Legal Adviser's Office, Department of State.

5. Grandparents names: Deceased (more than five years ago), none.

6. Brothers and spouses names: Louise Monjo; none.

7. Sisters and spouses names: none.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. NUNN, from the Committee on Armed Services:

Donald B. Rice, of California, to be Secretary of the Air Force (Exec. Rept. No. 101-6);

The following-named officer for reappointment as Vice Chairman of the Joint Chiefs of Staff under title 10, United States Code, section 154:

Gen. Robert T. Herres [redacted] FR, U.S. Air Force.

Mr. NUNN. Mr. President, from the Committee on Armed Services, I report favorably the attached listing of nominations.

Those identified with a single asterisk, (*) are to be placed on the Executive Calendar. Those identified with a double asterisk (**) are to lie on the Secretary's desk for the information of any Senator since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of May 1, May 2, and May 16, 1989 at the end of the Senate proceedings.)

*Lt. Gen. Frederic J. Brown, USA, to be placed on the retired list in the grade of lieutenant general (Reference No. 318).

*Maj. Gen. Frederic M. Franks, Jr., USA, to be lieutenant general (Reference No. 319).

*Gen. Joseph J. Went, USMC, to be reassigned in the grade of general to serve as Assistant Commandant of the Marine Corps and Chief of Staff (Reference No. 321).

*Maj. Gen. Norman H. Smith, USMC, to be lieutenant general (Reference No. 322).

**In the Air Force there are 27 promotions and appointments to the grade of lieutenant colonel and below (list begins with Wayne E. Balcom) (Reference No. 323).

**In the Navy and Naval Reserve there are 5 appointments and reappointments to the grade of commander and below (list begins with Kriss B. Stanley) (Reference No. 324).

*Maj. Gen. James R. Hall, Jr., USA, to be lieutenant general (Reference No. 333).

**In the Air Force Reserve there are 9 appointments and promotions to the grade of colonel and below (list begins with James E. Mullen) (Reference No. 334).

**In the Air Force Reserve there are 20 promotions to the grade of lieutenant colonel (list begins with Alan V. Box) (Reference No. 335).

**In the Air Force Reserve there are 3 appointments to the grade of lieutenant colonel (list begins with Jon M. Owings) (Reference No. 336).

**In the Air Force there is one appointment to the grade of second lieutenant (Robert J. Frink) (Reference No. 336).

Total: 70.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. CONRAD (for himself, Mr. HARKIN, Mr. LEAHY, Mr. MITCHELL, Mr. FOWLER, and Mr. DASCHLE):

S. 1008. A bill to promote the growth and economic diversification of, and to increase business and employment opportunities in rural America, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. DANFORTH (for himself, Mr. HOLLINGS, Mr. INOUYE, Mr. BRYAN, and Mr. MCCONNELL):

S. 1009. A bill to amend section 315 of the Communication Act of 1934 with respect to the purchase of broadcasting time by candidates for public office; to the Committee on Commerce, Science, and Transportation.

By Mr. WILSON (for himself, Mr. D'AMATO, and Mr. HELMS):

S. 1010. A bill to encourage further cooperation between Federal, State, and local law enforcement agencies in their efforts against drug trafficking and other serious criminal activities; to the Committee on the Judiciary.

By Mr. EXON:

S. 1011. A bill to amend title XVIII of the Social Security Act and other provisions of law to delay for 1 year the effective dates of the supplemental Medicare premium and additional benefits under part B of the Med-

icare Program, with the exception of the spousal impoverishment benefit; to the Committee on Finance.

By Mr. EXON (for himself and Mr. BOREN):

S. 1012. A bill to amend the Disaster Assistance Act of 1988 to extend disaster assistance to losses due to adverse weather conditions in 1988 or 1989 for crops planted in 1988 for harvest in 1989, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. PRESSLER:

S. 1013. A bill to amend the Agricultural Act of 1949 to remove the 5-percent acreage limitation requirement on producers of the 1990 crop of oats and to require that the acreage base of such crop of oats be determined separate from that of barley, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. DURENBERGER:

S. 1014. A bill to provide for the temporary suspension of the duty on certain two-stroke cycle piston engines; to the Committee on Finance.

S. 1015. A bill to suspend temporarily the duty on certain plastic web sheeting; to the Committee on Finance.

By Mr. DOLE:

S. 1016. A bill to change the name of "Marion Lake," located northwest of Marion, KS, to "Marion Reservoir"; to the Committee on Environment and Public Works.

By Mr. FORD (for himself, Mr. LEAHY, Mr. HEFLIN, and Mr. PRYOR):

S. 1017. A bill to enhance the ability of the Bureau of the Census to gather information concerning rural areas for Congress, to improve historic preservation efforts, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. HEINZ (for himself and Mr. DECONCINI):

S. 1018. A bill to set forth principles for United States nationals involved in industrial cooperation projects in the Soviet Union and the Baltic States and for other purposes; to the Committee on Foreign Relations.

By Mr. FOWLER (for himself, Mr. LEAHY, Mr. PRYOR, Mr. KERREY, Mr. CONRAD, and Mr. BOREN):

S. 1019. A bill to amend the Rural Electrification Act of 1936 to establish a nationwide rural star school program to improve educational opportunities in rural areas, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. BRADLEY (for himself and Mr. MATSUNAGA):

S. 1020. A bill to amend the Foreign Assistance Act of 1961 to authorize appropriations for the Child Survival Fund and for other health and disease assistance programs; to the Committee on Foreign Relations.

By Mr. McCAIN:

S. 1021. A bill to provide for the protection of Indian graves and burial grounds, and for other purposes; to the Select Committee on Indian Affairs.

By Mr. INOUYE:

S. 1022. A bill to amend the Communications Act of 1934 to provide authorization of appropriations for the Federal Communications Commission, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. DASCHLE (for himself, Mr. LEAHY, Mr. PRYOR, and Mr. CONRAD):

S. 1023. A bill to provide grants by the Department of Agriculture for technology and emergency assistance to benefit rural areas, to target Rural Electrification Administration investments toward business development, telecommunications improvement, and community planning, to assist distressed rural hospitals with FmHA community facility loans, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. DASCHLE (for himself, Mr. LEAHY, and Mr. CONRAD):

S. 1024. A bill to improve the coordination of the rural development efforts of the Department of Agriculture, and to increase the rural development efforts of the Rural Electrification Administration, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. KERRY:

S. 1025. A bill to authorize appropriations to carry out the Magnuson Fishery Conservation and Management Act for fiscal years 1990, 1991, and 1992, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. MOYNIHAN:

S. 1026. A bill to prevent abuses of the HUD section 8 Moderate Rehabilitation Program; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. HARKIN (for himself and Mr. CONRAD):

S. 1027. A bill to enhance the role of the Rural Electrification Administration in rural development and in small community water and sewer improvement, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. BOREN (for himself, Mr. LEAHY, Mr. PRYOR, and Mr. CONRAD):

S. 1028. A bill to amend the Consolidated Farm and Rural Development Act to establish Farmers Home Administration loan rates for health care facilities based on the average per capita income of the area to be served, to increase water facility grant authorization levels, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. BAUCUS (for himself and Mr. LEAHY):

S. 1029. A bill to establish a nationwide business "incubator" program to be administered by the Rural Electrification Administration, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. KERREY (for himself, Mr. LEAHY, and Mr. CONRAD):

S. 1030. A bill to improve telecommunications links for rural businesses, to make available to rural areas information concerning the availability of rural development assistance programs through the National Agriculture Library, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. DOMENICI:

S. 1031. A bill to establish an Engineering Extension Service as a mission of the Energy Extension Service to enable entrepreneurs to receive engineering information vital to such businesses, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. HEINZ (for himself and Mr. HARKIN):

S. 1032. A bill to amend the Agricultural Act of 1949 to establish eligibility requirements for agricultural commodity price support programs with respect to the delivery of irrigation; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. SPECTER:

S.J. Res. 136. Joint resolution designating August 8, 1989 as "National Neighborhood Crime Watch Day"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MITCHELL:

S. Con. Res. 38. Concurrent resolution providing for a conditional recess or adjournment of the Senate from May 18 or 19, 1989 until May 31, 1989, and a conditional adjournment of the House from May 25, 1989 until May 31, 1989; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. CONRAD (for himself, Mr. HARKIN, Mr. LEAHY, Mr. MITCHELL, Mr. FOWLER, and Mr. DASCHLE):

S. 1008. A bill to promote the growth and economic diversification of, and to increase business and employment opportunities in rural America, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

RURAL INVESTMENT FUND ACT

Mr. CONRAD. Mr. President, I am pleased to rise today to introduce the Rural Investment Fund Act of 1989. I do so on behalf of myself, Senators HARKIN, LEAHY, MITCHELL, FOWLER and DASCHLE. This bill will help provide the needed capital for rural small business retention, creation, and expansion.

In my meetings and discussions with bankers, economic development authorities, and small businesses in North Dakota, it is clear that rural America is facing severe economic decline. Unemployment, underemployment, poverty, and outmigration are increasingly significant problems in rural communities throughout the country. The lack of economic diversity in rural areas has made these rural areas more vulnerable during economic downturns.

Although 25 percent of our Nation's population lives in rural areas, this number is declining rapidly. Across the Nation, rural areas are experiencing losses in population and job availability. The Agriculture Department estimates that rural America lost 630,000 people due to outmigration in 1985–86 alone—a larger number than the average of either the fifties or sixties. Many college graduates leave rural areas due to lack of job opportunities, not because of a desire to leave their home State.

And in 1986, more than 1,000 rural counties had an annual average unemployment rate exceeding 9 percent.

Previously, rural policy focused almost solely on agricultural issues; however, the problems of rural areas extend beyond these issues. While agriculture will always be important to the rural economy, one key to rural economic development is diversification.

By shifting our legislative focus towards new business development we can rebuild our rural communities, enabling them to make a larger contribution to the global economic issues facing our country.

Most rural areas lack access to adequate capital to shift their focus to diversify their economic base. From discussions with North Dakotans, I have learned the problem is not just the cost of capital, but its availability. Most owners of rural small businesses find themselves relying upon personal savings, funds provided by family members, or personal loans by friends, especially for long-term credit.

Rural businesses have difficulties in obtaining sufficient capital from local lending institutions. The commercial lenders in rural areas do not directly provide equity capital, but generally make loans to meet short-term working capital needs. Small rural businesses who need capital have to rely on a relatively limited array of potential investors. Access to venture capital firms and investment banks is also limited.

In the past decade, small businesses have out-performed large businesses in creating jobs. The Small Business Administration reports that in 1988, small business continued to lead in job generation. However, rural areas are not experiencing this growth in small business. With the population movement to metropolitan areas and with the lack of available capital, it should be no surprise that small business growth in rural areas is 30-percent slower than in urban areas. In North Dakota, small business starts declined 29.4 percent between March 1987 and March 1988.

The Rural Investment Fund Act establishes an investment fund of $100 million per year for 3 years. This fund will be established under the Rural Partnerships Investment Board and authorizes it to provide lines of credit to State or local entities to form revolving loan funds for small business retention, creation, and expansion. These entities will serve rural areas, and include economic development districts, State agencies, counties, towns, townships, or nonprofit private community development corporations. As the funds are repaid to the lending entity, they will go into the entities' permanent revolving loan fund and will later be replaced to create more jobs.

State entities may receive a line of credit up to $1,250,000 over 5 years and all other entities may receive up to $750,000 over 5 years. Eligible entities are to be funded in at least 45 States. The maximum amount of funding to any one State will not exceed $10 million.

To receive the partnership funds, the entities must receive commitments from other sectors to match funds equal to the line of credit to be extended.

The revolving loan funds must be matched by other sectors and used for rural small business retention, creation, or expansion. The loan funds may be used to provide debt or equity capital, on loan guarantees. At least one bank, savings and loan, or community development corporation must provide at least a 50-percent match of each investment or loan made to each business applicant.

These partnerships will work well with existing Federal programs to provide powerful mechanisms to ensure rural businesses have access to much needed capital.

The trends of unemployment, underemployment and outmigration cannot continue. Rural America needs help now. Like the national and international economies, the urban and rural economies are interdependent. We can not afford to wait.

Revitalizing the rural economy must be a high priority in the 101st Congress. I believe this bill will help to encourage investment in rural America and contribute to its recovery.

I urge my colleagues to support this bill, and I ask unanimous consent that the text of the bill be printed in the RECORD.

S. 1008

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Rural Investment Fund Act of 1989".

SEC. 2. DEFINITIONS.

As used in this Act:

(1) BOARD.—The term "Board" means the Board of Directors of the Rural Partnerships Investment Board established in section 3(b).

(2) ELIGIBLE ENTITY.—The term "eligible entity" means a corporation that—

(A) is a nonprofit private corporation or a public entity that is—

(i) the governing body of each public regional organization (such as the governing body of an economic development district) that is chartered or otherwise organized under State law for the purpose of promoting economic development;

(ii) the agency of each State that is primarily responsible for rural economic development programs within the State;

(iii) the governing body of a country or other political subdivision of a State;

(iv) the governing body of a town or township within a State;

(v) an incorporated public organization or a nonprofit private community development corporation, or similar nonprofit private organization, that is chartered or otherwise organized under State law for the purpose of promoting economic development; or

(vi) an Indian tribe (as defined in section 4(b) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b)), any Indian organization or entity chartered under the Act of June 18, 1934 (25 U.S.C. 1001 et seq.) commonly known as the "Indian Reorganization Act", or any tribal organization (as defined in the section 4(c) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b(c)); and

(B) meets the requirements of paragraphs (3) and (5) of section 4(c);

(C) possesses the powers reasonably necessary to perform the functions and activities described in this Act;

(D) has a professional staff and management ability (including adequate accounting, legal, and business servicing abilities or experience); and

(E) meets any other requirements established by the Board to carry out this Act.

(3) INVESTMENT BOARD.—The term "Investment Board" means the Rural Partnerships Investment Board established in section 3(a).

(4) LOCAL BUSINESS.—The term "local business" means—

(A)(i) a business concern, located in a rural area, that—

(I) is incorporated under State law; and

(II) is independently owned and operated as defined by the Board; and

(ii) an individual who plans to organize and operate an entity of the type described in subparagraph (A); and

(B) that meets additional requirements that are established by the Board to carry out the intent of this Act.

(5) METROPOLITIAN COUNTY.—The term "metropolitan county" means a county that contains at least a part of a metropolitan statistical area as designated by the Office of Management and Budget.

(6) RURAL AREA.—The term "rural area" means all territory of a State that is not within a metropolitan statistical area or the outer boundary of any city or town having a population of 20,000 or more based on the latest dicennial census of the United States.

(7) RURAL FUND.—The term "Rural Fund" means the Rural Business Investment Fund established under section 4(a).

(8) SECRETARY.—The term "Secretary" means the Secretary of Agriculture, unless otherwise specified in this Act.

(9) STATE.—The term "State" means any of the 50 States.

SEC. 3. RURAL PARTNERSHIPS INVESTMENT BOARD.

(a) ESTABLISHMENT.—There is established a "Rural Partnerships Investment Board" to provide lines of credit to eligible entities whose applications have been approved by the Board, to enable such entities to establish, maintain, or expand revolving funds that are used for loans, or to guarantee loans, or for other investments in new or expanding rural local businesses in conjunction with loans or other investments made by banks (as defined in section 2(c) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(c))), savings and loan associations (as defined in title IV of the National Housing Act, as amended (12 U.S.C. 1724 et seq.)), or community development credit unions.

(b) BOARD OF DIRECTORS.—

(1) IN GENERAL.—The Board of Directors of the Investment Board shall consist of—

(A) the Administrator of the Rural Electrification Administration;

(B) the Administrator of the Farmers Home Administration;

(C) the Administrator of the Extension Service of the Department of Agriculture; and

(D) two members who shall be experienced in rural development and related matters to be appointed by the President with the advice and consent of the Senate, of which each member shall be from a separate political party.

(2) CHAIRPERSON.—The Chairperson of the Board shall be elected by the members of the Board from among the Board members who are Administrators under subparagraphs (A) through (C) of paragraphs (1), and shall serve for a 2-year period. Such Chairperson may serve consecutive terms.

(3) VACANCIES.—Vacancies on the Board shall be filled in the same manner as the vacant position was previously filled.

(4) CHIEF EXECUTIVE OFFICER.—A chief executive officer shall be selected by the Board and shall serve at the pleasure of the Board.

(5) QUORUM.—A quorum shall consist of three members of the Board. All decisions made by the Board shall require an affirmative vote of a majority of the members.

(6) COMPENSATION.—Members of the Board—

(A) appointed under subparagraphs (A), (B), and (C) of paragraph (1) shall receive reasonable allowances for necessary expenses of travel, lodging, and subsistence incurred in attending meetings and other activities of the Investment Board, as set forth in the bylaws issued by the Board of Directors, except that such level shall not exceed the maximum fixed by subchapter 1 of chapter 57 of title 5, United States Code, for officers and employees of the United States; and

(B) appointed under subparagraph (D) of paragraph (1) shall receive compensation for the time devoted to meetings and other activities at a daily rate not to exceed the daily rate of compensation prescribed for Level III of the Executive Schedule under section 5314 of title 5, United States Code, and reasonable allowances for necessary expenses of travel, lodging, and subsistence incurred in attending meetings and other activities of the Investment Board, as set forth in the bylaws issued by the Board of Directors, except that such level shall not exceed the maximum fixed by subchapter 1 of chapter 57 of title 5, United States Code, for officers and employees of the United States.

(7) RULES AND RECORDS.—The Board shall adopt such rules and procedures as it may consider appropriate for the transaction of the business of the Investment Board, and shall keep permanent and accurate records and minutes of its acts and proceedings.

(c) POWERS OF THE INVESTMENT BOARD.—The Investment Board shall be a body corporate that shall have the power to—

(1) operate under the direction of its Board;

(2) adopt, alter, and use a corporate seal, which shall be judicially noted;

(3) provide for one or more officers, employees, and agents, as may be necessary, define their duties, and require surety bonds or make other provisions against losses occasioned by acts of such persons;

(4) hire, promote, compensate, and discharge officers and employees of the Investment Board, without regard to title 5, United States Code, except that no such officer or employee shall receive an annual rate of basic pay in excess of the rate prescribed for Level III of the Executive Schedule under section 5314 of title 5, United States Code;

(5) prescribe by its Board its bylaws, that shall be consistent with law, and that shall provide for the manner in which—

(A) its officers, employees, and agents are selected;

(B) its property is acquired, held, and transferred;

(C) its general operations are to be conducted; and

(D) the privileges granted by law are exercised and enjoyed;

(6) with the consent of any executive department or independent agency, use the information, services, staff, and facilities of such in carrying out this Act;

(7) enter into contracts and make advance, progress, or other payments with respect to such contracts;

(8) sue and be sued in its corporate name, and complain and defend in courts of competent jurisdiction;

(9) acquire, hold, lease, mortgage, or dispose of, at public or private sale, real and personal property, and otherwise exercise all the usual incidents of ownership of property necessary and convenient to its operations;

(10) modify or consent to the modification of any contract or agreement to which it is a party or in which it has an interest under this Act;

(11) make such rules and regulations as the Board determines necessary and appropriate to carry out the authority vested in the Board under this Act;

(12) procure the temporary (not in excess of 2 years) or intermittent services of experts or consultants or organizations thereof, and in such cases such services shall be without regard to the civil service and classification laws and without regard to section 5 of title 41, at rates not to exceed the daily equivalent of the highest rate payable under section 5332 of title 5, United States Code, including traveltime, and while such individual is away from the home or regular place of business of such individual, travel expenses as authorized under section 5703 of title 5, United States Code; and

(13) exercise other powers as set forth in this Act, and such other incidental powers as are necessary to carry out its powers, duties, and functions in accordance with this Act.

SEC. 4. ESTABLISHMENT OF INVESTMENT FUND.

(a) ESTABLISHMENT.—

(1) IN GENERAL.—There is established in the Treasury of the United States a fund for the use of the Board in carrying out the provisions of this Act that shall be known as the "Rural Business Investment Fund".

(2) AVAILABILITY.—The Fund established under paragraph (1) shall be available to the Board to provide lines of credit for revolving funds to be operated by approved eligible entities to serve local businesses in rural areas.

(b) USE.—

(1) LINES OF CREDIT.—Amounts contained in the fund established under subsection (a) shall be used by the Board to provide lines of credit in amounts determined appropriate by the Board, but in no event shall any such line of credit exceed $750,000 to an approved eligible entity. Each line of credit shall be made available over a period of time established by the Board for each such entity, but in no event shall any such period of time extend beyond the date on which the Investment Board is terminated under section 5(m).

(2) EXCEPTION.—Notwithstanding paragraph (1), if the approved eligible entity is the agency of any State that is primarily responsible for the rural economic development programs within such State, and if such agency agrees to serve all rural areas of the State regarding assistance provided under this Act, the Board may provide a line of credit to such agency in an amount that shall not exceed $1,250,000, to be provided in the manner described in paragraph (1).

(3) AMOUNTS DRAWN FROM LINE.—Amounts drawn from each line of credit by each approved eligible entity shall be used solely as provided under this Act.

(c) APPLICATIONS OF ELIGIBLE ENTITIES FOR LINES OF CREDIT.—

(1) FEDERAL REGISTER NOTICES.—The Board shall publish notices of solicitations for applications for lines of credit in the Federal Register and such notices shall contain—

(A) the application procedures established by the Board;

(B) the application requirements of paragraph (3);

(C) the deadlines for submission of applications (which in no event shall be less than 150 days after the publication of the applicable notice);

(D) a copy of all available response forms;

(E) a summary of the functions of the Board regarding applications; and

(F) other information determined appropriate by the Board.

(2) SUBMISSION AND CONSIDERATION.—An eligible entity that desires to receive a line of credit under this Act shall submit an application to the Board at such time, in such form, and containing such information and documentation, including a description of the areas to be served, as the Board shall prescribe under paragraph (1), and the Board shall consider each such application based on the requirements of this Act.

(3) ELIGIBLE ENTITY.—

(A) MATCHING FUNDS.—In order for an application to be considered for approval by the Board for a line of credit, each eligible entity that submits an application shall—

(i) certify in writing that it shall use such funds as part of a revolving fund to invest in, lend funds to, or guarantee loans made to, local businesses in accordance with this Act; and

(ii)(I) agree to provide matching funds (Federal funds shall not be used to satisfy such matching requirement), in amounts that are at least equal to the amount of the line of credit to be provided by the Board, that shall be in the form of—

(aa) cash or cash equivalents; or

(bb) letters of credit in favor of the eligible entity issued or submitted by banks, savings and loan associations, insurance companies, similar Federally regulated financial institutions, local or State governments or private philanthrophic foundations, as determined appropriate and acceptable by the Board; or

(II) demonstrate, through procedures determined appropriate and acceptable by the Board, that banks, savings and loan associations, or community development credit unions are prepared to participate with the eligible entity in a lending, guarantee, or investment program for the benefit of local businesses, and that the total financial commitment demonstrated by the letters of intent or other documents is at least equal to the value of the line of credit for which the eligible entity is applying.

(B) EXCEPTION FOR CERTAIN ELIGIBLE ENTITIES.—If the average per capita income level

of the counties containing the rural areas served by an eligible entity is less than 70 percent of the national average per capita income for the most recent year for which such information is available, each such eligible entity shall only be required to match 50 percent of the funds provided by the Board in the same manner described in paragraph (3)(A)(ii) (I) or (II). A list of the average per capita income and population of each county in the United States that contains rural areas, and the national average per capita income for such year, shall be published in the Federal Register and otherwise made available by the Board to the public.

(4) MONITORING COMPLIANCE.—The Board shall establish procedures to monitor the compliance of each eligible entity participating in the program authorized by this Act with the requirements of this Act.

(5) ELIGIBLE ENTITY REVOLVING FUND REQUIREMENT.—To be eligible to receive a line of credit from the Rural Fund, the applicant eligible entity shall—

(A) demonstrate its ability or potential capacity to make sound business, lending and investment decisions and to provide business counseling and technical assistance;

(B) demonstrate its ability to operate consistent with the requirements of this Act and to increase the availability of credit in rural areas to promote the creation or expansion of viable businesses in rural areas;

(C) identify the proposed service area, which shall have common characteristics (such as a similar industrial, labor, or other markets, similar geographic or socioeconomic conditions, or other related considerations), and, to the extent that such area includes any towns or townships, such towns or townships shall be served in their entirety; and

(D) provide an assurance that its service area will consist of an area within the State whose median household income was less than the Statewide nonmetropolitan median household income for such State.

(6) FACTORS IN APPROVAL OF APPLICATIONS.—In determining which applications to approve, and the maximum amount of funds to be offered in each line of credit, the Board shall grant a preference to eligible entities—

(A) that have experience in serving local credit or equity needs and in making sound business and investment decisions, or that have the ability to serve such needs and make such decisions;

(B) whose boards of directors, or governing bodies if no such board exists, are composed of a cross-section of individuals (such as individuals with a business, community development or regional development background, or individuals who are State, local or county government officials, or individuals involved in banking, financial, or other investment activities);

(C) that agree, and are able, to provide funds that are in excess of the funds to be provided by the Board to such eligible entity under this Act;

(D) that are likely to stimulate significant job creation or retention and new business creation or business expansion per dollar of funds provided under this section;

(E) that submit applications that demonstrate the ability and willingness to provide continuing technical and management assistance, training, financial and business guidance, and planning, to approved local businesses;

(F) that demonstrate that the activities of the eligible entity are consistent with State, county or local goals, whichever is applicable, regarding long-term economic growth and community development; and

(G) that submit applications containing a comprehensive investment strategy, developed in consultation with the applicable State, regional, county or local unit of government.

(7) GEOGRAPHIC SPREAD.—

(A) IN GENERAL.—In awarding lines of credit under this section the Board shall attempt, as much as reasonably practicable and consistent with sound financial judgment, to assure that all rural regions of the United States benefit from such awards.

(B) MINIMUM AMOUNT OF FUNDS.—After considering the availability of qualified applications, and if consistent with good investment practices and the other requirements of this Act, the Board shall approve the application of at least one eligible entity in each of at least 45 States. The Board shall, to the maximum extent practicable and appropriate, ensure that eligible entities that are approved by the Board in any given State receive at least $750,000 (per State) out of the funds provided under subsection (d).

(C) MAXIMUM AMOUNT OF FUNDS.—The total amount of funds provided under this Act to eligible entities in any State shall not exceed $10,000,000.

(D) SPECIAL PROGRAM.—

(i) IN GENERAL.—The Board shall issue regulations to establish a program that targets the benefits of the Federal lines of credit provided under this section to those rural areas and residents with special needs.

(ii) FIVE PERCENT RULE.—If consistent with sound investment practices, not less than 5 percent of the funds appropriated under subsection (d) shall be issued to eligible entities that will serve—

(i) local businesses located in very distressed rural areas, as defined by the Board; and

(ii) local businesses located in rural areas that provide beneficial services to rural residents such as improved medical, hospital, or health care, licensed day care activities, improved services for the handicapped, the disabled, the elderly or other needy individuals, improved educational opportunities, improved public transportation services for needy individuals, or other related services as determined appropriate by the Board.

(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $100,000,000 in each of fiscal years 1990 through 1992 to be made available to the Rural Fund and the Board for the purpose of carrying out this Act.

(e) RELOCATION AND REFINANCING.—The Board shall establish rules and procedures to prohibit eligible entities from using the assistance received under this Act for loans and investments, or for issuing guarantees, that would—

(1) facilitate the relocation of a local business from one community to another; or

(2) refinance the existing debt of a local business, except that such refinancing may be undertaken with such assistance if it is undertaken in conjunction with a substantial expansion effort by the local business.

SEC. 5. LOCAL REVOLVING FUNDS.

(a) ESTABLISHMENT.—

(1) IN GENERAL.—Each eligible entity approved by the Board to participate in the program established under this Act shall establish a local revolving fund account in which to deposit—

(A)(i) amounts received from the Board under this Act;

(ii) any local matching funds received under section 4(c)(3)(A); and

(iii) any profits or income derived from the activities of the revolving fund established under this subsection; less

(B) reasonable operating expenses or losses incurred in administering such fund.

(2) PLACE OF ESTABLISHMENT.—Each local revolving fund established under this subsection may be established in one or more member banks of the Federal Reserve System or any Federally insured State nonmember bank (as defined in section 3(b) of the Federal Deposit Insurance Act (12 U.S.C. 1813(b)) and the funds, except as used as authorized in subsection (b), shall be held in cash and receive interest or be invested in direct obligations of the United States or in obligations guaranteed by the United States or an agency thereof.

(b) USE OF FUND.—Amounts in the local revolving fund may be used—

(1) to provide debt or equity capital, or loan guarantees, to local approved businesses as authorized in this Act, under procedures established by the Board;

(2) to cover the costs of providing training, business or financial planning, management or technical assistance to local approved businesses in amounts that do not exceed amounts or levels described in standards established by the Board;

(3) if financial investments are made in the eligible entity in accordance with section 4(c)(3)(A)(ii)(I)(aa) or (bb), to provide for a return of capital to non-Federal investors in the revolving fund, except that if such revolving fund experiences capital or other losses the share of returned capital under this paragraph shall be proportionately, or otherwise appropriately reduced to reflect such loss, under procedures established by the Board; or

(4) to cover reasonable operating or capital expenses, losses, or for other charges as prescribed in rules or standards established by the Board.

(c) DECISIONS CONCERNING FUNDING.—Eligible entities that receive a line of credit under section 4 shall make case-by-case determinations concerning applications submitted by each local business for loans, equity capital or loan guarantees, under general procedures and requirements established by the Board.

(d) REQUIREMENT OF PARTNERSHIPS FOR LOANS OR INVESTMENTS—Funds in each local revolving fund shall be loaned or invested only if one or more banks, savings and loan institutions, or community development credit unions, under procedures established by the Board, provide at least 50 percent of each investment or loan made by each such revolving fund to each such local business, or provide the funds that are guaranteed by such local revolving fund.

(e) INVESTMENT SIZE LIMITS.—

(1) IN GENERAL.—Partnership loans, investments, and any guarantees made by each eligible entity that receives assistance from the Rural Fund, shall not exceed $500,000, in total, in any given calendar year, to the same approved local business or to other local businesses that are financially connected or otherwise related to such local business (as defined by the Board). The provisions of this subtitle shall not limit the total amount of loans from sources other than eligible entities that each local business may receive.

(2) INELIGIBILITY.—Any local business that employs 100 or more employees shall not be eligible to receive assistance from a local re-

volving fund that receives assistance under this Act.

(f) SUBORDINATED INTEREST OF LOCAL REVOLVING FUND.—If a bank, savings and loan association, or a community development credit union has made an investment in a local business in conjunction with an investment made out of the revolving fund of an approved eligible entity, the amount invested by such revolving fund in such local business may be subordinated to the other investments in any instance, to any degree, and in any manner.

(g) OTHER INVESTORS.—A bank, savings and loan association, or community development credit union that contributes capital to an eligible entity that receives Federal assistance under this Act may establish contractual arrangements with such entity concerning the return of such investments in the local revolving fund consistent with subsection (b)(3).

(h) ADDITIONAL CAPITAL.—The Board shall promulgate regulations that provide each participating eligible entity with a sufficient amount of time to obtain additional capital or lines of credit, if any investors, pursuant to the contract with the eligible entity under subsection (g), withdraw some or all of their investment.

(i) CONTINUATION OF LINE OF CREDIT.—A line of credit provided to an approved eligible entity under section 4 for use in a local revolving fund shall continue to be available to be drawn down upon until the Investment Board is terminated or until the line of credit is canceled, revoked or suspended by the Board as described in subsections (j), (k), or (l).

(j) CANCELLATION OF LINE OF CREDIT.—The Board may cancel any prospective payments to be made from any approved line of credit under this Act if the Board determines that the eligible entity participating in the program established under this Act made investments or acted in a manner that was inconsistent with the provision of this Act.

(k) CONTINUATION OF BUSINESS PROMOTION ACTIVITIES.—

(1) INITIAL FEDERAL CONTRIBUTION.—The Federal assistance provided to each eligible entity under this Act shall become the property of each such entity on the termination of the Investment Board if—

(A) the eligible entity that administers the local revolving fund has operated the fund in a manner that is consistent with this Act as determined by the Board; and

(B) the eligible entity contracts with the Board and the Secretary to continue to provide lending, investment, and guarantee assistance consistent with this Act.

(2) EXCEPTION.—

(A) DEVELOPMENT OF MONITORING PROCEDURES.—Not later than the date on which the Investment Board is terminated, the Secretary shall develop procedures to enable the Secretary to monitor the operations of eligible entities that receive Federal assistance under this Act which continue to exist on the date the Board is terminated.

(B) REFUND OF FUNDS.—Notwithstanding paragraph (1), if the Secretary finds that the purpose of any eligible entity is no longer to promote business development in a manner consistent with this Act, the Secretary shall require the eligible entity to refund to the Secretary of the Treasury an amount equal to the amount of funds drawn out of the Federal line of credit issued to the eligible entity together with an appropriate amount of interest on such amount, as determined by the Secretary.

(C) HEARINGS.—The Secretary shall establish rules and procedures—

(i) to determine the amount of interest required under subparagraph (B); and

(ii) to provide a hearing to any eligible entity aggrieved by any order of the Secretary under this paragraph if such entity requests such a hearing within 30 days after receiving the order of the Secretary.

(D) JUDICIAL REVIEW.—

(i) RIGHT.—If any eligible entity determines that it is aggrieved by any final decision of the Secretary issued under subparagraph (B), it may obtain judicial review of such decision by filing, not later than 30 days after the date of the delivery or service of the final decision, a complaint against the United States in the United States court for the district in which such entity resides or is engaged in business.

(ii) TRIAL DE NOVO.—An action commenced under clause (i) shall be by a trial de novo by the court.

(iii) EFFECT OF ORIGINAL DECISION.—During the pendency of an action for judicial review under this clause, or an appeal of a decision concerning such action, the administrative action of the Secretary contained in the decision that is under review shall be and remain in full force and effect except as provided in clause (iv).

(iv) STAY OF ACTION.—The requirement of clause (iii) shall not apply, and the court may issue a stay of such action, if

(I) an application to the court is filed not later than 10 days after the filing of the original action in such court;

(II) a hearing on such application has been held; and

(III) the court, after considering the application filed under this clause, determines that the applicant is likely to prevail on the merits of the original action and that irreparable injury will be done if a stay of such action is not issued.

(v) INTEREST.—Interest shall accrue in favor of the Secretary on any amounts determined to be due to the Secretary by the final judicial disposition.

(l) ANNUAL REPORTS TO THE BOARD.—

(1) IN GENERAL.—Each eligible entity that receives assistance under this Act shall annually prepare and submit to the Board, at such time, and in such form as the Board may require, a report describing the financial condition of the eligible entity, and the investments, cash revenues, income from investments, loans made, equity positions taken, guarantees issued, losses sustained or taken, operating expenses, loss rates, and such other matters as the Board determines appropriate concerning the eligible entity.

(2) POST TERMINATION.—After the Board terminates under subsection (m), the reports required under paragraph (1) shall be submitted to the Secretary who shall stand in the same position as the Board under such paragraph.

(m) TERMINATION OF BOARD.—The Investment Board established by section 3(a) shall terminate on the last day of the 5th calendar year following the date of enactment of this Act.

SEC. 6. COMPLIANCE AND ENFORCEMENT.

(a) REVOCATION OF LINE OF CREDIT AND REFUND.—

(1) GROUNDS FOR REVOCATION.—A line of credit shall be revoked or suspended by the Board, and a full refund of the Federal investment shall be requested by the Board—

(A) for false statements knowingly made in any written statement required under this Act, or under any regulation or Federal Register notice issued under this Act;

(B) if any written statement required under this Act, or under any regulation or Federal Register notice issued under this Act, fails to state a material fact necessary in order to make the statement not misleading in the light of the circumstances under which the statement was made;

(C) for willful or repeated violation of, or willful or repeated failure to observe, any provision of this Act;

(D) for willful or repeated violation of, or willful or repeated failure to observe, any rule or regulation authorized under this Act; or

(E) for violation of, or failure to observe, any cease and desist order issued by the Board under this subsection.

(2) CEASE AND DESIST ORDERS.—Where an eligible entity has not complied with any provision of this Act, or of any regulation issued pursuant thereto, or is engaging or is about to engage in any acts or practices that constitute or will constitute a violation of such Act or regulation, the Board may order such entity to cease and desist from such action or failure to act. The Board may further order such entity to take such action or to refrain from such action as the Board determines necessary to insure compliance with this Act and the regulations issued thereunder.

(3) ORDER TO SHOW CAUSE, CONTENTS, AND HEARING.—

(A) ORDER.—Prior to revoking or suspending a line of credit under paragraph (1), or issuing a cease and desist order under paragraph (2), the Board shall serve on the eligible entity an order to show cause why an order revoking or suspending the line of credit or a cease and desist order should not be issued.

(B) CONTENTS.—An order to show cause under subparagraph (A) shall contain a statement of the matters of fact and law asserted by the Board and the legal authority and jurisdiction under which a hearing is to be held, and shall state that a hearing will be held before the Board at a time and place stated in the order.

(C) HEARING.—If after hearing under subparagraph (B), or a waiver thereof, the Board determines on the record that an order revoking or suspending the line of credit, or a cease and desist order should issue, or an order requiring a refund of the Federal investment in addition to reasonable interest thereon should issue, the Board shall promptly issue such order, which shall include a statement of the findings of the Administration and the reasons for such findings and specify the effective date of the order, and shall cause the order to be served on the entity.

(4) SUBPOENA OF PERSONS, BOOKS, PAPERS, AND DOCUMENTS; FEES AND MILEAGE; ENFORCEMENT.—

(A) SUBPOENA.—The Board may require by subpoena the attendance and testimony of witnesses and the production of all books, papers, and documents relating to the hearing from any place in the United States.

(B) FEES AND MILEAGE.—Witnesses summoned before the Board shall be paid by the party at whose instance such witnesses were called the same fees and mileage that are paid witnesses in the courts of the United States.

(C) ENFORCEMENT.—In the case of disobedience to a subpoena under this paragraph, the Board, or any party to a proceeding before the Board, may invoke the aid of any court of the United States in requiring the attendance and testimony of witnesses and the production of books, papers, and documents.

(5) PETITION TO MODIFY OR SET ASIDE ORDER; FILING, TIME AND PLACE, ADMINISTRATION TO SUBMIT RECORD; ACTION OF COURT; REVIEW.—

(A) IN GENERAL.—An order issued by the Board under this subsection shall be final and conclusive unless not later than 30 days after the service thereof the eligible entity appeals to the United States court of Apeals for the circuit in which such corporation has its principal place of business by filing with the clerk of such court a petition praying that the order of the Board be set aside or modified in the manner stated in the petition.

(B) FILING.—

(i) LEAVE OF COURT.—After the expiration of the 30-day period referred to in subparagraph (A), a petition may be filed only by leave of court on a showing of reasonable grounds for failure to file the petition prior to the expiration of such period.

(ii) CERTIFICATION.—The clerk of the court shall, on filing, cause a copy of the petition to be delivered to the Board and the Board shall certify and file in the court a transcript of the record on which the order was entered. If prior to the filing of such record the Board amends or sets aside its order, in whole or in part, the petitioner may amend the petition within such time as the court may determine, after providing notice to the Board.

(C) STAY OR SUSPENSION OF ORDER.—The filing of a petition for review under this paragraph shall not of itself stay or suspend the operation of the order of the Board, but the court of appeals in its discretion may restrain or suspend, in whole or in part, the operation of the order pending the final hearing and determination of the petition.

(D) ACTION BY COURT.—The court may affirm, modify, or set aside the order of the Board.

(E) ADDITIONAL EVIDENCE.—

(i) DETERMINATION.—If the court determines that the just and proper disposition of the case requires the taking of additional evidence, the court shall order the Board to reopen the hearing for the taking of such evidence, in such manner and on such terms and conditions as the court may consider appropriate.

(ii) FINDINGS.—The Board may modify its findings as to the facts, or make new findings, by reason of the additional evidence taken under this subparagraph, and it shall file its modified or new findings and the amendments, if any, of its order, with the records of such additional evidence.

(F) CONSIDERATION OF OBJECTIONS.—No objection to an order of the Board shall be considered by the court unless the objection was argued before the Board or, if it was not so argued, unless there were reasonable grounds for failure to do so.

(G) REVIEW.—The judgment and decree of the court affirming, modifying, or setting aside any such order of the Board shall be subject only to review by the Supreme Court of the United States on certification or certiorari as provided in section 1254 of title 28.

(6) ENFORCEMENT OF ORDER.—If the entity against which or against whom an order is issued under this subsection fails to obey the order, the Board may apply to the United States Court of Appeals, within the circuit where the entity has its principal place of business, for the enforcement of the order, and shall file a transcript of the record on which the order complained of was entered. On the filing of the application the court shall cause notice thereof to be served on the entity. The evidence to be considered, the procedure to be followed, and the jurisdiction of the court shall be the same as is provided in paragraph (5) for applications to set aside or modify orders.

(b) INVESTIGATIONS AND EXAMINATIONS.—

(1) AUTHORITY.—

(A) IN GENERAL.—The Board may conduct such investigations as the Board considers necessary to determine whether an eligible entity has engaged in any acts or practices that constitute or will constitute a violation of any provision of this Act, or of any regulation issued under this Act, or of any order issued under this section.

(B) FILING OF STATEMENTS.—The Board shall permit any individual to file a statement with the Board that is in writing, under oath or otherwise as the Board shall determine, as to all the facts and circumstances concerning the matter to be investigated.

(C) SUBPOENA.—For the purpose of any investigation under this subsection, the Board may administer oaths and affirmations, subpoena witnesses, compel their attendance, take evidence, and require the production of any books, papers, and documents that are relevant to the inquiry. Such attendance of witnesses and the production of any such records may be required from any place in the United States.

(D) REFUSAL TO OBEY.—In case of contumacy by, or refusal to obey a subpoena issued to, any individual, including an entity or corporation, the Board may invoke the aid of any court of the United States within the jurisdiction of which such investigation or proceeding is carried on, or where such individual resides or carries on business activity, in requiring the attendance and testimony of witnesses and the production of books, papers, and documents, and such court may issue an order requiring such individual to appear before the Board, to produce records, if so ordered, or to give testimony touching the matter under investigation.

(E) CONTEMPT.—A failure to obey an order of the court under this subsection shall be punishable by such court as a contempt thereof. All process in any such case may be served in the judicial district where such individual is an inhabitant or wherever such individual may be found.

(2) EXAMINATIONS AND REPORTS.—

(A) EXAMINATIONS.—An eligible entity under this Act shall be subject to examinations made by the Board through examiners selected or approved by the Board, and the cost of such examinations, including the compensation of the examiners, may in the discretion of the Board be assessed against the entity examined and when so assessed shall be paid by such entity.

(B) REPORTS.—Such entities shall prepare and submit reports to the Board at such times and in such form as the Board may require.

(3) EXAMINATIONS.—Each eligible entity shall be examined and audited at least once every 2 years, under procedures established by the Board, to determine whether or not such entity has been operated in a manner consistent with this Act and in an otherwise lawful manner, except that the Board may waive the examination requirement for up to 1 additional year if, in its discretion, the Board determines that such a delay would be appropriate based on the prior operating experience of the entity, the contents and results of the last examination and the management expertise of the entity.

(c) INJUNCTIONS OR OTHER ORDERS.—

(1) GROUNDS AND JURISDICTION OF COURT.—Whenever, in the judgment of the Board an eligible entity has engaged or is about to engage in any acts or practices that constitute or will constitute a violation of any provision of this Act, or of any regulation under this Act, or of any order issued under this section, the Board may apply to the proper district court of the United States or a United States court located in any jurisdiction subject to the laws of the United States, for an order enjoining such acts or practices, or for an order enforcing compliance with such provision, rule, regulation, or order. Such court shall have jurisdiction over such actions and, on a showing by the Board that such entity has engaged in or is about to engage in such acts or practices, may issue a permanent or temporary injunction, restraining order, or other order without bond.

(2) EQUITY JURISDICTION OF CORPORATION AND ASSETS.—In any proceeding under this section the court as a court of equity may, to such extent as it considers necessary, declare that such court has exclusive jurisdiction over the entity and the assets thereof, wherever located. Such court shall have jurisdiction in any such proceeding to appoint a trustee or receiver to hold or administer under the direction of the court the assets so possessed.

(3) TRUSTEESHIP OR RECEIVERSHIP.—The Board shall have authority to act as trustee or receiver of an entity under this section. On request by the Board, the court may appoint the Board to act in such capacity unless the court determines such appointment to be inequitable or otherwise inappropriate because of the special circumstances involved.

(d) UNLAWFUL ACTS AND OMISSIONS BY OFFICERS, DIRECTORS, EMPLOYEES, OR AGENTS.—

(1) VIOLATION OF ACT.—Wherever an eligible entity violates any provision of this Act or regulation issued under such Act by reason of such entity failure to comply with the terms thereof, or by reason of such entity engaging in any act or practice that constitutes or will constitute a violation thereof, such violation shall be considered to be a violation and an unlawful act on the part of any individual who, directly or indirectly, authorizes, orders, participates in, or causes, brings about, counsels, aids, or abets in the commission of any acts, practices, or transactions that constitute or will constitute, in whole or in part, such violation.

(2) BREACH OF FIDUCIARY DUTY.—It shall be unlawful for any officer, director, employee, agent, or other participant in the management or conduct of the affairs of an eligible entity to engage in any act or practice, or to omit any act, in breach the fiduciary duty of such individual as such officer, director, employee, agent, or participant, if, as a result thereof, the entity has suffered or is in imminent danger of suffering financial loss or other damage.

(3) DISQUALIFICATION OF OFFICERS AND EMPLOYEES.—Except on the written consent of the Board, it shall be unlawful—

(A) for any individual to take office as an officer, director, or employee of an eligible entity, or to become an agent or participate in the conduct of the affairs or management of an eligible entity, if—

(i) such individual has been convicted of a felony, or any other criminal offense involving dishonesty or breach of trust; or

(ii) such individual has been found civilly liable in damages, or has been permanently or temporarily enjoined by an order, judgment, or decree of a court of competent jurisdiction, by reason of any act or practice involving fraud or breach of trust; or

(B) for any individual to continue to serve in any of the above-described capacities, if—

(i) such individual is convicted of a felony, or any other criminal offense involving dishonesty or breach of trust; or

(ii) such individual is found civilly liable in damages, or is permanently or temporarily enjoined by an order, judgment, or decree of a court of competent jurisdiction, by reason of any act or practice involving fraud or breach of trust.

(e) PENALTIES AND FORFEITURES.—

(1) IN GENERAL.—Except as provided in paragraph (2), an eligible entity that violates any regulation or written directive issued by the Board requiring the filing of any regular or special report under this Act, shall forfeit and pay to the United States a civil penalty of not more than $100 for each and every day of the continuance of the corporation's failure to file such report, unless the entity demonstrates that such failure is due to reasonable cause and not due to willful neglect. The civil penalties provided for in this subsection shall accrue to the United States and may be recovered in a civil action brought by the Board.

(2) EXEMPTION.—The Board may through rules and regulations, or on application of an interested party, at any time previous to a failure under paragraph (1), by order, after notice and opportunity for hearing, exempt in whole or in part, any entity from the provisions of paragraph (1), on such terms and conditions and for such period of time as the Board determines necessary and appropriate, if the Board finds that such action is not inconsistent with the public interest or the protection of the Board. The Board may for purposes of this subsection make any alternative requirements appropriate to the situation.

(f) JURISDICTION AND SERVICE OF PROCESS.—Any suit or action brought under this section by the Board to enforce any liability or duty created by, or to enjoin any violation of, this Act, or any rule, regulation, or order promulgated thereunder, shall be brought in the district wherein the eligible entity maintains its principal office, and process in such cases may be served in any district in which the defendant maintains its principal office or transacts business, or wherever the defendant may be found.

(g) SUBSTITUTION OF SECRETARY.—On the termination of the Board, the Secretary shall possess all the powers, privileges and rights regarding compliance and enforcement as described in this section.

● Mr. HARKIN. Mr. President, I am pleased to cosponsor the Rural Investment Fund Act of 1989. I believe this legislation will make an important contribution to helping our rural communities address interrelated problems of lack of jobs, slow business growth and lack of capital.

The root problem that we face in our rural communities is the lack of an adequate number of good jobs at good wages. Because such jobs are in short supply, countless families have watched as their children and grandchildren leave their communities in search of better economic opportunities elsewhere. This fundamental and pervasive process of migration is wrenching for the people involved and, as we so well know, destructive of the communities whose future is slipping away.

In order to have jobs and opportunities in rural communities, it is clear that we need more economic development and business activity to provide those jobs. The story of rural America in this decade has been one of lagging far behind the levels of economic growth and recovery experienced by the rest of the Nation. Indeed, most of our rural communities are still struggling to recover from the twin crises of the recession early in this decade and the depression in the farm sector that followed.

There are a number of problems contributing to the slow economic progress we have seen in rural communities. Plainly, one of the problems is lack of adequate capital to support business development.

This legislation will help to address this problem by providing some Federal seed money in the form of lines of credit to local, regional, and State entities in order to supply capital to revolving loan funds. These entities will include economic development districts, State agencies, counties, towns, townships or nonprofit private community development corporations. The revolving loan funds will be used to help retain, create, and expand local rural businesses.

The legislation will create a rural business investment fund to provide money through the lines of credit. This fund will receive $100 million per year for 3 years from the Federal Government. The legislation provides for leveraging the money from the investment fund to enhance the benefits from the Federal money. The Federal money must be matched at least dollar for dollar by at least one bank, savings and loan or community development corporation.

This is a good and basically sound piece of legislation designed to meet a serious need. However, I will continue to work on some aspects of the bill that I believe require further attention.

First, I believe that we must examine the criteria for eligible businesses that may receive funds from the revolving loan funds. If those criteria are too restrictive we may miss opportunities to spur development of businesses that offer possibilities for creating significant numbers of jobs and a relatively large volume of business in rural communities.

Second, I want to examine carefully the limitations on the size of the loans that the revolving loan funds may make. Again, I would not want to see the level set so low that a whole class of businesses, namely small manufacturers, are left out of this initiative.

Third, I would like to see a more competitive approach for distributing funds to eligible entities under the program. And I would be inclined to allow an entity to receive a higher level of funding than the bill now provides.

Finally, I want to work to assure that the paperwork burdens and the approval processes are efficient.

Mr. President, this legislation is a welcome step in the right direction to help bring much needed capital to our rural communities. I am pleased to give it my support.●

By Mr. DANFORTH (for himself, Mr. HOLLINGS, Mr. INOUYE, Mr. BRYAN, and Mr. MCCONNELL):

S. 1009. A bill to amend section 315 of the Communications Act of 1934 with respect to the purchase of broadcasting time by candidates for public office; to the Committee on Commerce, Science, and Transportation.

CAMPAIGN ADVERTISING ACT

● Mr. DANFORTH. Mr. President, today Senators HOLLINGS, INOUYE, BRYAN, MCCONNELL, and I are introducing legislation to amend the lowest unit charge provision of the Communications Act. This legislation incorporates S. 2627, introduced by Senator MCCONNELL in the 100th Congress, and recently reintroduced in this Congress as S. 744. Senator MCCONNELL is the leader in the U.S. Senate on the lowest unit rate issue. I am pleased that he has joined the chairman of the Commerce Committee, the chairman of the Communications Subcommittee and me in the sponsorship of this bill, and I am grateful to him for lending his help and expertise to this initiative.

The lowest unit charge requirement, which was enacted in 1972, reflects the importance of political speech and the need to protect candidates from discrimination. Under this law, broadcasters are supposed to treat candidates as if they have as much market power as the biggest advertisers for a limited period of time—45 days before a primary, and 60 days prior to a general election.

Mr. President, the simple intent of this law is being thwarted by an ambiguity in the statute and by recent changes in the way broadcasters sell advertising time. This bill restores the lowest unit charge provision to its original intent by making two simple changes. First, it deletes the word "class" from the lowest unit charge provision. As a result, candidates will be entitled to the lowest advertising rate, not just the lowest rate for a particular "class" of time, such as "fixed" or "preemptible" time. Second, the bill adds a sentence to clarify that broadcasters are prohibited from "bumping" campaign ads.

ROLE OF TELEVISION IN POLITICS

Mr. President, broadcasters are in a unique position to affect the American electoral process. This is particularly true for television broadcasters. Television is both pervasive and influen-

tial. Ninety-eight percent of American households have televisions. Three-fifths have two or more TVs. On average, adults spend over 4 hours a day watching television.

More than any other commercial enterprise, TV affects our national values. According to a recent Roper survey, TV is the only source of news for 50 percent of Americans.

Television has a tremendous effect on our political life. Van Gordon Sauter, the former head of CBS News, is right in his observation that "[t]elevision is now the primary basis for making value judgments about candidates, their character and resourcefulness." Forty-nine percent of the public cite television as the most important information source for congressional elections.

Air time is the crucial element in a competitive rate between candidates. And the cost of air time has skyrocketed. TV advertising costs have more than tripled in the last 8 years. Television ads are now the single largest expense in most congressional campaigns. In today's Senate races, 40 to 60 percent of a campaign's funds go to television alone.

In 1956, the year in which the FCC began to collect data on broadcast spending, candidates spent less than six percent of their campaign budgets on radio and television combined. The total spent on electronic media for all elections—Federal, State, and local—that year was $10 million. Thirty years later, that national total was surpassed in a single Senate race in California. The two candidates in that race spent over $13 million on media alone.

A newly elected, or reelected, Senator knows that the average Senate campaign now costs $4 million. He knows that means he'll have to raise about $13,000 each week of his 6-year term. And he'll have to raise that sum in relatively small increments—a maximum of $1,000 per individual and $5,000 per political action committee.

The cost of air time is so high, it distorts the campaign process. It limits the candidate's speech. It makes it much tougher for a candidate to challenge an incumbent. And it has other, more insidious effects. It forces candidates to spend far too little of their time and energy on the issues, and far too much on raising money from groups whose membership and appeal are narrow. Night after night, instead of going home to our families, we go to fundraisers with our hands out. The need for constant fundraising raises the specter of undue influence by well-financed special interest groups, and lessens the public's confidence in its government.

THE NEED FOR CAMPAIGN REFORM

Mr. President, the public is ready for campaign reform. Many recent newspaper and broadcast editorials have called for reform. And they've used powerful terms—"fat cats," "give-to-get," "big money," "financial steroids," and "sewer money."

Many broadcasters have editorialized in favor of campaign reform. They've talked about the role of special interest groups, whose membership and appeal are narrow. They've called for fairness in our systems of elections.

The issue of campaign reform has been brought to the forefront in Congress. Over the dozen measures addressing campaign reform have been introduced in Congress already this year.

CAMPAIGN REFORM PROPOSALS

The Democrats and Republicans have offered different campaign reform bills. But they share common goals. Both parties want legislation to curb the influence of special interests and reduce the costs of campaigns. And one proposal gives neither party an advantage. I consider it to be the crucial element of campaign reform: clarifying lowest unit charge requirements of the Communications Act.

LOWEST UNIT CHARGE

Perhaps many of our colleagues, Mr. President, understand the current lowest unit charge requirement to mean that a candidate is to be charged no more than the station's most favored commercial advertiser for a particular spot on a particular show. This is what I thought it meant. But the Commerce Committee hearing held last September on the lowest unit charge requirement revealed that there are serious problems with the application of the lowest unit charge law today. The witnesses made the following compelling case for reform.

First, the law is unclear. Ask four lawyers how the lowest unit charge provision applies in a complicated example. You'll get four different answers. Interpreting lowest unit charge is now so difficult that, during election periods, the FCC has to answer 50 to 75 daily inquires about it.

Second, the law requires only that the candidates be afforded the lowest unit charge for each class of time. When the law was enacted, broadcast advertising was sold with rate cards. It was fairly simple to determine the lowest rate for the class of time—fixed or preemptible. But for many stations the way advertising is sold has changed. It is now, in effect, an auction. One media buyer has likened it to a Middle Eastern rug market.

Third, it is very difficult for a candidate to know if he is getting the lowest unit charge. He is not entitled to look at the station's commercial records to compare his rate to that of Coca Cola, for example. Without access to station records, there is no way to determine whether the requirement is being met. It is the only requirement I know of that is absolutely impossible to police.

Fourth, candidates usually wind up paying a much higher rate than commercial advertisers. In today's sophisticated campaigns, candidates must target specific voting age audiences. But a candidate's ad can be bumped, for example, from a news program to a Saturday morning cartoon show, unless he pays a premium fixed rate for his ad time. Witnesses told us that commercial advertisers rarely have to buy fixed time as protection against preemption, even though they sometimes need to avoid being bumped, too. And rates for fixed time can be four or more times the rates of preemptible time. Instead of getting the best deal, politicians are getting the worst. As the Democratic media buyer Bob Squier testified before the Commerce Committee last September, "[t]he memorial service for lowest unit rate was held years ago * * *."

Finally, there is the potential for abuse. Hearing witnesses testified that it would be possible for a broadcaster to favor one candidate over another. Candidate A might be told that to be sure his ad will run, he must buy expensive fixed time. But the broadcaster could assure his opponent, Candidate B, that he can buy cheap preemptible time and not be bumped. So, Candidate A buys fixed time. Candidate B buys preemptible time. Candidate B is never preempted. Hearing witnesses discussed a case in which one Senate candidate paid, on average, five times as much per advertising spot as his opponent—for spots on the same shows. The candidate buying the cheaper preemptible time was never preempted.

There is no way of determining whether one candidate should have been bumped. Stations are not required to record whether someone else sought to buy time. There is at least the potential for foul play. It could be done with a wink or an unspoken understanding. If it happen, it would be an illegal corporate contribution. And one candidate's dollar would have purchased four or more times as much speech as his opponent's.

In campaign reform generally, we're talking about the need for fairness in our election system. With the lowest unit charge, we are talking about the same concern. We must eliminate the possibility that through malice, or more likely through mistake, it is possible for a broadcaster to put his thumb on the scale. It is the potential for abuse that must be avoided.

THE SOLUTION

What then is the solution?

A number of observers favor free air time for candidates. Legislation has been introduced to provide free broadcast time to congressional candidates. Over sixty percent of the political challengers surveyed by the bipartisan Center for Response Politics support-

ed free time for candidates. And the Center itself recommends that Congress enact a free broadcasting plan.

Those who make the case for free broadcasting time point out that broadcasters use the spectrum, a valuable public resource, for free. They argue that free time is a small request to make in return. Those who cut timber in national forests, graze cattle on federal lands, or mine minerals on federal property have to pay fees. The argument is that broadcasters owe something for their use of a scarce public commodity.

Bob Squier said it well in last year's hearing, "[a]s the system works now, we must rent our airwaves back from the broadcasters at election time in order to conduct this most important transaction of the democracy."

I don't propose free air time for candidates, however. The problems with the lowest unit charge provision are significant. But they are easily solved. We don't need to require free time. We just need to clarify the law. The bill we are introducing today does that. It requires broadcasters and cable operators to sell fixed time to candidates at the lowest preemptible rate.

This is simple and straightforward. Require the lowest rate, and don't bump. S. 2627, the bill introduced by Senator MCCONNELL in the 100th Congress and on which we held hearings last year took this approach. The witnesses testified that it would work.

What would this proposal do? It would lower the cost of advertising to political campaigns significantly. By lowering costs, it would help candidates challenge incumbents.

It would give candidates the insurance that they need against preemption.

It would treat all candidates fairly.

It would help broadcasters to avoid mistakes in applying the law.

In short, it would restore lowest unit charge to its original purpose.

Political advertising accounts for a small portion of broadcasters' revenues. According to testimony at our hearing last year, it accounts for somewhere between three-quarters of one percent and four percent of broadcasters' revenues, depending on the market. And the lowest unit charge only applies 45 days before primaries and 60 days before general elections.

Candidates deserve a fair shake. While individual candidates will come and go, political speech should be treated at least as favorably as ads for Big Macs. After all, political advertising is purchased in bulk every 2 years. It should be afforded a bulk rate, and the insurance against preemption that goes with "most favored commercial advertiser" status.

Candidates don't need a free deal. They only need a fair deal.

Broadcasters have called for campaign reform. A key part of that reform, the advertising rate for political ads, involves the broadcasting industry directly. I urge my colleagues to take this step toward campaign reform.●

● Mr. HOLLINGS. Mr. President, I rise today in support of the Campaign Advertising Act of 1989. This legislation is very important to the American electoral process and the ability of our citizens to make an informed decision. This bill, introduced by Senator DANFORTH and myself, concerns a fundamental aspect of the electoral access, candidates access to the public airwaves and the prices charged for political advertisements. We have long been concerned that political candidates have reasonable access to broadcast stations and that there be no discrimination in the rates charges for campaign advertisements. Section 315(b) of the Communications Act was adopted specifically to address that concern.

Section 315(b), adopted in 1972, requires broadcasters to charge candidates the lowest unit rate available for the time during which the advertisements are aired. My committee held a hearing last year where we heard that the lowest unit rate provision is not being applied properly—candidates are being charged more than the lowest unit rate. Specifically, it was alleged that broadcasters have been: First, charging different rates to different candidates time and, second, charging them all higher rates for non-preemptible time. This has resulted in wide disparities in the rates paid by political candidates for political advertisements and in higher rates paid by all. This disturbs me greatly. We already spend too much time raising money just to get on television. Now, we are told one of the reasons why.

This bill requires broadcasters to provide advertising time to political candidates at the lowest unit rate available for advertisements sold for any class of time. In addition, the legislation does not permit the preemption of political advertisements. The effect will be to ensure that all candidates are charged the same type of lowest unit rate and that when candidates purchase time, they are assured that their advertisements will be run on the date and during the time period for which they contracted. Thus, all candidates will be treated fairly and equally. More importantly, this legislation will ensure that all the candidates have equal opportunities to present their positions to the public. Thus, it will further our goal of having a more informed electorate.

As a cosponsor of this legislation I want to encourage all of my colleagues to support the Campaign Advertising Act.●

By Mr. WILSON (for himself, Mr. D'AMATO, and Mr. HELMS):

S. 1010. A bill to encourage further cooperation between Federal, State, and local law enforcement agencies in their efforts against drug trafficking and other serious criminal activities; to the Committee on the Judiciary.

LAW ENFORCEMENT COOPERATIVE ACT

Mr. WILSON. Mr. President, I rise to introduce legislation on behalf of myself and Senator D'AMATO. It will be cited as the Law Enforcement Cooperative Act of 1989.

Mr. President, drug abuse and drug trafficking are national problems. Nevertheless, they cannot be attacked simply at the national level because the problem that they attack exists at the local level. If we are to have a chance at success in our antidrug efforts, all levels of government must be involved in a coordinated effort.

The efforts of every Federal law enforcement agency—the Drug Enforcement Administration, the Federal Bureau of Investigation, the Coast Guard, the Border Patrol, and the Customs Service—even in concert are not enough. They never can be. It is essential, instead, that there be the kind of cooperation between Federal, State, and local law enforcement agencies that is the absolute sine qua non to success in an antidrug effort.

Mr. President, local law enforcement is doing an outstanding job against very difficult odds. Some would say overwhelming odds. But, to make the most of those local efforts, and to make the most of Federal law enforcement efforts in cooperation, we need, in fact, real cooperation.

Fortunately, cooperative operations are taking place throughout the Nation—and they have been incredibly successful in my State of California and, indeed, all across the land.

Without doubt, the primary motivation for this cooperation between agencies is dedication to fight a common enemy—the drug trafficker and those who are his victims. Yet, there is another incentive that understandably and quite reasonably helps cement this cooperative spirit—it is the sharing of assets seized under the Federal asset forfeiture law.

With regular expansions and refinements of the Federal asset forfeiture law, there have been phenomenal increases in money flowing back into law enforcement. Indeed, in California, alone, more than $60 million has been forfeited and distributed to State and local law enforcement agencies.

Unfortunately, this very success has upset one Member in the other body, who has taken it upon himself to shut down a program that has served to further interagency cooperation in this vital battle against drugs.

Specifically, he successfully inserted in the 1988 drug bill a provision that will prohibit asset sharing with State and local agencies in so-called adoptive

cases—those cases in which the bulk of the investigative effort was undertaken by State or local agencies but the forfeiture was processed under Federal law. Furthermore, this objectionable provision could, as it presently reads, prevent asset sharing even when the assets were seized as a result of a joint Federal-State-local task force operation.

I want to emphasize to my colleagues that adoptive cases do not drain Federal resources. Rather, for every dollar forfeited by the Federal Government in an adoptive case, the Federal Government keeps 10 cents. A 10-percent processing charge invariable covers Federal expenses and indeed with help contribute to the construction of Federal prisons.

Mr. President, many times, indeed, too many times, the Federal Government decides it has come up with a better mouse trap and tries to foist it on local government—no matter what the cost may be to local government, as we rarely pick up the cost.

With asset forfeiture, local government knows that we have a better mouse trap—a comprehensive asset forfeiture law—and accordingly local governments have sought to make maximum use of the Federal law. Yet, at the insistence of one Member of the House, the program has been hampered, thereby cutting off millions of dollars earned by local law enforcement agencies that are struggling to stop drug trafficking and abuse.

Mr. President, the problem created by the new limit on asset sharing, which is scheduled to start on October 1 of this year, will not be severe for my State of California, as the State legislature improved the State forfeiture statute last year. Yet, it will reduce the amount of money flowing to State and local police in all too many States. In other States, however, the impact truly will be severe, as many State laws have no provision or an extremely limited one for applying criminals' forfeited assets to law enforcement. I am told that the problem will be particularly acute in Alabama, New York, Virginia, and North Carolina.

Mr. President, I am today introducing the Law Enforcement Cooperation Act of 1989, along with my colleague from New York, Senator D'AMATO.

My bill would replace the present absolute prohibition against asset sharing in adoptive and other asset forfeiture cases with a rule allowing asset sharing if it will serve to further cooperation between the recipient State or local law enforcement agency and Federal law enforcement agencies.

As I have said, cooperation is a key to success in our efforts against illegal drugs, and if we can attain this by allowing State and local agencies to use the Federal asset forfeiture laws, then there is no justification for preventing their use; we should encourage it.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1010

Be it enacted by the Senate and House of Representatives of the United States of America in Congress Assembled, That this Act may be cited as the "Law Enforcement Cooperation Act of 1989".

SEC. 2. Section 511(e)(3)(B) of the Controlled Substances Act (21 U.S.C. 881(e)(3)(B)), as added by the Assets Forfeiture Amendments Act of 1988, is amended to read as follows:

"(B) will serve to encourage further cooperation between the recipient State or local agency and federal law enforcement agencies.".

By Mr. EXON:

S. 1011. A bill to amend title XVIII of the Social Security Act and other provisions of law to delay for 1 year the effective dates of the supplemental Medicare premium and additional benefits under part B of the Medicare Program, with the exception of the spousal impoverishment benefit; to the Committee on Finance.

MEDICARE CATASTROPHIC COVERAGE DELAY ACT

Mr. EXON. Mr. President, I rise today to introduce legislation that will delay, for 1 year, implementation of portions of the Medicare Catastrophic Coverage Act passed by Congress last year and signed into law by President Reagan.

The Medicare Catastrophic Coverage Act represents the first major expansion of the Medicare Program since its inception more than 20 years ago. I think the bill makes many necessary changes and it now offers some needed protection to our senior citizens against the unforeseen and unpredictable event of an acute extended illness. I had concerns originally and still have concerns because the bill contains no provisions for coverage of long-term nursing home or custodial care.

There is no question that long-term care is, indeed, the true catastrophic cost facing seniors today.

My bill retains the current part A benefits that are already in place, including the expanded hospitalization—extended from 60 free days to 365 free days; the expanded skilled nursing care provisions—expanded from 100 days to 150 days; and the expanded hospice provisions—which eliminates the old 210-day cap and now provides unlimited coverage pending physician recertification of the patient's condition. Also retained is the Medicaid spousal impoverishment provisions. This very important provision allows the noninstitutionalized spouse to retain at least $12,000 in assets as well as a monthly living allowance of approximately $800. The at-home spouse may also retain the family residence, car, and personal belongings.

To pay for these benefits, my bill also retains the flat fee increase attached to the part B monthly premium. This flat fee is currently $4 a month. This is scheduled to increase to $7.18 in 1993.

What my bill delays is the implementation of all benefits not yet in effect. This would include all the new part B benefits as well as the prescription drug provisions. The bill also delays, for 1 year, implementation of the supplemental premium which has caused so much concern for our senior citizens.

Most importantly, my bill also includes a sense of the Senate statement that we must investigate, in depth, the suggestion made by the esteemed chairman of the Senate Finance Committee, Senator BENTSEN, concerning the recent revenue projections for the catastrophic care trust funds. If these projections are correct, it may be possible to reduce the supplemental premium by as much as 16 percent.

If so, we can retain a worthwhile program at significantly reduced costs and help pave the way for long-term health care legislation that, as I stated earlier, is the real catastrophic need facing our senior citizens.

I supported the Medicare catastrophic bill during its consideration as I feel that it offers valuable new and expanded services. That bill passed by an overwhelming vote of Congress and was signed into law by President Reagan.

At that time it was supported by a large number of organizations which promote the needs of our Nation's senior citizens. Unfortunately, there is much confusion over what that bill offers, who will benefit and who will pay. The bill is extremely technical and therefore confusing.

I have seen many articles, newsletters, and commentaries on this piece of legislation.

Many of these articles are not entirely consistent with the content of the new law. For that reason I am introducing this legislation. We need a longer time period to educate individuals as to what this bill does, and who will be affected by it. We also need to look at the funding mechanism and see if something else can be done. I supported the recent Senate amendment calling for hearings on this bill. I had hoped that we could resolve the issues without the need to delay implementation of the bill.

However, now I am convinced that with everything else that Congress has to consider this year, we may not have time, in the next couple of months, to do justice to this important piece of legislation.

President Reagan made it quite clear that he would only support the bill if

it would be paid for by those who would benefit from the improved coverage—the elderly and disabled. For the most part, I support this proposal.

The financing is progressive as well as being an asset protection plan; those with higher incomes and, therefore, more to protect from a financially devastating illness will pay more than those with more limited incomes. However, this type of financing mechanism can penalize, as so many Nebraskans have pointed out to me, some of those who were able to save toward their retirement. This is something we need to evaluate.

Mr. President, I know this problem has no easy solutions.

If it did, we would all be slapping ourselves on the back already, congratulating ourselves for our cleverness. But that is not the case. I only hope that when we do reevaluate this situation, the light of a different day will also bring new ideas and new ways of looking at the situation.

I am committed to finding a way to make true catastrophic health care coverage available to our Nation's senior citizens. This is important to them as well as to their children and grandchildren. I hope this 1-year delay will enable us to explore new solutions to this problem and find a better consensus.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1011

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

That the Act be cited as the "Medicare Catastrophic Coverage Delay Act of 1990".

SEC. 2. PURPOSES.

It is the purpose of this Act—

(1) to retain all Medicare Part A provisions currently in effect as provided for in the Medicare Catastrophic Coverage Act of 1988;

(2) to retain the Medicaid spousal impoverishment provisions as provided for in the Medicare Catastrophic Coverage Act of 1988;

(3) to retain the flat increase in Medicare premiums, as provided for in the Medicare Catastrophic Coverage Act of 1988, in order to finance the above-retained benefits;

(4) to delay, for one year, implementation of all other benefits provided in the Medicare Catastrophic Coverage Act of 1988;

(5) to delay, for one year, implementation of the supplemental premium as provided for in the Medicare Catastrophic Coverage Act of 1988; and

(6) to express the sense of the Congress that if revenue estimates conclude there is, in fact, a surplus of funds in the Catastrophic Coverage trust funds in excess of amounts required to reach and maintain adequate reserves, that the appropriate steps will be taken to reduce the supplemental premium.

SEC. 3. DELAY IN PART B BENEFITS AND RELATED PROVISIONS.

(1) Section 1833(c) of the Social Security Act (42 U.S.C. 13951(c)), as inserted by section 201(a) of the Medicare Catastrophic Coverage Act of 1988, is amended—

(A) in paragraph (1), by striking "1990" and inserting "1991";

(B) in paragraph (3), by striking "1990" each place it appears and inserting "1991"; and

(C) in paragraph (3)(A)—

(i) by striking the first sentence,

(ii) in the second sentence, by striking "succeeding year" the first place it appears and inserting "year (beginning with 1991)", and

(iii) in the second sentence, by striking "succeeding" the second place it appears.

(2) Paragraph (4)(B) of section 1861(t) of the Social Security Act, as added by section 202(a)(2)(C) of the Medicare Catastrophic Coverage Act, is amended by striking "1990" and inserting "1991".

(3) Section 1834(c) of the Social Security Act, as added by section 202(b)(4) of the Medicare Catastrophic Coverage Act, is amended—

(A) in paragraph (1)(C)(i), by striking subclause (I) and (II) and inserting the following:

"(I) 1991 is $600,

"(II) 1992 is $652, and";

(B) in paragraph (1)(C)(i) by striking subclause (III) and redesignating subclause (IV) as subclause (III);

(C) in paragraph (1)(C)(iii), by striking "1992" and inserting "1993";

(D) in paragraph (2)(C)(ii), by striking "1990", "1991", "1992", and "1993" and inserting "1991", "1992", "1993", and "1994", respectively;

(E) in paragraph (3)(A), by striking "1992" and inserting "1993";

(F) in paragraph (3)(C)(i), by striking "1990" and inserting "1991";

(G) in paragraph (4)(A)(i), by striking "1990 or 1991" and inserting "1991 or 1992";

(H) in paragraph (7)(B), by striking "1991" and inserting "1992";

(I) in paragraph (8)(A), by striking "6 years" and inserting "7 years"; and

(J) in subparagraphs (B), (C), (D), and (F) of paragraph (8), by striking "1989", "1990", "1991", "1992", "1993" and "1994" and inserting "1990", "1991", "1992", "1993", "1994", and "1995", respectively.

(4) Paragraphs (1) and (4) of section 1842(o) of the Social Security Act, as added by section 202(c)(1)(C) of the Medicare Catastrophic Coverage Act, are each amended by striking "1991" and inserting "1992".

(5) Section 202(e)(4)(B) of the Medicare Catastrophic Coverage Act is amended by striking "1993" and inserting "1994".

(6) Section 202(i)(2) of the Medicare Catastrophic Coverage Act is amended by striking "1989, 1990, 1991, 1992, and 1993" and inserting "1990, 1991, 1992, 1993, and 1994", respectively.

(7) Section 202(1)(2) of the Medicare Catastrophic Coverage Act is amended by striking "1989" and "1990" and inserting "1990" and "1991", respectively.

(8) Section 202(m) of the Medicare Catastrophic Coverage Act is amended by striking "1989", "1990", and "1991", and "1992", respectively.

(9) Section 1834(d)(2) of the Social Security Act, as added by section 203(c)(1)(F) of the Medicare Catastrophic Coverage Act, is amended by striking "1990" and inserting "1991".

(10) Section 203(c)(2) of the Medicare Catastrophic Coverage Act is amended by striking "1991" and inserting "1992".

(11) Section 1835(a)(2)(G) of the Social Security Act, as inserted by section 203(d)(1)(C) of the Medicare Catastrophic Coverage Act, is amended by striking "1993" and inserting "1994".

(12) Section 1154(a)(16) of the Social Security Act, as amended by section 203(d)(2) of the Medicare Catastrophic Coverage Act, is amended by striking "1993" and inserting "1994".

(13) Section 203(g) of the Medicare Catastrophic Coverage Act is amended by striking "1990" and inserting "1991".

(14) Section 1834(e) of the Social Security Act, as added by section 204(b)(2) of the Medicare Catastrophic Coverage Act, is amended—

(A) in paragraph (2)(B)(ii), by striking "1992" and inserting "1993",

(B) in paragraph (4)(A)(i), by striking "1990" and inserting "1991",

(C) in paragraph (4)(B), by striking "1991" and inserting "1992", and

(D) in paragraph (5), by striking "1990" and "1991" each place each appears and inserting "1991" and "1992", respectively.

(15) Section 204(3) of the Medicare Catastrophic Coverage Act is amended by striking "1990" and inserting "1991".

(16) Section 205(f) of the Medicare Catastrophic Coverage Act is amended by striking "1990" and inserting "1991".

(17) Section 206(b) of the Medicare Catastrophic Coverage Act is amended by striking "1990" and inserting "1991".

SEC. 4. DELAY IN CERTAIN REVENUE-RELATED PROVISIONS.

(1) Section 59B of the Internal Revenue Code of 1986, as added by section 111(a) of the Medicare Catastrophic Coverage Act, is amended—

(A) in the table in subsection (c)(2)(A), by striking the line relating to 1989;

(B) in the table in subsection (d), by striking the line relating to 1989; and

(C) in subsection (e)(4)—

(i) by striking "before 1998" each place it appears and inserting "before 1999", and

(ii) in the percentage table in subparagraph (A), by striking "1994", "1995", "1996", and "1997" and inserting "1995", "1996", "1997" and "1998", respectively.

(2) Section 111(e) of the Medicare Catastrophic Coverage Act is amended—

(A) in paragraph (1), by striking "1988" and inserting "1990", and

(B) in paragraph (2), by striking "1989" and "1989" and inserting "1990" and "1990", respectively.

(3) Section 112(b) of the Medicare Catastrophic Coverage Act by striking "1990" and "1989" and inserting "1991" and "1990", respectively.

(4) Section 1839(g) of the Social Security Act, as added by section 211(a) of the Medicare Catastrophic Coverage Act, is amended—

(5) Section 1841A of the Social Security Act, as inserted by section 212(a) of the Medicare Catastrophic Coverage Act, is amended—

(A) in subsection (c), by striking "1990" and inserting "1991", and

(B) in subsection (d), by striking "1992" each place it appears and inserting "1993".

(6) Section 1840(i) of the Social Security Act, as added by section 212(b)(1) of the Medicare Catastrophic Coverage Act, is amended by inserting "(1)" after "(i)" and

by adding at the end of the following new paragraph:

"(2)(A) Notwithstanding the previous provisions of this subsection but subject to subparagraph (B), premiums collected under this part which are attributable to subsection (g) of any month in 1989 shall, instead of being transferred to (or deposited to the credit) of the Federal Supplementary Insurance Trust Fund, be transferred to (or deposited to the credit of) the Federal Hospital Insurance Catastrophic Coverage Reserve Fund (created under section 1817A).

"(B) The total amount of the transfers or deposits made under subparagraph (A) shall not exceed the Secretary's estimate of the total amount of additional expenditures made under part A which are attributable to benefits during 1989 and which would not have been made but for the amendments made by the Medicare Catastrophic Coverage Act of 1988.".

(7) Section 1841B(c) of the Social Security Act, as inserted by section 213 of the Medicare Catastrophic Coverage Act, is amended by striking "1990" each place it appears and inserting "1991".

SEC. 5. MEDICAID PROVISIONS.

(1) Section 1905(p)(2) of the Social Security Act, as amended by section 301(b) of the Medicare Catastrophic Coverage Act, is amended by striking "1990", "1991", "1992", and "1993" each place each appears and inserting "1991", "1992", "1993", and "1994", respectively.

(2) Clauses (ii) and (iii) of section 1902(l)(2)(A) of the Social Security Act, as added by section 302(a)(2)(B)(iii) of the Medicare Catastrophic Coverage Act, by striking "1990" each place it appears and inserting "1991".

SEC. 6. MAINTENANCE OF EFFORT.

Section 412 of the Medicare Catastrophic Coverage Act is amended by striking "1990" each place it appears and inserting "1991".

Mr. REID. Mr. President, I would like to congratulate the senior Senator from Nebraska on the catastrophic measure. I also have a measure in to affect the catastrophic and I will look closely at his. It is certainly something when we return home we hear a lot about and it is something that we have to look to, to change.

By Mr. EXON (for himself and Mr. BOREN):

S. 1012. A bill to amend the Disaster Assistance Act of 1988 to extend disaster assistance to losses due to adverse weather conditions in 1988 or 1989 for crops planted in 1988 for harvest in 1989, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

DISASTER ASSISTANCE ACT

Mr. EXON. Mr. President, today I am introducing legislation to provide assistance for farmers and livestock growers affected by the current drought. I am pleased to be joined by my long-time friend and colleague Senator DAVID BOREN. This bill includes a number of provisions which I will enumerate in a moment, but the main point I want to make today is this: the situation is bad—worse than most of us realize—and we have to take action now.

In addition to the drought, much of Nebraska's wheat crop was further damaged by a late freeze at the critical time when the wheat itself was just beginning to form inside the plant. Last year's drought, which is now catching up with winter wheat producers, and the freeze have combined to create the worst situation in decades for portions of Nebraska.

Several weeks ago Senator KERREY and I toured Nebraska and what we saw was worse than we expected.

Many of our colleagues, as well as the Secretary of Agriculture, have also made visits to drought ravaged areas. But all the visits in the world will not change a thing. It will take more than our condolences and a symbolic pat on the head.

I know there are those who will claim we cannot afford another drought bill. To them I say that wheat farmers in Nebraska, Kansas, Oklahoma, and Texas cannot go on without one.

As far as financing this assistance goes, higher wheat prices prompted by the drought will result in the needed budgetary savings to cover the cost of assistance.

Mr. President, this legislation extends last year's drought bill to winter wheat by providing 80 percent of target price support for losses between 35 and 75 percent of usual production. For losses over 75 percent, it would provide 100 percent of target price protection.

This legislation would also make it easier for livestock growers to hay and graze program acreage and would allow farmers to plant other crops where possible. Finally, this legislation would mandate low interest loans to make up the difference between disaster payments and the income farmers could have expected without the drought.

Mr. President, the drought problems in Nebraska are very real.

Lack of adequate pasture has already forced farmers to begin selling down their herds. Much of the wheat crop is already lost. Even a good, solid rain at this late juncture will not bring it back. Last year, I warned that the 1988 drought may not be only a 1-year problem. Unfortunately, that prophecy has come true despite our fervent prayers for rain. The time for action is now.

The Nebraska wheat board has been very helpful in putting together this legislation and I want to acknowledge their assistance. We need to move forward and I stand ready to work with my colleagues on the Senate Agriculture Committee to pass a much-needed drought disaster bill now.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1012

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Disaster Assistance Act of 1989".

SEC. 2. PAYMENTS TO PROGRAM PARTICIPANTS FOR TARGET PRICE COMMODITIES.

Section 201 of the Disaster Assistance Act of 1988 (7 U.S.C. 1421 note) is amended—

(1) in subsection (a)(1)—

(A) by inserting after "excessive moisture," both places it appears the following: "freezing temperatures,";

(B) by inserting after "related condition in 1988," both places it appears the following: "or for winter crops, in 1988 or 1989,";

(C) in subparagraph (A), by inserting after "65 percent" the following: "(or, in the case of a winter crop, 80 percent)"; and

(D) in subparagraph (B), by inserting after "90 percent" the following: "(or, in the case of a winter crop, 100 percent)";

(2) in subsection (b)(4), by inserting after "July 31, 1989," the following: "or for winter crops, prior to July 31, 1990,"; and

(3) by adding at the end thereof the following new subsection:

"(c) WINTER CROPS.—(1) If an acreage limitation program under section 107D(f)(2), 105C(f)(2), 103A(f)(2), or 101A(f)(2) of the Agricultural Act of 1949 (7 U.S.C. 1445b-3(f)(2), 1444e(f)(2), 1441-1(f)(2), or 1441-1(f)(2)) is in effect for a crop of wheat, feed grains, upland cotton, or rice and the Secretary determines that the producers on a farm are eligible for a disaster payment for the winter crop of a commodity under subsection (a)(1), such producers may devote all or a portion (as determined by such producers) of the permitted acreage for wheat, feed grains, upland cotton, or rice for the farm for such crop to—

"(A) haying and grazing; or

"(B) the production of an alternative crop covered under this section, or section 202 or 203, or soybeans.

"(2) If the producers on a farm devote a portion of their permitted acreage to haying, grazing, or an alternative crop under subparagraph (A)—

"(A) the producers shall be eligible for payments under section 107D(c)(1), 105C(c)(1), 103A(c)(1), or 101A(c)(1) of the Agricultural Act of 1949 on such acreage; and

"(B) the crop acreage base and farm program payment yield of the farm under sections 504 and 506 of such Act (7 U.S.C. 1464 and 1466) shall not be reduced due to the fact that a portion of such permitted acreage was devoted to the production of haying, grazing, or such alternative crops.

"(3)(A) The Administrator of the Small Business Administration shall make disaster loans available to producers on a farm who are eligible for a disaster payment for the winter crop of a commodity under subsection (a)(1).

"(B) The amount of a loan made under subparagraph (A) shall be the amount requested by the producers on a farm, except that such amount may not exceed—

"(i) the expected income of such producers, obtained by multiplying—

"(I) the payment rate for the commodity under section 107D(c)(1), 105C(c)(1),

103A(c)(1), or 101A(c)(1) of the Agricultural Act of 1949; by

"(II) the sum of the acreage planted for harvest and the acreage prevented from being planted (because of drought, hail, excessive moisture, or related condition in 1988 or 1989, as determined by the Secretary) to such crop; by

"(III) 100 percent of the farm program payment yield established by the Secretary for such crop under section 506 of such Act (7 U.S.C. 1466); less

"(ii) the sum of—

"(I) the amount of any disaster payments received by such producers under subsection (a)(1) of the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.); and

"(II) the amount of any crop insurance proceeds obtained by such producers under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.).

"(C) The rate of interest on a loan made under subparagraph (A) shall be 8 percent per annum.

"(D) There are authorized to be appropriated for fiscal year 1989 such sums as are necessary to carry out this paragraph.

"(4)(A) For purposes of this section:

"(i) The term 'winter crop' means a crop of a commodity listed in subsection (a) planted during calendar year 1988 for harvest in 1989.

"(ii) The term '1988 crop' shall include winter crops.

"(B) For purposes of determining payments under this section, a winter crop shall be considered separately from crops planted for harvest in 1988.".

SEC. 3. PAYMENTS TO PROGRAM NONPARTICIPANTS FOR TARGET PRICE COMMODITIES.

Section 202 of the Disaster Assistance Act of 1988 (7 U.S.C. 1421 note) is amended—

(1) in subsection (a)—

(A) by inserting after "excessive moisture," both places it appears the following: "freezing temperatures,";

(B) by inserting after "related condition in 1988," the following: "or for winter crops, in 1988 or 1989,";

(C) in paragraph (1), by inserting after "65 percent" the following: "(or, in the case of a winter crop, 80 percent)"; and

(D) in paragraph (2), by inserting after "90 percent" the following: "(or, in the case of a winter crop, 100 percent)";

(2) in subsection (b), by inserting after "related condition in 1988," the following: "or for winter crops, in 1988 or 1989,"; and

(3) by adding at the end thereof the following new subsection:

"(d) WINTER CROPS.—(1) For purposes of this section:

"(A) The term 'winter crop' means a crop of a commodity listed in subsection (a) planted during calendar year 1988 for harvest in 1989.

"(B) The term '1988 crop' shall include winter crops.

"(2) For purposes of determining payments under this section, a winter crop shall be considered separately from crops planted for harvest in 1988.".

SEC. 4. CROP QUALITY REDUCTION DISASTER PAYMENTS.

Section 205 of the Disaster Assistance Act of 1988 (7 U.S.C. 1421 note) is amended—

(1) in subsection (a), by inserting after "related conditions in 1988," the following: "or for crops specified in section 201(c)(4)(A)(i) or 202(d)(1)(A), in 1988 or 1989,"; and

(2) in subsection (d), by inserting after "disaster in 1988," the following: "or for crops specified in section 201(c)(4)(A)(i) or 202(d)(1)(A), in 1988 or 1989,".

SEC. 5. EFFECT OF FEDERAL CROP INSURANCE PAYMENTS.

Section 206 of the Disaster Assistance Act of 1988 (7 U.S.C. 1421 note) is amended—

(1) by inserting after "Federal Crop Insurance Act," the following: "or for the crop of a commodity specified in section 201(c)(4)(A)(i) or 202(d)(1)(A),"; and

(2) in paragraph (3), by striking out "the 1988" each place it appears and inserting in lieu thereof "such".

SEC. 6. CROP INSURANCE COVERAGE FOR CERTAIN CROPS.

Section 207(b) of the Disaster Assistance Act of 1988 (7 U.S.C. 1421 note) is amended—

(1) by striking out "or" at the end of paragraph (4);

(2) by striking out the period at the end of paragraph (5) and inserting in lieu thereof "; or"; and

(3) by adding at the end thereof the following new paragraph:

"(6) planted in calendar year 1988 for harvest in 1989.".

SEC. 7. APPLICATIONS FOR ASSISTANCE.

Section 232(a)(2) of the Disaster Assistance Act of 1988 (7 U.S.C. 1421 note) is amended by inserting after "March 31, 1989" the following: "(or, in the case of a person eligible to receive payments for crops specified in section 201(c)(4)(A)(i) or 202(d)(1)(A), the date that is 180 days after the date of enactment of the Disaster Assistance Act of 1989)".

By Mr. PRESSLER:

S. 1013. A bill to amend the Agricultural Act of 1949 to remove the 5 percent acreage limitation requirement on producers of the 1990 crop of oats and to require that the acreage base of such crop of oats be determined separate from that of barley, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

REMOVAL OF ACREAGE LIMITATION ON OATS

Mr. PRESSLER. Mr. President, there is an unfortuante lack of high-quality oats in the marketplace. The demand for oats for human consumption has increased substantially in the past few years due to wide publicity on the nutritional benefits of this grain in lowering blood cholesterol and reducing colon cancer. We are all familiar with the current barrage of advertising on oat bran products.

Domestic oats demand has been increasing annually at the rate of 10 percent. Cereal manufacturers are scrambling to locate supplies of high-protein, milling-quality grain. Once the largest exporter of oats, the United States has become the largest importer. In 1987 the United States bought more than 46 million bushels of oats, most of it from Canada, Argentina, and Scandinavia. Imports in 1988 amounted to over 60 million bushels, or 21 percent of our total domestic use. In 1960, over one billion bushels of oats were harvested in the United States. Production in 1988 was only 206 million bushels. That was the smallest crop of oats harvested in the United States in 112 years.

The 1985 farm bill has been successful in some areas. However, in my home State of South Dakota, which has traditionally ranked as the No. 1 oats producing State in the Nation, oats have become a forgotten crop. Because of the way oats are treated in the 1985 farm bill, farmers have been planting barley instead, therefore adding to the surplus of this crop.

Mr. President, I believe one step in the right direction would be to raise the target price of oats. I support and am cosponsoring efforts to raise the target price of oats. Under present circumstances, I believe we should go even further to promote more oats production in the United States by removing the current 5 percent set-aside requirement for oats. We desperately need more domestically produced oats. Present regulations do not make good sense when we are importing 60 million bushels of oats in 1 year and at the same time forcing farmers who are participating in the oats program to idle land that could also be planted to oats.

By Mr. DURENBERGER:

S. 1014. A bill to provide for the temporary suspension of the duty on certain two-stroke cycle piston engines; to the Committee on Finance.

SUSPENSION OF DUTY ON CERTAIN TWO-STROKE CYCLE PISTON ENGINES

● Mr. DURENBERGER. Mr. President, I rise to introduce legislation that would alleviate an unintended problem that has arisen as a result of the adoption of the harmonized system of tariff clarifications.

Polaris Industries, a Minnesota-based company and the last remaining domestic manufacturer of snowmobiles, has for several years been importing engines for installation in their snowmobiles. Since there appear to be no domestic suppliers of comparable engines, Polaris has been allowed to import these engines duty-free. However, in the transition from the TSUS tariff clarification system to the harmonized system, these engines have been reclassified into a new category which carries a U.S. tariff of 3.1 percent. The legislation I am introducing would temporarily suspend the duty on these engines.

When Congress approved the harmonized system, it was not our intention to raise tariffs on products that are currently not dutiable. The purpose of the harmonized system was to enhance our international competitiveness. In this instance, the harmonized system works to the disadvantage of a domestic manufacturer and simply forces the company to raise the price of its products.

I ask unanimous consent that the full text of this legislation be included in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1014

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subchapter II of chapter 99 of the Harmonized Tariff Schedule of the United States is amended by inserting in numerical sequence the following new subheading:

"9902.84.07	Internal combustion 2-stroke cycle piston-type engines, of a cylinder capacity exceeding 50 cc but not exceeding 1,000 cc (provided for in subheading 8407.32.20 or 8407.33.20), to be installed in vehicles specifically designed for traveling on snow, golf carts, non-amphibious all-terrain vehicles, burden carriers, and personal watercraft (provided for in subheading 8703.10.00, 8703.21.00 or 8903.92.00).	Free ...	No change ...	No change ...	On or before 12/31/92".

SEC. 2. (a) Except as provided in subsection (b), the amendment made by the first section of this Act shall apply with respect to goods entered, or withdrawn from warehouse for consumption, on or after the 15th day after the date of the enactment of this Act.

(b) Notwithstanding section 514 of the Tariff Act of 1930 or any other provision of law, upon a request filed with the appropriate customs officer before the 90th day after the date of the enactment of this Act, any entry of goods described in subheading 9902.84.07 of the Harmonized Tariff Schedule of the United States (as amended by this Act) that was made—

(1) after December 31, 1988; and

(2) on or before the 15th day after the date of enactment of this Act;

shall be liquidated or reliquidated as though such entry occurred on the day after such 15th day.●

By Mr. DURENBERGER:

S. 1015. A bill to suspend temporarily the duty on certain plastic web sheeting; to the Committee on Finance.

SUSPENSION OF DUTY ON CERTAIN PLASTIC WEB SHEETING

● Mr. DURENBERGER. Mr. President, today I am introducing legislation to reclassify certain plastic web sheeting into a new duty-free category under the tariff schedules of the United States. My bill is identical to H.R. 1428, which was introduced in the other body by my distinguished colleague from Minnesota, Representative BILL FRENZEL.

Awa paper is a plastic web sheeting imported by a Minnesota-based company for use in the production of reverse osmosis filter elements. It is comprised of polyester fibers bonded with a resin, and its precise thickness and uniform density are critical to ensuring quality performance of reverse osmosis filters. These filters are used in the process of making potable water from brackish ground water, sea water or other water containing high concentrations of salts.

Awa paper is imported from Japan because there is no domestic source for a qualitatively similar product. I would also note that all other components of the filter elements produced by my constituent company are obtained from domestic sources and that Japan is an important export market for the finished filter element.

Awa paper is currently classified as a non-woven textile with a 12.9 percent ad valorem plus two cents per pound tariff. It is also subject to textile quotas under the Multifiber Arrangement [MFA]. Previously, awa paper was placed in the category of plastic sheets comprised of polyester, with only a 4.4-percent ad valorem tariff. The classification was changed when certain Customs officials successfully argued that the length of the man-made fibers in awa paper make it a textile. I believe that this classification is inappropriate, because awa paper does not possess characteristics representative of textiles—it exhibits no drape when laid flat upon a nonflat surface and it cannot be stitched or sewn. The nature of its component elements, as well as its applications, more properly identify awa paper with the classification relating to filter paper.

The recent change in tariff classification has seriously affected the international competitiveness and viability of my constituent company. Not only does it now face a tripling of duties, it also faces a threatened source of supply of awa paper. Without a reliable source of supply, the company cannot produce reverse osmosis filters—its primary product.

Mr. President, my legislation would establish a new tariff classification to cover only awa paper. Other web sheetings which are produced in the United States are left in the textile category. And to further narrow the application of this bill, I have limited the duty-free treatment to web sheeting used in the production of reverse osmosis filter elements for water purification systems.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1015

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subchapter II of chapter 99 of the Harmonized Tariff Schedule of the United States (19 U.S.C. 3001 et seq.) is amended—

(1) by adding at the end of the U.S. notes thereto the following new note: "8. For purposes of subheading 9902.56.01, the term 'nonwoven fiber sheet' means sheet comprised of a highly uniform and random array of polyester fibers 1.5 to 3.0 denier that is thermally bonded and calendered into a smooth surface web having—

"(a) a thickness of 3.7 to 4.0 mils;

"(b) a basis weight of 2.5 oz. per sq. yd.;

"(c) a machine tensile strength of 30 lb. per sq. in. or greater;

"(d) a low cross-direction tensile (approximately ⅓ of MD tensile strength); and

"(e) a Frazier air permeability of 1.0 to 1.5 cfm per sq. ft."; and

(2) by inserting in numerical sequence the following new subheading:

"9902.56.01	Nonwoven fiber sheet (provided for in subheading 5603.00.90).	Free ...	No change ...	No change ...	On or before 12/31/92".

SEC. 2. The amendment made by the first section of this Act applies with respect to articles entered, or withdrawn from warehouse for consumption, on or after the 15th day after the date of the enactment of this Act.●

By Mr. DOLE:

S. 1016. A bill to change the name of "Marion Lake," located northwest of Marion, KS, to "Marion Reservoir"; to the Committee on Environment and Public Works.

MARION RESERVOIR

Mr. DOLE. Mr. President, residents of Marion County, KS, have recently banded together to form the Marion County Economic Development Council to assist with the diversification and expansion of the economic base of the county. Their self-help effort is characteristic of the creativity that Kansans bring to the problems and opportunities that they face.

As the council motto says, Marion County is "In the Center of it All." Located near the geographic center of the State of Kansas, Marion County possesses a number of possibilities for growth and expansion.

Two important resources the council has identified are tourism and water recreation. Marion County is fortunate to have two beautiful lakes. However, they both have the same name—Marion Lake. The larger lake of the two was built by the U.S. Army Corps of Engineers and is located northwest of the city of Marion. It is known to local residents as Marion Reservoir, but is officially named Marion Lake.

The bill that Senator KASSEBAUM and I are introducing today, and that Congressman BOB WHITTAKER is introducing in the House, would change the official name of the large Corps of En-

gineers water project in Marion County to Marion Reservoir.

This name change should clear up confusion that has been experienced in the past by those who are promoting both lakes in Marion County. It is my understanding that the Corps of Engineers has no objections to the name change. Mr. President, it is important that we at the Federal level not stand in the way of progress that is being made by our local communities.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1016

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the lake located northwest of the City of Marion, Kansas, commonly known as "Marion Lake", and adopted and authorized in Public Law 80-516, shall hereafter be known and designated as "Marion Reservoir". Any reference to such lake in a law, map, regulation, document, record or other paper of the United States shall be deemed to be a reference to "Marion Reservoir".

By Mr. FORD (for himself, Mr. LEAHY, Mr. HEFLIN, and Mr. PRYOR):

S. 1017. A bill to enhance the ability of the Bureau of the Census to gather information concerning rural areas for Congress, to improve historic preservation efforts, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

RURAL PROGRESS MONITORING AND HISTORIC PRESERVATION ACT

Mr. FORD. Mr. President, today I am introducing the Rural Progress Monitoring and Historic Preservation Act of 1989, along with the distinguished chairman of the Senate Agriculture Committee, Senator LEAHY, the distinguished chairman of the Rural Development Subcommittee, Senator HEFLIN, and the distinguished Senator from Arkansas, Senator PRYOR, who is also a member of that subcommittee. I commend my colleagues and other members of the committee for the foundation they have been laying to support comprehensive rural development legislation, which will hopefully be enacted during this session of Congress. I am also privileged to have joined with 31 of my colleagues on the Bipartisan Task Force on Rural Development, established by the distinguished majority leader and minority leader.

It is no coincidence that so many are now interested in the issue of rural development. In many ways, the traditional quality of life in our Nation's rural areas has been extremely good. Family and community values, and the sense of identity among rural people have always been very strong. However, the economic growth in this country over the last 6 years has not been distributed evenly. It has not had a beneficial impact in many rural areas. We know that unemployment is greater in many rural areas. Poverty levels are higher in many rural areas. Education and family income levels are much lower in many rural areas. Health care is inadequate in many rural areas. And the infrastructure is in disrepair in many rural areas.

Mr. President, Kentucky is a rural State. Seventy-eight percent of Kentuckians live in towns or communities of less than 20,000 people. Fifty-five percent live outside of metropolitan statistical areas, compared to a national average of 23 percent. About half of the population in my State—49 percent—lives in communities of 2,500 or less. A recent GAO study identified 95 of Kentucky's 120 counties as rural counties. When you begin to talk about the many blessings and the many difficulties of rural America, you are talking about my State.

And Mr. President, my State has a rich and proud heritage in agriculture. There are some 93,000 farms, averaging only about 150 acres each. They are small, family farms. Farming has been at the heart of the Kentucky economy for several decades, and will continue to be. But to understand rural America you must look well beyond farming. Only about 4 percent of the labor force in my State is involved in agricultural employment. And of those actively engaged in farming, more than half—58 percent—derive some form of off-farm income from either the primary operator of the farm or spouse, or both. The average off-farm income exceeds the average income of the farm. And the bulk of these jobs are in the manufacturing or service sectors, which are central to rural America.

Mr. President, we have a responsibility to act in those areas where rural America is most deficient. In the most distressed rural areas, I do not believe people are looking for Government subsidies or handouts. However, these economically decentralized and less diverse areas can legitimately use assistance in two major areas where they lack resources: Capital formation, and information gathering and processing.

I know the distinguished chairman and other members of the Agriculture Committee have analyzed the most efficient means of delivering these resources in great detail. My proposal is much more modest, and attempts to supplement these efforts. It would assure that sufficient data is being collected to effectively monitor the changing economic conditions of rural America as a comprehensive rural development program is implemented.

Mr. President, the legislation which I am introducing today directs the Bureau of the Census to expand its data collection efforts to include more information about the rural economy. While I have just been able to cite statistics within my own State concerning the size of rural communities or the employment and average income levels for various business sectors, we still have relatively little information on what is happening within the various sectors. And we have relatively little information on how such developments are affecting the quality of life in other respects. For instance, we don't know exactly what is happening within the manufacturing or service sectors in rural America to know how different geographic areas are being affected, or what long-term impacts can be expected on employment and income levels, or what relationship exists with education, health care, infrastructure, rural housing, or other areas. Clearly, more information is needed.

Second, Mr. President, my legislation would recognize the important role of historic properties and related information as it relates to the quality of life in rural areas. It would require that any rural development programs take into account the potential impact they may have on the preservation of historic properties and historical and archeological data. Many rural areas have a unique sense of the history of their region that continues to live within their communities. It is important that this special component of rural America be preserved.

Mr. President, I again commend all of those that have expressed an interest in the issue of rural development. I believe it will remain one of the most significant economic issues facing this country for the rest of this century, and look forward to working with my colleagues to find comprehensive and innovative strategies for dealing with the needs of rural America.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1017

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Rural Progress Monitoring and Historic Preservation Act of 1989".

SEC. 2. MONITORING THE ECONOMIC PROGRESS OF RURAL AMERICA.

(a) BUREAU OF THE CENSUS.—The Director of the Bureau of the Census shall expand the data collection efforts of the Bureau to enable the Bureau to collect statistically significant data concerning the changing economic condition of rural counties and communities in the United States, including data on rural employment, poverty and income, and other information concerning the rural labor force.

(b) EMPLOYMENT REQUIREMENTS.—The Bureau of the Census shall, to the maximum extent practicable, employ residents of nonmetropolitan counties for the expanded rural data collection operations conducted in fiscal year 1990.

(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as may be necessary for each fiscal year to carry out subsection (a).

SEC. 3. HISTORIC PRESERVATION REQUIREMENTS.

With respect to applications for assistance submitted to any entity of the Department of Agriculture, the Secretary of the Interior, in consultation with the Assistant Secretary and the National Trust for Historic Preservation in recognition of its charter duties, shall prescribe and implement regulations concerning projects receiving funding from the Department of Agriculture and their relationship with the provisions of Acts entitled—

(1) "An Act to establish a program for the preservation of additional historic properties throughout the Nation, and for other purposes", approved October 15, 1966 (16 U.S.C. 470 et seq.); and

(2) "An Act to provide for the preservation of historical and archaeological data (including relics and specimens) which might otherwise be lost as a result of the construction of a dam", approved June 27, 1960 (16 U.S.C. 469 et seq.).

By Mr. HEINZ (for himself and Mr. DECONCINI):

S. 1018. A bill to set forth principles for United States nationals involved in industrial cooperation projects in the Soviet Union and the Baltic States, and for other purposes; to the Committee on Foreign Relations.

SLEPAK PRINCIPLES ACT

Mr. HEINZ. Mr. President, for many years this Senator and other Members of Congress have pressed the Soviet Government on issues of human rights. We have fought for individual cases—we have fought for questions of principle. We have pressed for changes in Soviet law and procedure. And we have had some success: things are changing in the Soviet Union.

We all welcome that change, and hope it continues. But at this point in the process, we must recognize that in the Soviet Union, the rights of the individual are still held hostage to the whim of the state.

It has been said that the business of America is business. But human rights are also our business. Americans doing business in the Soviet Union must not slip through that nation's still narrow portal of commerce by shedding the cloth of human dignity.

American businesses, simply because they are private entities, are a symbol of freedom. But we should expect these enterprises to be more than symbols. They should adhere to the same standards of human rights in the Soviet Union that they uphold here at home.

American firms have many practical difficulties to overcome in doing business in the U.S.S.R. The Congress, and the U.S. Government, have a responsibility to provide guidance in an area where we have the expertise—human rights.

Today Senator DECONCINI and I are introducing legislation that would provide a voluntary code of conduct for American businesses that choose to undertake joint ventures in the Soviet Union. We have called it the Slepak Principles Act, after the Soviet emigre and human rights activist Vladimir Slepak.

Our legislation lays out guidelines for U.S. businesses that will promote universally recognized fundamental freedoms in United States-Soviet joint ventures. In simple terms, our legislation urges American businesses in the Soviet Union to:

Avoid use of forced labor in any form;

Not allow the ethnic, religious, or political identity or activities of Soviet employees to affect their employment;

Not use structures that were churches or synagogues as places of business;

Maintain safe work environments for workersse can;

Use environmentally sound methods, and consult with affected communities about environmental considerations; and

Seek out private Soviet cooperatives as partners.

Our legislation directs the State Department to prepare an annual report on adherence to these principles by United States firms operating in the Soviet Union. It also directs that the principles and the State Department reports be made available to American businesses interested in Soviet joint ventures and to our allies, who represent a major part of the Soviet joint venture picture.

Mr. President, it is important that the Senate understand what this legislation is not. It is not a new restriction on United States-Soviet trade. It is not a disincentive to American firms seeking business opportunities in the Soviet Union.

This bill is an effort to educate and consciousness-raise. We want to encourage United States business operating in the Soviet Union to uphold American principles of human rights and fair play. It is a bipartisan effort. And it is an effort of both Chambers of Congress—parallel legislation is to be introduced in the other body by Congressman JOHN MILLER of Washington and LARRY SMITH of Florida.

Our effort is similar to the Sullivan principles, which sought to make American businesses operating in South Africa conscious of the special human rights considerations at work in that country.

I think all of our colleagues will agree that America, including American business, stands for something special in the world, specifically for a unique view of the rights and worth of the individual. I believe this legislation advances that special view, and I urge my colleagues to join us as cosponsors, and I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1018

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Slepak Principles Act".

SEC. 2. FINDINGS.

The Congress finds that—

(1) the Soviet Union freely undertook commitments to respect human rights and fundamental freedoms as set forth in the Helsinki Final Act, the Madrid and Vienna Concluding Documents, the Universal Declaration on Human Rights and other international human rights instruments;

(2) although there has been improved observance of human rights and fundamental freedoms in the Soviet Union and the Baltic States, serious violations of these rights and freedoms still occur there, and most improvements which have occurred have yet to be institutionalized;

(3) the utilization of forced labor in the manufacture of products and the subsequent buying and selling of these products is an abuse of human rights and is still practiced in the Soviet Union and the Baltic States;

(4) religious communities in the Soviet Union and the Baltic States have only limited control of the religious property they use and the Soviet Government can take such property away from these communities for its own use;

(5) Soviet labor practices have included denying individuals employment, discriminating against them in their employment, and dismissing them from their employment for acting upon their rights and freedoms;

(6) employers have an obligation to provide safe working conditions for their employees;

(7) serious environmental problems exist in the Soviet Union and the Baltic States, and local officials and communities have very limited ability to address or resolve these problems or to protect the environment;

(8) the recent enactment of laws in the Soviet Union allowing Soviet citizens to engage in limited forms of private enterprise in the form of cooperatives is a positive step towards the establishment of a freer economy and society;

(9) Vladimir Slepak, a former Soviet citizen and a founding member of the Moscow Helsinki Monitoring Group organized to monitor Soviet compliance with the Helsinki Final Act of the Conference on Security and Cooperation in Europe, has proposed principles relating to the conduct of industrial cooperation projects in the Soviet Union and the Baltic States that will promote individual human rights there; and

(10) it is in the interest of the United states that all United States nationals participating in industrial cooperation projects, including joint ventures, in the Soviet Union and Baltic States conduct their activities in a way that is consistent with internationally recognized norms regarding respect for human rights and fundamental freedoms, occupational safety standards, and protection of the environment.

SEC. 3. SLEPAK PRINCIPLES.

It is the sense of the Congress that United States nationals involved in industrial cooperation projects, especially joint ventures, in the Soviet Union and the Baltic States, or seeking to do so, should undertake—

(1) to ensure that they do not use goods, facilities, or services when there is reason to believe that these goods, facilities, or services were produced, wholly or in part, with the utilization of forced labor;

(2) to ensure, with respect to the Soviet workers employed in the industrial cooperation project, that a worker's political or religious views, sex, ethnic, or social background, or engagement in activities promoting human rights or other activities protected under the Helsinki Final Act and the Madrid and Vienna Concluding Documents, will not affect, or be allowed to affect, the status or terms of his or her employment;

(3) to decline participation in an industrial cooperation project involving the use of a structure currently or previously serving as a religious institution or a place of worship;

(4) to ensure that methods of production used in the industrial cooperation project meet international standards for occupational safety and do not pose a threat to the danger to workers or surrounding communities;

(5) to refrain from using methods of production that pose unnecessary environmental risks to the surrounding environment, including nearby populations and their property, and to seek to consult with concerned populations regarding protection of the local environment; and

(6) to seek out private cooperatives as potential partners or participants in commercial activities, when that is commercially feasible and allowed by relevant Soviet law.

SEC. 4. ANNUAL REPORT.

(a) Not later than 2 years after the date of enactment of this Act, and every 12 months thereafter, the Secretary of State shall submit to the Congress a report describing the extent to which industrial cooperation projects, including joint ventures, located in the Soviet Union and the Baltic States in which United States nationals participate adhere to the principles contained in section 3.

(b) The Secretary of State shall provide this report to the Organization for Economic Cooperation and Development, including its secretariat and its member States, and encourage these States to promote principles similar to those contained in this Act.

(c) The Secretary of Commerce and other United States Government agencies in contact with United States nationals participating in or interested in participating in industrial cooperation projects, including joint ventures, in the Soviet Union and the Baltic States shall inform these United States nationals of the contents of this Act and provide them with copies of the reports submitted to the Congress under this section.

SEC. 5. DEFINITIONS.

As used in this Act—

(1) the term "industrial cooperation" means the following commercial activities: joint ventures in production and sale; coproduction; specialization in production and sale; construction, adaptation and modernization of plants; cooperation in the setting up of complete industrial installations; mixed companies;

(2) the term "United States national" means—

(A) a citizen of the United States or other individual who owes permanent allegiance to the United States; and

(B) a corporation, partnership, or other business association organized under the laws of the United States, any State or territory thereof, the District of Columbia, the Commonwealth of Puerto Rico, or the Commonwealth of the Northern Mariana Islands; and

(3) the phrase "adhere to the principles contained in section 3" means—

(A) agreeing to abide by the principles contained in section 3 in any industrial cooperation projects undertaken in the Soviet Union or the Baltic States;

(B) providing the Department of State with information about industrial cooperation projects in the Soviet Union and the Baltic States that is relevant to the principles contained in section 3; and

(C) making a good faith effort to abide by the principles contained in section 3 in any industrial cooperation projects undertaken in the Soviet Union or the Baltic States.

● Mr. DECONCINI. Mr. President, today, my distinguished colleague from Pennsylvania, Senator HEINZ, introduced the Slepak Principles Act. The Senator is an active and committed member of the Helsinki Commission, which I chair, and I am pleased to be cosponsoring this legislation with him.

This legislation promotes a modified version of the Slepak principles. These are named for Vladimir Slepak who served 5 years in Siberian exile for his efforts to promote Soviet compliance with the Helsinki accords. The accords were signed by the United States, Canada, and 33 European nations, including the Soviet Union, in 1975. Now living in Israel, Mr. Slepak believes that trade can serve in a positive and direct way to promote human rights.

The Slepak principles tell us how this can be done. They represent a fundamental element of the philosophy on which the Helsinki accords are based—a philosophy which is designed to guide relations between nations toward the common goal of achieving lasting peace. The Helsinki accords recognize that this objective can be reached only if two key aspects of one country's relationship with another country, economic cooperation and military security, are developed in concert with a third aspect—respect for individual freedoms. It is this human rights component of the Helsinki accords which has been instrumental in shaping the direction and nature of our overall relations with Warsaw Pact countries.

President Gorbachev's initiatives are a dramatic example of how domestic reforms can act as a catalyst to the expansion of a country's international relations in general. This atmosphere of hope that the cold war has ended is creating a renewed Western interest in the Soviet Union's commercial market potential. As United States companies explore trade possibilities in the U.S.S.R., they have a unique opportunity to promote the Helsinki process—a process which is playing an ever-increasing role in East-West relations.

The purpose of the Slepak principles is to offer American firms a set of voluntary—and I stress voluntary—guidelines to follow as they establish joint ventures in the U.S.S.R. It is not the intent of the Slepak Principles Act to legislate restrictions on how United States companies should do business with the Soviets. It is the objective of the principles, however, to increase the level of awareness among United States corporations about certain Soviet labor policies and practices which infringe on human rights and run contrary to the goals of Helsinki. The extent to which U.S. corporations choose to permit policies which compromise the standards they follow elsewhere in the world is up to them. But in this era of glasnost and perestroika, it is difficult to understand why an American firm would allow a commercial venture with the Soviets to ignore internationally accepted standards with respect to human rights and environmental concerns. This is especially true given the importance we Americans attach to human rights and fundamental freedoms.

The Slepak principles speak to such basic questions as nondiscrimination on the basis of sex, religion, ethnic background, or political views. They encourage companies not to endorse the Soviet Government's practice of using desecrated churches and synagogues as sites for commerical facilities. The principles encourage the adoption of international standards for occupational safety and methods of production which take into account environmental concerns.

There are those, Mr. President, who may be critical of the Slepak principles. These people will claim they are an effort to inhibit trade with the Soviets. It will be unfortunate if they are viewed in this way. The Slepak principles are not a statement of whether we should or should not increase our trade with the Soviet Union. Rather, they provide companies who wish to develop Soviet trade with a framework which would enable them to conduct business in a manner more consistent with corporate standards in the West. Moreover, they will help to build a broader consensus in this country on trading with the Soviets, an issue on which there are currently very divergent views. The Slepak principles offer corporate America the chance to contribute to the Helsinki process. They also demonstrate the wisdom of Ralph Waldo Emerson when he wrote, "Trade makes peace and trade keeps peace."●

By Mr. FOWLER (for himself, Mr. LEAHY, Mr. PRYOR, Mr. KERREY, Mr. CONRAD, and Mr. BOREN):

S. 1019. A bill to amend the Rural Electrification Act of 1936 to establish

a nationwide rural star school program to improve educational opportunities in rural areas and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

RURAL STAR SCHOOLS ACT

● Mr. FOWLER. Mr. President, today there are hundreds of promising students in rural areas throughout this Nation who have exhausted the coursework in science or foreign language that is available to them in their local high schools. They are ready to move on to more advanced studies, but there is no one to teach them.

This is a waste of our most precious resources and our greatest potential. It is a problem that has always plagued our small towns and countryside. For the first time, I think we have a real opportunity to do something about it. That is why I am introducing the Rural Star Schools Act of 1989, as part of Senate Agriculture Committee legislative package for rural development.

In this computer, satellite, and telecommunications age, there is no excuse for important segments of our population to be isolated from knowledge and information—information they can use to develop careers and economic opportunities. Star schools will allow us to use modern technology to provide stronger curriculums in remote school systems that would not otherwise have the resources to offer courses in calculus or Japanese. The coursework made available will complement and enhance the work of the many dedicated and usually overburdened teachers who serve our rural schools and communities.

Today it is possible for students with special needs and aptitudes, whatever their location, to take even the most esoteric courses and to communicate with faraway instructors using television screens and computer keyboards. The legislation I propose would make a real commitment to education in our rural areas by making an initial investment in the necessary hardware and instruction. It is technology neutral, allowing us to employ the best transmissions capabilities available in a given area.

American education in general has to improve—with every international comparison showing American teenagers falling behind their Asian and European counterparts in math and science. We know our young people must be better educated if we are going to succeed in international competition. We know that educated citizens form the foundation of a free society. For the individual, education is the key to personal success. For our rural communities, it is the key to economic development.

When I visit my home State, every local official and businessperson I talk to says that limited educational resources are a constant obstacle to rural development. We have got to have a better educated, more highly skilled work force, with better access to vocational training, to serve the industries and businesses which do not have to locate in urban centers. As we work to improve our Nation's educational system, cannot afford to leave the bright students of our rural areas behind.

I believe this is in our national interest. I also say this on behalf of our important small town heritage—because these are the people who feed us and clothe us and ultimately account for half of America's GNP. Lack of educational and job opportunities are among the main reasons that young people are forced to leave our small towns. The star schools concept—supported by so many of our educators, broadcasters, rural cooperatives, and responsible corporate citizens—epitomizes the progressive change we need for the survival of our rural communities.

The benefits from rural star schools can help revitalize the countryside, offering rural families a real choice of staying close to their roots: to the land, to the families and friends, to the schools, churches, and communities they grew up with.

I ask my colleagues to join me in this commitment to rural America.●

By Mr. BRADLEY (for himself and Mr. MATSUNAGA):

S. 1020. A bill to amend the Foreign Assistance Act of 1961 to authorize appropriations for the Child Survival Fund and for other health and disease assistance programs; to the Committee on Foreign Relations.

AUTHORIZATION OF APPROPRIATIONS FOR CHILD SURVIVAL EFFORTS

● Mr. BRADLEY. Mr. President, I rise to introduce a bill with my colleague from Hawaii [Mr. MATSUNAGA], to reauthorize the international health programs, including the Child Survival Fund. This bill continues the current U.S. commitment to international immunizations.

Each year, 3.5 million children—about 10,000 a day—die needlessly from 6 vaccine preventable diseases: polio, measles, whooping cough, diptheria, tetanus, and tuberculosis. An equal number of children who survive these diseases suffer permanent physical and mental handicaps or are so severely weakened that they succumb more readily to the ravages of malnutrition and diarrhea. This is a daily tragedy in the developing world that can only be prevented through a worldwide effort to eradicate these deadly diseases.

Fortunately, the technology is available to prevent this tragedy. Universal access to childhood immunization, however, requires a continuing commitment on the part of all of the world's nations. The United States is not being asked to carry the entire burden of immunization of the world's children, but to participate in a global effort. In fact, approximately 80 percent of the resources needed to carry out vaccination programs are now provided by developing nations. But help from the industrialized nations is crucial to this effort.

In 1986, in an effort to immunize the world's children, we increased the Child Survival Fund by $50 million, an amount devoted to assisting nations in oral rehydration therapy and the development of locally sustainable delivery systems capable of immunizing their own children. The Child Survival Fund Act of 1989 continues this commitment by authorizing funding for this program through 1991. The bill authorizes $96 million in 1990—the same level as 1987—and $100 million in 1991 to ensure that AID will continue its commitment to assisting the developing nations in the delivery, distribution, and use of vaccines as well as oral rehydration therapy.

Mr. President, I am pleased to report that the efforts undertaken with the help of this funding have produced visible results. At the beginning of the decade, only about 10 percent of the children in developing nations were immunized. Currently, about 50 percent of children had been immunized. Any by 1990, if current world commitment continue, about 70 to 80 percent of the world's children will be immunized. We are within striking distance of the goal of universal access to immunizations for the world's children. That is no small accomplishment. Increases in immunizations are translating into actual reductions in cases of fatal and debilitating diseases among children. According to UNICEF, 1.5 million deaths were averted due to immunizations in 1987.

We need to continue the good work that we have begun. Unless immunizations remain at current levels, the toll on children will be significant. In addition to humanitarian concerns, a commitment to universal immunization is a cost-effective strategy. In the industrialized world, every $1 spent on immunizations saves about $14 in preventative and rehabilitative costs. In the developing world, savings are even higher. In nations such as the Ivory Coast, for every $1 spent on immunizations, $20 in medical and rehabilitation costs are saved.

For the sake of the world's children, I urge my colleagues to support the continuation of this valuable effort.●

By Mr. McCAIN:

S. 1021. A bill to provide for the protection of Indian graves and burial grounds, and for other purposes; to the Select Committee on Indian Affairs.

NATIVE AMERICAN GRAVE AND BURIAL PROTECTION ACT

● Mr. McCAIN. Mr. President, I rise today to introduce a bill for discussion on the issue of repatriating skeletal remains of native Americans, grave goods, and sacred ceremonial objects currently held in museums and other institutions. The measure I am introducing is similar to H.R. 1646 as introduced by Congressman MORRIS UDALL earlier this year.

The increasing controversy between museums and Indian tribes over native American skeletal remains, objects, and grave goods focuses primarily on the issue of ownership. Museums generally presume ownership on the basis of the Antiquities Act of 1906 and the Archaeological Resources Protection Act of 1979. Both acts basically provide that skeletal remains and other archaeological resources found on public lands are property of the United States and that they may be held in permanent museum collections. Tribes argue that title to skeletal remains, grave goods and ceremonial objects is held by the tribe unless the tribe or an individual member specifically transferred title to the museums. Last year the Select Committee on Indian Affairs considered S. 187, a bill which would have established a Native American Museum Claims Commission. The purpose of that Commission would be to investigate and adjudicate disputed claims if a negotiated voluntary settlement failed.

The bill I am introducing for discussion eliminates the need for a commission to adjudicate disputed claims by clarifying that the ownership of skeletal remains and grave goods and sacred ceremonial objects is held by the tribes or the heir of the native American, if one can be identified. The bill defines a process for repatriation by requiring Federal agencies to undertake a 2-year inventory of the skeletal remains and objects in their possession or control. The Federal agencies would then have 1 year to disseminate the result of their inventory to the governing body of each tribe. Each tribe would then have 1 year from the date they receive the inventory to notify the agency which, if any, remains, grave goods or objects they decide to accept and the date and manner of delivery. The agency would then be required to return the items requested unless they could show that those items were acquired with the express consent of the tribe or individual owners, or the items were indispensable for the completion of a specific scientific study. If the items were retained for scientific study, the agency would have 90 days after the study is completed to return the items to the tribe if the tribe had requested the agency to do so earlier.

The bill establishes a similar course of action for museums which receive Federal funds. A museum which fails to comply with the provisions of the act would be precluded from receiving any further Federal funds. The bill also prohibits the sale, use for profit, or interstate transport of native American skeletal remains, grave goods, or sacred ceremonial objects. A person may be fined up to $10,000 if convicted of violating this provision. The U.S. district courts are granted the authority to enforce the provisions of the act.

I would like to take a moment to highlight one result from last year's hearings that offers some hope for a consensus solution to the ongoing controversy between museums and Indian tribes. Mr. Michael J. Fox, director of the Heard Museum in Arizona, testifying on behalf of the American Association of Museums [AAM], presented a proposal for the committee's consideration for an intense year-long dialog between the native American and museum communities. The purpose of the dialog would be to review, study, and submit recommendations to assist the Congress in their consideration of a policy by which native American claims to certain categories of objects in museums and other institutions can be resolved in a uniform and timely fashion.

The proposed year-long dialog was greeted with some understandable skepticism within the native American communty. Indian tribes argued that legislation was necessary as a means to force museums and other institutions to process their claims for repatriation of certain objects. Tribal witnesses told the committee that without some enforcement mechanism their claims would never receive serious consideration. Keeping both perspectives in mind, the Senate Select Committee on Indian Affairs Committee Report (S. Rept. 601, 100th Cong. 2d sess. 5) included the following statement regarding AAM's proposal:

> The museum community and the professional organizations which have an interest in permanent curation are opposed to the legislation. On the other hand, the Museum community has acknowledged the necessity of responding to tribal demands for repatriation and has volunteered to facilitate a dialogue between tribes and museums to develop recommendations for addressing the conflict. The Committee would encourage this activity, provided that the tribes wish to participate and have an equal opportunity to frame the agenda of such a dialogue and development of recommendations. * * *

After the 100th Congress adjourned without legislation enacted, Mr. Fox, with the full support of the board of trustees for the Heard Museum, began turning his proposal into a reality. A meeting was held at the Heard Museum in Phoenix, AZ, on December 12, 1988 to draft a plan of action for a national dialog. In attendance at this planning session were members of the native American community, museum curators, and a group of distinguished anthropologists.

The panel agreed that the national dialog should be composed of individuals representing diverse points of view, with equal representation for native Americans. All present indicated that the goal of returning to the Congress with the results of the national dialog by the beginning of the 2d session of the 101st Congress was both reasonable and necessary.

With an initial plan of action in place, the focus of attention turned to selecting the national panel members. Ms. Suzan Harjo, executive director, National Congress of American Indians, assumed a primary role in selecting the native American panelists. Mike Fox coordinated the selection process for members from the museum community. The original list of panel members includes:

Dr. William L. Boyd, president, Field Museum of Natural History, Chicago, IL;

Mr. Roger Buffalohead, St. Louis Park, MN;

Dr. Vine Deloria, Jr., Department of Political Science, University of Arizona;

Dr. Lynne Goldstein, Department of Anthropology, University of Wisconsin-Milwaukee, Milwaukee, WI;

Ms. Suzan Harjoi, executive director, National Congress of American Indians, Washington, DC;

Mr. Oren Lyons, Onondaga Nation, Nedrow, NY;

Mr. Will Mayo, TANANA Chiefs Conference, Fairbanks, AK;

Dr. Michael Morratto, president, INFOTEC, Fellow and Research Associate in Anthropology, California Academy of National Science;

Mr. Ruben Snake, Winnebago Tribal Council, Winnebago, NE;

Dr. Martin Sullivan, director, New York State Museum, Albany, NY;

Mr. Walter Echohawk, Native American Rights Fund, Boulder, CO;

Ms. Harriet Toro, Phoenix area vice president, National Congress of American Indians, Sells, AZ;

Dr. Douglas Ubelaker, Department of Anthropology, National Museum of Natural History/National Museum of Man, Smithsonian Institution, Washington, DC; and

Dr. Peter H. Welsh, director of research/chief curator, the Heard Museum, Phoenix, AZ.

Dr. Paul Bender, dean, College of Law, Arizona State University, was selected as the panelist's facilitator and Mr. Michael J. Fox as the administrator. In addition to the panelists, Dr. Rennard Strickland, visiting professor, Arizona State University, serves as an ex-officio member of the panel, and various House and Senate staffers have been welcomed as observers. Although each of the panelists is associated with a university, organization,

museum or institution, they are participating on the panel in their individual capacities. Each member of the panel brings important experience and expertise to this task. The Congress and all American people should benefit greatly from the work which has been undetaken by the panel.

The national panel has already held two meetings at the Heard Museum, one on April 1 and the second on May 6. While a significant amount of discussion remains, the process is underway, and, I believe, the dialog has the potential not only to help the museum and native American communities to better understand the other's perspective, but to assist the Congress in achieving a fuller understanding of the repatriation issue. It is my hope that the bill I am introducing today for discussion, along with the other House bills or any additional Senate bills, will help facilitate the panel's discussions on what would constitute a fair and manageable repatriation process. I look forward to the recommendations of the national panel.

I want to publicly commend the Heard Museum and the board of trustees for the time, resources, and facilities they have made available to develop and support this national dialog. I also want to commend the National Congress of American Indians for taking an active role in this year-long dialog. I am encouraged by their participation, and know that they will make a significant contribution to the panel's discussions.

Mr. President, I ask unanimous consent that a copy of the bill be inserted in the RECORD following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1021

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Native American Grave and Burial Protection Act".

FINDINGS

SEC. 2. The Congress finds that—

(1) numerous agencies and instrumentalities of the Federal Government, as well as State and private museums which receive Federal funding, have in their possession the skeletal remains of Native Americans;

(2) some of these skeletal remains are readily identifiable as to tribal origin and, in other instances, tribal origin can be inferred with reasonable certainty;

(3) Indian tribes have expressed a clear and unequivocal interest in acquiring these skeletal remains for purposes of reinterment or other disposition which is consistent with tribal religious or cultural practices;

(4) it is necessary to develop an effective mechanism to provide for the respectful return of these skeletal remains;

(5) numerous Federal agencies have jurisdiction over Federal lands which contain the skeletal remains of Native Americans, associated grave offerings, and sacred ceremonial objects;

(6) numerous institutions have gained control over skeletal remains, associated grave offerings, and sacred ceremonial objects by virtue of Federal funding of archeological and other projects on non-Federal lands;

(7) confusion exists over who should rightfully have control or ownership over skeletal remains and ownership of associated grave offerings and sacred ceremonial objects, which are located on, or which have been disinterred from, Federal lands; and

(8) it is necessary to clarify ownership interests in Native American items located on tribal and Federal lands.

DEFINITIONS

SEC. 3. For purposes of this Act—

(1) The term "Native American" means any individual who is—

(A) an Indian,

(B) an Alaska Indian, Eskimo, or Aleut, or

(C) a Native Hawaiian.

(2) The term "Native Hawaiian" means any individual who is a descendant of the aboriginal people who, prior to 1778, occupied and exercised sovereignty in the area that now comprises the State of Hawaii.

(3) The term "Indian tribe" means any tribe, band, nation, or other organized group or community of Indians which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

(4) The term "tribal land" means—

(A) all lands within the limits of any Indian reservation under the jurisdiction of the United States Government, notwithstanding the issuance of any patent, and including rights-of-way running through the reservation,

(B) all dependent Indian communities, including lands conveyed to Native Corporations pursuant to the Alaska Native Claims Settlement Act, within the borders of the United States whether within the original or subsequently acquired territory thereof, and whether within or without the limits of a State, and

(C) any lands administered for the benefit of Native Hawaiian pursuant to the Hawaiian Homes Commission Act, 1920 and section 4 of Public Law 86-3 (48 U.S.C. 491, note preceding).

(5) The term "grave goods" means any object which was found in the grave of, or is otherwise directly associated with the skeletal remains of, a Native American.

(6) The term "sacred ceremonial object" means any specific item which is, or has been, devoted to a Native American religious ceremony and which is essential for the continuing observance of such religious ceremony.

(7) The term "museum" means any museum, university, government agency, or other institution receiving Federal funds which possesses or has control over any Native American skeletal remains or sacred ceremonial objects.

CONSENT REQUIREMENT

SEC. 4. (a) Notwithstanding any other provision of law, it shall be unlawful for any person to sell, use for profit, or transport from one State to another State any skeletal remains of a Native American, any grave goods, or any sacred ceremonial objects without the express written consent of—

(1) in the case of remains and grave goods, the heirs of the Native American, or

(2) in the case of sacred ceremonial objects or in the case of remains or grave goods for which the heirs of the Native American cannot be ascertained, the governing body of the Indian tribe of which the Native American was a member or from which such grave goods or objects originated.

(b) Any person who knowingly violates subsection (a) shall, upon conviction, be fined not more than $10,000 per violation.

OWNERSHIP

SEC. 5. (a) Any skeletal remains of a Native American, any grave goods, or any sacred ceremonial objects which are excavated or discovered after the date of enactment of this Act shall be disposed of according to the wishes of—

(1) in the case of remains and grave goods, the heirs of the Native American, or

(2) in the case of sacred ceremonial objects or in the case of remains or grave goods for which the heirs of the Native American cannot be ascertained, the governing body of the Indian tribe of which the Native American was a member or from which such grave goods or objects originated.

(b) Any skeletal remains and grave goods of a Native American for whom the heirs cannot be ascertained, and any sacred ceremonial objects, that are found on Federal or tribal land shall be considered to be owned by the Indian tribe—

(1) which has jurisdiction over the reservation on which such items were discovered,

(2) which aboriginally occupied the area from which such items were discovered,

(3) in the case of remains and grave goods, of which the Native American was a member,

(4) in the case of grave goods or sacred ceremonial objects, from which such grave goods or objects originated, or

(5) which can show a cultural affiliation with such items.

(c) Nothing in this section shall prevent an Indian tribe from expressly relinquishing title to any skeletal remains, grave goods, or sacred ceremonial objects.

ACTIONS BY FEDERAL AGENCIES

SEC. 6. (a) By no later than the date that is 2 years after the date of enactment of this Act, any agency or instrumentality of the Federal Government which has possession or control of any skeletal remains of a Native American, any grave goods, or any sacred ceremonial object shall compile an inventory of all of such items in its possession or control and, to the extent possible, identify such items as to the Indian tribe of which the Native American was a member or from which the items originated.

(b)(1) By no later than the date that is 3 years after the date of enactment of this Act, each Federal agency and instrumentality described in subsection (a) shall provide to the governing body of each Indian tribe notice of any skeletal remains of a Native American, grave goods, or sacred ceremonial objects that are associated with the Indian tribe and are in the possession or control of the agency or instrumentality. The notice shall contain—

(A) a list which identifies each of such items and the circumstances surrounding the acquisition of the item, and

(B) a list of items that are not definitely identifiable as being associated with that Indian tribe but which, given the totality of circumstances surrounding the acquisition of the item, make it more likely than not that the item originated with that Indian tribe or that the skeletal remains are of a member of that Indian tribe.

(2) A copy of each notice provided under paragraph (1) shall be sent to the Secretary

of the Interior who shall publish a list of all the notices in the Federal Register.

(c)(1) By no later than the date that is 1 year after the date on which notice is provided to an Indian tribe by a Federal agency or instrumentality under subsection (b)(1), the Indian tribe shall decide which, if any, of the remains, grave goods, or sacred ceremonial objects it agrees to accept and shall notify the Federal agency or instrumentality of such decision and of the place, date, and manner of delivery that the Indian tribe has chosen.

(2) Notwithstanding any other provision of law, upon receiving notice of acceptance of items by an Indian tribe under paragraph (1), the Federal agency or instrumentality shall return such items to the Indian tribe unless such items—

(A) were acquired with the express consent of the Indian tribe or the legitimate Native American owners of such items, or

(B) are indispensable for the completion of a specific scientific study, the outcome of which would be of major benefit to the United States.

(3) If an Indian tribe provides notice of acceptance of items to a Federal agency under paragraph (1) and the items are not returned to the Indian tribe by reason of a scientific study described in paragraph (2)(B), the Federal agency shall return the items to the Indian tribe by no later than the date that is 90 days after the date on which the scientific study is completed.

ENFORCEMENT

SEC. 7. The United States district courts shall have jurisdiction over any action brought by an heir of a Native American or by an Indian tribe alleging a violation of this Act and shall have the authority to issue such orders as may be necessary to enforce the provisions of this Act.

ACTIONS REQUIRED FROM CERTAIN MUSEUMS

SEC. 8. (a) By no later than the date that is 2 years after the date on which a written request for the return of skeletal remains, grave goods, or sacred ceremonial objects is submitted by the governing body of any Indian tribe to a museum which receives Federal funds, the museum shall return to the Indian tribe any skeletal remains of a Native American who was a member of the Indian tribe, and any grave goods or sacred ceremonial object which originated from the Indian tribe, that are in the possession or control of the museum unless—

(1) such items were acquired with the consent of the Indian tribe or the Native American owners of such items, or

(2) such skeletal remains are indispensable for the completion of a specific scientific study, the outcome of which would be of major benefit to the United States.

(b) If an Indian tribe makes a written request to a museum for the return of items under subsection (a) and the items are not returned to the Indian tribe by reason of a scientific study described in subsection (a)(2), the museum shall return the items to the Indian tribe by no later than the date that is 90 days after the date on which the scientific study is completed.

(c) Notwithstanding any other provision of law, any museum that fails to comply with the provisions of this section shall no longer be eligible to receive any Federal funds.●

By Mr. INOUYE:

S. 1022. A bill to amend the Communications Act of 1934 to provide authorization of appropriations for the Federal Communications Commission, and for other purposes; to the Committee on Commerce, Science, and Transportation.

AMENDING THE COMMUNICATIONS ACT OF 1934

● Mr. INOUYE. Mr. President, today, I am introducing legislation to reauthorize the Federal Communications Commission for fiscal years 1990 and 1991. The President has asked that we fund the Commission at a level of $109,831,000 for fiscal year 1990 and $117,831,000 for fiscal year 1991. Both of these amounts represent increases over current authorization levels. The increase for fiscal year 1990 is to fund pay increases and the retirement program. The much larger increase for the next fiscal year is to cover the major cost of consolidating the Commission in a single building.

The legislation I am introducing reflects these amounts requested by the administration. The FCC's workload has increased tremendously with the introduction of new services. Not only must the Commission first determine what new services shall be offered, it then must process the tens of thousands of applications it receives, enforce its rules and police interference. The Commission is also involved in fundamental decisions about the use of the scarce electromagnetic spectrum and important actions concerning the development and maintenance of competition in the telecommunications marketplace. Finally, the Commission must continue to pursue effective regulatory policies where necessary to ensure the public interest is served.

This legislation also provides for the extension of: the travel reimbursement program; the program to permit the Commission to use the skills of older Americans; and the authority to relocate the Hawaii monitoring station. The Congress has provided for these policies in past FCC reauthorization legislation. Experience has demonstrated their value, and I believe we need to continue them.●

By Mr. DASCHLE (for himself, Mr. LEAHY, Mr. PRYOR, and Mr. CONRAD):

S. 1023. A bill to provide grants by the Department of Agriculture for technology and emergence assistance to benefit rural areas, to target Rural Electrification Administration investments toward business development, telecommunications improvements, and community planning, to assist distressed rural hospitals with FmHA community facility loans, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

ADVANCED TECHNOLOGY AND EMERGENCY ASSISTANCE ACT OF 1989

By Mr. DASCHLE (for himself, Mr. LEAHY, and Mr. CONRAD):

S. 1024. A bill to improve the coordination of the rural development efforts of the Department of Agriculture, and to increase the rural development efforts of the Rural Electrification Administration, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

RURAL MONITORING AND ASSISTANCE ACT OF 1989

● Mr. DASCHLE. Mr. President, out of concern that rural communities have for too long taken a back seat in our Nation's economic affairs, I rise today to introduce the Rural Monitoring and Assistance Act of 1989 and the Advanced Technology and Emergency Assistance Act of 1989.

Let's face it. The economic statistics for nonmetropolitan, noncoastal America have not been encouraging during the past decade. After experiencing a revitalization during the 1970's, rural areas today suffer from net outmigration; lower average incomes and higher unemployment rates than metropolitan areas; and a deterioration in quality of life through hospital closings. We need to take affirmative steps to address these problems. As one Nation, we cannot consciously allow an entire way of life for a significant sector of our society to wither. We owe it to ourselves to make rural, as well as urban life, viable.

The two bills I am introducing today address several important needs faced by rural areas.

RURAL MONITORING AND ASSISTANCE ACT OF 1989

This bill would do two things. First, it would require the Secretary of Agriculture to make recommendations by September 1, 1989, regarding how to improve the coordination of rural development activities by seven USDA agencies (FmHA, Forest Service, Soil Conservation Service, Agricultural Research Service, REA, Office of Transportation, ASCS, Extension Service).

The Department of Agriculture has a strong presence in rural America. Its successes and failures can have a dramatic impact on life in rural areas. Yet, many USDA programs have been seriously impaired in recent years. To cite one example, nonagricultural rural assistance funding for the Farmers Home Administration alone has fallen from approximately $3 billion per year to roughly $600 million per year in the past decade.

The Rural Monitoring and Assistance Act recognizes that budgetary restrictions will continue to restrain the amount of Federal investment in community development programs in rural areas. However, this provision mandates that we should not give up on ensuring that the money we do allocate for this purpose is spent wisely. I am hopeful that the Secretary of Agriculture's study, due by the end of this fiscal year, will make thoughtful suggestions for better targeting and coordinating our limited resources for

rural development within the Department of Agriculture.

Second, this bill would require the Secretary of Agriculture to study economically distressed rural counties from fiscal years 1990 through 1993, and make recommendations about how USDA can best meet the needs of distressed rural economies.

This provision recognizes that certain counties have very specific needs for revitalizing economic conditions. A long-term study of these needs would greatly enhance our ability, as well as the ability of the Department of Agriculture, to ensure that the unique needs of certain areas can be met constructively.

ADVANCED TECHNOLOGY AND EMERGENCY ASSISTANCE ACT OF 1989

This bill provides for emergency loans to rural communities, the restructuring of Farmers Home Administration (FmHA) hospital loans, technical assistance, and targeted investment of Rural Electrification Administration funds toward rural development activities.

EMERGENCY LOANS FOR COMMUNITIES

This bill would create a new emergency loan authority within FmHA to address emergency needs in rural communities. The proposal would amend the current law to allow communities to apply for short-term, low-interest loans for emergency purposes. Emergency situations are defined as those events that cannot be practically planned for by a local governmental entity. The maximum loan amount under the program would be $50,000, with a maximum term of 2 years. The proposal would authorize $2.5 million for the program for fiscal year 1990, and $5 million for each fiscal year thereafter.

South Dakota communities continually face unanticipated emergencies, such as the need to replace an ambulance or repair a broken water line. These are situations that cannot always be absorbed by the budgets of small communities. A $50,000 expense is a budget buster for many small communities across the country. This provision will help those communities that are unable to qualify for private financing to deal with such emergencies.

Terms of loans made under this program could be converted to longer terms under existing loan programs within FmHA. This emergency loans proposal would simply augment current FmHA efforts to finance these activities.

TECHNICAL ASSISTANCE

My bill would also retool existing law that provides grants for purposes of preparing long-range development plans, preparing project-specific business plans, and funding community leadership development. My proposal would amend the existing section 111 grants program at FmHA to make private nonprofit organizations eligible for the grants. This change recognizes the need to maximize the benefit these programs can play in making positive changes in rural America.

This proposal would also increase authorization levels for technical assistance by $5 million. This additional pool of funds would be targeted to technology advancement proposals. The funds would be used to promote the development of computer and telecommunications centers.

FMHA HOSPITAL LOAN RESTRUCTURING

The FmHA Hospital Loan Restructuring provision would direct the Secretary of Agriculture to promulgate regulations to restructure delinquent hospital and medical care facility loans. The regulations would be similar to those promulgated under the Farm Credit Act for delinquent farm loans. As such, the program would not cost the Federal Government any money. The goal of this proposal is to ensure that rural hospitals do not fail as a result of Federal policies that display a benign neglect toward the needs of rural health care. While I cannot guarantee that this provision will save every rural hospital that has a FmHA loan, it will at least provide the delinquent health care facility an opportunity to restructure its Federal obligation.

For over a year, I have been working with Five Counties Hospital in Lemmon, SD, trying to reach some agreement with FmHA regarding the community's struggle to save the facility. The hospital is vitally important for the emergency, short-term health care needs of the entire Northwest region of South Dakota. I am convinced that most hospitals facing similar circumstances would have closed long ago. Whether or not closing is in their best interests, these facilities must at least be afforded the opportunity to restructure their Federal debt in a manner consistent with the Federal Government's fiduciary responsibility.

TARGETING INVESTMENTS BY ELECTRIFICATION BORROWERS

Finally, this bill would provide specific guidance to rural electric cooperatives as they consider how to invest in development activities. Currently, cooperatives can use up to 15 percent of their total utility plant for any purpose, without the approval of the administrator. My provision would target that investment to such development activities as business development centers; rural business investment corporations; business, medical or education-related telecommunications or infrastructure improvements; business incubator programs; or related activities. This should encourage greater use of the funds already available to the cooperatives.

Both the Rural Monitoring and Assistance Act and the Advanced Technology and Emergency Assistance Act attempt to direct our limited rural development resources to activities that will bring the most benefits to rural residents. I ask that my colleagues join me in reaffirming our commitment to rural Americans and show them that they, too, can share in the richness and blessings of our Nation's economic strength.

I thank the Chair and ask unanimous consent that the entire texts of my bills be printed in the RECORD.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

S. 1023

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Advanced Technology and Emergency Assistance Act of 1989".

SEC. 2. TARGETING INVESTMENTS BY ELECTRIFICATION BORROWERS.

Section 312 of the Rural Electrification Act of 1936 (7 U.S.C. 940b) is amended—

(1) by inserting "(a) IN GENERAL.—" before "A borrower"; and

(2) by adding at the end thereof the following new subsection:

"(b) TARGETING INVESTMENTS.—Amounts intended to be invested by a borrower under subsection (a) shall be invested in—

"(1) new businesses, business development centers, community development corporations, business investment corporations, business, medical or education related telecommunications or infrastructure improvements, or any related activities including technical assistance programs in rural areas; or

"(2) other community, business or economic development projects or investments.".

SEC. 3. PROVIDING ASSISTANCE THROUGH LOCAL GOVERNMENTS AND NONPROFIT PRIVATE CORPORATIONS.

Section 306(a)(11) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)(11)) is amended—

(1) by inserting after "may select" the following: ", or to private nonprofit development corporations approved by the Secretary,"; and

(2) by adding at the end thereof the following new sentence: "To the extent that private nonprofit development corporations receive grants under this paragraph, such corporations shall coordinate their efforts to provide services or assistance with such grants with local, regional, and State governments as appropriate.".

SEC. 4. RURAL TECHNOLOGY ASSISTANCE GRANTS.

Section 306(a)(11) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)(11)) (as amended by section 3) is further amended—

(1) by inserting "(A)" after "(11)"; and

(2) by adding at the end thereof the following new subparagraphs:

"(B)(i) the Secretary shall make grants to States, counties, towns, regional organizations, community development corporations, or like entities, for the purposes described in clause (ii).

"(ii)(I) Grants made under this subparagraph shall be used to—

"(aa) promote the use of advanced telecommunications, related advanced technologies, and computers by the recipients of such grants in rural areas;

"(bb) assist in the creation of new rural businesses or the expansion of existing rural businesses through the provision of telecommunication and computer technology, technical assistance, and business planning to such businesses; and

"(cc) otherwise promote the purposes of this Act.

"(II) Funds appropriated under this subparagraph may not be used for—

"(aa) political activities; or

"(bb) any activities, the effect of which is to relocate existing jobs and businesses.

"(iii) Grants may be made under this subparagraph only for a project intended to benefit a rural area.

"(iv) To receive a grant under this subparagraph an entity of the type described in clause (i) shall submit an application to the Secretary at such time, in such form, and containing such information as the Secretary may require.

"(v) There are authorized to be appropriated to carry out this subparagraph $5,000,000 for each fiscal year.".

SEC. 5. RURAL EMERGENCY ASSISTANCE LOANS.

Section 306(a)(11) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)(11)) (as amended by sections 3 and 4), is further amended by adding at the end thereof the following new subparagraph:

"(C)(i) The Secretary shall establish and implement a program to make loans for the benefit of any town or city that—

"(I) has a population of less than 20,000 individuals within its outer boundaries; and

"(II) is financially unable to obtain funds as quickly as needed to correct emergency conditions or situations needing urgent attention.

"(ii) The Secretary shall promulgate regulations—

"(I) targeting the program established under this subparagraph towards needy communities in rural areas;

"(II) setting forth a definition of 'emergency conditions or situations needing urgent attention'; and

"(III) requiring that the Secretary approve or reject applications within 30 days of their receipt.

"(iii) The Secretary shall limit the amount of loans provided to the same borrower under this subparagraph to $50,000, and the term of such loans shall not exceed 2 years.

"(iv) The Secretary may respond to the credit needs of rural towns or cities eligible to participate in the program authorized under this subparagraph by making loans that are eligible for refinancing after the expiration of the 2-year period described in clause (iii), and payments under such loans may be set at a level that is at a sufficiently low level during such 2-year period so that the financially troubled town or city can participate in the program established under this subparagraph. The Secretary shall assist such borrowers in obtaining financing through existing Farmers Home Administration programs so that such borrowers are able to pay the balance due on each loan at the end of such 2-year period.

"(v) There are authorized to be appropriated $2,500,000 for fiscal year 1990, and $5,000,000 for fiscal year 1991 and for each subsequent fiscal year, to carry out the emergency lending program authorized by the program established under this subparagraph.".

SEC. 6. ASSISTING DISTRESSED RURAL HOSPITALS AND HEALTH CARE FACILITIES.

The Secretary of Agriculture shall establish and implement a program that is similar to the program established under section 353 of the Consolidated Farm and Rural Development Act (7 U.S.C. 2001), except that the debt restructuring and loan servicing procedures shall apply to delinquent community facility program loans (rather than delinquent farmer program loans) made by the Farmers Home Administration to a hospital or health care facility under section 306(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 306(a)). Not later than 120 days after the date of the enactment of this Act, the Secretary of Agriculture shall promulgate regulations, as modeled after those promulgated under such section 353, that implement the program established under this section.

S. 1024

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Rural Monitoring and Assistance Act of 1989".

SEC. 2. RURAL DEVELOPMENT ASSISTANCE INFORMATION AND AVAILABILITY.

The Rural Development Act of 1972 (7 U.S.C. 2651 et seq.) is amended by adding at the end thereof the following new section:

"SEC. 509. NEED AND AVAILABILITY OF RURAL DEVELOPMENT ASSISTANCE.

"(a) ESTABLISHMENT OF PROGRAM.—Not later than 180 days after the date of enactment of this section, the Secretary shall establish a program to study economically distressed counties in a variety of states that have high concentrations of nonmetropolitan counties with low per capita income.

"(b) EVALUATION.—When conducting a study of counties under subsection (a), the Secretary shall evaluate the need of such counties for rural development assistance, the nature of the assistance needed, and the availability of such assistance.

"(c) REPORT.—Not later than September 30, of each of the fiscal years 1990 through 1993, the Secretary shall prepare and submit, to the Committee on Agriculture of the House of Representatives and the Committe on Agriculture, Nutrition, and Forestry of the Senate, a report that contains the results of the studies and evaluations conducted under this section and on any action taken by the Secretary to improve economic conditions in rural counties.

"(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as may be necessary to carry out this section.".

SEC. 3. REPORT ON COORDINATION OF RURAL DEVELOPMENT ACTIVITIES.

Not later than September 1, 1989, the Secretary of Agriculture shall prepare and submit, to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, a report that contains the recommendations of the Secretary concerning better coordination of the rural development activities of the Farmers Home Administration, the Forest Service, the Soil Conservation Service, the Agricultural Research Service, the Agricultural Stabilization and Conservation Service, the Rural Electrification Administration, the Extension Service and the Office of Transportation.●

By Mr. KERRY:

S. 1025. A bill to authorize appropriations to carry out the Magnuson Fishery Conservation and Management Act for fiscal years 1990, 1991, and 1992, and for other purposes; to the Committee on Commerce, Science, and Transportation.

AUTHORIZING APPROPRIATIONS FOR THE MAGNUSON FISHERY CONSERVATION AND MANAGEMENT ACT

● Mr. KERRY. Mr. President I rise to introduce legislation to reauthorize the Magnuson Fishery Conservation and Management Act. This law is the main law that governs our U.S. fisheries.

In 1976 Congress created the Magnuson Act to conserve and manage our fishery resources which had become depleted by over fishing—primarily, the result of increase in catch by foreign vessels off the U.S. coasts. Under the act, the United States claimed exclusive management authority over fish stocks and other living marine resources, except the highly migratory tuna found within the 200 mile zone. In addition to establishing this exclusive economic zone [EEZ], the act created eight Regional Fishery Councils that are responsible for the fishery resources in their region.

Since its enactment, the Magnuson Act has had measurable success in restoring various fish stocks, and the U.S. fishing industry has grown as foreign fleets have been displaced.

None the less, our fisheries and coastal areas are in tough shape. Mr. President, I want to sound the environmental alarm regarding the state of U.S. fisheries and our coastal resources. And I want to highlight the low priority that the administration's budget has demonstrated with regard to saving these critical resources. Our coastal resources are heading toward disaster. Pollution is fouling our estuaries and bays, beaches have become a dumping ground for plastic pollution and medical waste, our shores are slowly eroding and with the potential of sea level rise from expected global warming, shores and wetlands will be further threatened. Fishery stocks are declining, and shell fish beds are facing increasing closures.

The National Oceanic and Atmospheric Administration is the agency in charge of these issues. But their budget is totally inadequate. The Bush budget cuts overall NOAA funding by 21 percent. That translates into a $231 million cut this year.

With regard to the Magnuson Act, though appropriations for fiscal year 1989 totaled $72 million, only $56 million is in the administration's request for fiscal year 1990—a 22-percent cut. The Bush budget calls for a 46 percent cut in the National Marine Fisheries Service.

At a time when certain fishery activities need an increase to continue

the progress we've made under the Magnuson Act, the administration proposes a substantial decrease. The Bush request for funds to improve fishery data collection and analysis has been cut by 24 percent; and conservation and management funding has been cut 26 percent. One has to wonder, is this the President who claims to be a friend to the Maine lobsterman? Frankly we cannot hope to manage our fisheries under the Magnuson Act or any other system without adequate funding.

One part of this problem that this legislation addresses is the declining stocks throughout the U.S. fishery. In particular the declining stocks in the North Atlantic fishery. In New England ground fish stocks are down. Cod, haddock, yellow tail, and pollock have reached historically low levels. With the increase in our domestic fishing effort and new and improved fishing technologies and unfortunately certain bad fisherman who continue to fish illegally, Georges Bank and the Gulf of Maine are basically getting fished out.

This brings to mind several thoughts and questions during our reauthorization process. It is clear that we need to increase our fishery enforcement. And we must question whether the management of our resources is adequate. It is also imperative that we increase research activities for data collection and analysis. And what about aquaculture? If our natural stocks are declining should we start to invest in fish farming? Think about the money that this Nation currently puts into agricultural research and farm schools to support our grain belt and cattle industry. With fish becoming more popular among consumers not to mention its health benefits, maybe it's time to seriously invest in this industry.

It's easy to understand why our fisherman are over harvesting ground fish particularly in New England. That's where the market exists. America demands cod and haddock. Perhaps it is time to alter the market and change our strategies. Today the scallop, mackeral, herring, and squid stocks are all in fine shape and are tasty sea food too. Perhaps it's time to expand America's sea food palate through education and marketing strategies.

Mr. President, the legislation that I am introducing today is a starting point in a lengthy reauthorization process. I have included changes that the Regional Councils believe are necessary and the bill being introduced today addresses the shortage of fishery enforcement and the need for more research. There are other issues which still must be considered and will be in the future. These include, the damage to fishery resources in the North Pacific caused by the foreign driftnet fleet, the question of limited entry, the issue of highly migratory species being covered under the act, as well as many other important issues. I look forward to taking up these and other issues as they unfold during the reauthorization process and am pleased to begin the reauthorization process with the introduction of this legislation.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1025

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (d) of section 201 of the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1821) is amended to read as follows:

"(d) TOTAL ALLOWABLE LEVEL OF FOREIGN FISHING.—The total allowable level of foreign fishing, if any, with respect to any fishery subject to the exclusive fishery management authority of the United States, shall be that portion of the optimum yield of such fishery which will not be harvested by vessels of the United States, as determined in accordance with the provisions of this Act.".

SEC. 2. (a) Section 302(a) of the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1852(a)) is amended in each of paragraphs (1), (2), (3), (4), (5), (6), and (8) by striking "appointed from each" and inserting in lieu thereof "appointed to an obligatory seat for each".

(b) The first sentence of section 302(b)(2)(B) of the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1852(b)(2)(B)) is amended by inserting, immediately before the period at the end of the first sentence, the following: ", except that the Secretary shall appoint a member to fill an obligatory seat on a Council only from a list submitted by the Governor of the State for which the obligatory seat is reserved".

SEC. 3. Section 302(d) of the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1852(d)) is amended by inserting "and Council staff members" immediately after "other nonvoting members".

SEC. 4. Section 302(j)(3) of the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1852(j)(3)) is amended—

(1) by striking the semicolon at the end of subparagraph (A)(ii) and inserting in lieu thereof a period;

(2) by striking "and if any meeting or portion" and all that follows; and

(3) by adding at the end the following new subparagraph:

"(B) If any meeting or portion is closed, the Council concerned shall inform local newspapers in the major fishing ports within its region (and in other major, affected fishing ports), including the time and place of the meeting. Brief closures of meetings in order to discuss employment matters or other internal administrative matters need not be published. Subparagraphs (D) and (F) of paragraph (2) shall not apply to any meeting or portion thereof that is closed pursuant to subparagraph (A).".

SEC. 5. Section 307(1) of the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1857(1)) is amended—

(1) by striking "or" at the end of subparagraph (H);

(2) by striking the period at the end of subparagraph (I) and inserting in lieu thereof "; or"; and

(3) by adding at the end thereof the following new subparagraph:

"(J) to forcibly assault, resist, oppose, impede, intimidate, or interfere with any observer (including any supplementary observer) on board a vessel pursuant to this Act;".

SEC. 6. (a) Section 308(a) of the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1858(a)) is amended by striking "$25,000" in the second sentence and inserting in lieu thereof "$100,000".

SEC. 7. (a) Section 309(a)(1) of the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1859(a)(1)) is amended by inserting "or (J)" immediately after "(I)".

(b) Section 309(b) is amended—

(1) by striking "$50,000" and inserting in lieu thereof "100,000";

(2) by striking "$100,000" each place it appears and inserting in lieu thereof "$200,000";

(3) by inserting "any observer described in section 307(1)(J) or" immediately after "injury to"; and

(4) by inserting "observer or" immediately before "officer in fear".

SEC. 8. Section 311(e) of the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1861(e)) is amended—

(1) in paragraph (1), by striking "and" at the end;

(2) in paragraph (2), by striking the period at the end and inserting in lieu thereof a semicolon;

(3) by inserting immediately after paragraph (2) the following new paragraphs:

"(3) claims of parties in interest to property disposed of under 19 U.S.C. 1612(b), as made applicable by section 310(c) to seizures under this Act, in the amounts determined by the Secretary as applicable to such claims at the time of seizure; and

"(4) reimbursement to any Federal or State agency, at the discretion of the Secretary, for services performed, or personnel, equipment, or facilities utilized, under any agreement with the Secretary entered into pursuant to subsection (a) of this section.".

SEC. 9. Section 406 of the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1882) is amended by adding at the end the following new paragraphs:

"(16) $81,000,000 for the fiscal year ending September 30, 1990, of which $6,500,000 shall be used for enforcement and $5,000,000 shall be used to increase research and assessment efforts.

"(17) $85,000,000 for the fiscal year ending September 30, 1991.

"(18) $89,000,000 for the fiscal year ending September 30, 1992.".●

By Mr. MOYNIHAN:

S. 1026. A bill to prevent abuses of the HUD Section 8 Moderate Rehabilitation Program; to the Committee on Banking, Housing, and Urban Affairs.

PREVENTING ABUSES OF THE HUD SECTION 8 MODERATE REHABILITATION PROGRAM

● Mr. MOYNIHAN. Mr. President, I rise to introduce legislation to prevent a recurrence of the lack of competition in HUD's Section 8 Moderate Rehabilitation Program, and to improve the program's operation. The shortage of affordable housing in this country does not come as news to any of us. The supply is decreasing, the need is

increasing, and Federal funding has been cut some 70 percent in recent years.

But it certainly came as news that funds from the section 8 program were flowing so freely to the developers, and that former Federal officials were receiving exorbitant fees to simplify that process. Some of these consultants admittedly knew little or nothing about the program, yet they received hundreds of thousands of dollars to lend their support to certain projects, perhaps in a single phone call.

This became possible because the competitive award process had become an afterthought. Deserving applicants were losing out to those who could afford the most influence, at the ultimate expense of low-income families across the country. Such abuses must not recur. We must maximize the use of the few remaining resources for improving low-income housing, and ensure that they are allocated fairly and judiciously.

This bill directs that the established regulations for a competitive award process be followed, even if the funds are awarded without regard to regional allocations. Such allocations became impractical when the program was greatly diminished in the mid-1980's, and the number of units per locality became so small that constructing them became impractical. HUD officials used the absence of regional allocations to make awards at their discretion.

The bill also directs the Secretary of Housing and Urban Development to ensure that the use of the low-income tax credit in a project also being financed under the section 8 program is consistent with the goal of maximizing the production of low-income housing. In some cases developers received more assistance than necessary from the Federal Government for the continuing operation of a project by using both programs. As a result, HUD's subsidies were higher than necessary and potentially took funds from other projects.

The bill also calls for a vigorous attempt to recover excessive payments caused by incorrect calculations of contract rents and annual updating of the handbook containing instructions and guidance for field staff in administering the program. The latter had not been done regularly.

Mr. President, the Mod Rehab Program is a valuable means of building and renovating housing for low-income people. With the proper procedures in place and proper oversight, it will continue to help combat the housing crisis. I ask my colleagues for their support.●

Mr. HARKIN (for himself, Mr. LEAHY, and Mr. CONRAD):

S. 1027. A bill to enhance the role of the Rural Electrification Administration in rural development and in small community water and sewer improvements, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

RURAL ELECTRIFICATION ADMINISTRATION ACT AMENDMENTS OF 1989

● Mr. HARKIN. Mr. President, I am pleased to introduce today along with Senators LEAHY and CONRAD legislation to improve rural water and sewer systems and put economic development on an equal footing within the Rural Electrification Administration with that agency's rural electrification and telephone efforts.

Over the years the REA and the local rural electric cooperatives and local telephone cooperatives and companies have done an outstanding job of promoting rural development. I remember looking at some of the debates that went on when the Rural Electrification Act was considered and passed. Opponents of that legislation argued that if rural electrification would not pay well enough to attract private investment, then farm families, small towns, and rural communities should go without electricity. Well, the Rural Electrification Act passed and farmers and rural citizens moved ahead, stringing the wire in many cases themselves, to bring electricity to the farthest reaches of our country. As a result of this electrification effort we built in this country the most productive agricultural system in the world and vastly improved the quality of life for residents of our small towns and rural communities.

The structure of the REA and the local borrower electric and telephone cooperatives and companies offer an opportunity to address one of the most pressing infrastructure problems facing rural America today: The lack of adequate amounts of quality water and adequate waste treatment facilities in many communities. In addition, the REA electric and telephone system can play an important role in general rural economic development efforts.

The legislation I am introducing today will amend the Rural Electrification Act of 1936 to create a new position in the REA of Assistant Administrator for Economic Development to carry out programs of the REA regarding involvement of rural electric and telephone systems in community and economic development. This new position will be on an equal footing with the Assistant Administrator for Electric and the Assistant Administrator for Telephone in the REA, and will involve responsibility for administration of the programs of the REA that are not directly related to providing electric or telephone service.

The legislation will also create a technical assistance unit within REA to provide advice and guidance to local electric and telephone cooperatives regarding community and economic development activities that they may choose to undertake.

Under this legislation, the Administrator of the REA will be authorized to make loans to local electric cooperatives and local telephone cooperatives and companies to enable them to provide water and waste facilities in their service areas. REA may make up to $40 million in such loans each year, but no more than 10 percent of the total amount of loans authorized for electrification and telephone purposes in the year.

This new authority for REA will supplement the programs now available through the Farmers Home Administration for water and sewer facility grants and loans. In administering this new authority, the Administrator of REA will consult and coordinate with FmHA. REA will give priority in making loans based on considering a number of factors, including the need for water and waste disposal facilities, income and employment in the area and the benefits such facilities would have on economic development.

The bill also will leverage Federal funds by requiring the use of private sector funds to supplement REA funds when such private sector funds can be obtained at rates affordable to the borrower, and provides for adjustment of REA interest rates to enable borrowers to obtain private financing.

Mr. President, this legislation will help meet the great need in our rural communities for water and sewer facilities, and give REA and its borrower electric and telephone companies and cooperatives a new role in rural economic development. I hope that this important legislation will soon be enacted.●

By Mr. BOREN (for himself, Mr. LEAHY, Mr. PRYOR, and Mr. CONRAD):

S. 1028, A bill to amend the Consolidated Farm and Rural Development Act to establish Farmers Home Administration loan rates for health care facilities based on the average per capita income of the area to be served, to increase water facility grant authorization levels, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

HEALTH CARE AND WATER SYSTEM IMPROVEMENT AMENDMENTS.

● Mr. BOREN. Mr. President, on behalf of myself and my colleagues Senators LEAHY, PRYOR, and CONRAD, I am introducing the Health Care and Water Systems Improvement Amendments of 1989. This bill is primarily intended to help address very serious problems that exist in our rural areas without creating several new Government programs. The bill would allow existing Farmers Home Administration programs to better serve our rural

citizens and meet their needs for quality water and waste facilities and for improved health care services. Rural community leaders and economic development councils in Oklahoma have pointed out several problem areas that need to be addressed. However, water and waste facilities and health care stand out as two of the most critical. My colleagues and I believe this legislation can immediately address these problems and can provide an important first step in a long-term effort to improve the quality of life in our rural areas. The bill consists of three main parts.

First, this bill simply raises the authorization level for FmHA water and waste facility grants. This is an existing grant program that provides funds for repairs, replacement, and maintenance of small water system facilities. Our small systems are familiar with this program and have demonstrated the need for additional funds for the improvement of the rural infrastructure.

Second, the bill would require the Secretary of Agriculture to establish interest rates for health care and other community facilities in accordance with the income of the area served. Therefore, health care facilities in low-income rural areas would be able to refinance their FmHA loans at lower interest rates. This reduction of interest rates could mean the difference between closing and continued operation for some rural hospitals and clinics. Certain other facilities, such as fire stations or community centers, could also take advantage of the lower interest rates.

Third, the bill would establish a national rural waste water circuit rider program similar to the existing Rural Water Circuit Rider Program. This program would provide funds for waste water technicians that can travel over an entire State to assist small waste water systems. The current rural water circuit rider program has been quite successful at using this method of distributing assistance to small drinking water systems. Similarly, the waste water circuit rider demonstration program has successfully shown that this method can also be used to help small waste water systems improve their management, efficiency, and environmental quality.

Mr. President, I hope my colleagues agree that this is a very practical way to help rural areas and small communities; I urge them to promptly consider this legislation. I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1028

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Health Care and Water System Improvement Amendments of 1989".

SEC. 2. WATER AND WASTE FACILITY GRANTS.

Section 306(a)(2) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)(2)) is amended by striking out "$154,900,000" and inserting in lieu thereof "$204,900,000".

SEC. 3. LOANS RATES APPLICABLE TO HEALTH CARE AND RELATED FACILITIES.

Section 307(a)(3) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1927(a)(3)) is amended by adding at the end thereof the following new subparagraph:

"(C) Notwithstanding the provisions of subparagraph (A), the Secretary shall establish loan rates for health care and related facilities that shall be based solely on the income of the area to be served, and such rates should be otherwise consistent with the provisions of such subparagraph.".

SEC. 4. RURAL WASTE WATER TREATMENT CIRCUIT RIDER GRANT PROGRAM.

(a) ESTABLISHMENT.—The Administrator of the Farmers Home Administration shall establish a national rural waste water circuit rider grant program that shall be modeled after the existing National Rural Water Association rural waster circuit rider program that receives funding from the Farmers Home Administration.

(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $4,000,000 each fiscal year to carry out the program established under subsection (a).●

By Mr. BAUCUS (for himself and Mr. LEAHY):

S. 1029. A bill to establish a nationwide business "incubator" program to be administered by the Rural Electrification Administration, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

RURAL BUSINESS ASSISTANCE ACT

● Mr. BAUCUS. Mr. President, today I am introducing the third in a series of bills to help rural America get back on its feet.

I have spoken at length in the past about the basic tools I believe are necessary to help rural areas compete in today's world economy.

One of those tools is access to state-of-the-art telecommunications services. On April 11, I introduced legislation, S. 759, the Rural Access to Telecommunications Services Act of 1989, to bring this tool to rural areas. Under my legislation, rural businesses, hospitals, and schools will all have access to telecommunications services equal to those currently available in urban areas.

Another essential tool is access to capital for businesses that want to locate or expand in rural areas. Many of these businesses, because of their location, are considered by banks to be more risky than others and have found it next to impossible to secure adequate financing. On April 19, I introduced legislation to address this problem. My legislation, S. 863, the Rural Access to Capital Act of 1989, will establish a public/private partnership revolving loan fund at the SBA to make capital more readily available to rural businesses.

The legislation I am introducing today will provide another important tool to rural businesses: Access to a business "incubator" program to be administered through the Rural Electrification Administration [REA]. This legislation will establish a $10 million revolving loan rural business incubation fund at the REA to be used to make grants and low interest loans available to REA borrowers for the purpose of developing business incubators.

The incubators will provide technical assistance, advice, loans, or capital to business incubation programs already in existence; or to create and operate new ones. The purpose of this provision is to establish a common facility from which small businesses can operate while sharing facilities, equipment, machinery, telecommunications devices, computers, support staff, overhead costs, or janitorial services with other small businesses. This program could cut down on a substantial amount of the overhead costs associated with operating a small business in rural areas.

Once again, I look forward to working with my colleagues to develop a comprehensive approach to facilitate revitalizing rural areas.

Mr. President, I ask unanimous consent that the full text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1029

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Rural Business Assistance Act of 1989".

SEC. 2. RURAL ECONOMIC DEVELOPMENT.

The Rural Electrification Act of 1936 (7 U.S.C. 901 et seq.) is amended by adding at the end thereof the following new title:

"TITLE V—RURAL ECONOMIC DEVELOPMENT

"SEC. 501. ADDITIONAL POWERS AND DUTIES OF REA ADMINISTRATOR.

"The Administrator of the Rural Electrification Administration shall—

"(1) provide advice and guidance to electric and telephone borrowers under this Act concerning the effective and prudent use by such borrowers of the investment authority under section 312 to promote rural development;

"(2) provide technical advice, troubleshooting, and guidance concerning the operation of programs or systems that receive assistance under this Act;

"(3) establish and administer various pilot projects through electric and telephone borrowers that the Administrator determines are useful or necessary, and recommend specific rural development projects for rural areas;

"(4) act as an information clearinghouse and conduit to provide information to electric and telephone borrowers under this Act

concerning useful and effective rural development efforts that such borrowers may wish to apply in their areas of operation and concerning State, regional, or local plans for long-term rural economic development;

"(5) provide information to electric and telephone borrowers under this Act concerning the eligibility of such borrowers to apply for financial assistance, loans, or grants from other Federal agencies and non-Federal sources to enable such borrowers to expand their rural development efforts;

"(6) promote local partnerships and other coordination between borrowers under this Act and community organizations, States, counties, or other entities, to improve rural development; and

"(7) administer a Rural Business Incubation Fund (as established under section 502) that shall provide technical assistance, advice, loans, or capital to business incubation programs or for the creation and operation of business incubation programs and small business incubators in rural areas, designed to provide a common facility from which small businesses can operate while sharing facilities, equipment, machinery, telecommunications devices, computers, support staff, overhead costs, or janitorial services with other small businesses.

"SEC. 502. RURAL BUSINESS INCUBATION FUND.

"(a) ESTABLISHMENT AND USE.—

"(1) ESTABLISHMENT.—There is established in the Treasury of the United States a revolving fund to be known as the Rural Business Incubation Fund (hereinafter referred to in this title as the 'Incubation Fund') to be administered by the Administrator.

"(2) USE.—The Incubation Fund shall be used to make grants and reduced interest loans to electric and telephone borrowers under this Act to promote business incubation programs or for the creation or operation of business incubators in rural areas by such borrowers, and the rate of such loans shall not exceed the standard rate as provided in section 305.

"(3) BUSINESS INCUBATION.—Business incubators that receive assistance under this title shall be a facility in which small businesses can share premises, support staff, computer equipment, telecommunications terminal equipment, machinery, janitorial services, utilities, or other overhead expenses, and where such businesses can receive technical assistance, financial advice, business planning services or other support. Business incubation programs that provide assistance of the type described in this paragraph shall be eligible for assistance under this title even where such program does not involve the sharing of premises.

"(b) APPLICATION FOR ASSISTANCE—

"(1) ELIGIBILITY TO SUBMIT.—Borrowers under this Act that operate existing business incubators or that desire to operate such incubators or business incubation programs, and that meet the requirements established by the Administrator for obtaining grants or reduced interest loans under this section, may submit applications at such time, in such form, and containing such information as the Administrator shall require, for such grants or loans.

"(2) REQUIREMENTS.—Applications submitted under paragraph (1) shall, at a minimum—

"(A) contain an assurance that any incubator established or operated to this section will be operated on a not-for-profit basis; and

"(B) contain an assurance that it will be the policy of such incubator to encourage and assist businesses in graduating from the incubator and becoming a viable business entity in the community and to inform participating businesses of this policy;

"(3) REVIEW.—In reviewing applications for assistance, the Administrator shall consider—

"(A) how effectively the incubation project will assist in the formation, growth, or improved efficiency of small businesses that will help diversify and develop the local economy; and

"(B) the amount of local support likely to exist for the incubator and the businesses to be assisted by such incubator, taking into account local contributions of business, financial, technical, technological or managerial expertise, and contributions of equipment or materials, local financial assistance, and other factors as determined appropriate by the Administrator.

"(c) FUNDING OF LOCAL INCUBATORS.—

"(1) BY BUSINESSES UTILIZING INCUBATOR.—

"(A) IN GENERAL.—Business incubators that receive assistance under this section shall, to the extent practicable and except as provided by the Administrator, require that each business entity that utilizes such incubator share, on a percentage or other basis, as determined by the Administrator, a portion of the benefit of any growth in profits, net worth, or other measure of income or growth that results during or because of such entity's entry into the incubator.

"(B) CONTRIBUTION TO INCUBATOR FUND.—At such time as the business incubator receives revenues from the business entity as provided under subparagraph (A), such incubator shall pay an amount equal to 50 percent of such revenue to the Incubator Fund established under subsection (a).

"(C) FLEXIBILITY.—In administering the requirement of this paragraph, the Administrator shall provide substantial flexibility and assistance to incubators in order to ensure that a proper balance is achieved between—

"(i) the objective that a business that benefits from an incubator should return a small portion of such benefit to the incubator for use in assisting other businesses and to the Incubator Fund established under subsection (a); and

"(ii) the requirement that such payments by a business not impose an undue burden nor interfere with the purposes of this section.

"(2) BY BORROWER ESTABLISHING INCUBATOR.—

"(A) IN GENERAL.—A borrower that establishes or assists a business incubator under this section shall purchase Capital Term Certificates issued by the Incubator Fund in amounts equal to 10 percent of the amount of the grant, or 5 percent of the amount of the reduced interest loan, provided by the Administrator under this section.

"(B) REDEMPTION OF CERTIFICATES.—Each calendar year for the 10-year period beginning on the date that a grant or reduced interest loan is provided under this section, the Administrator shall redeem an amount equal to 10 percent of the Capital Term Certificates purchased by the borrower under subparagraph (A), without any payment of interest.

"(3) BY THE SECRETARY OF THE TREASURY—

"(A) IN GENERAL.—Not later than October 1, of each fiscal year, the Secretary of the Treasury shall purchase Capital Term Certificates issued by the Incubator Fund in the amount of $10,000,000.

"(B) TERMINATION OF OBLIGATION.—The Secretary of the Treasury shall not be obligated to make any payments under subparagraph (A) to the Incubator Fund after October 1, 1995.

"(C) REDEMPTION OF CERTIFICATES.—Each calendar year for the 10-year period beginning on January 1, 2000, the Administrator shall redeem an amount equal to 10 percent of the Capital Term Certificates purchased by the Secretary under subparagraph (A), without any payment of interest.

"(d) REPAYMENTS TO INCUBATION FUND.—All payments made on loans under this section, and all amounts provided under subsection (c), shall be placed in the Incubator Fund established by subsection (a) and shall be available to carry out the purposes of this section.

"(e) FULL USE.—The Administrator shall undertake all reasonable efforts to make full use, during each fiscal year, of any funds contained in the Incubator Fund established under subsection (a), consistent with the requirement that the Incubator Fund redeem Capital Term Certificates as provided by subsection (c).".●

By Mr. DOMENICI:

S. 1031. A bill to establish an Engineering Extension Service as a mission of the Energy Extension Service to enable entrepreneurs to receive engineering information vital to such businesses, and for other purposes; to the Committee on Energy and Natural Resources.

NATIONAL ENERGY EXTENSION SERVICE AMENDMENTS ACT

● Mr. DOMENICI. Mr. President, I send to the desk a bill that I believe offers an important contribution to assist small and struggling businesses to make it in the world marketplace.

This bill, the National Engineering Extension Service Amendments Act of 1989, will create a national engineering outreach service, one that would work rather like the exceedingly successful Agricultural Extension Service.

This legislation would establish at an engineering school in each State—or a similar organization—an engineering extension service to help small, incubator companies with the advice they need to convert good ideas into successful product lines.

I believe every Member of this body knows how very difficult it is for many small, struggling companies to take their high technology ideas and inventions and move those developments onto the production line.

Yet America's survival in this great and competitive industrial world we have created will depend to a great extent on the ability of small, innovative companies to make that transition, to take the gleam in the eye of a savvy inventor and turn that gleam into a usable product.

Dr. L.H. Lattman, president of New Mexico Institute of Mining and Technology, is a strong believer in the concept I have included within this bill. And I believe that he stated the case for this legislation very accurately in a recent paper:

While the Engineering Extension Service concept certainly will not solve all problems,

I believe it will contribute very significantly to economic development . . . in the area of manufacturing and most especially in manufacturing based on frontier technology.

That is what this bill is all about. Specifically, the bill would create a new subtitle B in title 5 of Public Law 95-39, the Energy Research and Development Administration Appropriation Authorization.

This new subtitle, which I have termed the "Engineering Extension Service Act of 1989," establishes within the Department of Energy a new office, the Engineering Extension Service, which would serve as the Federal Government's link with engineering extension service offices that would be established in each State.

Those State offices, which would be created by each Governor within an entity in the State, probably a university with an engineering school, would maintain a list of available experts within the State to assist fledgling businesses. Some of these experts might be on the university faculty. Others might be retired engineers. Still others might be existing engineering firms that wish to participate, or work at our system of national laboratories.

Each Governor would be required to submit a plan for such an EES, which would develop and maintain a data base of engineering and scientific experts.

These experts would be available, at a fee—an affordable fee—to small businesses in the State.

Mr. President, earlier this year, I participated in an economic development tour of three States with the Governor of New Mexico and a number of members of the New Mexico Legislature.

One of the most exciting things that we saw was the work of the engineering extension service operated by North Carolina State University, a service that in its most recent year aided 14,000 firms and individuals in North Carolina. North Carolina is way ahead of most of us. It initiated such a system as long ago as 1955, and now offers to "help industry and engineers to move aggressively and beneficially utilize new technologies."

I am convinced that the program North Carolina has developed needs to be encouraged in all States; that is what this bill accomplishes.

My bill calls for a Federal commitment of $10 million in the current fiscal year, with that money to be allocated among the States on a basis of each State's small business receipts, with each State guaranteed a minimum of one-half of 1 percent of the Federal pool.

The Federal funds would have to be matched by the State or the participating non-Federal organization, so that means each State is guaranteed close to $50,000 in Federal assistance.

My bill also creates a National Engineering Extension Service Advisory Board to assist in the implementation and evaluation of the program.

Mr. President, this is a sound concept, one that will help our small businesses become more competitive in America and in the world. I hope my colleagues will study it carefully, and give it their enthusiastic support. This is a bill that is good for America.

The bill I am introducing today does not propose to reform the Energy Extension Service but expand it. Several other bills have been introduced dealing with the Energy Extension Service. In particular, Senator WIRTH has introduced S. 324. Title V of that bill deals with the Energy Extension Service as it relates to global warming. I look forward to working with Senator WIRTH and other committee members as we discuss new roles for the Energy Extension Service.

I ask unanimous consent that a copy of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1031

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress Assembled, That this Act may be cited as the "National Energy Extension Service Amendments Act of 1989".

SEC. 2. FINDINGS.

The Congress finds that—

(1) it is in the interest of the United States to foster commercialization of evolving engineering concepts and technologies;

(2) such commercialization usually requires extensive engineering design and development efforts, manufacturing engineering, and accurate cost estimation not commonly available to small or start-up businesses;

(3) persons having such engineering skills and experience may be comparatively unknown to a small or start-up business or difficult to locate, in any particular area;

(4) a considerable pool of expert, active, and retired persons with the needed expertise and skills is available in the United States;

(5) the success or failure of initial manufacturing efforts depends upon the engineering expertise and skills which often are too expensive for a small or start-up business to maintain in-house; and

(6) the latest technological and manufacturing advances must be made available to companies in the United States on a timely basis to maintain the competitiveness of such businesses in the international market.

SEC. 3. AMENDMENTS TO PUBLIC LAW 95-39.

(a) Redesignate Title V of Public Law 95-39 as "TITLE V—ENERGY AND ENGINEERING EXTENSION SERVICES" and redesignate sections 501 through 513 thereof as "Subtitle A—Energy Extension Service", and add at the end thereof the following new subtitle B:

"Subtitle B—Engineering Extension Service

"SHORT TITLE

"SEC. 521. This subtitle may be cited as the 'Engineering Extension Service Act of 1989'.

"PURPOSES

"SEC. 522. The purposes of this subtitle are to—

"(1) establish a positive engineering outreach program to aid small and start-up businesses;

"(2) foster a broader application of engineering principles and techniques to product development, manufacturing, and commercial production by small and start-up businesses; and

"(3) assist small and start-up businesses in dealing with Federal government on related engineering matters.

"ESTABLISHMENT OF SERVICE

"SEC. 523. (a) There is hereby established an Engineering Extension Service within the Department of Energy to engage in a program of engineering extension service work.

"(b) The duties and responsibilities of the Director of the Energy Extension Service pursuant to subtitle A are hereby expanded to include the program and activities of the Engineering Extension Service authorized and conducted pursuant to this subtitle.

"DESCRIPTION OF ENGINEERING EXTENSION SERVICE

"SEC. 524. The Engineering Extension Service shall develop and implement a comprehensive program to—

"(1) aid small and start-up businesses in discovering useful and practical information relating to manufacturing and commercial production techniques and costs;

"(2) encourage the application of such information in order to solve product development and manufacturing problems;

"(3) establish an Engineering Extension Service program affiliated with an entity in each State, such as an institution of higher education which employs an engineering or science faculty;

"(4) establish and maintain a directory of the names, experience, and expertise of persons, including university faculty and active and retired private consultants, within each State who are available to provide engineering advice and consultation;

"(5) establish and maintain a list of small and start-up commercial and manufacturing businesses in each State;

"(6) coordinate engineers and manufacturers to aid small and start-up businesses in solving specific technical problems and reviewing manufacturing methods to improve their cost-effectiveness;

"(7) assist small and start-up businesses in the drafting of the technical portions of proposals seeking Federal assistance;

"(8) furnish technical information and notes of interest to small and start-up businesses, including, where appropriate, the conduct of seminars; and

"(9) facilitate contract research between university faculty and students and small and start-up businesses, in order to improve product development and independent quality control testing.

"STATE EXTENSION PROGRAMS

"SEC. 525. (a) Within 120 days of enactment of this subtitle, the Secretary shall, pursuant to sections 505, 506, 507 and 508, invite the Governor of each State to submit a plan for the conduct of engineering extension service activities described in section 524.

"(b) The Governor of each state shall designate a central or lead entity within such state to coordinate the Engineering Extension Service programs in that State, in order to eliminate rivalry, duplication of pro-

grams, incomplete coverage, and inefficient fiscal management. Such entity may include an institution of higher education or the entity used to implement energy extension service activities within such State.

"(2) Before designating a central or lead entity under paragraph (1), the Governor of each State shall consider whether such entity also serves as the lead entity for the Energy Extension Service and the Agricultural Extension Service. In the case of an institution of higher education, the Governor shall also consider—

"(A) the quality of the engineering program of such institution; and

"(B) the proximity of the institution to major concentrations of small businesses.

"(c) Each State cooperative engineering extension service shall provide—

"(1) instruction, referrals, and practical demonstrations in commercializing an idea of an entrepreneur, or a technology developed by any of the national laboratories or other sources;

"(2) continual dissemination of information on manufacturing advances to allow companies to maintain a cost-competitive position with manufacturers in foreign nations; and

"(3) programs to carry out the purposes of section 524.

"ENGINEERING DATA BASE

"SEC. 526. (a) Each entity designated under section 525(b) shall develop and maintain a data base of engineering and scientific experts interested in participating in the Engineering Extension Service. Such data base shall, at a minimum, include faculty of institutions of higher education, retired manufacturing experts, and national laboratory personnel.

"(b) The Secretary shall develop a nationwide network to access the data bases of each such participating entity, which shall employ, to the greatest extent feasible, advanced high speed data transmission and communications networks.

"PARTIES RECEIVING ASSISTANCE

"SEC. 527. (a) AVAILABILITY OF SERVICES.—The services provided by the Engineering Extension Service established under this Act shall be available to any small or start-up business.

"(b) FEES.—(1) The Director of the Engineering Extension Service of each State may determine the appropriate amount of fees charged to a recipient party for services offered under this Act, and may collect such fees.

"(2) The Director of the Engineering Extension Service of each State shall charge fees which are affordable to a party eligible for assistance, which shall be determined by examining factors including—

"(A) the costs of the services received;

"(B) the need of the recipient for the services; and

"(C) the ability of the recipient to pay for the services.

"STATE ASSISTANCE

"SEC. 528. (a) AUTHORIZATION.—Subject to the requirements and limitations of sections 205 and 206, the Secretary is authorized, in accordance with the provisions of this subtitle, to make grants to any eligible State to—

"(A) carry out the purposes of this subtitle in such State, and

"(B) to pay the Federal share of the costs of carrying out the purposes of this subtitle in such State.

"(b) ALLOCATION OF FUNDS.—(1) Subject to subsections (c) and (d), funds appropriated for the purposes of this subtitle shall be allocated annually among the eligible States in proportion to the ratio of the aggregate gross receipts of small businesses in a given State and the aggregate gross receipts of all small businesses in all eligible States.

"(2) Notwithstanding paragraph (1), each eligible State receiving funds under this subtitle shall be allocated a minimum of one per centum of the available appropriations for the purposes of this subsection.

"(c) Subject to subsection (e), funds appropriated for the purposes of this subtitle shall be disbursed to each eligible State in equal semiannual payments on the first day of December and June of each year by the Secretary of the Treasury. Such sums shall be paid to the treasurer or to the officer of the State duly authorized by the laws of the State to receive the same.

"(d) LIMITATION.—(1) No disbursement of the Federal share of funds authorized to be appropriated by this subtitle may be made to any State until an equal non-Federal amount for the maintenance of the Engineering Extension Service has been either provided from appropriated funds for that year by the legislature of such State, or from a State, county, or local authority, an institution of higher education, or contributions from individuals within the State.

"(2) The State officer receiving the funds disbursed pursuant to paragraph (1) shall, on or before the first day of November of each year, submit to the Secretary, on the forms prescribed by him, a detailed statement of the amounts received and disbursed during the previous fiscal year.

"(3) If any portion of the funds received by a State in accordance with this subsection is diminished, lost, or misapplied, it shall be replaced by that State. Until it is replaced, no subsequent appropriation shall be allocated or paid to such State.

"(e) CERTIFICATION.—(1) On or before the first day of December in each year, the Secretary shall certify to the Secretary of the Treasury as to allocation under subsection (b) of the annual appropriation to each eligible State for cooperative engineering extension activities under this subtitle.

"(2) If the Secretary withholds such certification from any State, the Secretary shall notify such State and the Secretary of the Treasury of the reasons for withholding the certification. Any amount involved shall be kept separate in the Treasury until the expiration of the Congress immediately following adjournment of the session of the legislature of any State for which a certificate has been withheld.

"(3) A State may appeal to the Secretary, if the Secretary withholds the certification of that State. If the Secretary does not provide such certification by the end of the fiscal year for which the funds were appropriated, such funds shall be returned to the miscellaneous receipts of the Treasury.

"INSTITUTIONS OF HIGHER EDUCATION

"SEC. 529. (a) Before any funds appropriated pursuant to the subtitle may be disbursed to any institution of higher education designated pursuant to section 525(b), the Secretary must approve a fiscal proposal submitted to him by the appropriate officials of such institution.

"(b) On or before the first day of November of each year, the designated institution of higher education of each State shall submit a report of its activities under this subtitle during the previous year, including a detailed statement of receipts and expenditures, to the Secretary and the Secretary of the Treasury.

"LIMITATION

"SEC. 530. No funds provided pursuant to this subtitle, may be used for—

"(1) the purchase, erection, preservation, or mortgage repayment of any building;

"(2) the purchase or rental of land;

"(3) lecturer's fees; or

"(4) any other purpose not specified in this subtitle.

"RECORDS

"SEC. 531. Each State or other entity within a State receiving Federal funds under the subtitle shall be subject to the requirements of section 511.

"ADVISORY BOARD

"SEC. 532. For the purposes of this subtitle, there is hereby established, pursuant to section 509, a National Engineering extension Service Advisory Board with the same membership structure, functions and duties as the National Energy Service Advisory Board.

"REPORT TO CONGRESS

"SEC. 533. The Secretary shall make an annual report to the Congress of the receipts, expenditures, and results of the cooperative engineering extension work in all of the States receiving funds under this Act. Such report shall state whether the allocation of the appropriation of the Federal share to any State has been withheld, and if so, the reasons therefore.

"AUTHORIZATION OF APPROPRIATION

"SEC. 534. (a) There is authorized to be appropriated such funds as may be necessary to carry out the provisions of this subtitle.

"(b) No more than 20 percentum of each annual appropriation may be applied to the printing and distribution of publications.

"DEFINITIONS

"SEC. 535. For the purposes of this subtitle, the term—

"(1) 'institution of higher education' has the same meaning as such term is defined in section 1201(a) of the Higher Education Act of 1965 (20 U.S.C. 1141(a));

"(2) 'Secretary' means the Secretary of Energy;

"(3) 'small business' means—

"(A) an enterprise that is—

"(i) independently owned and operated;

"(ii) not dominant in a field of operation; and

"(iii) earning annual receipts not in excess of $1,000,000; and

"(B) an enterprise that meets additional criteria established by the Secretary, including—

"(i) the dollar volume business; and

"(ii) the number of employees, which may vary from industry to industry to the extent necessary to reflect differing characteristics of such industries and to take proper account of other relevant factors; and

"(4) 'start-up business' means a small business which has been in existence for 5 years or less.".

(b) OTHER CONFORMING AMENDMENTS.—The term "title" in title v of Public Law 95-39 shall be changed to "subtitle" wherever such term appears in sections 501, 503(c), 512, and 513.●

By Mr. HEINZ (for himself and Mr. HARKIN):

S. 1032. A bill to amend the Agricultural Act of 1949 to establish eligibility requirements for agricultural commodity price support programs with respect to delivery of irrigation water;

to the Committee on Agriculture, Nutrition, and Forestry.

IRRIGATION SUBSIDY REFORM ACT

Mr. HEINZ. Mr. President, I rise today with my colleague from Iowa, Senator HARKIN, to introduce the Irrigation Subsidy Reform Act of 1989. The bill is straightforward: it would prohibit farmers from participating in price and income support programs administered by the Department of Agriculture [USDA] if they receive irrigation water from Federal projects at less than full cost. I am pleased to announce that Representative SAM GEJDENSON of Connecticut is introducing a companion bill in the House of Representatives.

This legislation is designed to reconcile two costly, contradictory Federal policies. On the one hand, a few different Federal agencies—principally the Bureau of Reclamation [BuRec]—spend a great deal of the taxpayer's money to give below-cost water to a few farmers so they can grow more crops. Yet on the other hand, USDA spends even more of the taxpayer's money paying these same farmers not to grow crops. It's time for one of those hands to get out of the taxpayer's pocket.

Today's taxpayers are not the only ones paying the bill. These policies encourage environmentally destructive practices that threaten the water and the land we will pass on to our children.

BUDGETARY IMPACTS OF "DOUBLE-DIPPING"

Mr. President, this bill has signficant budgetary implications. Department of the Interior [DOI] officials estimate that the Bureau of Reclamation serves roughly 10 million acres, or about one-fifth of the Nation's irrigated farmland. They further estimate that 38 percent of BuRec-served land is used in the production of surplus crops in an average year.

The Bureau of Reclamation subsidizes farmers because it sells water at prices that do not recover the Federal Government's full capital, operating, and interest costs. This subsidy is enormous. Interior officials estimate the total irrigation subsidy from 1902 through 1986 at $9.8 billion. They further estimate the annual subsidy at $534.3 million for 1986, $203 million of which (38 percent) may be associated with the production of surplus commodities. I might add here that officials with the Office of Management and Budget [OMB] and the Congressional Budget Office [CBO] dispute Interior's methodology for calculating subsidy values. They argue the total subsidy through 1986 may be as high as $70.3 billion.

USDA officials estimate that farmers served by BuRec water may have received commodity program payments totaling as much as $785 million in 1986. So a select group of farmers received Government outlays and subsidies totaling about $1 billion in 1986.

ENVIRONMENTAL IMPACTS OF IRRIGATION SUBSIDIES

Moreover, current reclamation and irrigation policies actually foster environmental degradation. Increased agricultural activity made possible by reclamation has contributed to a number of serious water supply and quality problems, including the accumulation of salts, trace elements, pesticides, herbicides, and other agricultural chemicals, and contamination of groundwater supplies.

Used irrigation water is heavy salinized. If soil conditions (impermeable clay near the root zone, for instance) prevent deep percolation, such water must be drained. Used irrigation water from just 8,000 acres in the Westlands Water District was conveyed via the San Luis Drain into the Kesterson National Wildlife Refuge until 1983. At that point, the bioaccumulation of the trace element selenium reached toxic levels and caused widespread nesting failures and deformities in Kesterson's waterfowl. The Interior Department was forced to close Kesterson Reservoir because of these environmental harms.

Our ground water resource, estimated at 15,000 trillion gallons nationally, appears ubiquitous and inexhaustible. But more than 95 percent of the total is available on a one-time basis only. And it is being depleted or contaminated in many areas.

Irrigation accounts for one-third of all water withdrawals, but two-thirds of all ground water withdrawals. Not surprisingly, the availability of a guaranteed market is fueling ground water overdraft. Forty-five percent of the irrigated acreage in 11 major ground water irrigation States is served by "declining ground water areas." Unless our current policies are changed, ground water overdraft will likely continue until extractive costs exceed the benefits, which will be too late.

ALLOCATING SCARCE RESOURCES EFFICIENTLY

Mr. President, water—particularly in the West—is a precious resource. We must treat it accordingly. Economists and environmentalists argue that artificially low irrigation water prices encourage the inefficient allocation of this limited resource.

Last year Senator TIM WIRTH of Colorado and I sponsored Project 88: Harnessing Market Forces To Protect Our Environment. Underpinning Project 88 is the notion that a key to reducing inefficient natural resource use and environmental degradation is to ensure that producers and consumers face the true cost of their decisions, not just the direct costs, but the full social costs of the consequences of their actions.

The Irrigation Subsidy Reform Act of 1989 is consistent with Project 88 principles. If enacted, it would eliminate USDA subsidies that promote excessive use of irrigation water, often to ruinous effect.

If enacted, the Irrigation Subsidy Reform Act would give affected farmers a choice between subsidized water and a market guaranteed by USDA. If they choose the water, they are not prohibited from using it to grow surplus crops. They simply cannot participate in price and income support programs. Presumably, ineligibility for price and income supports would prompt farmers to switch production from field crops to specialty crops, fruits, nuts, and vegetables, which often require less water. Such a shift would bolster farm income by reducing price-depressing surplus production of wheat, cotton, and other program commodities. If participating in the commodity programs is important to them, they are free to renegotiate their water contracts to pay full cost for their irrigation supply. Higher water prices would prompt farmers to conserve supply.

Mr. President, we are firmly entrenched in an era of fiscal scarcity. The Federal Government simply cannot afford to provide subsidized irrigation water to a few large farmers and then pay them not to produce surplus commodities. The budget deficit precludes that sort of largesse.

In an era when poverty and economic development programs are being eliminated wholesale or curtailed sharply, such subsidies and outlays are an affront. In the central valleys of California, some farmers pay $10 for water to irrigate an acre of surplus cotton. Just a few hundred miles away, Los Angeles cuts essential services while paying 60 times as much for the same quantity of water for drinking. This is nothing more than a testimony to the constituent greed and vested power of the so-called "water lobby."

THE FAILURE OF RECLAMATION'S SOCIAL GOALS

Compounding the affront is the failure of our reclamation programs to accomplish their primary social objective: to provide the benefits of subsidized irrigation to a maximum number of family farms. The Reclamation Act of 1902 was passed, according to F.H. Newell, the first BuRec Commissioner, "not to irrigate the lands which now belong to large corporations * * * not to make these men wealthy; but * * * to bring about a condition whereby that land shall be put into the hands of the smaller owner."

Congress intended that full irrigation benefits would accrue only to individuals farming 160 acres. Congress passed the Reclamation Reform Act of 1982 [RRA] to extend partial irrigation subsidy benefits to individuals farming up to 960 acres.

The amount of irrigated farmland in this country has risen steadily, from 17 million acres in 1939 to some 50 mil-

lion acres today. But the number of irrigated farms peaked in 1954 at 325,000 and has declined steadily since then. So irrigation benefits—which we have seen are quite substantial—are accruing to fewer and fewer farmers.

The concentration of farmers receiving ever larger irrigation benefits has attendant social consequences. Professor Walter Goldschmidt's pioneering work in the 1940's delineated the correlation between farm size and community well-being in California. Communities surrounded by large farms had poorer social conditions than communities surrounded by smaller farms.

Professor Dean MacCannell refined and extended the study throughout the Sun Belt earlier this decade. He confirmed the inverse relationship between farm size and community well-being.

More recently Don Villarejo and Judith Redmond of the California Institute for Rural Studies have documented the concentration of wealth flowing from irrigation benefits in the Westlands Water District of California's Central Valley Project [CVP]. They report that "while agriculture flourishes, much of the populace in the Central Valley live in poverty." Their study, Missed Opportunities—Squandered Resources: Why Prosperity Brought by Water Doesn't Trickle Down in the California Central Valley, uncovered "a pervasive pattern involving considerable effort on the part of large operations to comply with the technical requirements of RRA in order to receive low-cost water while circumventing the RRA goal of assisting family-scale farms." Such paper farm accounting practices appear unscrupulous, and indeed do not reflect the intent of Congress.

Some will argue that this bill is antifarmer. It is not. Subsidized irrigation bestows considerable benefits. Irrigation increases per acre yields. Consequently, irrigators enjoy decided advantages over dryland farmers. Irrigated yields for wheat, for instance, are twice the dryland yields. Irrigated yields for cotton are 90 percent higher. Not surprisingly, irrigated areas constitute 13.7 percent of all harvested cropland, but 27.8 percent of the value of harvested production. That is benefit enough.

I would note that there is precedent for the Irrigation Subsidy Reform Act. Congress previously prohibited BuRec water recipients from growing surplus crops for 10 years after initial construction of individual projects. The Reclamation Reform Act of 1982 repealed that provision. The current budget deficit and environmental constraints mandate that it be reinstated.

Mr. President, this bill will reduce USDA outlays. It may increase BuRec water receipts. It will promote the conservation and protection of surface and ground water supplies. It will encourage trading and selling water rights, thus increasing the supply available for economic development. It will end years of contradictory and wasteful Federal policy. I urge my colleagues to support it.

Mr. President, I ask unanimous consent that at this point, a copy of the Irrigation Subsidy Reform Act of 1989 be printed in the RECORD and letters endorsing the legislation from the National Wildlife Federation, the Natural Resources Defense Council, and the Council for Citizens Against Government Waste.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1032

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Irrigation Subsidy Reform Act of 1989".

SEC. 2. INELIGIBILITY OF RECIPIENTS OF FEDERAL IRRIGATION WATER DELIVERED AT LESS THAN FULL COST FOR BENEFITS FROM PRICE AND INCOME SUPPORT PROGRAMS ADMINISTERED BY THE DEPARTMENT OF AGRICULTURE.

Title IV of the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.) is amended by adding at the end thereof the following new section:

"SEC. 425. INELIGIBILITY OF RECIPIENTS OF FEDERAL IRRIGATION WATER DELIVERED AT LESS THAN FULL COST FOR BENEFITS FROM PRICE AND INCOME SUPPORT PROGRAMS ADMINISTERED BY THE DEPARTMENT OF AGRICULTURE.

"(a) IN GENERAL.—Notwithstanding any other provision of law, any producer to whom irrigation water is delivered in a crop year at less than full cost from a Federal irrigation project shall not be eligible to receive, directly or indirectly, a loan or payment under, or in connection with, any program carried out by the Secretary under this Act, or any other Act, to support the price or adjust the supply of an agricultural commodity, including milk, for such crop year.

"(b) MEANING OF TERMS.—As used in this section, the terms 'full cost', 'irrigation water', and 'project' have the meaning given such terms in section 202 of the Reclamation Reform Act of 1982 (43 U.S.C. 390bb).".

SEC. 3. EFFECTIVE DATE.

(a) IN GENERAL.—The amendment made by section 2 shall apply with respect to irrigation water delivered in any crop year beginning after the date of enactment of this Act pursuant to a contract entered into, renewed, modified, or amended before, on, or after the date of enactment of this Act.

(b) MEANING OF TERMS.—As used in this section, the terms "irrigation water" and "contract" have the meaning given such terms in section 202 of the Reclamation Reform Act of 1982 (43 U.S.C. 390bb).

NATIONAL WILDLIFE FEDERATION,
Washington, DC, May 17, 1989.

Hon. JOHN HEINZ,
U.S. Senate, Washington, DC.

DEAR SENATOR JOHN HEINZ: I am pleased that you and Representative Gejdenson are introducing identical bills today to tighten eligibility requirements for agricultural price and income support programs for crops grown on lands receiving Federally-subsidized irrigation water. The measure is designed to reduce the Federal budget deficit, improve the allocation of scarce water and land resources, and reduce damages to the environment.

The passage of your amendment to the Agricultural Act of 1949 will help resolve the longstanding inconsistency between Federal agricultural support programs designed to restrict the production of surplus crops and Federal irrigation projects intended to increase production of many of these same crops. The irrigation subsidy amendment would deny participation in the farm programs to persons receiving subsidized irrigation water under new, renewed, amended, or modified water contracts.

The Bureau of Reclamation and the U.S. Army Corps of Engineers provide irrigation water to farms at a fraction of the cost to the taxpayers of the dams, canals, pumps, and other components of the system. Approximately 40% of the land receiving subsidized water is planted to surplus crops; wheat, corn, cotton, rice, sorghum, oats, and barley. The Department of Agriculture estimated that it paid more than $730 million in crop-support payments to owners and operators of Federally-irrigated farms in 1986. Your bill will gradually reduce the drain on the Treasury as irrigation water contracts expire between now and 2005.

Your bill makes sense for both the economy and the environment. We support it.

Sincerely,

JAY D. HAIR,
President.

NATURAL RESOURCES DEFENSE COUNCIL,
Washington, DC, May 15, 1989.

DEAR MEMBER OF CONGRESS: The Natural Resources Defense Council urges you to support the Irrigation Subsidy Reform Act of 1989, which is being introduced by Senator John Heinz, Representative Sam Gejdenson and others on May 17, 1989. The bill would accomplish a simple but much needed reform of federal agriculture and water policy by elminating "double subsidies" for surplus crops grown with federal irrigation water. Specifically, the bill requires agricultural operations using taxpayer subsidized irrigation water on crops already in surplus to forgo the additional subsidies available through the federal commodity programs.

Passage of this eminently sensible measure will help to address one of the most critical needs in western water policy by requiring water users to recognize the true cost of their irrigation water. The bill would reduce political pressures for more unnecessary irrigation projects and economic incentives to overproduce. It is completely consistent with the philosophy that our agricultural and economic policies would allow market forces to operate.

Federal irrigation subsidies have generally outlived their original social purposes and have proven to be a huge drain on the federal budget. Moreover, they create significant adverse environmental effects by encouraging the farming of marginal land, the damming of our last free flowing rivers and streams, and the diversion of scarce water supplies away from fish and wildlife and other environmental needs and into irrigated agriculture (which already uses about 85% of the water in the West).

In 1984, the U.S. Department of Agriculture, in a report ordered by Congress, concluded that irrigation subsidies for surplus crops contradict federal policies discouraging overproduction of these crops. The Irrigation Subsidy Reform Act is a much needed step toward eliminating this contra-

diction and we urge you to give it your support.

Sincerely,

HAMILTON CANDEE,
Director, Western Water Project.

COUNCIL FOR CITIZENS AGAINST GOVERNMENT WASTE,
Washington, DC, May 17, 1989.

Hon. JOHN HEINZ,
Russell Senate Office Building, Washington, DC.

DEAR SENATOR HEINZ: The Council For Citizens Against Government Waste (CCAGW) is the lobbying arm of Citizens Against Government Waste, a 350,000-member organization which is the nation's fastest growing citizens' movement. CCAGW endorses the Irrigation Subsidies Reform Act of 1989, to eliminate water subsidies for farmers who also receive commodity subsidies.

In 1984, 45% of the land irrigated with federally-subsidized water was used to grow crops already in surplus. In 1986, $785 million in Department of Agriculture commodity subsidies were paid to farmers who received subsidies from the Bureau of Reclamation. This double dipping must stop.

It doesn't make sense for farmers to get help from the government to irrigate their crops and increase production while at the same time they are being paid to restrict the production of surplus crops. The taxpayers are taking a bath on this wasteful and inefficient practice. We don't have to raise taxes to reduce the $263 billion federal deficit when there's waste like this that can be eliminated.

The Irrigation Reform Act of 1989 would bring more sanity to farm policies by prohibiting farmers who receive water subsidies from also receiving commodity subsidies. The Council For Citizens Against Government Waste urges all Senators to join you in co-sponsoring this important waste-cutting legislation.

Sincerely,

THOMAS A. SCHATZ,
Government Affairs Director.

Mr. HARKIN. Mr. President, I am pleased to join Senator HEINZ in introducing the Irrigation Subsidy Reform Act of 1989. The bill is simple and straightforward. It provides that farmers who receive federally subsidized irrigation water may not also receive benefits under Federal farm price and income support programs.

The Bureau of Reclamation subsidizes farmers in parts of the country by selling water from federally constructed projects at prices that do not recover the projects' full capital, operating, and interest costs. The Interior Department estimates the 1986 subsidy at $534 million, $203 million of which may be associated with surplus crop production. Since its beginning the Bureau of Reclamation has provided subsidies in an amount estimated to be as high as $70.3 billion by the Congressional Budget Office.

About 38 percent of the acres receiving subsidized irrigation are used to produce crops supported by Federal commodity programs. USDA calculates that farmers served by Bureau of Reclamation water may have received commodity program payments totaling as much as $785 million in 1986. Hence, for 1986 a small group of farmers received combined water subsidies and farm program benefits of about $1 billion.

The double dipping that results from piling farm program payments on top of irrigation subsidies is a prime example of the sort of spending that we must eliminate if we are ever to get the Federal budget deficit under control. This is just one more instance where Federal programs are working at cross purposes with one another. One foot is on the accelerator and the other is on the brake.

This double dipping continues even as the budget deficit forces cuts in spending for agriculture programs that translate nearly dollar for dollar into reduced income for farmers in Iowa and other parts of the country that do not benefit from subsidized water.

My State of Iowa is still suffering from severe drought problems, including shortages of water for household and livestock use. The National Guard is hauling water. Livestock herds are being liquidated. The applications for Farmers Home Administration grants and loans for water systems far exceed the available money. Thus far this year there have been over $60 million in applications for somewhat more than $10 million in funds. So I am troubled that each year hundreds of millions of dollars go out to farmers in other parts of the country who get both irrigation subsidies and farm program benefits, while we in Iowa can't even get the Federal help we need to have water for our people and livestock to drink.

It's a matter of basic fairness. Farmers who get irrigation subsidies clearly have a competitive advantage over those who don't. To make matter worse, farmers in Iowa and other parts of the country who don't get subsidized water are paying taxes to fund their competitors' subsidies.

Under this legislation, farmers who are receiving these double benefits simply must choose which benefit they will retain. If they want to continue receiving farm program benefits, they can renegotiate their water contracts so they pay the full cost of the water. Or they could contine to receive water benefits if they grow crops that are not supported by Federal farm programs.

Moreover, as Senator HEINZ has so well explained, water subsidies go predominantly to large farming operations. The original intent of the Bureau of Reclamation program was to limit irrigation benefits to 160 acres per person. Currently, however, the limit has reached 960 acres, and that limit is skirted by "paper farms."

The conflicting policies relating to payment of commodity program benefits to farmers receiving subsidized water also encourage environmental harm. The intensive cropping and high water use fostered by these policies contribute to accumulation of salts, trace elements, pesticides, and other substances in used irrigation water. For example, the accumulation of selenium from irrigation drainage reached such high levels in the Kesterson Reservoir in California that wildlife poisoning resulted.

Mr. President, this legislation represents sound fiscal, agricultural and environmental policy. I urge that my colleagues support this bill and hope that it will soon be enacted.

By Mr. SPECTER:

S.J. Res. 136. Joint resolution designating August 8, 1989, as "National Neighborhood Crime Watch Day"; to the Committee on the Judiciary.

NATIONAL NEIGHBORHOOD CRIME WATCH DAY

Mr. SPECTER. Mr. President, today I introduce a joint resolution which commends the Nation's Neighborhood Crime Watch groups and designates August 8, 1989, as "National Neighborhood Crime Watch Day."

One such group, the National Association of Town Watch [NATW], has made significant contributions in helping neighborhoods throughout the country in their fight against crime. The association's fifth annual National Night Out crime prevention project, which was held on August 9, 1988, involved citizens and police in 7,000 communities in all 50 States. Last year, I joined then-Vice President Bush and NATW's executive director, Matt Peskin, for the kick-off ceremony in Philadelphia.

During National Night Out, residents in neighborhoods across the Nation will sit on lighted porches, enjoy visits from local police, and participate in a variety of special events such as block parties, cookouts, and parades.

Nationally, 18.5 million Americans participated in "National Night Out" in 1988. This unique anticrime effort heightens crime prevention awareness and reunites communities and local law enforcement agencies. Many communities in your State are dedicated National Night Out supporters.

The National Association of Town Watch is a unique organization, serving as liaison among thousands of communities involved in crime prevention programs and representing the entire spectrum of programs concerned with the serious problem of crime in our neighborhoods. As such, it helps coordinate the anticrime efforts of, and provide information and assistance to, the many communities involved in organized crime prevention programs.

Under the leadership of Mr. Matt Peskin, NATW received the prestigious National Constituency Organiza-

tion Award in 1986 and 1988, presented by the National Crime Prevention Council, the Crime Prevention Coalition, and the U.S. Department of Justice, for the association's extraordinary efforts in fighting crime.

In association with other anticrime organizations, NATW works to reduce the neighborhood crime rate and to enhance the police-community relationship. Nearly obsolete in the 1960's and 1970's, the notion of the police and the community cooperating with each other now is being institutionalized. No longer are people as afraid to call the police, and law enforcement organizations now recognize the citizens' role in fighting crime.

In correspondences with my office, the U.S. Department of Justice noted that "NATW has done exemplary work and has made significant contributions to the overall national crime prevention effort." The Department also indicated that "National Night Out is an excellent program and should be continued."

As a former district attorney, current member of the Senate Judiciary, Committee, and cochairman of the Congressional Crime Caucus, I have actively pursued initiatives to fight street crime. Accordingly, I commend the efforts of NATW and all the participants in National Night Out.

Mr. President, I urge my colleagues to join in supporting this important resolution to recognize the active involvement of neighborhood organizations in the ongoing national fight against crime and to designate August 8, 1989, as National Neighborhood Crime Watch Day.

I ask unanimous consent that the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 136

Whereas neighborhood crime is of continuing concern to the American people;

Whereas the fight against neighborhood crime requires people to work together in cooperation with law enforcement officials;

Whereas neighborhood crime watch organizations are effective at promoting awareness about, and the participation of volunteers in, crime prevention activities at the local level;

Whereas neighborhood crime watch groups can contribute to the Nation's war on drugs by helping to prevent their communities from becoming markets for drug dealers;

Whereas citizens across America will soon take part in a "National Night Out", a unique crime prevention event which will demonstrate the importance and effectiveness of community participation in crime prevention efforts by having people spend the period from 8 to 10 o'clock post-meridian on August 8, 1989, with their neighbors in front of their homes: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That August 8, 1989 is designated as "National Neighborhood Crime Watch Day", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such day with appropriate programs, ceremonies, and activities.

ADDITIONAL COSPONSORS

S. 135

At the request of Mr. GLENN. the name of the Senator from Alabama [Mr. HEFLIN] was added as a cosponsor of S. 135, a bill to amend title 5, United States Code, to restore to Federal civilian employees their right to participate voluntarily, as private citizens, in the political process of the Nation, to protect such employees from improper political solicitations, and for other purposes.

S. 231

At the request of Mr. MOYNIHAN, the name of the Senator from Iowa [Mr. HARKIN] was added as a cosponsor of S. 231, a bill to amend part A of title IV of the Social Security Act to improve quality control standards and procedures under the Aid to Families With Dependent Children Program, and for other purposes.

S. 247

At the request of Mr. METZENBAUM, the names of the Senator from Arkansas [Mr. PRYOR], the Senator from Nebraska [Mr. EXON], the Senator from Vermont [Mr. JEFFORDS], the Senator from Maine [Mr. COHEN], and the Senator from Alaska [Mr. STEVENS] were added as cosponsors of S. 247, a bill to amend the Energy Policy and Conservation Act to increase the efficiency and effectiveness of State energy conservation programs carried out pursuant to such act, and for other purposes.

S. 427

At the request of Mr. MACK, the name of the Senator from Florida [Mr. GRAHAM] was added as a cosponsor of S. 427, a bill to designate the Federal building located at 1801 Gulf Breeze Parkway, Gulf Breeze, FL, as the "Bob Sikes Visitor Center."

S. 464

At the request of Mr. SANFORD, the name of the Senator from South Carolina [Mr. HOLLINGS] was added as a cosponsor of S. 464, a bill to promote safety and health in workplaces owned, operated, or under contract with the United States by clarifying the U.S. obligation to observe occupational safety and health standards and clarifying the U.S. responsibility for harm caused by its negligence at any workplace owned by, operated by, or under contract with the United States.

S. 488

At the request of Mr. FOWLER, the names of the Senator from Vermont [Mr. LEAHY] and the Senator from Louisiana [Mr. JOHNSTON] were added as cosponsors of S. 488, a bill to provide Federal assistance and leadership to a program of research, development, and demonstration of renewable energy and energy efficiency technologies, and for other purposes.

S. 494

At the request of Mr. DURENBERGER, the name of the Senator from South Dakota [Mr. DASCHLE] was added as a cosponsor of S. 494, a bill to amend the Internal Revenue Code of 1986 to extend for 5 years, and increase the amount of, the deduction for health insurance for self-employed individuals.

S. 543

At the request of Mr. SIMON, the name of the Senator from Rhode Island [Mr. PELL] was added as a cosponsor of S. 543, a bill to amend the Job Training Partnership Act to strengthen the program of employment and training assistance under this act, and for other purposes.

S. 692

At the request of Mr. HATCH, the name of the Senator from Wisconsin [Mr. KASTEN] was added as a cosponsor of S. 692, a bill to amend title XX of the Social Security Act to establish a block grant program for child care services, to amend the Internal Revenue Code of 1986 to adjust the earned income credit to take account of family size, and for other purposes.

S. 714

At the request of Mr. MCCLURE, the name of the Senator from Alaska [Mr. MURKOWSKI] was added as a cosponsor of S. 714, a bill to extend the authorization of the Water Resources Research Act of 1984 through the end of fiscal year 1993.

S. 763

At the request of Mr. MACK, the names of the Senator from Washington [Mr. GORTON], the Senator from Nebraska [Mr. EXON], the Senator from South Dakota [Mr. PRESSLER], the Senator from Colorado [Mr. WIRTH], the Senator from South Carolina [Mr. THURMOND], the Senator from North Dakota [Mr. CONRAD], the Senator from Wisconsin [Mr. KASTEN], the Senator from Ohio [Mr. METZENBAUM], the Senator from Virginia [Mr. WARNER], and the Senator from Nevada [Mr. BRYAN] were added as cosponsors of S. 763, a bill to require a report on the extent of compliance by the Palestine Liberation Organization [PLO] with its commitments regarding a cessation of terrorism and the recognition of Israel's right to exist, and for other purposes.

S. 829

At the request of Mr. HUMPHREY, his name was added as a cosponsor of S. 829, a bill to provide the President with enhanced rescission authority at such time as the debt of the U.S. Government held by the public exceeds $2,378,000,000,000.

S. 882

At the request of Mr. MCCONNELL, the name of the Senator from Mississippi [Mr. COCHRAN] was added as a cosponsor of S. 882, a bill to amend the National School Lunch Act to make private nonprofit organizations eligible to participate in the summer food service program for children, and for other purposes.

S. 893

At the request of Mr. LAUTENBERG, the names of the Senator from Arizona [Mr. DECONCINI] and the Senator from South Dakota [Mr. PRESSLER] were added as cosponsors of S. 893, a bill to establish certain categories of Soviet and Vietnamese nationals presumed to be subject to persecution and to provide for adjustment to refugee status of certain Soviet and Vietnamese parolees.

S. 933

At the request of Mr. HARKIN, the name of the Senator from Ohio [Mr. GLENN] was added as a cosponsor of S. 933, a bill to establish a clear and comprehensive prohibition of discrimination on the basis of disability.

S. 949

At the request of Mr. RIEGLE, the name of the Senator from North Dakota [Mr. BURDICK] was added as a cosponsor of S. 949, a bill to amend title XIX of the Social Security Act to provide States additional authority and flexibility under Medicaid to improve children's access to health care services, to assure sufficient payment levels for certain providers and to provide funds for demonstration projects, and for other purposes.

S. 959

At the request of Mr. DASCHLE, the name of the Senator from North Dakota [Mr. CONRAD] was added as a cosponsor of S. 959, a bill to amend title III of the Public Health Service Act to make improvements in the National Health Service Corps scholarship program, and for other purposes.

SENATE JOINT RESOLUTION 67

At the request of Mr. DOMENICI, the names of the Senator from Nebraska [Mr. KERREY], the Senator from West Virginia [Mr. ROCKEFELLER], and the Senator from South Carolina [Mr. THURMOND] were added as cosponsors of Senate Joint Resolution 67, a joint resolution to commemorate the 25th anniversary of the Wilderness Act of 1964 which established the National Wilderness Preservation System.

SENATE JOINT RESOLUTION 76

At the request of Mr. HELMS, the names of the Senator from Michigan [Mr. LEVIN], the Senator from Wyoming [Mr. SIMPSON], the Senator from Kansas [Mrs. KASSEBAUM], and the Senator from South Carolina [Mr. THURMOND] were added as cosponsors of Senate Joint Resolution 76, a joint resolution to designate the period commencing on June 21, 1989, and ending on June 28, 1989, as "Food Science and Technology Week."

SENATE JOINT RESOLUTION 79

At the request of Mr. REID, the names of the Senator from Tennessee [Mr. GORE], the Senator from Rhode Island [Mr. PELL], the Senator from Delaware [Mr. BIDEN], and the Senator from Illinois [Mr. SIMON] were added as cosponsors of Senate Joint Resolution 79, a joint resolution to require display of the POW/MIA flag at Federal buildings.

SENATE JOINT RESOLUTION 81

At the request of Mr. DIXON, the names of the Senator from Missouri [Mr. DANFORTH], the Senator from Hawaii [Mr. MATSUNAGA], the Senator from Arkansas [Mr. BUMPERS], the Senator from North Carolina [Mr. HELMS], the Senator from Texas [Mr. BENTSEN], the Senator from South Dakota [Mr. PRESSLER], the Senator from Illinois [Mr. SIMON], the Senator from Alabama [Mr. HEFLIN], and the Senator from Ohio [Mr. GLENN] were added as cosponsors of Senate Joint Resolution 81, a joint resolution to designate the week of October 1 through 7, 1989, as "National Health Care Food Service Week."

SENATE JOINT RESOLUTION 86

At the request of Mr. RIEGLE, the names of the Senator from Connecticut [Mr. DODD], the Senator from Alabama [Mr. HEFLIN], and the Senator from Tennessee [Mr. GORE] were added as cosponsors of Senate Joint Resolution 86, a joint resolution designating November 17, 1989, as "National Philanthropy Day."

SENATE JOINT RESOLUTION 110

At the request of Mr. SIMON, the names of the Senator from Pennsylvania [Mr. SPECTER], the Senator from Tennessee [Mr. SASSER], and the Senator from Wyoming [Mr. SIMPSON] were added as cosponsors of Senate Joint Resolution 110, a joint resolution designating October 5, 1989, as "Raoul Wallenberg Day."

SENATE JOINT RESOLUTION 130

At the request of Mr. SARBANES, the names of the Senator from California [Mr. WILSON], the Senator from Washington [Mr. ADAMS], the Senator from Maine [Mr. COHEN], the Senator from Alaska [Mr. STEVENS], the Senator from Mississippi [Mr. LOTT], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from West Virginia [Mr. BYRD], the Senator from Pennsylvania [Mr. HEINZ], and the Senator from Tennessee [Mr. GORE] were added as cosponsors of Senate Joint Resolution 130, a joint resolution designating February 11 through February 17, 1990, as "Vocational Technical Education Week."

SENATE CONCURRENT RESOLUTION 9

At the request of Mr. HUMPHREY, the name of the Senator from Delaware [Mr. ROTH] was added as a cosponsor of Senate Concurrent Resolution 9, a concurrent resolution establishing procedures for expedited consideration by the Congress of certain bills and joint resolutions submitted by the President.

SENATE CONCURRENT RESOLUTION 38—PROVIDING FOR A CONDITION RECESS OF THE SENATE AND ADJOURNMENT OF THE HOUSE

Mr. MITCHELL submitted the following concurent resolution; which was considered and agreed to:

S. CON. RES. 38

Resolved by the Senate (the House of Representatives concurring), That when the Senate recesses or adjourns at the close of business on Thursday, May 18, 1989, or Friday, May 19, 1989, pursuant to a motion made by the Majority Leader, or his designee, in accordance with this resolution, it stand recessed or adjourned until 2:15 post meridian on Wednesday, May 31, 1989, or until 12 o'clock meridian on the second day after Members are notified to reassemble pursuant to section 2 of this resolution, whichever occurs first; and that when the House adjourns on Thursday, May 25, 1989, it stand adjourned until 12:00 o'clock meridian on Wednesday, May 31, 1989, or until 12 o'clock meridian on the second day after Members are notified to reassemble pursuant to section 2 of this resolution, whichever occurs first.

SEC. 2. The Majority Leader of the Senate and the Speaker of the House, acting jointly after consultation with the Minority Leader of the Senate and the Minority Leader of the House, shall notify the Members of the Senate and the House, respectively, to reassemble whenever, in their opinion, the public interest shall warrant it.

NOTICES OF HEARINGS

SUBCOMMITTEE ON NUTRITION AND INVESTIGATIONS

Mr. LEAHY. Mr. President, I wish to announce that the Subcommittee on Nutrition and Investigations of the Committee on Agriculture, Nutrition, and Forestry will hold two hearings on the reauthorization of the WIC and child nutrition legislation. The hearings will be held on June 1, 1989, at 9:30 a.m. and on June 14, 1989, at 2 p.m. in room 332 Russell Senate Office Building.

Senator TOM HARKIN will preside. For further information please contact Mark Halverson of the subcommittee staff at 224-3254.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ARMED SERVICES

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet on Wednesday, May 17, 1989, at 2 p.m. in open session to receive testimony on Department of Energy Defense Programs in review of

the fiscal years 1990 and 1991 defense authorization request.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be allowed to meet during the session of the Senate Wednesday, May 17, 1989, at 10 a.m. to conduct an oversight hearing on the HUD Inspector General's report on mismanagement in the moderate rehabilitation program (section 8).

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Wednesday, May 17, at 2 p.m. to mark up the Foreign Relations Authorization Act for fiscal year 1990.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

ROSWELL, NM, ENCOURAGES PARTNERS IN EDUCATION

● Mr. DOMENICI. Mr. President, one of the outstanding small cities of this Nation is Roswell, NM, a city on the move. The city has demonstrated once again its vision for the future with the creation of a project known as Partners in Education.

I commend the Roswell Independent School District, the Hispano Chamber of Commerce, and the city of Roswell for this leadership, and I want to inform my colleagues briefly about this excellent effort.

The project, bringing together 23 elementary and secondary schools, is sponsored by 27 of the city's businesses. It is a joint effort to enhance education and opportunities for all of the projects participants.

Mr. President, this partnership benefits the schools and the schoolchildren by broadening students concepts of selfworth, providing role models for disadvantaged students, expanding a student's awareness of career choices, fostering a better understanding of the Roswell Public Schools, and creating for employees a new sense of service to the system that perpetuates free enterprise.

In turn, the businesses of Roswell will benefit from ths project by influencing career choices of students, developing a pool of potential employees, improving opportunities for effective economic development through exchange of resources, and increasing the efficiency and success of business operations.

These are the kind of initiatives our country needs to pursue with vigor. I am proud that the Roswell Independent School district, the Hispano Chamber of Commerce, and the city of Roswell have decided to implement this project.

This cooperation will build a stronger community, a stronger state, and a stronger nation. I hope other communities will follow Roswell's lead.

Mr. President this is an excellent example of what President Bush has called the thousand points of light.

The Partners in Education project reaches out to students, encouraging them to stay in school and pursue their education. It focuses on helping each student develop a vision for the future through positive contacts and role models. With this vision, students can continue to seek their goals positively.

Our Nation is the strongest in the world. Projects like the Partners in Education, which focus is on the development of a vision of the future for America's young people, will help us maintain our strength into the 21st century and beyond.

Once again, I commend the people of Roswell, NM, for their leadership and their continued drive for excellence.●

ELIMINATE THE RURAL-URBAN DIFFERENTIAL

● Mr. BURDICK. Mr. President, I am pleased to be a cosponsor of Senate Concurrent Resolution 37, which calls for the elimination of the Medicare payment differential between urban and rural hospitals.

The Medicare prospective payment system was established on the theory that urban hospitals incur a greater cost per patient than do rural hospitals. Under this payment system, urban hospitals receive a larger payment from Medicare than do their rural counterparts.

However, this system failed to account for the higher proportion of Medicare patients in rural hospitals. In addition, rural hospitals serve a smaller number of patients who are covered by some form of private health insurance. Rural hospitals have not been able to meet their expenses under this system and have been closing at twice the rate of urban hospitals since 1987.

Mr. President, this statistic is of grave concern to my home State of North Dakota. For North Dakota's many rural communities, the rural hospital is the only provider of health care in an often isolated area. When a rural hospital closes, it deprives rural residents of needed care and affects the community's entire economic structure.

I have long supported the elimination of this unfair distinction, which has contributed to the continuing shortage of sufficient health care services in many of our communities. I believe that we must work to relieve rural hospitals and rural communities of this unnecessary burden. Senate Concurrent Resolution 37 is an important step in that direction.●

FINANCIAL INSTITUTIONS REFORM, RECOVERY AND ENFORCEMENT ACT OF 1989

● Mr. HATFIELD. Mr. President, when the Senate considered S. 774, the Financial Institutions Reform, Recovery and Enforcement Act of 1989, I expressed my reservations about several provisions of the bill. While I voted for S. 774, I did so with the fear that some of those provisions might substantially and perhaps unnecessarily impact the earning capacity of healthy thrift institutions, thereby exacerbating the very problem which the bill seeks to remedy.

Mr. President, not all thrift institutions are failing, have made poor investment decisions or are run by poor management. Indeed, more Oregon thrift institutions are quite healthy and have an excellent record in terms of financial stability and quality of management. However, it is these healthy Oregon thrifts that must bear a great financial burden for the mistakes and omissions of other savings and loan associations in other parts of the country.

One of the specific areas of concern for me is the treatment of supervisory goodwill. The new tangible capital standards in the legislation specifically exclude supervisory goodwill, and in doing so effectively abrogate agreements made between the Federal Home Loan Bank Board, on behalf of the U.S. Government, and certain healthy thrift institutions. These healthy savings and loan associations relied exclusively on such agreements with the FHLBB as an inducement to acquire failed institutions. Principles of equity alone dictate that the Government continue to recognize the validity of these agreements.

Mr. President, recently I received a letter from Mr. Dale Weight, president and chairman of the board of the Benjamin Franklin Federal Savings and Loan Association in Portland, OR. His letter outlines with great clarity the serious impact this legislation will have on the Benjamin Franklin, a healthy institution that acquired a failing thrift at the urging of the FHLBB. His is a voice which must be heard, even at this late date, and I ask that his letter be printed in the RECORD.

The letter follows:

BENJ. FRANKLIN FEDERAL SAVINGS AND LOAN ASSOCIATION,
Portland, OR, April 27, 1989.

Hon. MARK O. HATFIELD,
U.S. Senator, Hart Senate Office Building, Washington, DC

DEAR MARK: The Bush savings and loan plan (FIRREA) currently before Congress places The Benj. Franklin in serious jeopardy.

The proposed language of the House Subcommittee and Senate bill will, if passed as proposed, effectively move The Benj. Franklin to a "Special Supervisory Association" status.

Benj. Franklin currently has $291 million in supervisory goodwill on its books. This goodwill arose as a purchase accounting adjustment for acquiring, at the behest of the FSLIC, the Equitable Savings and Loan Association of Portland, Oregon and the Western Heritage Savings and Loan Association of Pendleton, Oregon. The FSLIC saved $360 million dollars through the willingness of the Benj. Franklin to accept goodwill as a form of assistance. Further, this was done as a common practice during the early 1980's with several billion dollars of goodwill being created by the FSLIC. This "goodwill" saved the insurance fund from earlier default and was accepted by the acquiring institution as an acceptable level of assistance based on mutual agreeable write off schedules. In our case, the goodwill was to be written off over a 32 year period by a direct charge to earnings of $11 million a year.

The approach taken by the House Subcommittee on Financial Institutions and new amendments to the subcommittee's report in the full committee, would change the basis upon which the goodwill was accepted by excluding the goodwill from a thrift's core capital requirement. If the government reneges on its commitments to Benj. Franklin and other supervisory acquirors by not fully including supervisory goodwill in core capital:

Benj. Franklin and other profitable supervisory acquirors would be transformed overnight from institutions in full regulatory compliance to supervisory cases.

The resulting negative publicity will do immense damage to stockholder values and to customer confidence; this is not a theoretical concern but a real crisis issue;

Capital markets will be impossible to access given the sudden regulatory noncompliance;

The investor perception of the thrift industry will be diminished since investors will see the healthy institutions in which they have invested suddenly become supervisory cases;

Benj. Franklin will be placed in a position where increased earnings or capital are necessary under the legislation but will be obstructed due to conditions caused by the same legislation.

In a dramatic effort to meet the capital requirements, supervisory acquirors like Benj. Franklin would have to downsize resulting in: Employee layoffs; branch closings; cutbacks in residential mortgage lending; and other service cutbacks.

The regulators currently have significant authority to restrict or close institutions that are in poor condition or engaged in unsafe or unsound practices.

If the concern is that institutions not be permitted to grow based on their supervisory goodwill, growth restrictions can be drafted which will achieve this objective but not cause the other concerns identified above through the failure to fully include goodwill in core capital.

Our position is simply that any change in the law that does not fully grandfather supervisory goodwill is an improper abrogation of supervisory acquisition agreements.

We need, and ask for, your help now. Please contact the House Banking Committee and insist that all supervisory goodwill be grandfathered and that it be counted 100% toward capital. Thanks.

Sincerely,

G. DALE WEIGHT.●

HENRY DROPKIN TESTIMONIAL

● Mr. HEINZ. Mr. President, I rise today to commemorate the career of one of our Nation's great labor leaders, a man I respect and admire. After 42 years of devoted service to the cause of working men and women, Henry Dropkin is retiring as international vice president of the Amalgamated Clothing and Textile Workers Union.

For over 15 years, Mr. President, I have been honored to call Henry Dropkin my friend. Like many hundreds of Pennsylvanians, I too have known him as a devoted family man, a good husband and father, a well-spoken community leader. Like many thousands of ACTWU and AFL-CIO members, I too have known Henry as a tireless advocate of workers' rights and of fair trade. And like many public officials in our home State of Pennsylvania, I too have benefited from his solid grasp of trade and labor issues, his sound and thoughtful insights, his passionate vision for the future of our Nation and wise counsel.

Mr. President, it is with mixed emotions that I note Henry Dropkin's retirement. While I join with his family and many friends in wishing my friend health and happiness in his new life, the American labor movement is losing one of its brightest lights.●

PROMOTE COMPETITIVENESS BY CUTTING CAPITAL GAINS TAX

● Mr. LOTT. Mr. President, today I am pleased to join my colleague from Wisconsin, Senator BOB KASTEN, in his effort to promote investment, job creation, and competitiveness by cutting the capital gains tax.

Senator KASTEN's bill, S. 171, enjoys the widest bipartisan support of any capital gains bill introduced in the Senate to date. S. 171 is cosponsored by our distinguished colleagues Senators STEVE SYMMS, JIM MCCLURE, RICHARD SHELBY, THAD COCHRAN, RUDY BOSCHWITZ, and HOWELL HEFLIN.

Mr. President, there are several aspects of Senator KASTEN's bill that differentiate it from other capital gains reform approaches. First, the bill would target the tax incentive to growth-oriented investments in corporate stock and business assets. Second, it would prevent tax sheltering activity by excluding collectibles and depreciable real property from preferential treatment. Third, it would inject some fairness in the tax code by partially indexing the basis of all capital assets, thus preventing the taxation of purely inflationary gains.

America is facing its greatest competitive challenge in years. Our overseas competitors—including Japan, West Germany, Taiwan, South Korea, and others—have adopted tax policies that reward risk-taking, innovation, and investment. As a result, these countries are creating new products, new industrial innovations and new technologies have vaulted them to the top of world economy. To keep pace with our competitors, we must bring down our high tax on productive capital.

Mr. President, I highly recommend to my Senate colleagues an article by Senator KASTEN on the need to reduce the U.S. capital gains tax. I ask that it be printed in the RECORD.

The article follows:

[From CFO, May 1989]

LET'S SHARPEN AMERICA'S COMPETITIVE EDGE—BY CUTTING THE CAPITAL GAINS TAX

(By Senator Robert W. Kasten, Jr.)

One of America's worst competitive handicaps is purely self-inflicted: We impose the heaviest tax on capital gains in the free world. This tax cripples U.S. savings and investment—and without investment, new products and new technologies aren't developed, new plants aren't built, and new American jobs aren't created.

Most of our rivals recognize the immense economic value of a lower capital gains rate. Many countries—including West Germany, Italy, the Netherlands, South Korea, and Hong Kong,—don't tax capital gains at all. Others—Canada, France, Japan, even socialist Sweden—have lower capital gains taxes than we do. And although Great Britain has a higher capital gains rate, it encourages investment by indexing capital gains for inflation.

The result of this disparity is that investment rates in the United States are much lower than elsewhere. For example, investment rates in Japan and the "four tigers" of Asia (Singapore, South Korea, Taiwan, and Hong Kong) average 28.8 percent of gross national product, compared with only 19 percent in the United States.

According to President Reagan's 1989 economic report, tax reform increased the tax burden on U.S. investment by 10 percent. Although other countries have similarly reformed their tax codes, they've managed to reduce their capital costs by retaining a capital gains preference. Japan's cost of capital, for example, is now 50 percent to 75 percent lower than ours.

President Bush and I have made capital gains reform proposals that would encourage the kind of investment that is essential for America's competitiveness. Both proposals would cut the capital gains tax in half, and limit the tax break to equities—the kind of investment that sparks job creation, technological innovation, and small business formation. To prevent tax-sheltering by the rich, our proposals would exclude investments in collectibles and depreciable real property.

My bill, however, contains two elements not included in the President's proposal. First, it would cut the corporate capital gains rate in half. Excluding corporations from preferential capital gains treatment would make tax considerations a significant factor in determining the form of doing business. Moreover, corporate investors account for a large amount of venture capital investment (40 percent in 1986).

Second, my bill would index capital gains for any year in which inflation rises above 4 percent. While the 50 percent exclusion would lower the tax burden on holders of stock, this indexing provision would ease the burden on holders of nonequity assets, whose capital gains are mostly due to inflation.

It is fundamentally unjust to tax investors on purely inflationary gain. Holders of assets such as homes, family farms, and land are particularly vulnerable to this unfair tax. The indexing provision would encourage individuals to save and invest—by protecting the value of their capital assets from high inflation.

Opponents of a reduced capital gains tax maintain that it would amount to a massive "giveaway to the rich" that would deepen the budget deficit. Economist Paul Craig Roberts has noted that the "giveaway to the rich" idea relies on a very peculiar definition of the rich—one that includes even a middle-class businessman who retires and sells his business. The capital gain swells his income for the year to several hundred thousand dollars, and he is "rich"—until the following year.

In 1978, we cut the top capital gains rate from 50 percent to 28 percent. Taxes paid on capital gains increased from $9.1 billion in 1978 to $12.5 billion in 1980. In 1981, we cut the top rate further, to 20 percent, and capital gains taxes increased from $12.7 billion in 1981 to $24.5 billion in 1985.

Other countries have adopted tax policies that reward saving, investing, and risk-taking. Keeping our capital gains tax as high as it is amounts to a giveaway of American jobs to our foreign competitors. We can sharpen America's competitive edge by bringing our capital gains rate in line with the rest of the world.●

THE 34TH ANNUAL DETAILED FINANCIAL DISCLOSURE OF SENATOR PAUL SIMON

● Mr. SIMON. Mr. President, it has been my practice in each of the 34 years I have spent in public life to volunteer a detailed accounting of my finances.

I ask that my financial report for 1988 be printed in the RECORD.

The financial report and related announcement follow:

ANNOUNCEMENT

For the 34th consecutive year that he has held public office, U.S. Senator Paul Simon, D-Ill., has released a detailed description of his income, assets and liabilities.

Simon has been making the voluntary annual statements longer than any other national officeholder, beginning the practice when he entered public service as a state representative in 1955. He followed the practice during eight years in the Illinois House of Representatives, six years in the Illinois Senate, four years as lieutenant governor and ten years in the U.S. House of Representatives. The listing predates disclosure requirements of state and federal law and continues to exceed those requirements.

The Illinois senator lists 1988 income for himself and his wife, Jeanne, totaling $172,088.59. The figure includes his Senate salary, reimbursement for travel and other expenses, honoraria for appearances and other items.

The Simons had assets of $368,835 and liabilities of $197,332 for a net worth of $171,503.

Income statement of Paul and Jeanne Simon—1988

General income (Paul Simon):	
Salary, U.S. Senate	$89,500.00
State of Illinois, general assembly system	17,651.00
Book royalties	13,997.07
U.S. Senate, expense reimbursement	8,545.12
Simon for Senate, expense reimbursement	490.22
Simon for President, expense reimbursement	641.28
Donohue Show, expense reimbursement	17.18
Blue Cross/Blue Shield, reimbursement	44.00
Land's End, refund	10.00
Friends of Phil Sharp, expense reimbursement	5.22
Paul Simon Official Office Account, expense reimbursement	8.80
Saturday Night Live (4 programs)	3,042.00
Illinois Democratic Party, expense reimbursement	394.89
Honoraria (including travel reimbursement) and articles:	
Phillips College, talk	2,000.00
San Diego County Democratic Central Committee, talk	2,000.00
Brotherhood of Maintenance of Way Employees, talk	2,000.00
National Industries for the Blind, talk	1,500.00
Knoxville College, talk	1,228.00
National association of Federal Credit Unions, talk	2,000.00
American Income Life Insurance Company, talk	2,000.00
Association of Trial Lawyers of America, talk	2,000.00
National association of Broadcasters, talk	1,000.00
National Association of Trade & Technical Schools, talk	2,000.00
College of William and Mary, talk	1,710.94
New York Times magazine, article ($500.00 donated to Dana College)	2,500.00
New York Times Magazine, article	300.00
Chronicle of Higher Education, article	200.00
American Foreign Service Journal, article	100.00
General income (Jeanne Simon):	
Salary, Washington Financial Group	800.00
Book Royalty, advance	3,750.00
Chicago Tribune magazine, article	1,500.00
Alison Bunte, travel expense reimbursement	6.00
Illinois Democratic Party, expense reimbursement	21.25
African American Institute, expense reimbursement	821.00
Interest income:	
Franklin Fund	382.00
General American Life	154.00
U.S. Senate Federal Credit Union	299.00
Polish National Alliance, Insurance policy	13.00
U.S. Government	4,503.62
Dividends:	
Adams Express	293.00

TERRY ANDERSON

● Mr. MOYNIHAN. Mr. President, today marks the 1,523d day of captivity for Terry Anderson in Beirut.

I ask that the attached letter written by Terry Anderson in the fall of 1985 be printed in the RECORD.

Re letter follows:

CAPTIVE WRITES THAT HE DREAMS OF HOME

(Here are excerpts from a letter written by captive Terry Anderson, 38, chief Middle East correspondent of The Associated Press, to his family. The letter was dropped off yesterday at the AP's Beirut office.)

Once again, our captors are allowing us to write to you, as well as to the president and others in hopes that perhaps we and you can persuade someone to break this deadlock. This is both a personal letter to all of you and an open letter—I ask that you release to the papers, etc., any part you don't consider too personal.

The three men confined with me . . . and the Bible I was given after the first few weeks, have kept me sane. We have services twice a day, and choose readings in turn. We try to exercise every day, though the room is small. And I'm learning to read French from Tom Sutherland, with the help of a couple of old—and by now tattered—copies of L'Orient le jour.

Keeping occupied is our main problem. It's the only way to keep away the depression.

Reagan says he will not negotiate with terrorists. Where does that leave us? Our kidnapers are not part of a government or any official group that can be pressured by Iran or Syria. How can you pressure a group if you don't know who they are? And how long does he think the group is going to allow him to play around?

Our captors say they've done their best to settle this peacefully, but the U.S. simply says nothing—publicly or privately. However, distasteful it might be, Reagan must negotiate if he cares at all about our well-being. And he must do so soon. William Buckley is dead after 1½ years in captivity. I don't want to share that fate, and neither do Father Jenco, or Tom or David.

I dream every day of the place at Batavia, [N.Y.,—his family's home], and of building a small cottage by the stream, and working to clean the pond in the summers . . . Please make sure to thank personally all those people who have been caring enough to try to help us. I want to thank each of them personally when I'm home.

Important: we have just been told that someone has phoned news media to claim Islamic Jihad has killed us. Obviously this is not true. Our captors say it was an attempt by the U.S. government to disturb the negotiations.●

CHICAGO VOCATIONAL HIGH SCHOOL

● Mr. SIMON. Mr. President, near the end of last year, the U.S. Department of Education announced the nominees for the annual Secondary School Recognition Program. Among the designated schools, I am pleased to announce, were 24 institutions from my home State. The citizens of Illinois recognize and uphold the values of a strong and multifaceted education for their children. I hope that the nominations of these schools epitomize the emphasis that our State places on learning.

I was particularly proud to learn that three schools from the city of Chicago received such recognition. Being the Nation's third largest school district, the city's schools face many challenges. Nonetheless, these schools—Chicago Vocational High School, Hubbard High School, and Kenwood Academy—demonstrate that many of the students and teachers of Chicago are part of an outstanding educational program. The excellence of these schools can serve as an example to others within the city and throughout the entire Nation.

In the case of Chicago Vocational, this recognition is particularly rewarding. In recent years, C.V.S. has broken new ground in enhancing the vocational training that it offers. Among the newest features of the school is an entrepreneurial program which combines the curiosity and energy of the students with the knowledge and experience of the business leaders in the community. The motivation which this program provides serves not only to dissuade potential dropouts, but it also gives the students the hands-on training that will make them the community leaders of tomorrow. This program has also energized the entire C.V.S. community—local businesses, banks, and parents—in a unique manner. By involving these external parties in the educational process, learning is not put on hold when the C.V.S. student leaves his or her classroom.

Mr. President, although these nominations are honorable in and of themselves, I am sorry to hear that the three schools from Chicago will not be considered for the final award. This ineligibility arises not from a fault in their educational program. Instead, the three schools were disqualified based on the city of Chicago's lack of compliance with Public Law 91-142, section 504.

As you may know, this regulation is important in establishing and upholding the civil rights of Americans who are faced with disabilities. Laws such as this ensure that all Americans, regardless of physical characteristics, are free to pursue an education, a career, or any goal which they seek.

The violation of this law is regrettable. It is even more disappointing in that the schools are penalized for a circumstance which they do not control.

At a time when some have questioned the level of Federal funding for our schools, perhaps this will remind us that the only change in this situation should be an increase. Before the U.S. Department of Education can reward local schools with such honors, it must also reward them financially.

Mr. President, my congratulations go to the students, faculty, and parents of all 24 of these schools. I hope that all Members of the Senate share in the pride and esteem I feel. To be recognized among schools across the entire Nation must be very rewarding to the students, faculty, and parents of these schools. Likewise, the education which these young people earn is a reward of the highest value. In the meantime, I would also like to stress to my colleagues that more must be done to ensure that all students of all levels of physical ability may be able to share in these excellent educational opportunities. When that day arrives, we may feel even more pride.●

APPOINTMENTS BY THE PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The Chair, on behalf of the President pro tempore, pursuant to Senate Resolution 222, 93d Congress, appoints the following Senators to serve as ex officio members of the Committee on Commerce, Science, and Transportation for the purpose of participating in the National Ocean Policy Study: The Senator from Hawaii [Mr. MATSUNAGA], the Senator from Maine [Mr. MITCHELL], the Senator from Washington [Mr. ADAMS], the Senator from California [Mr. WILSON], the Senator from Maine [Mr. COHEN], and the Senator from Texas [Mr. GRAMM].

The Chair, on behalf of the President pro tempore, pursuant to Public Law 94-118, reappoints the Senator from Delaware [Mr. ROTH] to Japan-United States Friendship Commission.

The Chair, on behalf of the President pro tempore, pursuant to Public Law 100-204, appoints the Senator from Rhode Island [Mr. PELL] as a member of the U.S. Commission on Improving the Effectiveness of the United Nations.

The Chair, on behalf of the President pro tempore, pursuant to Public Law 93-29, as amended by Public Law 98-459, appoints Patricia A. Riley, of Maine, to the Federal Council on the Aging, vice Jon B. Hunter.

APPOINTMENTS BY THE MAJORITY LEADER

The PRESIDING OFFICER. The Chair, pursuant to section 403(a)(2) of Public Law 100-533, announces on behalf of the majority leader his appointment of the following individuals to the National Women's Business Council: Mary Ann Campbell, of Arkansas, and Virginia Littlejohn, of Maryland.

Mr. PRYOR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Without objection, it is so ordered.

The legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

EXECUTIVE CALENDAR

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to executive session to consider the following nominations:

Calendar 101. David C. Mulford to be an Under Secretary of the Treasury;

Calendar 102. Robert R. Glauber to be an Under Secretary of the Treasury;

Calendar 124. Phillip D. Brady to be General Counsel of the Department of Transportation;

Calendar 126. David P. Prosperi to be an Assistant Secretary of Transportation;

Calendar 127. Thomas J. Collamore to be an Assistant Secretary of Commerce;

Calendar 128. Michael R. Darby to be an Under Secretary of Commerce for Economic Affairs;

Calendar 130. Richard T. Crowder to be a Member of the Board of Directors of the Commodity Credit Corporation;

Calendar 131. Jack C. Parnell to be a Member of the Board of Directors of the Commodity Credit Corporation;

Calendar 132. Franklin E. Bailey to be an Assistant Secretary of Agriculture;

Calendar 133. Charles E. Hess to be an Assistant Secretary of Agriculture;

Calendar 134. Jo Ann D. Smith to be an Assistant Secretary of Agriculture; and

Calendar 135. Frank Q. Nebeker to be chief judge of the U.S. Court of Veterans Appeals.

I further ask unanimous consent that the nominees be confirmed, en bloc, that any statements appear in the RECORD as if read, that the motions to reconsider be laid upon the table, en bloc, that the President be immediately notified of the Senate's action, and that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

Without objection, the nominations are considered and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

DEPARTMENT OF THE TREASURY

David Campbell Mulford, of Illinois, to be an Under Secretary of the Treasury.

Robert R. Glauber, of Massachusetts, to be an Under Secretary of the Treasury.

DEPARTMENT OF TRANSPORTATION

David Philip Prosperi, of the District of Columbia, to be an Assistant Secretary of Transportation.

DEPARTMENT OF COMMERCE

Thomas Jones Collamore, of the District of Columbia, to be an Assistant Secretary of Commerce.

Michael Rucker Darby, of Texas, to be Under Secretary of Commerce for Economic Affairs.

DEPARTMENT OF AGRICULTURE

Richard Thomas Crowder, of Minnesota, to be a Member of the Board of Directors of the Commodity Credit Corporation.

Jack Callihan Parnell, of California, to be a Member of the Board of Directors of the Commodity Credit Corporation.

Franklin Eugene Bailey, of Virginia, to be an Assistant Secretary of Agriculture.

Charles E. Hess, of California, to be an Assistant Secretary of Agriculture.

Jo Ann D. Smith, of Florida, to be an Assistant Secretary of Agriculture.

U.S. COURT OF VETERANS APPEALS.

Frank Quill Nebeker, of Virginia, to be chief judge of the U.S. Court of Veterans Appeals for the term of 15 years.

NOMINATION OF HON. FRANK Q. NEBEKER TO BE CHIEF JUDGE OF THE U.S. COURT OF VETERANS' APPEALS

Mr. CRANSTON. Mr. President, as chairman of the Committee on Veterans' Affairs, I am pleased to rise in support of the President's nomination of Frank Q. Nebeker to be the first chief judge of the U.S. Court of Veterans' Appeals.

Our committee held a hearing on this nomination on Monday, May 15, and then met on Tuesday, May 16, and voted unanimously to report the nomination favorably to the full Senate.

BACKGROUND

Mr. President, the Senate consideration of this nomination is one of a number of very meaningful, truly historic events that are occurring this year as the result of the enactment last year of laws elevating the Veterans' Administration to Cabinet-level status (Public Law 100-527) and providing for judicial review of the denials of veterans' claims for benefits and establishing the new court of veterans' appeals (Public Law 100-687).

In March, the Senate confirmed the nominations of Edward J. Derwinski and Anthony J. Principi to serve as the first Secretary and Deputy Secretary, respectively, of Veterans' Affairs. On March 15 we celebrated the establishment of the Department of Veterans' Affairs. Those events were manifestations of the very high level of appreciation of the American people for the courage, service, and sacrifices of those who have served in the Armed Forces and of the great importance that the Nation attaches to the programs by which we seek to meet our obligations to our Nation's veterans.

This nomination symbolizes Congress' recognition of the fact that those whose service has preserved our government of laws not of men are entitled to a full measure of justice in their relations with their Government.

The sustained effort in the Senate to provide for judicial review of VA decisions denying claims for benefits covered a span of nearly 13 years. Members of our committee worked long and hard and played vital roles in developing legislation to ensure that veterans have access to the courts and to the assistance of counsel. Thus, this nomination is specially significant for our committee, and we are delighted to be able to support this nominee.

QUALIFICATIONS OF NOMINEE

Mr. President, many aspects of Judge Nebeker's background make him eminently qualified to be the first chief judge of the new veterans' court. Committee staff has thoroughly reviewed his questionnaire and financial statements, and we are assured that there are no financial conflicts.

Judge Nebeker's qualifications are very impressive: During more than a decade as an assistant U.S. attorney in Washington, DC, including 8 years as appellate division chief, he gained wide experience and expertise in the field of judicial review of administrative actions.

For the next 18 years, until 1987, he served as an associate judge of the District of Columbia Court of Appeals—the District of Columbia's highest court. Committee staff has undertaken a painstaking review of a substantial sampling of Judge Nebeker's opinions as an appellate judge—including the opinions cited in his questionnaire and opinions in areas analogous to veterans' claims for benefits. Those opinions disclose strong intellect, fairmindedness, and clear, concise expression.

Throughout his service on the appeals court, Judge Nebeker was active as a leader in the continuing education of Federal and State appellate judges. He has planned and taught seminars on appellate advocacy and opinion writing and helped found the appellate judges graduate program at the University of Virginia.

For the past 1½ years Judge Nebeker has served with distinction as the Director of the Office of Government Ethics.

What I have just described is an outstanding background for a chief judge of this new court of veterans' appeals, but there is one other valuable and practical facet of Judge Nebeker's experience. He was a very active member of the committee that planned the current D.C. Court of Appeals courthouse, and he has just completed moving the Office of Government Ethics into new offices. Those experiences have given him invaluable experience in construction and logistics and in relationships with the General Services Administration that can be well used in finding the new court an immediate, temporary home, and, eventually, permanent offices and courtrooms.

By coincidence, he has told us that he believes he can obtain the old Government Ethics Office space as the court's initial temporary home.

MEMBERSHIP IN PRIVATE CLUBS NOT ADMITTING WOMEN

Mr. President, there is one aspect of Judge Nebeker's background which has caused concern—his memberships in two local organizations, the Cosmos Club, which until May 1988 had a policy excluding women from membership, and the Lawyers Club, which has no such written policy, but, as matter of practice, has never admitted a woman to membership.

The American Bar Association's commentary to Canon 2 of its Code of Judicial Conduct states:

It is inappropriate for a judge to hold membership in any organization that practices invidious discrimination on the basis of race, sex, religion, or national origin.

In the case of another judicial nomination involving the question of membership in a discriminatory private club, that of Vaughn Walker to the U.S. District Court for the Northern District of California, I expressed, in an April 4 letter to the chairman of the Judiciary Committee, my opposition to that nomination. In Mr. Walker's case, I concluded that his actions and statements regarding his membership in the Olympic Club of San Francisco, which has a written membership policy excluding women, demonstrated an attitude and an insensitivity which is unacceptable for a member of the Federal judiciary.

I believe that the proper procedure is for the Senate to make careful, case-by-case, determinations in each case of membership in a discriminatory club and not to apply an overarching policy that fails to distinguish the line between a nominee who is really working for constructive change and one who merely says he is. In the Walker and Nebeker cases, I see very significant differences.

First, on the issue of working for change within the club, there is no evidence that prior to being nominated, Mr. Walker had done anything—other than vote—to open the Olympic Club to women. Judge Nebeker has a record, substantiated by committee staff investigation, of having worked extensively and successfully to bring about the admission of women to the Cosmos Club. In his own words, he went "far beyond a mere offer to support another's efforts." He indicates he is seeking to do the same thing in the Lawyers Club, and his record in such activities at the Cosmos Club lends credibility to his assertion.

Second, Mr. Walker defended the Olympic Club's discriminatory policy—although saying he opposed it—and mischaracterized the club's position on maintaining that policy. He described the club as moving toward change, when in fact it was deeply involved in hostile litigation and strenuously fighting coverage under a San Francisco antidiscrimination ordinance, and he asserted that the exclusion of women was different from the exclusion of blacks since women and other athletic facilities in San Francisco they could use. Judge Nebeker's attitude toward the problem is very different. He does not defend the exclusion, but simply stated, in his May 3 letter to me, that it is "an outmoded tradition reflective of a period of male dominated commercialism" and hence is susceptible to efforts to overcome the "inertia of the past." He also stated in that letter, "[I]f I saw no chance for change, I would have left the club * * *."

Third, the nature of the clubs is quite different. The Olympic Club until last year excluded both women and minorities, membership being limited in the bylaws to white males as late as 1968. The Lawyers Club, in contrast, has no formal policy of exclusion, and we have no evidence that any woman has ever been turned down because of her gender. Given the fact, according to Judge Nebeker, that two women are currently being nominated, it seems reasonable for him to await the outcome of the current efforts he and others are undertaking to admit women to membership. In this regard, I am pleased to note the optimistic view he expressed at his hearing that women might be admitted as soon as next week.

In sum, I believe that the Nebeker record of working for change is very different from the Walker record of defending his club's discriminatory practices and belatedly resigning upon his second nomination.

At the hearing on his nomination, Judge Nebeker agreed to let me know if and when the Lawyers Club admits any women as members and, if it has not done so by the end of this year, to report back to me then with respect to his intention at that time with respect to continuing his membership.

In view of all these considerations, although I do not share Judge Nebeker's narrow interpretation of the term "invidious discrimination," as expressed in his May 3 letter, his views and activities in this area pose no barrier to my support of his nomination.

Mr. President, I ask unanimous consent that copies of my April 20, 1989, letter to Judge Nebeker—with enclosures—and his May 3 response be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

PRELIMINARY PREPARATIONS FOR ESTABLISHING THE NEW COURT

Mr. CRANSTON. Mr. President, before closing, I would like to comment on the effort Judge Nebeker has been making in recent weeks to plan and make preliminary preparations for the myriad tasks that must be completed for the new court to hit the ground running on September 1. In an April 10, 1989, letter to him I recommended, in view of the short period available, that he feel free to proceed with such activities during the pendency of his nomination, and he has been diligently doing so. He has also undertaken a review of the enabling legislation and provided the staff of both Committees on Veterans' Affairs with several excellent recommendations for revisions. Some of his proposals require prompt action, and I have been pursuing them in the context of both the fiscal year 1989 supplemental appropriations bill and a measure and

House committee Chairman MONTGOMERY and I are developing together.

Mr. President, I ask unanimous consent that a copy of my April 10 letter to Judge Nebeker be printed in the RECORD after the other letters that I have asked to be printed at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

CONCLUSION

Mr. CRANSTON. Mr. President, I am happy to be able to recommend to the Senate the confirmation of the nomination of Judge Nebeker to serve as chief judge of the U.S. Court of Veterans' Appeals and urge that my colleagues vote unanimously in support of this excellent nomination.

EXHIBIT 1

COMMITTEE ON VETERANS' AFFAIRS,
Washington, DC, April 20, 1989.

Hon. FRANK Q. NEBEKER,
Arlington, VA.

DEAR FRANK: It was good to meet with you on April 14 and learn about your thoughts for the new Court of Veterans Appeals. I am writing in follow-up to our discussions in that meeting on the issue of membership in clubs and organizations that have exclusionary membership practices—including your membership in the Lawyers' Club, a club that has no women members or associate members.

As you will recall, we discusssed the American Bar Association's admonition, in the commentary on Canon 2 of its Code of Judicial Conduct, against judges' membership in organizations which practice "invidious discrimination". You related your interpretation of this canon as being directed against discrimination that entails "holding out the excluded as unworthy".

The relevant portion of Canon 2 states: "A judge should respect and comply with the law and should conduct himself at all times in a manner that promotes public confidence in the integrity and impartiality of the judiciary."

The relevant portion of the commentary on this point states:

"It is inappropriate for a judge to hold membership in any organization that practices invidious discrimination on the basis of race, sex, religion or national origin. Membership of a judge in an organization that practices invidious discrimination may give rise to perceptions by minorities, women and others, that the judge's impartiality is impaired. Whether an organization practices invidious discrimination is often a complex question to which judges should be sensitive. The answer cannot be determined from a mere examination of an organization's current membership rolls but rather depends on the history of the organization's selection of members and other relevant factors. Ultimately, each judge must determine in the judge's own conscience whether an organization of which the judge is a member practices invidious discrimination."

On this issue of what constitutes invidious discrimination, I note the comments made by then-Judge Anthony Kennedy in connection with his December 15–17, 1987, confirmation hearing before the Senate Judiciary Committee on his nomination to be an Associate Justice of the Supreme Court. When asked whether any of the clubs to which he had belonged practiced invidious discrimination within the meaning of the ABA Code, Judge Kennedy replied:

"As far as I am aware, none of these policies or practices were the result of ill-will. I recognize nonetheless that real harm can result from membership exclusion regardless of its purported justification. Therefore, I have supported efforts to broaden the membership of clubs to which I have belonged as a circuit judge and have resigned when those efforts have appeared to be unlikely to succeed."

Judge Kennedy further stated that "none of these clubs practiced invidious discrimination. That term is not a precise and crystal clear term." He added: "There is no question that the injury and the hurt and the personal hurt can be there, regardless of the motive."

When Judge Kennedy was asked why it took him so long to resign from the Olympic Club (which excludes women from membership), he responded:

"Discrimination comes from several sources. Sometimes it is active hostility. And sometimes it is just insensitivity and indifference. And over the years, I have tried to become more sensitive to the existence of subtile barriers to the advancement of women and of minorities in society. And this was an issue on which I was continuing to educate myself."

Given Judge Kennedy's interpretation of what constitutes invidious discrimination, and based on my own reading of the canon, I am concerned about the interpretation you presented at our April 14 meeting, and invite written amplification from you about the basis for your interpretation and its application to the Lawyers' Club.

With specific regard to your associate membership in the Lawyers' Club, U.S. Circuit Judge Kenneth Starr, who, as you know, has been nominated for the position of Solicitor General, responded to the Senate Judiciary Committee in his Committee questionnaire (pertinent pages are enclosed) that he was an associate member of the Club from December 30, 1987, but had tendered a resignation letter dated March 31, 1989. He stated in the questionnaire: "I have therefore withdrawn from the group, in view of concerns over the appearance of a prospective officer of the Department of Justice serving as a member of a gender-exclusive organization of professionals."

With regard to the possibility of the Lawyers' Club changing its practices of excluding members on the basis of sex, Judge Starr stated in his responses to the Judiciary Committee's questionnaire:

"Several months after joining the Lawyer's Club, I indicated to Chief Judge Howard Markey (U.S. Court of Appeals for the Federal Circuit), who is likewise an associate member, that I would support informal efforts then underway to encourage opening the group to women. I have recently been advised by Chief Judge Markey, that in his considered view, no change in policy is likely to occur in the forseeable future."

At our meeting, you expressed a different opinion regarding the possibility of a change in membership practices, and I would appreciate your sharing with the Committee the basis for your opinion in this regard. I also invite you to share with us a detailed description of your personal efforts (and copies of any letters or other documents you prepared) to encourage the Lawyers' Club to admit women as members and associate members, as well as the same type of information with respect to your efforts regarding the Cosmos Club.

I find myself in agreement with Judge Kennedy's admirable sensitivity on this issue, stressing the impact on and the perception of the excluded rather than the intent or motive of the excluders and referring to his growing sensitivity "to the existence of subtle barriers to the advancement of women and minorities in society." Similarly, Judge Starr seems to have understood well the unacceptable appearance of membership "in a gender-exclusive organization of professionals" on the part of a Department of Justice official. I very much hope that you will reconsider your view on this matter in light of the positions taken and sensitivities displayed by these two prominent jurists.

Finally, to acquaint you further with my position on these matters, I am enclosing a copy of my April 4, 1989, letter to Senator Joseph Biden, Chairman of the Senate Judiciary Committee, concerning the nomination of Vaughn Walker to the U.S. District Court for the Northern District of California.

I look forward to receiving your responses at your earliest convenience.

With warm regards,

Cordially,

ALAN CRANSTON,
Chairman.

I. BIOGRAPHICAL INFORMATION (PUBLIC)

1. Full name (including any former names used): Kenneth Winston Starr.

2. Address: List current place of residence and office address(es): 6455 Madison Court, McLean, Virginia 22101. United States Court of Appeals, United States Courthouse, 3rd & Constitution Ave., N.W., Washington, D.C. 20001.

3. Date and place of birth: July 21, 1946 Vernon, Texas.

4. Marital Status (including maiden name of wife, or husband's name). List spouse's occupation, employer's name and business address(es):

Married—Alice M. Starr; (Maiden name) Alice Jean Mendell; Advertising and Public Relations Consultant, WEST*GROUP, 1600 Anderson Road, McLean, Virginia 22102.

5. Education: List each college and law school you have attended, including dates of attendance, degrees received, and dates degrees were granted:

Duke University School of Law, 1970–1973, J.D. (1973).

Brown University, 1968–1969, A.M. (1969).

George Washington University, 1966–1968, A.B. (1968).

Harvard University, Summers, 1967–1968.

San Antonio College, Spring 1966, Summer 1964.

Harding College, 1964–January 1966.

III. GENERAL (PUBLIC)

1. An ethical consideration under Canon 2 of the American Bar Association's Code of Professional Responsibility calls for "every lawyer, regardless of professional prominence or professional workload, to find some time to participate in serving the disadvantaged." Describe what you have done to fulfill these responsibilities, listing specific instances and the amount of time devoted to each.

Since 1983, my service as a judge has prevented my engaging in the practice of law in any fashion. Consistent with my judicial responsibilities, however, I have worked actively in organizations or groups seeking to improve the administration of justice, including prison conditions in the United

States. For example, I served as a member of the Task Force on Prison Industries, an ad hoc organization formed by Chief Justice Burger to facilitate the development of meaningful training and vocational opportunities for prison inmates. In addition, I have served as a charter member of the Committee on Community Corrections, an ad hoc group of federal and state officials (and the broader legal community) seeking to foster, in an area of overcrowded prisons, public awareness of alternative means of punishment and incarceration. I have also served as chairman of the D.C. Circuit's Committee on the Bicentennial of the Constitution, which has sponsored educational programs related to the Constitution for the benefit of the general public (including students) as well as the bench and bar. Finally, I have been actively involved, including providing in-house legal services, with a non-profit corporation that provides housing for mentally retarded adults in Northern Virginia.

Throughout my work in private practice, I made myself available to handle pro bono matters. Shortly after joining the firm in Los Angeles (in 1974), I handled (successfully) a state criminal charge against an individual. The charge (grand theft auto) was dismissed prior to trial following negotiations with the Inglewood, California prosecutor. I also handled a landlord-tenant dispute for the same individual following completion of the criminal proceedings.

In Washington, D.C., I volunteered for the D.C. Bar's list of attorneys to handle pro bono matters. By referral from the bar, I was primarily involved in a sensitive, protracted domestic relations matter, including obtaining emergency injunctive relief by virtue of spousal abuse difficulties. Ultimately, the matter resulted in a divorce decree to my client's satisfaction.

2. Do you currently belong, or have you belonged, to any organization which discriminates on the basis of race, sex, or religion—through either formal membership requirements or the practical implementation of membership policies? If so, list, with dates of membership. What you have done to try to change these policies?

For a brief period (from Dec. 30, 1987 until resignation by letter dated March 31, 1989), I was an associate member, Lawyer's Club of Washington. The club is a social organization of lawyers and judges in Washington D.C. It has no place of business, license or the like. It meets periodically as a group for lunches, and has two dinners annually. Several months after joining the Lawyer's Club, I indicated to Chief Judge Howard Markey (U.S. Court of Appeals for the Federal Circuit), who is likewise an associate member, that I would support informal efforts then underway to encourage opening the group to women. I have recently been advised by Chief Judge Markey that, in his considered view, no change in policy is likely to occur in the foreseeable future. I have therefore withdrawn from the group, in view of concerns over the appearance of a prospective officer of the Department of Justice serving as a member of a gender-exclusive organization of professionals.

Member, United Methodist Men, Trinity Methodist Church, McLean, VA., from 1978–present. I have no plans to withdraw from participation in the United Methodist Men. Each congregation of the United Methodist Church has a women's (United Methodist Women) and men's (United Methodist Men) organization dedicated to spiritual and social purposes. I am aware of no sentiment whatever that these time-honored, religious-related organizations are in any way inappropriate or improper, nor am I aware of any effort (or even any suggestion) within the United Methodist Church to disband such organizations.

EXHIBIT 2

U.S. SENATE,
Washington, DC, April 4, 1989.

Hon. JOSEPH R. BIDEN, Jr.,
Chairman, Committee on the Judiciary, U.S. Senate, Washington, DC.

DEAR JOE: I am returning to you the four blue slips I received from the Judiciary Committee dated March 17, 1989, regarding the nominations of Ferdinand F. Fernandez and Pamela Ann Rymer to the U.S. Court of Appeals for the Ninth Circuit, Robert C. Bonner to the U.S. District Court for the Central District of California, and Vaughn Walker to the U.S. District Court for the Northern District of California. My recommendations are affirmative regarding the Fernandez, Rymer, and Bonner nominations and, for the reasons set forth below, negative regarding the Walker nomination.

With respect to the Bonner nomination, I want to express my objection to the procedure of requesting action on a blue slip for a nomination for which there is, as yet, no vacancy. In this case, the position for which Mr. Bonner has been nominated will not become vacant until Judge Rymer's nomination to the Ninth Circuit has been confirmed. In the interests of assisting the Judiciary Committee in moving ahead as expeditiously as possible with regard to the pending nominations, however, I am returning the Rymer and Bonner blue slips simultaneously. I wish to make clear that I continue to oppose this procedure, and my acquiescence in this instance should not be interpreted as approval of the procedure in the case of future nominations.

With respect to the Walker nomination, I have given careful consideration to whether Mr. Walker should be confirmed for a lifetime appointment to the federal bench. I have reached the conclusion that his actions with respect to his membership in a discretionary club are disqualifying. His persistent refusal to terminate his membership in this club and his testimony regarding this issue at the Judiciary Committee's hearing in the last Congress demonstrates an attitude and an insensitivity which is unacceptable for a member of the federal judiciary.

The commentary to Canon 2 of the American Bar Association Code of Judicial Conduct explicitly states that "it is inappropriate for a judge to hold membership in any organization that practices invidious discrimination on the basis of race, sex, religion, or national origin".

The Judiciary Committee is familiar with the discriminatory membership policies of the club at issue in the Walker nomination—the Olympic Club of San Francisco—since these policies were discussed at length during the Committee's consideration of the nomination of Anthony Kennedy in December of 1987.

Judge Kennedy's perception of the problem that arose from his membership in the Olympic Club and his resolution of the issue stand in stark contrast to Mr. Walker's. Judge Kennedy had resigned from the Olympic Club in November of 1987, following a vote by the club's members against a plan that would have admitted women. Judge Kennedy, in his testimony before the Judiciary Committee, demonstrated repeatedly his own growing awareness of and sensitivity to the problems arising from membership in a private club which discriminates against women and minorities and the need for judges to take action to terminate membership in such a club. In response to questions regarding "why did it take so long" for him to resign from the Olympic Club, Justice Kennedy responded:

"Discrimination comes from several sources. Sometimes it is active hostility. And sometimes it is just insensitivity and indifference. And over the years, I have tried to become more sensitive to the existence of subtle barriers to the advancement of women and of minorities in society. And this was an issue on which I was continuing to educate myself."

Substantial weight was also given to the fact that Judge Kennedy had previously resigned from a discriminatory club in his home community in 1980. He also testified very firmly and forthrightly that "constitutional and public morality make race or sex distinctions unacceptable for membership" in these private clubs.

The Judiciary Committee in its report on the Kennedy nomination expressed the hope that Judge Kennedy's conduct in resigning from the Olympic Club would set a "positive example for other judges and judicial nominees".

In contrast, for more than a year, Mr. Walker has refused to take such action and, in his testimony before the Committee, attempted to defend the club's discriminatory policies by seeking to cast them in a favorable, but factually incorrect, light.

For example, Mr. Walker testified to the Committee last June, "In the past, there had been no formal exclusion of blacks or, indeed, any other racial minorities". (Transcript, June 13, 1988, p. 38.) That statement is contradicted by an August 8, 1988, letter to the Judiciary Committee from George Riley, the Special Assistant to the San Francisco City Attorney. He stated:

"From its inception, the bylaws of the Olympic Club restricted membership to "only white male citizens of the United States of good moral character, integrity and reputation." This policy of racial segregation was challenged in 1967 when community groups and others brought pressure against the Club. Nevertheless, the Board of Directors unanimously elected to retain the whites only membership restriction. A year later, this ban against minorities was quietly dropped."

Mr. Walker also characterized the Olympic Club as having completed "substantial" change and having "promise of future change" with respect to admission of black individuals to membership. (Transcript, June 13, 1988, P. 41.) Mr. Riley, in his August 8 letter, however, indicated that the club had not admitted any blacks until the spring of 1988 when "in response to the pending lawsuit [by the City of San Francisco against the Olympic Club based upon violations of state civil rights laws], the club announced that it admitted two black men into its membership of more than 4,700 voting members."

The Committee has also received a copy of a press release of the Olympic Club, dated June 30, 1988, describing certain actions taken by the Board of Directors regarding procedures for monetary transactions expressly adopted for the purpose of avoiding coverage under the San Francisco City ordinances prohibiting discrimination by certain clubs. This release which concludes with the statement that the Olympic Club was taking these actions to "defend

the fundamental rights of its members against the strong arm of political oppression" is wholly inconsistent with Mr. Walker's characterization of an organization voluntarily moving towards compliance with basic civil rights principles.

With respect to the issue of discrimination against women, the record also indicates numerous statements by Mr. Walker attempting either to defend the club's policies or to diminish the significance of this issue.

For example, he stated in his testimony that the club had defeated "on a very close vote" a referendum to change the bylaws on admission of women to full membership. (Transcript, June 13, 1988, p. 38.) In fact, this referendum—which is the same vote which precipitated Judge Kennedy's resignation from the Olympic Club—was defeated by a vote of 1,540 to 2,082.

During this testimony, Mr. Walker stated that a woman's athletic club offering athletic facilities was within a block of the Olympic Club and indicated his view that the availability of an alternative facility for women made their exclusion from membership in the Olympic Club "distinguishable" from the exclusion of blacks. (Transcript, June 13, 1988, p. 42.)

Mr. Walker also repeatedly asserted during this testimony that the club was making progress toward eliminating discrimination against women. (Transcript, June 13, 1988, p. 46.) These statements appear to have little factual basis and were refuted in Mr. Rilery's letter to the Committee which recites, in detail, the steps the club had taken to defend its discriminatory practices in the litigation brought against the club by the City of San Francisco.

In sum, for well over a year, Mr. Walker has defended his continued membership in this discriminatory club and has failed to acknowledge the impropriety of maintaining membership in such a club and appointment to the federal bench. Although he has expressed his own opposition to the continued exclusion of women from the Olympic Club and urged a repeal of its exclusionary rule, his testimony and statements on the subject demonstrated a fundamental lack of understanding of the significance of this issue. Indeed, his testimony that the existence of a nearby women's athletic club made the issue of invidious discrimination based on sex different from that based upon race suggests a gross insensitivity—in marked contrast to Judge Kennedy's understanding—regarding the damage that exclusionary membership policies generate—even if other facilities are available to serve those denied admission.

This insensitivity is also expressed in the July 18, 1988, letter to the editor of an Olympic Club publication from Mr. Walker. In that letter, one argument he makes is that the policy has put nominees to the federal bench, like himself, "on the spot" and that other public servants are "next in line as targets of rules prohibiting or inhibiting membership in a single sex club". Although the same letter begins by urging the change on the basis of "fairness", his emphasis and approach to this issue is, again, fundamentally different from Judge Kennedy's.

The contrast between Judge Kennedy's statements regarding the Olympic Club's policies and those made by Mr. Walker is striking, and, in light of these statements, it is not at all surprising that Judge Kennedy resigned following the defeated referendum on membership for women while Mr. Walker chose to retain his membership.

Mr. Walker's basic perspective on this issue and his defense of the club's position cannot, in my view, be rectified by a belated resignation, calculated to win confirmation rather than prompted by recognition of the impropriety of maintaining such a membership.

There are additional controversies regarding Mr. Walker raised in connection with his demeanor and handling of the Gay Olympics litigation which are relevant in terms of the nominee's potential judicial temperament. These issues have not been satisfactorily factually resolved because, in part, of the assertion of attorney-client privileges. I am persuaded, however, that Mr. Walker's actions with respect to his membership in a discriminatory club are by themselves disqualifying.

For the Senate to approve this nomination would send a very inappropriate message to women and minority individuals in California and throughout the nation. I am unaware of any other instance where the Committee has knowingly approved a judicial nominee who has taken the position espoused by Mr. Walker with respect to the appropriateness of continued membership in a discriminatory club. I urge that the nomination of Vaughn Walker not be approved.

Cordially,

ALAN CRANSTON.

ARLINGTON, VA, *May 3, 1989.*

Hon. ALAN CRANSTON,
Chairman, Committee on Veterans Affairs, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: I have your letter and enclosures of April 20, 1989, wherein you ask that I share further with you my basis for believing that, despite Chief Judge Markey's view, membership in the Lawyers' Club of Washington will soon include women. You have also asked that I detail my personal participation in efforts to encourage that group and the Cosmos Club to admit women.

I do not share Judge Markey's opinion that admitting women into the Lawyers' Club is unlikely in the foreseeable future. I do not know the basis for his view or any factual predicate for it. The club has existed for 87 years. Its most senior member joined in 1939. If I believed as Judge Starr does that Chief Judge Markey is correct, I would have left the club. But I believe that this kind of change can be brought about best from within. And while, indeed, I acknowledge the validity of your point about perception and share it, my view is that more can be done in this instance to bring about change within the group than by shunning it or walking away. To be sure, a group which invidiously discriminates is vastly different. But as Justice Kennedy observed about the difficulty of defining these words, precision is illusive. Nonetheless, resort to the *Webster's Third New International Dictionary,* 1976—a date approximating the time the commentary to Canon 2 was under consideration—does reveal that the word invidious is about eight or nine on a language "Richter scale." It is a word connoting defamatory, hateful, obnoxious and odious. These words, particularly "odious," are far more severe than the one I used on April 14. "Odiousness" is defined as the state of being subjected to widespread or deep hatred or condemnation often marked by loathing or contempt. As with Justice Kennedy, I would not have joined a group with such practices. But that is a different case from that of a group which, absent those traits, has adhered to an outmoded tradition reflective of a period of male dominated commercialism. It is there that interstitial efforts can be fruitful in overcoming the inertia of the past.

The constitution and bylaws of the Lawyers' Club do not preclude the admission of women. (The occasional use of a masculine pronoun is not, to my knowledge, considered exclusive, but in the vein of its universal usage.) Therefore, no formal written proposals to change a governing document by democratic process have been in order. Thus, my efforts at fostering a change in the practice of all male membership have been to encourage the members to recognize that for our limited purposes women members would be welcomed. These efforts included importuning the past presidents over the years of my associate membership and seeking numerous suggestions from them and the secretary as to the best candidates to propose to break the barrier. I remind you that as an associate member, I do not have a vote. I know of no member who has expressed a negative view to the admission of women, although there is plenty of sentiment against being forced by law to do so. Nonetheless, I adhere to the view that since the group is exclusively for lawyers and judges, it ought to and will react favorably to nominations of women for membership. There are many others in the club working for such result and I have been advised that nominations of women for membership have been recently made and are in the process of being made. I, thus, remain convinced that Judge Markey's prediction is in error.

I observe that any change within the Lawyers' Club must result from a genuine desire not only for such change, but for the benefit of real social and professional companionship of women. To do less would smack of tokenism and be an insult to the women nominated. I will not be a party to such a disingenuous exercise. Accordingly, there is a need for delicate planning, which I believe, I can participate in as an associate member to bring about that change. I have spoken to a number of women as to their willingness and desire to join the group.

I would like also to address your expressed desire (page 3 of your letter) that I reconsider my view in light of those of Justice Kennedy, Judge Starr, and your reference to your views in your enclosed letter about the Walker nomination. As I said above, if I saw no chance for change, I would have left the club; but I see the change as very close at hand. I trust you do not mean to suggest that I resign simply because of your expressed concern, for I share your view that a belated resignation is subject to an interpretation of being motivated by desire for confirmation and would not be a positive example for other judges and judicial nominees which we both seek. Moreover, I respectfully submit that my open approach to these issues, as evidenced by my efforts to bring about change in the two groups under discussion (one successfully), distinguishes my case from your view of Mr. Walker and dispels any appearance of impropriety from membership as such. In light of your particular interest in ensuring that judicial and other nominees are committed to equal opportunity for women, I add to my response that during the past 18 years as a judge, I have never hesitated to select a woman as my law clerk which my record will reflect.

My efforts at the Cosmos Club date back three or four years. As a new member, I felt any earlier effort would be dismissed as that of an upstart. I have held no office on any standing committee of the club. However,

because of my expression of interest in this issue—particularly to many older active members—I was asked to serve and did serve on an ad hoc legal affairs committee to deal with this matter. Shortly thereafter, the club Board itself proposed a bylaw change making women eligible for membership. My participation thereafter was extensive, but as with the Lawyers' Club, I drafted no letters or documents. Like Justice Kennedy and Judge Starr, I kept my efforts informal, though I went far beyond a mere offer to support another's effort. It seems to me that a public detailing of my participation in the effort at the Cosmos Club could set a precedent which would operate to chill willingness of others to undertake similar efforts in other clubs. In addition, to do so would involve others who legitimately wish their privacy to be maintained. Accordingly, I prefer simply to describe my participation as quite extensive. I am at liberty, however, to invite you to contact Mr. Tedson Meyers, President of the Cosmos Club, who will verify the extent of my efforts. I believe a member of your staff at our April 14 meeting suggested he knew or had spoken or planned to speak with Mr. Meyers. He can also affirm that many women have been admitted to the club, two of whom I sponsored.

In conclusion, I observe that there seems to be at least two ways of bringing about a societal change reflective of the fact women and minorities are now a part of the mainstream of the nation. One is to bring legal and suasive pressure on exclusive groups. You and others have had success in such endeavors. I, on the other hand, have worked openly from within the two groups to which I belong, likewise with considerable success. Each of us, I submit, has demonstrated a common commitment to equality of reward for each citizen according to ability and without regard for notions of historic prejudices.

Sincerely,

FRANK Q. NEBEKER.

U.S. SENATE,
Washington, DC, April 10, 1989.

Hon. FRANK Q. NEBEKER,
2360 North Vermont Street, Arlington, VA.

DEAR JUDGE NEBEKER, I want to extend to you my congratulations on your nomination by President Bush to be the Chief Judge of the new United States Court of Veterans Appeals. Your nomination is a truly historic occasion.

Since the Court is an entirely new institution, there are a great many administrative and logistical tasks that need to be accomplished in order for it to begin operations, as provided in the Veterans Judicial Review Act, on September 1 of this year. As I believe you are aware, arrangements must be made as soon as possible to obtain space for a courtroom and offices for immediate as well as intermediate and long-term use. In addition, plans and a budget for necessary furnishings, equipment, supplies, and staffing must also be prepared without delay if the Court is to begin functioning efficiently.

Thus, I would like to assure you that it would not be considered presumptuous for you, during the pendency of your nomination in the Senate, to begin making whatever contacts and plans you consider necessary to ensure that appropriate arrangements are made with respect to matters such as a budget, funding, space, personnel, furnishings, supplies, and equipment for the Court. In this regard, I would note that the September 1 starting date is not readily susceptible to postponement in light of the fact that cases already exist in which the right to appeal to the Court is inherent and their numbers can be expected to grow rapidly in the coming weeks and months.

In connection with the Committee's consideration of your nomination, I request, as has already been discussed with you by Committee staff, that you provide the Committee with a signed statement from your physician as to your current health status. The statement should include descriptions of any current health problems (and any medications prescribed to treat them), and of any problems that have occurred within the past 5 years, that may have a bearing on your ability to carry out the duties of the Chief Judge for the 15-year term for which you have been nominated. This document should be submitted to the Committee in a sealed envelope marked "Attention: Edward P. Scott, General Counsel".

I appreciate your cooperation and look forward to meeting with you in the near future.

With best personal regards,

Sincerely,

ALAN CRANSTON,
Chairman.

LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will now resume legislative session.

PROVIDING FOR A CONDITIONAL RECESS OR ADJOURNMENT OF THE SENATE

Mr. MITCHELL. Mr. President, I send a concurrent resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the concurrent resolution.

The legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 38) providing for a conditional recess or adjournment of the Senate from May 18 or 19, 1989, until May 31, 1989, and a conditional adjournment of the House from May 25, 1989, until May 31, 1989.

The PRESIDING OFFICER. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the Senate proceeded to consider the concurrent resolution.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution was agreed to, as follows:

S. CON. RES. 38

Resolved by the Senate (the House of Representatives concurring), That when the Senate recesses or adjourns at the close of business on Thursday, May 18, 1989, or Friday, May 19, 1989, pursuant to a motion made by the majority leader, or his designee, in accordance with this resolution, it stand recessed or adjourned until 2:15 post meridiem on Wednesday, May 31, 1989, or until 12 o'clock meridian on the second day after Members are notified to reassemble pursuant to section 2 of this resolution, whichever occurs first; and that when the House adjourns on Thursday, May 25, 1989, it stand adjourned until 12 o'clock meridian on Wednesday, May 31, 1989, or until 12 o'clock meridian on the second day after Members are notified to reassemble pursuant to section 2 of this resolution, whichever occurs first.

SEC. 2. The majority leader of the Senate and the Speaker of the House, acting jointly after consultation with the minority leader of the Senate and the minority leader of the House, shall notify the Members of the Senate and the House, respectively, to reassemble whenever, in their opinion, the public interest shall warrant it.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDERS FOR TOMORROW

ORDER FOR RECESS UNTIL 1:30 P.M. TOMORROW

MORNING BUSINESS

Mr. MITCHELL. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 1:30 p.m. tomorrow, Thursday, May 18, and that following the time for the two leaders, there be a period for morning business not to extend beyond 2:30 p.m., with Senators permitted to speak therein for up to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO PROCEED TO CONSIDERATION OF THE CONFERENCE REPORT—HOUSE CONCURRENT RESOLUTION 106

Mr. MITCHELL. Mr. President, I ask unanimous consent that at 2:30 p.m., the Senate proceed to the consideration of the conference report on the budget resolution, House Concurrent Resolution 106.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL THURSDAY, MAY 18, 1989 AT 1:30 P.M.

Mr. MITCHELL. Mr. President, if the distinguished Republican leader has no further business, and if no other Senator is seeking recognition, I now ask unanimous consent that the Senate stand in recess, under the previous order, until 1:30 p.m. on Thursday, May 18, 1989.

There being no objection, the Senate, at 5:35 p.m., recessed until Thursday, May 18, 1989, at 1:30 p.m.

NOMINATIONS

Executive nominations received by the Senate May 17, 1989:

DEPARTMENT OF STATE

DELLA M. NEWMAN, OF WASHINGTON, TO BE AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIA-

RY OF THE UNITED STATES OF AMERICA TO NEW ZEALAND AND TO SERVE CONCURRENTLY AND WITHOUT ADDITIONAL COMPENSATION AS AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO WESTERN SAMOA.

ROBERT D. ORR, OF INDIANA, TO BE AMBASSADOR EXTRAORDINARY AND PLENIPOTENTIARY OF THE UNITED STATES OF AMERICA TO THE REPUBLIC OF SINGAPORE.

DEPARTMENT OF THE TREASURY

BRYCE L. HARLOW, OF VIRGINIA, TO BE A DEPUTY UNDER SECRETARY OF THE TREASURY, VICE JOHN K. MEAGHER, RESIGNED.

PUBLIC HEALTH SERVICE

THE FOLLOWING CANDIDATES FOR PERSONNEL ACTION IN THE REGULAR CORPS OF THE PUBLIC HEALTH SERVICE SUBJECT TO QUALIFICATIONS THEREFOR AS PROVIDED BY LAW AND REGULATIONS:

1. FOR APPOINTMENT:

To be medical director

BRUCE A. CHABNER
DANIEL D. COWELL
PHILIP GORDEN
IRWIN J. KOPIN

To be senior surgeon

SAMUEL BRODER
JOHN I. GALLIN

To be senior assistant pharmacist

GARY W. BLAIR

IN THE AIR FORCE

THE FOLLOWING OFFICERS FOR APPOINTMENT IN THE RESERVE OF THE AIR FORCE TO THE GRADE INDICATED, UNDER THE PROVISION OF SECTIONS 593, 8218, 8373, AND 8374, TITLE 10, UNITED STATES CODE:

To be major general

BRIG. GEN. CHARLES R. DRIGGERS, xxx-xx-xxxx, AIR NATIONAL GUARD OF THE UNITED STATES.

BRIG. GEN. JOE H. ENGLE, xxx-xx-xxxx, AIR NATIONAL GUARD OF THE UNITED STATES.

To be brigadier general

COL. TANDY K. BOZEMAN, xxx-xx-xxxx, AIR NATIONAL GUARD OF THE UNITED STATES.

COL. NELSON E. DURGIN, xxx-xx-xxxx, AIR NATIONAL GUARD OF THE UNITED STATES.

COL. ADOLPH P. HEARON, xxx-xx-xxxx, AIR NATIONAL GUARD OF THE UNITED STATES.

COL. FRED R. HELMS, xxx-xx-xxxx, AIR NATIONAL GUARD OF THE UNITED STATES.

COL. JOHNNY J. HOBBS, xxx-xx-xxxx, AIR NATIONAL GUARD OF THE UNITED STATES.

COL. THOMAS W. NAPOLITAN, xxx-xx-xxxx, AIR NATIONAL GUARD OF THE UNITED STATES.

COL. RICHARD E. PEZZULLO, xxx-xx-xxxx, AIR NATIONAL GUARD OF THE UNITED STATES.

COL. JAMES H. RENSCHEN, xxx-xx-xxxx, AIR NATIONAL GUARD OF THE UNITED STATES.

COL. DAVID J. RIST, xxx-xx-xxxx, AIR NATIONAL GUARD OF THE UNITED STATES.

COL. DAN A. ROBAR, xxx-xx-xxxx, AIR NATIONAL GUARD OF THE UNITED STATES.

COL. WILLIAM J. STOCKWELL, xxx-xx-xxxx, AIR NATIONAL GUARD OF THE UNITED STATES.

COL. TERRENCE P. WOODS, xxx-xx-xxxx, AIR NATIONAL GUARD OF THE UNITED STATES.

IN THE PUBLIC HEALTH SERVICE

THE FOLLOWING CANDIDATES FOR PERSONNEL ACTION IN THE REGULAR CORPS OF THE PUBLIC HEALTH SERVICE SUBJECT TO QUALIFICATIONS THEREFOR AS PROVIDED BY LAW AND REGULATIONS:

1. FOR PERMANENT PROMOTION:

To be medical director

THOMAS R. BENDER
JAMES E. BERNER
GEORGE S. BOWEN
GERALD A. FAICH
TIMOTHY G. FLEMING
HAROLD M. GINZBURG
MARY E. GUINAN
ALAN R. HINMAN
CHARLES L. HOSTETTER
MICHAEL P. HUDGINS
WILLIAM D. LASSEK
MISAEL A. MORENO
FITZHUGH S. M. MULLAN
ALLAN S. NOONAN
ROGER J. PORTER
KENNETH E. POWELL

To be senior surgeon

SUSAN S. CARLSON
EDWIN P. EWING, JR
FREDERICK L. FERRIS, III
JOHN C. FINLEY
DOROTHY M. GOHDES
WILLIAM C. KNOWLER
DALE N. LAWRENCE
RICHARD C. MOORE, JR
RICHARD J. OBRIEN, JR
RICHARD D. OLSON
DOROTHY D. SOGN
ANGELITA J. SUNGA
CARL J. TJERANDSEN
JAY S. WEISFELD

To be surgeon

JOYCE M. JOHNSON

To be dental director

C. MICHAEL BECK
JOHN L. DRAGER
ERNEST HARDAWAY
CLIFFORD C. SCHARKE
CONRAD A. SCHWALM
GENE R. STERRITT
JOHN R. SUNDELL

To be senior dental surgeon

PATRICK C. BLAKE
ANTHONY R. CAVALLI
JAN R. GOLDSMITH
JEFFREY T. HOFFELD
MELVIN L. LERNER
JAMES A. LIPTON
RONALD A. LORTS
REGINALD LOUIE
WILLIAM J. NIENDORFF
LARRY D. PRATER
JOHN P. ROSSETTI
DONALD A. SCHNEIDER
MICHAEL R. WALKER
TONIE M. WALLER

To be dental surgeon

JAMES E. ADAMO
JOHN F. ANTON
JOHN D. LEVY
THOMAS O. OAS
FORREST H. PEEBLES
GREGORY T. SMITH
JONATHAN C. SMITH

To be nurse director

EILEEN P. GUNTER
JOAN A. HARTWELL
BERNADINE B. KUCHINSKI
LILLIE A. SLEBODNICK

To be senior nurse officer

M. ELIZABETH DICKEY
JEAN E. HASTINGS
JANET M. JONES
BETTE LOUISE LEMPERLE
DANIEL J. WALZ

To be nurse officer

WILLIAM S. CAMPBELL
THERESA M. MCDONALD
DANIEL A. NAPOLIELLO
CARROLL G. ONEILL
ELEANOR B. SCHRON
MICHAEL D. SMITH
MARIA J. TAVORMINA

To be senior assistant nurse officer

DAVID L. GRIFFITH

To be engineer director

KEITH E. ENDERS
BRUCE T. FERRIS
DAVID L. LARSON
JOHN N. LEO
WAYNE R. MATHIS
W. A. MULLEN, III
MALCOLM B. REDDOCH
DARRYL D. TYLER

To be senior engineer officer

THOMAS M. BEDICK
HERBERT CAUDILL, JR
CLARENCE H. EMMETT, JR
C. LEWIS FOX, JR
MARIUS J. GEDGAUDAS
ROBERT W. HARDING
GARY C. HAWTHORN
TOBIAS A. HEGDAHL
RALPH L. HOGGE
ROGER C. JENSEN
BROCK M. NICHOLSON
CARL A. ROTH
MERLE M. WASSON
FREDRICK W. WELLER
DAVID L. WEST

To be engineer officer

GERALD V. BABIGIAN
ROBERT A. YOUNG
WILLIAM R. ZOBEL

To be scientist director

WILLIAM A. BETTS
BOBBY D. BRAYBOY
DAVID G. BROWN
JAMES M. EVERTS
RICHARD C. HENNEBERRY
JAMES R. KING
HARVEY RUDOLPH
HUGH S. SLOAN, JR

To be senior scientist

MICHAEL L. ADESS
DOUGLAS L. ARCHER
JEANNE R. BURG
DONALD L. CAMPBELL
DAVID L. CONOVER
LAURENCE J. DOEMENY
DONALD D. DOLLBERG
LIREKA P. JOSEPH
KENNETH KRELL
THOMAS B. SHOPE, JR
ROBERT SPIRTAS

To be scientist

ALICE L. GREIFE

To be sanitarian director

TROY W. COLE
W. ALLEN KINGSBURY
TRUMAN L. MCCASLAND

To be senior sanitarian

RICHARD A. LEMEN
ERVIN L. MOORE

To be sanitarian

THOMAS E. CROW
RICHARD W. HARTLE
PAUL D. PRYOR

To be veterinary director

RONALD W. MOCH

To be senior veterinary officer

MORRIS E. POTTER

To be pharmacist director

NORMAN C. DITTMAN
GAYLE R. DOLECEK
JIMMY R. MITCHELL
FRANCIS X. OSULLIVAN, JR
THEODORE B. PUKAS
JEROME C. SHORT

To be senior pharmacist

GEORGE D. ARMSTRONG, JR
GARY J. BUEHLER
GARY L. CHADWICK
FRANK A. DODGE
LOUIS D. FAIRFIELD
WYMAN M. FORD
RICHARD N. HERRIER
STEPHEN A. MAURER
FRANK J. NICE
DENNIS A. PHILIPP
JAMES E. RILEY, JR
EUGENE B. SMITH, JR
RICHARD M. TAFFET
LAWRENCE A. TRISSEL
RAY D. WESTERLAGE
ALAN M. YAMASHITA

To be pharmacist

THOMAS M. DOLAN
STEVEN J. DONELAN
MICHAEL W. DREIS
STEPHAN L. FOSTER
PAUL F. JAROSINSKI
GORDON R. JOHNSTON
RICK S. LARRABEE
HALRON J. MARTIN
ANASTASIA E. PEREZ
THOMAS H. PEREZ
MARK E. RAMEY
RICHARD A. STOWE

To be dietitian director

CAROLYN PRZEKURAT

To be senior dietitian

MICHAEL A. BERNSTEIN
ALBERTA C. BOURN
PETER M. STEGMAYER

To be therapist director

ROBERT K. BAUS

To be senior therapist

JAMES A. BIRKE
ROBERT E. MANSELL
B. THOMAS SCHEIB

To be therapist

ANDREW NOVICK
WAYNE S. SMITH

To be health services director

JOEL G. BOSTROM
RALPH E. BUNGE
NORMAN E. CHILDS
JOHN H. EILERT, JR
KENNETH R. ENVALL
JOHN E. HUBBARD
CARL G. LEUKEFELD
EDWIN A. MILLER
ALAN F. SCHMIERER
WILBUR F. VANPELT

To be senior health services officer

MICHAEL B. BECKERMAN
BARRY BRAGIN
JOSEPH E. BRANTLEY, JR
JOHN J. COHN
LARRY D. EDMONDS
ARTHUR J. FOREST
ELLERY F. GRAY
JOHN H. HAIRE
MICHAEL J. KENNEDY
JOHN M. KUTCH, JR
SOLOMON LEVY
GARY O. MAUPIN
ROLAND M. MCPHEARSON, JR
DANIEL L. MINTZ
JUDITH L. MUNSTERMAN
LARY S. SCHNEIDERMAN
KENNETH F. SCHULZ
ROBERT A. ZOON

To be health services officer

JESSE L. GLIDEWELL
MICHAEL R. HANNA
WILLIAM G. JONES
MARION A. JORDAN
ERNEST H. KIMBALL, IV
KLAUS D. KRACHT
BRUCE E. LEONARD
SUSAN J. LOCKHART
KEITH C. LONGIE
BARBARA G. LUBRAN
KATHLEEN F. MARTIN
JAMES D. MCGLOTHLIN
LATHAM R. MORRIS
VON NAKAYAMA
LINDA M. POTTERN
CHARLES A. SCHABLE
DAVID G. SHOMBERT
STEPHEN A. SOUZA
FRANCIS P. WAGNER, JR

To be senior assistant health services officer

GEORGE E. FOLEY, III

IN THE ARMY

THE FOLLOWING-NAMED OFFICERS FOR PROMOTION IN THE RESERVE OF THE ARMY OF THE UNITED STATES, UNDER THE PROVISIONS OF TITLE 10, U.S.C., SECTION 3383:

ARMY PROMOTION LIST

To be colonel

RONALD W. BYERS, xxx-xx-xxxx
WILLIAM W. GRAHAM, xxx-xx-xx...
JAMES L. KENNEDY, xxx-xx-xxxx
FRANK J. KIEFER, JR, xxx-xx-xxxx

CONFIRMATIONS

Executive nominations confirmed by the Senate May 17, 1989:

DEPARTMENT OF THE TREASURY

DAVID CAMPBELL MULFORD, OF ILLINOIS, TO BE AN UNDER SECRETARY OF THE TREASURY.

ROBERT R. BLAUBER, OF MASSACHUSETTS, TO BE AN UNDER SECRETARY OF THE TREASURY.

DEPARTMENT OF TRANSPORTATION

PHILLIP D. BRADY, OF VIRGINIA, TO BE GENERAL COUNSEL OF THE DEPARTMENT OF TRANSPORTATION

DAVID PHILIP PROSPERI, OF THE DISTRICT OF COLUMBIA, TO BE AN ASSISTANT SECRETARY OF TRANSPORTATION.

DEPARTMENT OF COMMERCE

THOMAS JONES COLLAMORE, OF THE DISTRICT OF COLUMBIA, TO BE AN ASSISTANT SECRETARY OF COMMERCE.

MICHAEL RUCKER DARBY, OF TEXAS, TO BE UNDER SECRETARY OF COMMERCE FOR ECONOMIC AFFAIRS.

DEPARTMENT OF AGRICULTURE

RICHARD THOMAS CROWDER, OF MINNESOTA, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE COMMODITY CREDIT CORPORATION.

JACK CALLIHAN PARNELL, OF CALIFORNIA, TO BE A MEMBER OF THE BOARD OF DIRECTORS OF THE COMMODITY CREDIT CORPORATION.

FRANKLIN EUGENE BAILEY, OF VIRGINIA, TO BE AN ASSISTANT SECRETARY OF AGRICULTURE.

CHARLES E. HESS, OF CALIFORNIA, TO BE AN ASSISTANT SECRETARY OF AGRICULTURE.

JO ANN D. SMITH, OF FLORIDA, TO BE AN ASSISTANT SECRETARY OF AGRICULTURE.

THE ABOVE NOMINATIONS WERE APPROVED SUBJECT TO THE NOMINEES' COMMITMENT TO RESPOND TO REQUESTS TO APPEAR AND TESTIFY BEFORE THE DULY CONSTITUTED COMMITTEE OF THE SENATE.

U.S. COURT OF VETERANS APPEALS

FRANK QUILL NEBEKER, OF VIRGINIA, TO BE CHIEF JUDGE OF THE UNITED STATES COURT OF VETERANS APPEALS FOR THE TERM OF 15 YEARS..

EXTENSIONS OF REMARKS

ENTERPRISE ZONES IN NO MAN'S LAND

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. GARCIA. Mr. Speaker, I would like to enter into the RECORD the following article taken from the May issue of Insight magazine entitled, "Enterprise Zones in No Man's Land."

Originally introduced in 1980 by myself and former Congressman Jack Kemp, the Housing and Urban Development Secretary, enterprise zones provide various incentives to eligible businesses to locate in impoverished rural and inner-city communities.

As we in Congress consider further enterprise zone legislation to strengthen the existing Federal program, this article should be insightful reading.

[From Insight, May 1, 1989]

ENTERPRISE ZONES IN NO MAN'S LAND

(By Karen Diegmueller)

Call Jack Kemp fickle. Just when the secretary of housing and urban development was poised to select 100 neighborhoods as enterprise zones, he turned a cold shoulder toward the antipoverty tool he had so passionately embraced. Kemp's nearly decade-long pursuit of enterprise zones will wait until—as he made clear to a House subcommittee—cities and states are offered a meaningful federal commitment.

The concept of enterprise zones first surfaced in Congress in 1980. Not until 1987, however, did both the House and Senate pass legislation. Title 7 of the Housing and Community Development Act authorized HUD to designate 100 distressed communities nationwide. Unlike previous bills that called for federal tax incentives, the adopted measure restricted the benefit of the zone designation to special consideration for HUD grants and regulation waivers. Despite the limitations, some 279 communities applied for federal enterprise zone status by the Jan. 17 deadline. In March, Kemp halted the process.

Enterprise zones are economically troubled areas that supporters believe will benefit from such preferential government treatment as tax credits. In theory, by being offered enough tax assistance and being freed from undue regulations, entrepreneurs will risk opening businesses in these areas. Those firms will produce jobs, specifically for welfare recipients and the unemployed, and the entire area will profit.

Supporters of enterprise zones have been amenable to Kemp's stance. Gary Kesner, commissioner of business development for New York City, says labeling alone without tax incentives may in the long run harm the concept. "It raises expectations in certain areas, [and] if they don't come to fruition, it casts a pall on the program in the future." Furthermore, "it might have taken the wind out of the momentum for new legislation," says the conservative Heritage Foundation's Stuart Butler, the man credited with introducing enterprise zones to the United States.

So far, results from state programs have not proved the theory. Case studies of 10 enterprise zones conducted by HUD in 1986 found that millions of dollars had been invested and thousands of jobs had been created or retained. Nevertheless, the department concluded that it could not determine whether the zone designation was responsible for the economic gains.

Particularly disheartening for proponents were the findings from three enterprise zones in small Maryland communities by the General Accounting Office, the investigative arm of Congress. The agency selected the Maryland program because of its similarity to congressional proposals and because it was one of the longer running of the 37 state plans. As with the HUD study, GAO found that employment in the three zones increased, ranging from 8 percent to 76 percent, but the agency concluded that the program had no effect on the growth. During interviews with GAO researchers, employers frequently said they would have located in the zone regardless of the program.

Despite inconclusive proof that enterprise zones are cost-effective, there are indications that they can create an environment conducive to business. More than 1,000 businesses and 8,000 jobs have been established in Kentucky's 10 zones since 1982. There also have been immeasurable benefits, says Sara L. Bell, the states enterprise zone coordinator. Residents in Louisville's zone were asked what they really needed. They overwhelmingly favored a supermarket—not the expensive corner market common to many inner cities. "It took two or three years, but we have two new supermarkets," she says.

In 62 of Illinois's 68 zones from July 1983 through last June, $2.9 billion had been invested, 38,392 jobs had been created, and 83,605 jobs had been retained. Jeffrey Johnson, the enterprise zone program manager, says the state makes no claim of a direct correlation between the designation and the results. "Just the designation of an enterprise zone shows both business and labor the state is concerned about their welfare."

Michael Allan Wolf, who has been monitoring enterprise zones since 1982, says he is skeptical of the GAO report because industry typically cites zone designation as an inducement. Firms may have been considering locating in the area for a variety of reasons and then "the incentives offered were the icing on the cake. Businesses appreciate that pro-business atmosphere," says Wolf, an associate professor of law and director of the EZ Project at the University of Richmond.

Advocates of enterprise zones do not dispute the lackluster assessment of the state enterprise programs. They, in fact, use it to promote their argument that federal tax incentives are needed to encourage business investment in some of the nation's most poverty-stricken areas. "We produced the body of an automobile. Now with the tax incentives and the push we're making, we're going to put the engine in the car," says Rep. Robert Garcia, the New York Democrat who pioneered the concept in Congress along with Kemp.

Opposition to federal enterprise zones has quieted since the program's contentious origins. "If this were truly a supply-side, Republican, inner-city program, it would not have generated the interest that it has or the support it has," says Wolf.

Some of labor's major concerns—abolishing the minimum wage and and easing safety regulations—have been greatly assuaged by the assurances of Garcia and Kemp that no such thing will happen. Resistance now focuses on the loss of revenue to the Treasury and the potential for the zones to turn into tax havens. Executive branch estimates have put the loss at more than $1 billion for the first three years for 75 zones. (President Bush's budget calls for 70 zones.)

At Kemp's confirmation hearing earlier this year, Sen. Nancy Landon Kassebaum, a Kansas Republican, cautioned against allowing the zones to be converted into a new Urban Development Action Grant. That HUD program, which has been halted, came under attack for underwriting developments in questionable projects.

"The fear that this will grow out of control is a legitimate one," says Butler. At the worst, he says, enterprise zones would produce heavy tax losses and few jobs. For this to happen, though, businesses would have to have moved into the distressed areas. "You only lose money if businesses will be set up," he says, adding that in his estimation this is an unlikely outcome.

Safeguards have been put in place in some states to prevent tax giveaways. New York excludes from eligibility existing businesses that would relocate to an enterprise zone, although the state makes an exception for New York City. In Kentucky, 25 percent of the employees hired by new businesses must be residents of the zone, unemployed for at least a year or welfare recipients. Existing businesses are given a bit more slack. They can expand their capital investment by 20 percent or their entire work force by 20 percent. "For an existing business, it was almost impossible to hire 25 percent new employees," explains Bell.

Believing drawbacks can be overcome by the careful use of such requirements, supporters are optimistic that Congress will finally pass enterprise zone legislation that will make designation worthwhile. The wrinkle is what shape it will take. Garcia and fellow New York Democrat Charles B. Rangel are sponsors of a bill that offers tax incentives along the lines of the original legislation sponsored by Garcia and Kemp in 1980. Among its provisions are wage tax credits to employers and targeted employees, investment tax deductions and a capital gains tax exemption in some situations.

If the legislation is going to be meaningful, Kesner says, it will have to go beyond tax incentives. It needs a job training element and a great deal of flexibility. In New York City, for instance, some of the areas best-suited for designation are ineligible because they are outside yet near the poverty pockets, he says.

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

Garcia also wants to expand the intent of the original legislation to place more emphasis on neighborhood revitalization. He proposes including affordable housing and law enforcement assistance as components. "What we're trying to create is a community," he says.

That approach has been a secondary concern at the state level, where enterprise zones have been positioned as economic development tools. Kentucky was one of the few states that attempted to make neighborhood revitalization an integral part of the program. An overriding consideration of the task force formed to study enterprise zones was to avoid doing anything that would damage neighborhoods. The state devised a system whereby a neighborhood group could incorporate and then be granted seed money in the form of property in order to attain a goal. (Though it was not incorporated through the state, a group in Lexington turned a parking lot into a day-care center.) Bell says it has not worked well as yet because of the difficulty in pinpointing individuals to take responsibility for the groups, but the state intends to continue the effort.

When HUD conducted its case studies, it found that enterprise zones were unlikely to be in the worst areas of the state. Incentives, state and local officials believed, were insufficient to offset the risks. Butler says such a philosophy runs counter to the way he envisions the concept. "The worst areas should be the top priorities." By no means, however, does he want enterprise zones to become an entitlement program.

One way to avoid that is to inject competition into the process. "We think the federal government should look at factors other than economic distress," says Johnson. So, too, apparently, does Jack Kemp. In testimony before the House Banking, Finance and Urban Affairs Subcommittee on Economic Stabilization, Kemp said he favors a competitive process. "Those states and localities which offered the strongest package of incentives and initiatives would receive preferential selection for zone eligibility." That could mean throwing out the current HUD formula of selecting the 100 zones (one-third for rural areas) solely on the basis of distress as defined by poverty and unemployment levels. Such an action could also mean offending the communities that had sought federal designation before there were the richer federal rewards to be had.

JACK YOHE MAKES A-B-E AIRPORT THE LEHIGH VALLEY'S FRONT PORCH

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. RITTER. Mr. Speaker, public relations and marketing are an important part of an airport director's daily responsibilities. Today, more than ever, the proper marketing and public relations approach can mean the difference between a prospering airport supported by the community and one that is facing strong public opposition and declining air service.

With this in mind, I recommend that my colleagues, depending on the needs in their districts, contact the Federal Aviation Administration [FAA] to obtain their management-training film for small- to mid-sized airports. I point with pride to the fact that the subject of the FAA film is the Allentown-Bethlehem-Easton International Airport and it's Director Jack Yohe.

Mr. Speaker, at this point I include an article from the April issue of the Lehigh Valley Business Digest which reports on Jack Yohe's outstanding record:

ABE AIRPORT: THE LEHIGH VALLEY'S FRONT PORCH

Last year, the Federal Aviation Administration was looking for a dynamic, well-run small to mid-sized airport at which to shoot a management-training film. There were literally hundreds of airports from which to pick. The FAA's choice: Allentown-Bethlehem-Easton International Airport, one of the fastest-growing small "hub" airports.

ABE's selection was an acknowledgement of the airport's growth and sound management under Jack Yohe, who became airport director in 1984.

Since Yohe, former consumer affairs advocate for the Civil Aeronautics Board (CAB), took over the reins, air traffic in and out of ABE has increased 85.4 percent including a 12.1 percent increase in 1988 alone. And the airport's most recent statistics reveal no signs of a slow-down. January 1989 traffic increased 13 percent over the same month last year.

But things were not always so rosy for the sprawling complex in Hanover Township, Lehigh County.

GROWING BY LEAPS

The airport experienced four consecutive years of declining traffic in the early 1980's, caused at least in part by the federal airline deregulation of 1978. Traffic increased slightly, the year before Yohe arrived, and has grown by leaps and bounds ever since.

Yohe attributes the growth to two factors: aggressive marketing and the simultaneous growth of the Lehigh Valley's economy.

"We have marketed the airport rather vigorously, not just in the Lehigh Valley, but throughout the country. I sold it as hard as I know how," Yohe says.

"We went to the airlines and argued that the airport was less than 100 miles from three congested major air markets (Newark, New York City and Philadelphia). We argued that the community would support air service and we could get competitive fares and reasonable schedules," Yohe says.

Armed with that sales pitch and a bevy of contacts accumulated from his CAB days, the airport director quickly extended ABE's services. The area's expanding, diversifying economy helped too.

FRONT PORCH OF THE VALLEY

"The airport and the economy have worked hand-in-glove," Yohe says. "The Valley is unique in its work ethic, its educational facilities and even its climate. The area has a lot going for it. And it might sound corny, but I like to consider ABE the front porch of the Valley."

In 1982, ABE served slightly over 400,000 passengers. Last year, just under 800,000 passengers were served by four major carriers (USAir, United, Eastern and Northwest Orient), eight commuter carriers and several corporate air fleets.

Though the airport is booming, Yohe knows there are still several problems to solve if ABE is to continue its growth. The major trouble spot: access to the airport.

AUTO CONGESTION

"The biggest problem we have to address is the failure of state and local government to come to grips with the surface transportation needs around the airport," he says.

Airport Road, the main highway feeding ABE, is often congested, particularly when businesses in the adjacent Lehigh Valley Industrial Parks change shifts. The airport's board of directors has named a task force to study the problems. For Yohe, any traffic changes would be for the better and can't come soon enough.

"Strangely enough, the strength of the airport is easy access, on a larger scale," Yohe says. "We're not in a big city. There's no Schuylkill Expressway. The passengers have peace of mind and little inconvenience. They can check in and out of the airport quickly.

"But the biggest problem is the roads out front. We could have the best schedules and fares, but if you can't get into the airport, it doesn't matter."

Another problem: lack of parking spaces at the airport.

"We don't need a study to show the need for more parking," Yohe said. ABE added about 500 spaces last year, but he feels current traffic levels are "pushing the limit" on existing parking lots. He thinks a multi-level parking deck will be the eventual solution.

The problems with local roads and parking are particularly vexing to Yohe because the airport's other existing infrastructure—terminals, gates, runways—can accommodate anticipated growth.

A MILLION PASSENGERS

"In three to four years, we will see at least 1,000,000 passengers in and out of the airport annually. We could accommodate more passengers. There is room for growth," Yohe says.

The airport is actively negotiating with two major carriers—American and Delta—to begin service to ABE in the "not-too-distant" future, Yohe says. The airport is also talking with major construction companies about building a 150-room hotel adjacent or attached to ABE.

Any changes or future growth would be carefully planned so as not to adversely effect the quickly-growing residential and commercial development around the airport, Yohe says.

"You've got to be a good neighbor. You can't create havoc with noise or the environment. We'll always be cautious moving forward," the director says.

"I want to see an airport that is providing adequate, safe air travel to a growing community and serves as a catalyst for the overall economic development of the area. We don't want to grow to be a burden."

A WOMAN'S RIGHT TO CHOOSE

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. MILLER of California. Mr. Speaker, in the next few months, the Supreme Court will hand down its decision in Webster versus Reproductive Health Services. Some have asked the Court to use this opportunity to revoke a woman's right to choose whether or not to terminate a pregnancy.

I would like to submit the following letters from residents of California who are concerned about maintaining a woman's right to make this difficult and most personal decision of whether or not to bear a child.

James G. Friedl of Concord, CA lost his mother to an illegal abortion. Friedl insists that "making abortion illegal will not stop abortion! It will make it difficult at best and life threatening at worst."

Marcia Toddhunter DeRosa of Pacifica, CA writes:

When I was 19 I became pregnant. I was not irresponsible; I had an I.U.D. At the time I was an honors student in college and working my way through school at a 32-hour-a-week job. Had I not had the abortion, had I decided to keep the baby, I would have had to quit school. I would probably still be working as a sales clerk somewhere, seeking out a living just below the poverty line. Instead, I had the opportunity to go to law school and become a successful, contributing tax-payer. I am able to ensure that my children will be able to grow into successful adults rather than part of the seemingly unending cycle of poverty.

Cynthia C. Ramseyer of Half Moon Bay, CA writes:

At the time I became pregnant, despite careful contraception, I was unmarried and did not have an adequate income to afford either adequate medical care for myself and the baby or insurance.

Had I kept the baby, I would have had to continue working to support it and myself. The total lack of adequate, affordable, child care for working mothers in my area supported my decision to abort.

Legal procedures for putting a child up for adoption were untenable. I would not subject a baby to a series of foster homes while the State tried to decide what to do with it. And I had absolutely no confidence of my baby being placed in a home where it would not be abused, molested, neglected or harmed.

As the stories of James Friedl, Marcia Toddhunter DeRosa, and Cynthia Ramseyer reveal, both carrying a child to term and undergoing an illegal abortion can have severe consequences for both the woman and her children. Better health care, adequate, affordable child care, and a living wage for women would ameliorate much of the need for abortion. Nevertheless, it is the woman who must make this difficult choice in light of her particular circumstances.

WHY OUR SOCIETY IS RAPE-PRONE

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. RICHARDSON. Mr. Speaker, I would like to bring to the attention of my colleagues the following article written by a fellow New Mexican, Jane C. Hood. It is a thoughtful and enlightening commentary on the recent "wilding" attack and rape of a woman jogger in Central Park.

WHY OUR SOCIETY IS RAPE-PRONE

(By Jane C. Hood)

ALBUQUERQUE, NM.—Why did eight teenagers beat and rape a jogger in Central Park? Mostly missing from the analyses of "wilding," and lost among the suggestions for preventing similar tragedies is one crucial issue: gender.

In a society that equates masculinity with dominance and sex with violence, gang rape becomes one way for adolescents to prove their masculinity both to themselves and to each other.

With the exception of prison assaults, gang rape is a crime committed almost exclusively by males against females. Yet, few commentators have focused on gender and what it means to be raised male in America. Like the proverbial fish who cannot describe water, Americans see everything but gender at work in the April 19 assault.

Given more than 30 years of research on rape, our myopia is hard to explain. In a classic 1971 study of 646 Philadelphia rapes—almost half of which were pair or group rapes—Menachem Amir, a criminologist, described the prototype for the Central Park assault.

* * * * *

The April 19 incident also shares some characteristics of "gang bangs" in fraternity houses and random violence against women on college campuses.

To understand this form of male bonding, we must understand the difference between rape-prone societies and those that are rape-free. In a study of 150 subsistance societies, Peggy Sanday, an anthropologist, found high incidences of rape to be associated with militarism, interpersonal violence in general, an ideology of male toughness and distant father-child relationships.

Rape-free societies, on the other hand, encourage female participation in the economy and political system and male involvement in child-rearing.

Despite recent moves toward gender equality, our society is still very much rape-prone. Surveys of U.S. and Canadian college students, for example, find that one of three men say that if they could get away with it, they would be at least "somewhat likely" to rape a woman.

Similarly, several recent surveys of high school students found 40 to 50 percent of both boys and girls agreed with statements such as "If a girl goes to a guy's apartment after a date, it's O.K. for him to force her to have sex." Even jurors in rape trials have found it hard to believe that an attractive man would rape a woman if he could just as easily have seduced her. As many of these studies point out, in rape-prone societies rape is confused with sex.

Thus, an effective national campaign to prevent assaults on women by bands of young men should target not "criminals" but rather advertisements portraying women as sex objects, sexual harassment and gender inequality in the workplace, resistance to paternity-leave policies and Rambo dolls and other violent games and toys.

Prevention campaigns might also include attempts to bring more fathers into day care and kindergarten classrooms to show that "real men" are nurturing people.

Community groups could support sex education programs that teach that rape is not sex but violence and that good sex takes place in the context of love and respect.

We should encourage co-ed sports at the elementary and middle school levels so that boys can learn that girls are not "the other" to be made fun of and put down.

In an otherwise excellent column in the New York Times, Tom Wicker described the Central Park rape as "a chance event that could have happened to anyone." In a way it was. On the other hand, when was the last time you heard about a gang of teenage girls raping and beating a man in Central Park? To get to the roots of this particular brand of violence, we need to long beyond race and class to look at gender relations in the United States.

INVITING SOVIET INPUT TO OUR DEFENSE BUDGET IS SHEER FOLLY

HON. GERALD B.H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. SOLOMON. Mr. Speaker, now I have seen everything. The Armed Services Committee of this House is seeking advice from the Soviets, including the KGB, on how the United States might cut its military forces.

Mr. Speaker, in the 11 years I've served in this body I have never witnessed an idea which, if realized, would justify such contempt from the world. This is almost a caricature of self-contempt, this impulse to invite our traditional enemy into our own defense deliberations. Since when do chickens invite the fox to design the coop's defenses. Such analogies abound, but they certainly are not funny. They are downright dangerous. It would be behoove everyone to keep a clear head, and not become drunk on glasnost.

Henry Mohr in the May 15 Washington Times has expressed the madness of this idea as well as anyone. I enter his column in today's RECORD.

A FOX IN THE HILL'S HEN HOUSE

(By Henry Mohr)

Washington is admittedly a unique place. A place where almost anything can happen—and usually does. But the goings-on in the House Armed Services Committee these days are some of the strangest ever witnessed. Not only has the fox entered the hen house on the Hill; it came in by invitation!

Incredibly, the House Armed Services Committee is seeking advice from the Soviets, including a KGB (secret police) front organization, on how to cut U.S. military forces. Unbelievable!

Democratic Rep. Les Aspin of Wisconsin, chairman of the Armed Services Committee, announced a few days ago that classified information provided Congress by the Defense Intelligence Agency will be supplemented with "direct Soviet inputs . . ." (Read: Soviet propaganda.)

HASC meetings with the Soviets and their advocates are already under way. A group of retired Soviet admirals and general met with committee members May 5. A series of meetings began the next week with a group headed by Andrey Kokoshin, deputy director of the Soviet Institute of the USA and Canada, and Roald Sagdeyev, former direc-

tor of the Soviet Space Research Institute and arms control adviser to the Kremlin.

That in itself is amazing. The Institute of the USA and Canada is identified as a KGB front organization in John Barron's best-selling book, "KGB Today—The Hidden Hand." Mr. Barron describes the institute as affording "disguised Soviet operatives entry into much higher levels of American society than does the WPC (World Peace Council)." Fully a third of the institute's staff members are said to be KGB officers.

If there's anything the United States doesn't need, it's for the House Armed Services Committee to allow itself to become a forum for glasnost-style KGB propaganda that could undermine support for U.S. defense programs. Soviet President Mikhail Gorbachev must be laughing his head off.

Who would believe that such people, including Marshal Sergei Akhromeyev, former chief of the Soviet general staff (now a personal adviser to Mr. Gorbachev), would be allowed to critique U.S. defense programs recommended to Congress by the president of the United States? This is a slap in the face for the president, to say the least.

Put yourself in the shoes of someone in a business which is competing with the store across the street. Only one of the two will survive; winner take all.

Would you ask your competitor how to run your business, what merchandise to carry, how to price and advertise it? And would you believe what he tells you?

Of course not. Only a fool would. The dumbest thing you could do (unless you had suicidal tendencies) would be to follow the advice of those who want to destroy you. Bear in mind that Mr. Gorbachev has never changed the objective set by his predecessors: eventual Soviet world domination and that includes the United States. One can only guess what Mr. Aspin hopes to accomplish.

Some (including Mr. Aspin, based on his own statements) have been taken in by glasnost and perceive, erroneously, that the Soviet threat is decreasing. CIA Intelligence officer Peter V. Ploy warned as recently as April 28 that the reverse is true.

Speaking to about 100 experts on national strategy, meeting at the Center for Defense and Strategic Studies in Springfield, Mo., in which this writer participated, Mr. Ploy said the CIA believes the Soviet Union will become an even greater threat in the 1990s than it is today.

Most participants agreed that the Soviet Union will emerge from its current reorganization (i.e., "reducing" tanks, artillery pieces and divisions) more powerful and a greater military threat to European and American security than ever before. The Soviets are actually increasing their nuclear weapons arsenal. Obviously, this is no time to let down our guard by cutting defense.

So far, the Bush administration and Secretary of Defense Dick Cheney have been holding their reactions in check, although it must be difficult. Hopefully, the House of Representatives will have the good sense to put a stop to this ridiculous exercise of allowing Congress to be used as a forum for Soviet propaganda.

The fox has no place in the chicken coop, especially when its purpose can only be to have a good meal at our expense.

THE SUGAR MESS

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. PORTER. Mr. Speaker, today I will introduce legislation to strike the sugar title from the 1985 Food Security Act. As my colleagues may remember, last Congress I introduced H.R. 2017, a bill to reduce the sugar loan rate from 18 cents to 12 cents per pound, while at the same time providing financial assistance to our Nation's domestic cane and beet growers to decrease amounts over a 4-year period. Supporters of the current Sugar Program declared my bill "dead on arrival." They said that there was nothing wrong with the U.S. Sugar Program and that it should remain unchanged.

The very facts surrounding the U.S. Sugar Program belie that statement, so I believe that the only way to remedy the problems of the U.S. sugar mess is to eliminate the Sugar Program by striking it entirely from the farm bill.

Mr. Chairman, let me explain the reasons for my growing frustration and the need to offer this reform legislation.

Products containing domestic sugar and corn sweeteners cost U.S. consumers an additional $3 billion each year due to our current Sugar Program. At the same time, domestic manufacturers must compete with imported sugar-containing products from foreign manufacturers who are able to purchase sugar at one-half to one-third the price that domestic companies must pay for U.S. sugar.

According to the Commerce Department, since 1981, the artificially high price of sugar cost 8,900 U.S. food manufacturing jobs, and an additional 7,000 jobs with the closing of domestic sugar refineries.

U.S. sugar imports have been slashed approximately 66 percent during our domestic Sugar Program. Since 1982, the revenue earned by sugar-exporting countries, most of which are developing countries, has fallen from $1.6 billion to below $600 million in 1989.

According to USDA's own figures, over 50 percent of the revenue received by U.S. sugar producers is attributable to the U.S. Government program. In addition, the USDA found our Sugar Program represents one of the most restrictive trade barriers in the world, ranking with Japanese beef and soybean programs.

Sugar import barriers have imposed tremendous hardships on our foreign allies in the Caribbean region, the Philippines, Latin America, Asia, and Africa. These hardships undermine U.S. policy which is designed to enhance democratic development by stimulating export markets of young pro-Western democracies. Our present Sugar Program is hypocritical.

The Congress has tried countless shortcuts to deal with the problems of the domestic Sugar Program. Even now, there is legislation pending before the Ways and Means Committee that would attempt to stop the hemorrhaging of the Caribbean sugar import quotas. However, to accomplish this, the legislation will put 27 non-Caribbean Basin Initiative [CBI] sugar suppliers in a worsened position. This legislation is illegal under the General Agreement on Tarriffs and Trade [GATT]. Therefore, the CBI legislation contemplates paying hundreds of millions of dollars in trade compensation to non-CBI nations.

Soon, we will be faced with a ruling from the GATT on the Australian complaint that United States sugar import quotas are illegal. I believe that the Australians will win this case. Such a GATT ruling could result in compensation by the United States to these 39 sugar suppliers in the hundreds of millions of dollars, and could spark a retaliatory trade war that makes other trade skirmishes look like popgun battles. It would also undercut U.S. efforts to tear down foreign protectionist trade walls.

Mr. Chairman, I could continue with this litany. However, I will spare my colleagues a recitation of the facts associated with the Sugar Program of which we are all aware. After having offered legislation to modestly reduce the support price for sugarcane and sugar beets, and finding no support for such an amendment, I have determined that it is better to strike the entire sugar title from the Farm Program.

I respectfully request my colleagues who have reached the same level of frustration and concern over the direction of the Nation's Sugar Program to cosponsor this legislation.

BOXING LABOR STANDARDS ACT OF 1989

HON. PAT WILLIAMS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. WILLIAMS. Mr. Speaker, and my friends in boxing, I am pleased to rise today to introduce legislation addressing the regulatory problems in the sport of boxing.

The Congress has struggled for many years with me in trying to find a way to make the sport of boxing safer for those men who labor in the ring. The last time the Congress acted it sent legislation establishing voluntary guidelines to the Senate. That approach did not receive consideration and although since that time there has been some developments toward reform in the sport, the Congress has remained reluctant to act. With the introduction of this legislation today, I can't help but state that time is running out for us and the sport of boxing.

During the past year I have made a concerted effort to meet with and discuss these issues with all levels of the boxing world and the various levels of government involved in the sport. I have met with commissioners, promoters, boxers, managers, fans, referees, ring physicians, and anyone else who had some interest in this issue. In these discussions I was amazed at what I was continually told. All those years of public and congressional debate have not fallen on deaf ears. People were listening and I found little, if no opposition to the updating and standardizing of health and safety requirements for fighters, and they want those requirements made mandatory.

If I may summarize what I've heard it will help us see what action is now necessary.

People want a Federal presence in the protection of fighters, they want that presence to standardize health and safety requirements, they want the State commissions to be involved in the implementation of those requirements, and most important they want those requirements to be mandatory. Time and time again folks shared the concern that voluntary compliance simply would not work and if we attempted it, in its failure fighters would be worse off instead of better. They applauded our concern and our efforts, but they also marveled at our naivete. The sport has had more than 100 years to implement self regulation, since the adoption of the Marquis of Queensbury rules and it simply was not going to happen.

So like the racers in Alice in Wonderland we have run and run only to have arrived at where we started. There were many good and important suggestions that folks raised about programs that are important to fighters, but it is clear that any creative assistance fighters may be provided has to first be grounded in mandatory Federal health and safety requirements. Given the history and development of the issues surrounding this debate, I predicted that the approach that we need has to be simple and direct. We cannot wait to bring regulations to the sport.

As I said, there are few folks who do not support Federal participation in the protection of those who labor in the ring. In fact I believe that the true basis for any sport, the fans are beginning to resent the chaos and improprieties of this sport. Each year that passes boxing moves closer to pop entertainment and away from the "sweet science" that has brought many of us to be fans.

Again here today I ask the question asked of me, "Why can't fighters be provided the same protections other workers in this country enjoy?" I believe we have the answer to that question: Legislation that will expand the Occupational Safety and Health Administration to cover boxing and its environs.

Once one sees fighters as workers it becomes clear that they should be afforded the same legal protections that we provide all workers. Yes, there is room for some form of creative Federal involvement in the sport. And it must be in the very basic establishment of safety ground rules, which every employer wishing to do business in this country must abide by.

Utilizing the existing structures under OSHA saves the creation of a new, a burdensome Federal bureaucracy. This legislation will create an Office of Compliance and appoint a Boxing Commission to create and publish the necessary Federal protections. When a fight is planned and executed, there should be no question what health and safety rules apply. No worker in this country should go to work wondering if they will be afforded basic worker health and safety requirements. Those protections should be the same in Montana as they are in Nevada or New Jersey. All parties involved should know what work requirements there are and all fans should expect some uniform application of those rules. Auto workers don't have to negotiate their basic occupational safety standards and neither should fighters.

In am confident that this approach will provide the basic foundation necessary to protect our fighters and maintain fan confidence in this important sport. The legislation is direct, mandatory, and focused on health and safety standards and not commercial reform of the sport.

I have introduced two pieces of legislation today that are aimed at the same type of reform. First, OSHA style health and safety standards, and second, a Labor Advisory Commission proposed and championed by Gerry Cooney. This institute grew out of Gerry's concern that fighters are often left after their boxing career with no skills to enter the work force. This is a laudable effort and I commend Mr. Cooney for his interest and work on this concern.

Health and safety standards and job training work well together and I fully endorse both ideas. I firmly believe the best thing that could happen for fighter is if both pieces of legislation are adopted. I have introduced them as separate bills, however, to allow them to be considered independently on their merits.

I firmly believe that we do not have the luxury of enough time to explain or implement a complicated broad-based voluntary commission. This Congress may tell the tale for boxing reform. We owe it to the fan and the fighter to resolve once and for all the possibility of congressional action. It is inappropriate for us to year after year dangle the carrot of reform before the sport's community. We have brought them along with us in this discussion and now, that we have reached some consensus on health and safety reform, the Congress should strike.

IRRIGATION SUBSIDIES REFORM ACT OF 1989

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. GEJDENSON. Mr. Speaker, I rise today to introduce the Irrigation Subsidies Reform Act of 1989. This legislation seeks to eliminate one of the most striking contradictions in our Nation's farm policy. On the one hand, the Federal Government provides low cost, subsidized water to a select group of farmers for irrigation on lands that yield surplus crops. On the other hand, many of these same farmers are receiving Federal agricultural commodity payments not to grow the same crops on other stretches of their land.

The Irrigation Subsidies Reform Act of 1989 would eliminate this double Federal subsidy. Farmers who receive federally subsidized irrigation water to grow crops that are in surplus would no longer be eligible to receive price support loans or benefits from price and income support programs administerd by the U.S. Department of Agriculture [USDA]. As a result of this legislation, farmers would have to choose their subsidy.

As many of my colleagues may know, the production of surplus crops with subsidized water adds to the glut of farm products. A 1982 study by the Department of Agriculture found that 45 percent of the land irrigated with subsidized Bureau of Reclamation [BUREC] water is used to grow surplus crops. Incredibly, almost half the lands using subsidized water are growing crops that are in surplus. Even with the drought we experienced last summer, the Commodity Credit Corporation [CCC], which is the branch of the Department of Agriculture that purchases surplus agriculture commodities, has in storage today 250 million bushels of surplus corn, 375 million bushels of surplus sorghum, 30 million bushels of surplus barley, 60,000 bales of surplus cotton and expects to have 300,000 bales of surplus cotton in storage next year.

In addition to bringing sanity to Federal farm policy, this legislation reduces the Federal budget deficit. According to testimony presented before the House Interior Subcommittee on Water and Power by the Agriculture Department in the 100th Congress, the total USDA commodity payments made to farmers with Bureau of Reclamation [BUREC] irrigated lands was approximately $785 million in 1986. Of this amount, the USDA spent an estimated $379 million on commodity payments to farmers producing surplus crops.

To make matters worse, the Interior Department estimates that the Federal Government spent $534 million in 1986 to provide subsidized irrigation water; $203 million of this amount was used to provide subsidized water for farmers to grow crops that are already in surplus.

During the 100th Congress, while serving as chairman of the House Interior Committee on Oversight and Investigations, I attempted to get a straight answer from the Department of Interior regarding the calculation of costs to taxpayers in providing irrigation subsidies. Publicly, the Department of the Interior blatantly and repeatedly underestimated the cost of the irrigation subsidies. Privately, the Department's own economists responsible for calculating irrigation project costs, charged in internal memoranda that the Department's official price tag of $9.8 billion for the cost of the federally funded water projects through the Bureau of Reclamation since its inception were too low. The Interior Department's Office of Policy Analysis calculated the cost to the taxpayers of the BUREC subsidized Water Program at between $22 billion and $28 billion since its inception.

In addition, the Congressional Budget Office placed the subsidy between $33.7 billion and $70 billion since the beginning. Faced with a Federal budget deficit of $99 billion projected for fiscal year 1990 and double subsidy cost estimates ranging from $9.8 billion to $70.3 billion, it is critical that the irrigation subsidy system be reformed during this session of Congress.

Mr. Speaker, I grew up on a family farm in Bozrah, CT. I hold a strong belief in the productivity of the American agricultural industry, but this kind of double-dipping by a smaller group of farmers destroys the credibility of Federal farm policy and undercuts popular support for necessary farm programs.

The main problem plaguing American farmers today is low commodity prices caused by overproduction. Simply reducing the volume of surplus crops will increase commodity prices and farmers income. Recipient farmers of the

double subsidy inundate the market with unneeded surplus agricultural commodities. They drive up Federal expenditures for USDA commodity programs and place farmers in other areas of the country, who do not receive subsidized water, at a competitive disadvantage in the agricultural marketplace.

Finally, the "Irrigation Subsidies Reform Act of 1989" protects the environment because it encourages the conservation of precious water resources. The wasteful use of irrigation water can damage fragile ecosystems and destroy important wildlife habitats.

Mr. Speaker, as we begin the debate on the 1990 farm bill, we have the opportunity to improve the agricultural system in this country. The "Irrigation Subsidies Reform Act of 1989" ends the contradiction in Federal farm policy. It cuts the Federal budget deficit, reduces the cost of USDA commodities programs, reduces the surplus of agricultural crops, encourages the conservation of our precious water resources and makes the playing field more level for farmers who do not receive subsidized water. I encourage my colleagues to join me in support of this legislation to reform the irrigation subsidy system and bring fiscal sanity back to our Nation's farm policy.

THE MINIMUM WAGE

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. HAWKINS. Mr. Speaker, it has been 8 years since the minimum wage was last increased. The $3.35 per hour wage today only purchases $2.46 worth of goods and services in the marketplace. Workers today deserve to earn a decent wage for the hard work they perform. H.R. 2, the Fair Labor Standards Amendments of 1989 creates the long overdue opportunity for Congress and the President to provide millions of low wage workers a measure of economic justice.

President Bush's veto threat of this modest proposal is wrong and unfair to the poorest working men and women in the Nation. When the President supports a capital gains tax and opposes a modest increase in the minimum wage, it is easy to see why the income gap between the richest and poorest Americans is the greatest in more than 40 years.

I urge the President to reconsider and not veto this legislation for the sake of 30 cents an hour. Also, I believe it is important for all of us to realize Congress' 60-day training wage proposal for the very first job—or jobs—a worker takes, is significantly different than the Bush 6-month, potentially lifetime, subminimum.

The following article, "Bush's Minimum-Wage Ploy," by Arnold Mayer, vice president of the United Food & Commercial Workers [AFL–CIO], that appeared in the Washington Post on May 16, 1989, points out the differences in the two proposals and clearly shows the only meaningful increase in the Federal wage floor is the congressional package.

I encourage my colleagues to join in our efforts to convince President Bush of the importance of signing a meaningful minimum wage bill. Copy of the article follows:

BUSH'S MINIMUM-WAGE PLOY

Some workers could end up on a subminimum training wage treadmill.

Much is missing from the public debate on the differences between the minimum-wage legislation passed by both houses of Congress and the one supported by the Bush administration. News reports concentrate on 1) the Bush call for a $4.25 an hour minimum wage in three years as compared with the congressional $4.55 rate; and 2) the Bush proposal for a six-month so-called training wage versus the congressonal two-month limit.

In actual fact, the training wage difference is much greater and much more significant both in economic and political terms. The administration is demanding a six-month training period every time a worker changes his or her job, while the congressional 60-day total training wage would occur only once—on the very first job or jobs a worker took.

Under the Bush proposal, a worker could be plagued with the subminimum wage throughout his or her working life. Under the Congressional legislation, the worker would endure the subminimum only at the start.

But there is more. In both proposals the training wage would be either $3.35 an hour—the minimum-wage rate in effect since Jan. 1, 1981—or a percentage of the existing minimum wage, whichever is higher. The subminimum percentage would be 80 percent in the Bush proposal and 85 percent in the congressional bill.

Multiply either the Bush minimum-wage proposals of $3.65 an hour for 1990 or $3.95 for 1991 by 80 percent and the all-pervasive training wage stays at $3.35 an hour both years. In 1992, the Bush-proposed minimum wage would go to $4.25 and the training wage would finally rise—by 5 cents to $3.40.

Minimum-wage workers leave jobs often. In 1980, the U.S. Minimum Wage Study Commission found that "turnover was greater among minimum-wage workers than among those making higher wages." In fact, more than twice as great.

"On a monthly basis, 13 percent of minimum-wage workers left their jobs," according to the commission. For the economy as a whole, "workers left their jobs at a 6 percent monthly rate." Many experts believe the turnover rate among minimum-wage workers is higher today.

The Bush proposal also gives employers an incentive to conclude that these low-wage workers are inadequate in their job performances as they approach the magic six-month deadline. While the substitute of subminimum workers for those receiving the full minimum wage would be illegal, the U.S. Labor Department's Wage and Hour Division has been so denuded of staff that it could hardly enforce this difficult-to-prove provision.

As a result, most workers employed at the subminimum wage would never reach the full rates proposed by Bush. Job changes—either voluntary or forced—would effectively keep them at the $3.35 and $3.40 rates.

The media has speculated that the Bush "take-it-or-leave-it" attitude on minimum wage is a political ploy aimed at stiffening the image of a president who often compromises with Congress. It is to show conservatives that he does stand his ground.

Bush's minimum-wage strategy is actually a shrewder maneuver than that. It is a double play. Bush demonstrates to the nation a "gentler and kinder" approach than the Reagan flat "no" on minimum-wage increases. At the same time, he assures employers that under the law they will not have to pay more to a large number of workers until 1992 and then an increase of only a nickel an hour.

There is yet another benefit for minimum-wage opponents. Representatives, senators and the media are guessing what will happen after the expected Bush veto of the congressional minimum-wage legislation.

Congress will probably be unable to override the veto. While both chambers approved the minimum-wage bills by comfortable margins, they did not pass them by the two-thirds majority which the Constitution demands for a veto override.

Bush may not be willing to make changes in his proposals even after a veto. He could very well continue his "tough strategy" for the economic benefit of employers and the political benefit of conservatives.

But the political pressures may be too great. The administration may be willing or may have to negotiate a new bill with Sen. Edward M. Kennedy (D-Mass.) and Rep. Augustus F. Hawkins (D-Calif.), the chairmen of the congressional labor committees.

No genius is needed to foresee what a compromise of the minimum-wage rates could be like. One side or the other may get the better deal of a nickel in the difference between the Bush proposal of $4.25 an hour in the third year and the congressional $4.55 figure. The result is likely to be somewhere between $4.35 and $4.45.

Such a compromise would be difficult for minimum-wage increase advocates to swallow. The cost of living has increased 37 percent since the $3.35 minimum first went into effect. The minimum should be at $4.60 today to make up the lost purchasing power of these low-paid workers.

The $3.35 rate represented 48 percent of the nation's average wage when it became law in 1981. To equal the same percentage of the average wage today, $4.58 would be needed. Any wage compromise would therefore push minimum-wage workers even further down the equity scale.

But the negotiating sticking point will come on the training wage. If the administration becomes generous and cuts its six months subminimum to just one month at every job change, the minimum-wage worker still will be in deep trouble. Because of job turnovers, the $3.35 and the $3.40 rates will remain a major factor—and perhaps the predominant factor—in the job market for minimum-wage workers.

This after-the-veto situation puts the Democrats in a political bind. If they agree to such a training wage deal, they cripple the effectiveness of the Fair Labor Standards Act—long a major jewel in the Democratic New Deal's crown—and they will enrage labor and other advocates of the working poor.

If congressional Democrats refuse to make the deal, the administration will try to make them appear as dogmatists who will not compromise to provide a much-needed wage increase to low-wage workers—even though President Bush is not proposing a real increase.

The minimum-wage fight could end up as a victory for political cynicism at the expense of the working poor.

THE PROCHOICE MOVEMENT CUTS ACROSS RELIGIOUS, POLITICAL, AND GEOGRAPHIC BOUNDARIES

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. GREEN. Mr. Speaker, several months ago I received the following essay from Mr. Claude W. Sherwin of Salt Lake City, UT. Mr. Sherwin describes himself as a devout Christian and a regular contributor to the Republican Party. He is also prochoice. Knowing of my prochoice position on abortion, he wanted to share with me his essay which thoughtfully explains his prochoice views. I was very moved by what he wrote and wish to share it with my colleagues because I believe it illustrates that the prochoice sentiment is shared by people in all walks of life regardless of religious, political, or geographic labels.

Subject: The Right To Choose.
To: All Who Have a Concern or Interest.
From: Claude W. Sherwin.
Date: August 22, 1988.

Vice President Bush, during his acceptance speech at the Republican National Convention, made a pitch for his anti-abortion stand by using an often used, worn-out cliche. Referring to his adopted granddaughter, he said that he was glad that her mother chose adoption over abortion.

I'm sure that any grandparent, or parent of an adopted child, would certainly make the same statement. The point is, the statement is a loaded declaration which will always get a cheering, affirmative response. We are all very glad that the mothers of George Washington, Abraham Lincoln, Henry Ford and thousands of other such examples, did not choose abortion.

In Utah we have had two rather recent examples of young girls and young boys being murdered by deranged men. Would it not be understandable to hear the families of those victims say that they wished that the mothers of the killers had chosen abortion? The same thought might cross the minds of thousands of families and friends of other murder victims across the country. Would the world have possibly been better off if the mothers of Hitler and Stalin had chosen abortion? These too, are loaded statements.

To me, the important word is choice. The decision, that yes or no answer, can only be made by the female carrying the embryo, be it a teenager who made a mistake, or an older woman with no means of support. The reasons may well run into the hundreds, but each is an individual case, to be dealt with only by that individual who carries the embryo.

Many clinics across the nation that perform legal abortions have been subjected to picketing, bombings, arson, and rock throwing by so-called "right to lifers." They often harass and intimidate the people who enter or leave these clinics. They are breaking the law and should be severely dealt with. Have the homes of any pregnant young teenagers or pregnant single welfare recipients ever been picketed by mobs telling them that they must have an abortion? I don't think so.

It is not a question of pro-abortion, but a question of pro-choice. The Supreme Court has said that a woman has a legal right to make that choice. Extreme right wing radicals are saying "to hell with the law and the courts." Patrick J. Buchanan, in his new book, "Right From The Beginning," while discussing the method of selecting new Supreme Court Justices, states that, "not only the character, but the philosophy of the new Supreme Court Justices should be made by the Republican Party." He later goes on to suggest that people should act in defiance of Supreme Court edicts (re. pages 344-346). What an example for young people. Obey the law only if you agree with it. I believe the word is "Anarchy."

There is no acceptable either/or solution to the problem. It is not a question of conservative or liberal, left or right, black or white or right or wrong. It instead has to do with our answer to an even more complex question. A question that has never had a provable answer. "When does a soul-bearing human life begin?" Is it at the moment of conception, the moment of birth, or at some point in time in between? Is it a soul bearing human being during the first or second trimester? I cannot prove that it is or isn't, nor do I believe that anyone else can.

I happen to be a devout Christian. It is my honest personal belief that early term embryos are not in fact soul bearing human beings. If I believed otherwise, I would never be able to understand the millions and millions of miscarriages that regularly occur. Today, an embryo can be started in a test tube by dropping a sperm on an egg. I personally do not believe that the soul, or the spirit of God, is suddenly present in that tube. This is the philosophy, my philosophy, that I choose to believe. You may agree or you may choose to believe something completely different.

I am told that my rights end when they infringe on your rights. Therefore, your rights must end when they infringe on mine. It's an American rule that works. With that as our guideline, let us not give up our right to choose the path we wish to follow.

As a point of interest, I have for many years been a regular contributor to the Republican Party. During those years I have always split my ballot, and have never been able to follow straight party lines. I also happen to be a regular contributor to Planned Parenthood. This may seem strange or conflicting to some people, but that's my choice.

For taking the time to read this, let me say thank you. Thank you for allowing me to use you as a means of getting all of this out of my system.

Sincerely,

CLAUDE W. SHERWIN,
Salt Lake City, UT.

THE SOCIAL SECURITY REPRESENTATIVE PAYEE ACT OF 1989

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. MATSUI. Mr. Speaker, today I am joining my colleagues Mr. LEVIN and Mr. MOODY, in introducing legislation, the Social Security Representative Payee Act of 1989, that is designed to reform and strengthen vital services which the Social Security Administration provides to approximately 5 million people who are among the most vulnerable in American society.

My staff began working in February with the staff of the Ways and Means Social Security Subcommittee, chaired by Congressman JACOBS, as well as Congressman LEVIN's staff on a package of reforms to the Social Security Representative Payee system. The multitude of problems which exist in the representative payee system have been painfully apparent in recent months in my home District in California.

National attention has been focused on the problems of abuse in licensed and unlicensed Board and Care facilities because of the very tragic and terrible Puente case. The Puente case is only one of the many horror stories that have been documented under our current representative payee system, although it is the most gruesome. We will have other Puente cases in this country if we do not take action in Congress. Unlike many problems we tackle on Capitol Hill, I believe that there are some positive solutions we can all agree are possible. Looking at the issue, I feel that in some ways it is simple common sense which the Social Security Administration [SSA] lacks in the administration of the representative payee program.

The courts have also recognized that the representative payee system is failing. Legal Services of Northern California, based in Sacramento, filed in U.S. District Court in February a class action lawsuit which documents the widespread and inherent problems that plague the system. The named plaintiff, Mr. Charles Briggs, who is mentally disabled and has no other source of income other than SSI disability benefits, could only receive his check through a representative payee. From December, 1981 until June, 1988, Adult Protective Services of Sacramento County acted as Mr. Brigg's representative payee. When the County, due to fiscal burdens, discontinued this service, Mr. Briggs was unable to locate another representative payee. Without a representative payee, he could not receive his check.

Mr. Briggs ended up homeless, sleeping on the streets, and subsisting by eating at food kitchens run by local charities. The representative payee system, by terminating his benefits, left Mr. Briggs destitute and guaranteed his homeless status. On April 26, 1989, the 9th Circuit Court of Appeals entered an order granting the motion for a preliminary injunction in the Briggs case. The Secretary is currently enjoined from refusing to pay Social Security or Supplemental Security Income benefits directly to beneficiaries because those beneficiaries cannot obtain a representative payee.

In another case, the Federal district court in Colorado on March 20, 1989, granted the plaintiff, Mr. Holt, summary judgment and ordered SSA to repay the $7,000 of benefits that were misused by Mr. Holt's representative payee. Mr. Holt has claimed that the Social Security Administration was obligated to pay the money a second time because SSA had failed to comply with its duty to investigate the representative payee, who had an extensive criminal record.

Sadly, Mr. Holt and Mr. Briggs' cases are not unique. I would like to share with my colleagues a few other documented examples

that illustrate how the system is really functioning.

Sister Laura Ann Walton filed a declaration in the Motion for Preliminary Injunction in the Briggs case. She is the director of Maryhouse, a resource center for homeless women and children in Sacramento. She describes the plight of 30 women she served who were eligible for Social Security and/or Supplemental Income [SSI] benefits but who could not find a representative payee. Some of these women were without benefits for as long as 4 or 5 months while they attempted to find a payee. During that time period they were homeless, often hungry, and threatened by the violence of street life. Here clients have resorted to getting individuals as payees who are physically abusive and who keep the money for themselves.

Sister Walton serves as a payee for as many women as she can handle. Each time she has applied to be representative payee, she reports that she was not even asked for identification.

A second declaration was filed by Peggy Nickerson, a social worker at the St. Paul's mental health center serving the Sacramento area. The mentally ill seniors she serves are also left homeless to face the dangers of the streets, hunger, and desperation because they cannot find a payee. It is not uncommon for her clients to go to local liquor stores, grocery stores, and pawn shops to get the owners to be payees. The owners exploit the beneficiaries by providing tabs at the liquor stores, by charging outrageous fees for their services, and by not accounting for their funds. Her clients tell her that often the only way to get a payee is to pay for one, and the payees charge as much as $500.

In a third declaration in the Briggs case, Tim Brown, a social worker employed by Sacramento County, describes how his clients with mental disabilities would completely break down mentally under the stress of being homeless while in the process of finding a payee. His sworn statement includes one actual case illustrating how tragic the consequences of the current representative payee system can be. One woman has her boyfriend act as her payee. This woman was often delusional to a severe degree and completely incapable of making choices about her welfare and safety. Because her boyfriend controlled her money, she felt she has no option but to live with him. He treated her very violently. He literally tortured her on a regular basis. During one hospitalization it was found that her entire body was covered with bruises, lacerations, and cigarette burns inflicted by her payee.

There are many more lives being ruined because the representative payee system has failed. There is a failure to help beneficiaries find responsible representatives payees, a failure to run simple background checks, and a failure to monitor representative payees after they have been authorized. How could the good intentions of Congress, trying to assure that benefits truly help recipients have gone so astray in the hands of the Social Security Administration?

The Social Security Representative Payee Act of 1989 is a number one priority item in my legislative agenda for this Congress. I share these shocking stories only to emphasize that immediate reform is essential.

Thank you.

MARINE BIOTECHNOLOGY AND AQUACULTURE

HON. KWEISI MFUME

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. MFUME. Mr. Speaker, science fiction writers would have us believe that space is the final frontier. But the reality is that the final frontier is much closer to home. The Natural Resources Subcommittee of the House Science and Technology Committee traveled to the future and a new frontier on May 15 when they held onsite hearings on marine biotechnology and aquaculture in Baltimore, MD. Scientists and entrepreneurs are turning to the ocean as a source of new products, new technology and new ideas for research and the place where these will meet will be at the Christopher Columbus Center for Marine Research and Exploration at the Inner Harbor of Baltimore.

Several examples come to mind of how the new frontier of exploration on our own shores could benefit mankind. A nuisance to shipping for centuries the common barnacle now is looked upon as a source for a new natural adhesive. Research into the protein substance that binds barnacles to the bottoms of ships may yield a similar protein substance produced in American laboratories for a new glue. In a completely different field, scientists are studying salmon for clues to building a new generation of compact electronic sensors. Salmon have traditionally baffled researchers who are stumped that the fish are able to find their way back to spawn in the exact stream they were born in. With properly funded and supervised research, the sea, its bottom and its inhabitants could be valuable sources of substances that might have use in medicine, industry, pharmaceuticals, mining, and food production, and this is what the Columbus Center is all about. But formidable obstacles exist for undersea research.

Tradescope Magazine, a Japanese periodical, capsulizes the problems involved in biotechnology and aquaculture research as "the inhospitable nature of marine environments makes undersea development a risky and expensive business." Trenches to 10,000 meters, little light or oxygen, extremely cold temperatures, and crushing pressures contribute to the danger and expense of undersea research and development. The problems of exploration in the hidden depths of the trenches pose as daunting of problems as the space program has encountered. As the Government in now in cooperation with private industry in the Shuttle Program so also is such a partnership sought for marine biotechnology and aquaculture.

Mr. Speaker, I am pleased to announce that such an innovative and creative partnership does indeed exist. The National Oceanic and Atmospheric Administration [NOAA] has expressed its support for the Christopher Columbus project. Commemorating the 500th anniversary of the famous explorer's discovery of the new world, the Columbus Center will engage in marine and oceanographic biotechnological research.

The parallels between the explorer and the facility are more than coincidental. Columbus sought financial support from a variety of sources to follow a dream which eventually changed the world. With professional experience, special knowledge and personal courage he ventured into uncharted waters of the north Atlantic. The Columbus Center also involves a special collaboration of government, private enterprise and educational institutions. The partnership, as well as the research are necessary to realize the dream of turning toward the sea as a source of innumerable benefits for all of humankind. The future needs the Columbus project.

Of major importance will be the center's role in providing coordination for environmental research. The results of the center's research will contribute to our knowledge of how to restore the seas to the pristine condition that Columbus experienced. Depletion of marine animal populations from using our seas as a garbage dump and the constant accidents at sea that spill everything from oil to airplanes is a sad reality of this century. The research that the Columbus Center will engage in will seek to discover affordable solutions to these, and other, environmental problems.

Some balance of interests must be sought among all the various uses of the bay. Because it is a fragile ecological system, a varied recreational playground, a convenient resource for industry and a source of jobs, there arises conflict as to what is best for the bay. At its best, the center will assist in providing the technological and scientific research necessary to make the hard decisions about the bay's future. The Christopher Columbus Center will be a great boon, not only to the Chesapeake Bay, but its discoveries will be applicable to all of our Nation's waterways and shoreline. It is our dream, Mr. Speaker, that the center, coordinating with government, universities, industry, and all the users of the bay, will ensure that the bay has a long, healthy, and prosperous future.

THE 80TH ANNIVERSARY OF ITALIAN TRIBUNE

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. HERTEL. Mr. Speaker, I rise today to recognize the 80th anniversary of the Italian Tribune-La Tribuna Del Popolo, a bilingual newspaper, published in Warren, and serving the Italian-American community of Michigan and the surrounding States.

The newspaper, founded in 1909 by Vincent Giuliano, has served as a way for Italian-Americans to stay abreast with cultural, educational, and social events happening within the Italian-American community.

The success of this publication is accredited to Edward Baker, the publisher and grandson of the founder of the paper who has carried

on the family tradition of maintaining effective communication to the Italian-American community in Michigan. Edward's wife Marlene, has also been instrumental in making the paper such a great success.

My dear colleagues, please join me in recognizing the 80th anniversary of the Italian Tribune and in congratulating Edward Baker on the great job he has done over the years.

AUNT JEMIMA SERVES OLD TRADITION—STEREOTYPING

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. STOKES. Mr. Speaker, I would like to bring to my colleague's attention an editorial, entitled, "Aunt Jemima Serves Old Tradition—Stereotyping," which appeared in the Plain Dealer on Sunday, May 7, 1989. The article was written by Associate Editor Elaine Ayala and explores the profundity of systematic discrimination known as stereotyping. The subject examined by Ayala is Nancy Green, also known as, "Aunt Jemima," a trademark which has graced the box containing the famous pancake mix for nearly a century.

According to Ayala's article, the real Nancy Green was an attractive, dignified figure who became a nationwide celebrity by going around the country and promoting the pancake mix at fairs and expositions. At the turn of the century, the use of racial stereotypes as caricatures was widely used by advertisers to sell their products to consumers. Consequently, instead of placing Nancy Green's graceful figure on the pancake mix box, a pleasingly plump black woman was substituted, wearing a bandanna, an apron, a wide-mouthed grin, and wielding a spatula.

The inference was obvious in 1893—black women were happy, dim-witted, and content to serve. Until 1989, the image of Aunt Jemima has remained virtually the same since her debut. The advertisers have now decided to modernize Aunt Jemima's image for a new generation. The new and improved Aunt Jemima will not wear her customary bandanna and will sport pearls.

Ayala has a strong point to make about the subtleties of racism and discrimination in the United States of America. She contends that instead of modernizing a derogatory caricature that is supposed to represent modern black womanhood, why not get rid of the symbol altogether.

Mr. Speaker, Ayala's article is well worth reading. It is definitely food for thought.

[From the Plain Dealer, May 7, 1989]

AUNT JEMIMA SERVES OLD TRADITION—STEREOTYPING

(By Elaine Ayala)

Reality is so unmarketable. So the guys in gray flannel suits always have turned to stereotypes—usually racial ones—to sell a product. They figure consumers not only want a good soap, they also want to feel superior, demean or make fun of the caricature on the soap's package.

The sick notion has sold a lot of goods, it also has sold the American consumer a bill of goods.

The more frightening images ("Alligator Bait" whiskey, which had a picture of a black child and two alligators) have disappeared—the suits' bow to societal pressure. Many a product slogan has thus been retired to the Smithsonian or some other appropriate institution. But we don't have to look too far back for examples of racial stereotyping in product marketing. Just last year, Colgate renamed its Asia-destined "Darkie" toothpaste, which depicted a minstrel in blackface, to "Darlie" Asians reportedly were unsupportive of the change, saying they respected black people for their clean teeth.

Other seemingly harmless-looking images stay with us, doing their part in coloring the way we look at people of color. Aunt Jemima is a case in point. The ever-joyous, fat black woman who loves to serve up a stack of flapjacks is hanging on into the 21st century. What a shame. She's earned her retirement.

Recently, the Quaker Oats company presented a new and improved Aunt Jemima—a modern version of her old jovial self. While there's no way to add insult to injury in this case (the damage being mostly done), the new Aunt Jemima still inspires winces from these parts.

The new Aunt Jemima smiles broadly, a mouthful of white teeth running across the box. She no longer sports a bandana across her head (thanks for small favors). And she isn't wearing that traditional white collar of hers, the kind all of Shirley Temple's mammies used to wear. Pearl earrings and a white ruffled blouse make her just a bit more modern. The company presented this new Aunt Jemima by telling its consumers that she still has "the important attributes of warmth, quality, good taste, heritage, and reliability" they have come to expect from her.

The company wants you to keep believing that Aunt Jemima is just a sweet old woman who loves serving you. That she's a harmless symbol of an American tradition. Don't buy the PR. Don't buy the pancake mix. Keeping Aunt Jemima alive on a pancake box perpetuates the most dangerous kind of stereotype, the seemingly harmless one.

The real Aunt Jemima—first inspired from a minstrel song, then brought to life in the form of Nancy Green—didn't look anything like the new or the old Aunt Jemima. Green was an elegant looking woman from Montgomery County, Kentucky. She was hired by the then-owner of the trademark, the R.T. Davis Mill & Manufacturing Co. of St. Joseph, Mo., to go to the Columbian Exposition in Chicago in 1893 to promote the pancake mix. She made more than a million pancakes at that fair and told stories about the old South. People flocked to see her, warranting police protection.

For the next 30 years and until her death in 1923, she played Aunt Jemima at fairs across the nation. The whole while, through, Nancy Green's lovely face never graced a pancake box. The Aunt Jemima most consumers saw was a grotesque caricature of a black woman with saucer lips and fear in her eyes. In 1902 and 1917, the boxes sported the phrase, "I'se in town honey!"

To be fair, the pancake mammy, whose birth can be blamed in part on a newspaper (wouldn't you know it), was among a slew of racial stereotypes used to sell products. There are, and have been, plenty others to embarrass America. Stuff like the Frito Bandito, "Nigger Head Brand" canned fruits and vegetables and "Chinese Rat Destroyer" and "Rough on Rats," both of which depicted rat-eating Asians on their labels.

Most of the labels now serve as historical memorabilia so that we might go to a museum and shake our heads in dismay. So that we might say silently to ourselves that we're an older and wiser society.

However, Aunt Jemima is clinging to life, teaching children all the wrong things about black Americans and insulting sensible people of all colors as a symbol of black servitude. What her owners must be pressured to realize is that Aunt Jemima is tired after a century of servitude. She deserves a gentle retirement. Her own must also be pressured to understand that the perpetuation of a black woman's image as a content servant is harmful, demeaning, passe, and that black women are a lot of things . . . your peer, your boss, your neighbor. But in 1989, black women sure as hell don't want to be viewed as your servant.

THE EFFECTS OF TAX REFORM

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, May 17, 1989, into the CONGRESSIONAL RECORD:

THE EFFECTS OF TAX REFORM

With federal income tax income just over, many Hoosiers have expressed concern to me that their taxes have gone up under the changes made by the Tax Reform Act of 1986. They feel that tax reform passed them by, and that the tax code still favors the wealthy and big business. According to a recent national poll, 63% of the respondents said their taxes had gone up under the new tax system.

These views are not easy to reconcile with the generally accepted opinion among tax experts that tax reform appears to be achieving one of its primary goals: to make the tax code more equitable. While it is still early to make definitive judgments on the effects of tax reform, preliminary evidence suggests that the tax burden has been shifted from low- and moderate-income taxpayers to the wealthy and to corporations.

Tax reform was enacted by the Congress in order to achieve two basic goals. First, it was aimed at bringing more fairness to the tax code. The new law sought to achieve this by eliminating major loopholes and shelters used extensively by the wealthy and corporations to limit tax payments, and by instituting a much tougher minimum tax. The tax code was also made more equitable by removing over six million working poor Americans from the tax rolls.

Second, tax reform was intended to boost economic growth by lowering tax rates—to marginal rates of 15, 28, and 33% for individuals, and to 34% for corporations—and by lessening tax considerations in investment decisions. It was argued that tax reform would lead individuals and corporations to make their investment decisions based on the merits of the investment, rather than the tax breaks it would create.

Two-and-a-half years after tax reform was enacted, the evidence suggests that tax reform seems to be working in these two respects. A recent congressional study found that "effective" income tax rates—the rates actually paid out in taxes—have dropped from 1984 to 1988 for all taxpayers except

the very wealthy. The study determined that effective federal income tax rates for the wealthiest one-tenth of all taxpayers have increased on average from 15.1% to 15.5%. In contrast, average tax rates for taxpayers in the next four-tenths have dropped from 9.6% to 9.0%, and rates for the bottom half of taxpayers declined from 4.1% to 3.5%.

Since individual financial situations differ, exceptions abound, and some taxpayers have experienced an increase in their tax liability. However, most tax experts believe that more than 80% of all taxpayers have received a modest tax reduction owing to the law's lower rates and increased personal exemption, with most low- and middle-income taxpayers coming out as winners.

Moreover, taxpayers seem to be relying less on tax considerations in making their investment decisions, in part because tax reform eliminated most shelters and credits. The IRS indicates that the percentage of tax filers who itemize their returns—a sign that a taxpayer is taking advantage of tax breaks—has dropped from 60% in 1986 to 50% in 1987.

The evidence also suggests that tax reform succeeded in transferring a substantial portion of the tax burden from individual taxpayers to corporations—tax reform was intended to shift $120 billion over five years to corporate tax rolls. Large corporations which before the 1986 reform were using tax breaks to avoid their tax liability, are now paying more taxes on their profits. Economists believe that their increased tax burden is being carried primarily by stockholders, as opposed to consumers.

One advocacy group for tax reform concluded that the number of corporations paying no income tax—so-called "corporate freeloaders"—has declined since tax reform was enacted. The number of such corporations was 40 of 250 surveyed in 1986, and only 16 in 1987. As a result of lost tax preferences, the effective rate paid by those companies has increased, from an average of about 15% in 1981-1985 to 22% in the 1987 tax year.

In addition, tax reform has not had the dire effects on the economy that some had predicted. The elimination of tax shelters in real estate has not hurt the real estate industry, nor has repeal of the investment tax credit and accelerated depreciation—two tax breaks favored by businesses—undermined U.S. industry, as the solid business investment over the last two years would indicate. Experts generally agree that, while taxes are important, their impact is at the margin of business decision-making. Developments in the international and domestic economies usually swamp the impact of tax changes.

In spite of the apparent successes of tax reform, some believe that the 1986 tax changes went too far in eliminating some tax preferences, by repealing the capital gains tax break, by restricting deductible contributions to Individual Retirement Accounts, and by eliminating tax breaks for builders of low-income housing, to cite a few examples. Others contend that tax reform has not gone far enough in removing abuses from the tax code, and would point to home-equity loans and mortgage-interest deductions for second homes.

It is my view that tax reform has made the tax system somewhat more fair. Among individuals, winners outnumber losers, as the benefits of lower tax rates have generally more than offset the loss of specific deductions. The code has made it nearly impossible for the rich to avoid taxes, and businesses are paying more under the new tax code.

The effects of tax changes generally occur over a long period of time, but I believe the 1986 tax reform will increase incentives to work and save, and decrease incentives to cheat. Yet it will not stop demand for changes in the tax code. The system does not work that way, and policymakers are prone to address problems by means of tax breaks. While it is likely that some modifications will be made to the tax code in coming years, I am hopeful that the experience with this tax reform will push the Congress toward greater efforts to achieve equity and fairness for American taxpayers.

TRIBUTE TO REV. MERVIN C. GRAY

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. DYSON. Mr. Speaker, I rise today to honor Rev. Mervin C. Gray one of the great leaders of Maryland's First District. Reverend Gray is retiring from his position as pastor of the Eastern and St. John's United Methodist Churches in Lusby. He has been an inspiration to all who have come into contact with him, and he will be sorely missed by his parishioners.

Reverend Gray has served as pastor of the Eastern and St. John's United Methodist Churches for the past 9 years. In this position he has undertaken great humanitarian works throughout Calvert County, and will leave behind him a legacy of appreciation and good will. Reverend Gray, spotting a need, has assisted indigent youths in their encounters with the judicial system. He has often come before Judge Perry Bowen of the 7th Circuit Court to intercede on behalf of these youngsters, recognizing that everyone has the right of a fair trial. He has also provided counseling to children with adjustment problems, in an attempt to keep them out of the judicial system. To provide them with activities, he was extremely instrumental in building the recreation center in Lusby, MD.

We in southern Maryland do not have to be concerned that Reverend Gray's retirement will mean the end of his good works. Reverend Gray leaves to devote his considerable talents to hosting The Hour of Hope show. This show provides an hour of inspiration and faith for our young people. The Hour of Hope uplifts us through song and word, and reaches out to our troubled youth. Reverend Gray shows them that someone cares for them, that there are many people ready and willing to help them through troubled times. He provides spiritual strength through a phone line for prayer, and he provides guidance through a hot line that youths can call if they need a sympathetic ear.

During The Hour of Hope Reverend Gray also discusses the problems of drugs and drug abuse. This is especially important as more of our Nation's youth come into contact with drugs. Daily we read about the increase in drug-related crimes throughout our Nation. In southern Maryland we have experienced a 52-percent increase in these crimes since the beginning of the decade. Reverend Gray ministers to our young people, showing them that drugs are not an acceptable option.

Once again, Reverend Gray will have placed himself in a position of extreme importance to the youth of Maryland. This is good news to those of us who live in southern Maryland. We need his continued leadership. It will take dedicated leaders like Reverend Gray to show our youth the proper path. I wish him well on his retirement, although I know that he will never really retire from helping us become better people.

HOW CAN AMERICA SAVE ITS SHARE OF THE MIDDLE EAST MARKET?

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. BROOMFIELD. Mr. Speaker, I want to bring an issue of great economic importance to the attention of my colleagues in Congress who believe that America should export more, not less, U.S.-made products to the Middle East. America is losing its share of the lucrative product market in the Middle East and American jobs will also be lost because of our government's inability to make a decision about assigning a representative to the Saudi Arabian Products Standards Office [SASO]. It is time for the Department of Commerce and United States corporation in Saudi Arabia to have a meeting of the minds before United States exporters lose the Middle East produce market.

SASO sets the domestic standards for products being imported into Saudi Arabia. Although the Saudi Arabian Government has been requesting that a United States representative be named to that organization, our government has yet to assign a single American to SASO. The United States private sector is unable to provide the necessary funding for an American representative to SASO and Commerce insists that it is unable to fund the position because of budget constraints.

European countries and Japan already have many official representatives assigned to SASO and those countries have already developed standards that favor their own products. U.S. companies are already being hurt by not being officially represented at SASO by an American who could protect the interests of U.S. companies. Advocating the use of U.S. product standards, alerting U.S. corporations to potential problems and protecting the interests of the private sector in SASO appear to me to be a legitimate U.S. Government function.

I am confident that other Members share my concern about the inordinate delay in resolving this important issue that impacts on markets for U.S. products, and U.S. jobs. The time for cooperation and a rapid resolution of this standards issue is now.

I commend the following Forbes magazine article to my colleagues in the House who share my concerns about of this critical standards issue.

WHO SETS THE STANDARDS?
(By John R. Hayes)

General Electric's business in Saudi Arabia has been threatened since early last year, when a container of gas turbine parts was held at the port of Dammam. The hang-up? One oil heater didn't conform to new Saudi electrical standards. Customs officials have also stopped shipments of goods from Clorox and Westinghouse. Eventually storage and shipping penalties caused so much screaming and arm-waving that the Saudis declared a moratorium on enforcing their new rules, but product standards remain a threat to U.S. exporters.

Were GE and Clorox shipping shoddy goods to Saudi Arabia? No such thing. Product standards deal not so much with quality but with uniformity in size, materials and performance. So what happened?

Simply, the U.S. companies let themselves be outflanked. Japan, the U.K., Germany and France have sent teams of standards professionals to Riyadh to advise the Saudi Arabian Standards Organization [SASO] on its 16-year-old project to develop product standards. SASO expects to write 42,000 standards, covering everything from the shelf life of lamb to the color of ground wires in air conditioners. Not surprisingly, our competitors argue for standards that favor their own manufacturers.

A U.S. representative could argue differently, but there isn't one around. Every six months or so the Saudis renew an invitation to the U.S. government to send a U.S. standards expert to Riyadh. SASO even offered to pick up housing, office and local transportation expenses if the Commerce Department would recruit someone. Overruling his staff, former Secretary William Verity, citing the expense, passed up the invitation once again last spring.

Much is at stake. The U.S. used to dominate trade with Saudi Arabia. But since 1982 U.S. exports have slipped from 21% to 15% of total Saudi imports. Today Japan has the biggest piece of the market.

Since other countries in the Persian Gulf—Bahrain, Kuwait, Oman, Qater, and the United Arab Emirates, all members of the Gulf Cooperations Council—will adopt Saudi standards as they are written, an additional $1.5 billion of U.S. exports is at risk.

The Persian Gulf isn't the only area of the world where product standards have trade implications, or where the U.S. competitors have been quick to react. Consider Brazil, for example, which imports some $17 billion worth of goods. The library at the national standards clearinghouse contains about 70 shelf-feet of German product standards, in Portuguese. A gift from a German construction company, these volumes have become the principal reference for standards development in Brazil. U.S. standards are represented by one shelf of 5-to-20-year-old copies of assorted trade association publications.

In India, where $40 billion will be spent on telecommunications equipment in the next decade, Europeans have spent over $16 billion equipping a laboratory outside New Delhi to certify that locally made electronic components meet European specifications. The thinking: If India can sell components to Europe for use in European-built transponders, satellites and computers, it will earn the hard currency it needs to buy the finished products from Europe.

Japan's Ministry of International Trade & Industry currently has technical experts working abroad on five nations' standards programs. MITI has also brought standards personnel from 28 developing countries back to Japan, expenses paid, for language and technical training.

Why can't the U.S. counter the influence of the Japanese and the Germans? There is no central clearinghouse for product standards in the U.S. as there is in most other countries. The government is not involved. Instead, some 400 private and public groups develop standards for the various industries. And these groups haven't shown much interest in foreign standards.

So far the lone effort to protect trade with Saudi Arabia comes from legislation introduced by Congressman Mervyn Dymally (D-Calif.). The law, enacted last fall, directs Commerce to accept the Saudi invitation—and similar invitations from other trading partners—but to get the funding from private business.

That may prove more easily said than done. A group called the American/Saudi Roundtable is heading the fundraising effort, but things are not going well. Seems that the Roundtable's letters keep getting forwarded to the Corporate Philanthropy Office. So far the outfit has collected two sincere letters of support, from the U.S. Chamber of Commerce and the National Association of Manufacturers, but only about $85,000 in hard cash. That's one-third of what's needed to fund U.S. involvement for one year. A similar effort by German industry raised $5 million in 20 days.

Old habits die hard. For generations, U.S. business had its own huge market to sell to and simply didn't think much about exporting. Listen to Robert Toth, an American standards consultant to the World Bank: "American exporters still have a take-it-or-leave-it approach to their products," he says. "They say, 'We produced it to the UL standard. If it's good enough for the U.S., it's good enough for you.' " Faced with that attitude, a lot of foreign buyers are leaving U.S. goods alone.

OLDEST U.S. WINERY CELEBRATES ITS 150TH ANNIVERSARY

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. GILMAN. Mr. Speaker, the oldest continually operating winery in the United States, the Brotherhood Winery of Washingtonville, NY, is celebrating its 150th anniversary this month.

The beautiful mid-Hudson region of New York State has long been recognized as one of the leading wine producing regions in our Nation. The rolling hills of the Hudson, near the Catskill Mountains, are ideally suited for the growing of grapes and the producing of wine. Many fine wine companies flourish in the region; but Brotherhood is the oldest.

It was in 1839 that Jean Jacques, a French immigrant, produced the first commercial vintage of his wine, which was sold only for sacramental purposes. Jean Jacques' sons carried on this family business after his dealth in 1868.

In 1886, New York City wine merchant Jesse Emerson purchased the winery. Under his leadership, the winery began to sell its product to nonreligious customers. It was Jesse Emerson who constructed the majestic fieldstone buildings that visitors to Brotherhood Winery tour and admire to this day. Emerson also constructed the largest underground wine cellar in the United States, which is modeled after the famous wine cellars of Europe.

Brotherhood Winery continued functioning throughout prohibition by producing sacramental wines, and was purchased by L.L. Farrell in the 1920's upon the death of Jesse's last surviving son.

Today, Brotherhood Winery is enjoying the finest era of its long history. Brotherhood uses eight grape varieties, from throughout New York State, to produce its excellent wines. Internationally, Brotherhood's famous winemaster Cesar Baeza is winning praise for his premium wines from connoisseurs throughout the world.

"If you look at the giant oak casks in our wine cellars," says winemaster Baeza, "you realize that some of them have been helping produce and store wines since Martin Van-Buren was President of the United States. Some of the oak casks, capable of holding 800 to 3,000 gallons apiece, arrived at Brotherhood from the French cooperages where they were built, long before the Statue of Liberty touched our shores."

These massive casks, along with the famous fieldstone buildings, are highlights of the daily tours of the Brotherhood Winery open to the public.

Mr. Speaker, a special ceremony will be held on Saturday, May 20. This ceremony is being hosted by the current owners: Edwin D. Silvers, Cesar Baeza, Jim Cimino, Robert Markovits, and Michael Vernicari. The ceremony will attract young and old from throughout the Nation as they congregate to help celebrate a living monument to our Nation's past: a monument which has continued to be productive throughout its 150-year history and which enjoys its greatest success today.

Mr. Speaker, I invite our colleagues to join in congratulating Brotherhood Winery upon this milestone event.

WHY THE ELDERLY LOSE BY EARNING MORE

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. RITTER. Mr. Speaker, this month is "Older Americans Month." A month that we have set aside to honor those members of our society who have contributed so much to our Nation. Therefore, at this time it is especially fitting and necessary to seriously examine a tax system that effectively discriminates against those older Americans who choose, or need, to continue to work. Between the taxation of Social Security benefits—beyond $25,000 in overall income for single seniors and $31,000 for married couples; and paying the "earned income" tax—where, for every $2 earned above $8,800 in earnings, $1 must be given back in social security benefits); plus the new Medicare surtax; seniors face astonishingly high marginal tax rates. These tax rates are a major disincentive to seniors' working.

With demographics showing fewer younger workers coming into the work force, constriction in many labor markets across the country, and America's need for well developed skills, experience and judgment on the job, we need to encourage, not discourage, those seniors who choose to work beyond normal retirement age.

We need to rethink the way middle income seniors get taxed. Mr. Speaker, to emphasize this, I call the attention of my colleagues to an article by James J. Kilpatrick, appearing in the May 6 issue of Human Events. I include the article at this point.

WHY THE ELDERLY LOSE BY EARNING MORE—PART II

(By James J. Kilpatrick)

The complexities of Social Security may not make it a felony for certain old folks to work, but the law imposes heavy penalties nonetheless.

I wrote about the situation last month [HUMAN EVENTS, April 8, page 16] in reviewing a paper just published by the National Center for Policy Analysis in Dallas. The paper, by John C. Goodman, is titled "The Elderly: People the Supply-Side Revolution Forgot." In attempting to compress two of Goodman's tables I messed up his figures. Let me put the record straight, and then turn to a retired pharmacist in Bend, Ore., for a personal word.

First, consider the case of an elderly widow who likes to work and hates to be idle. Hundreds of thousands of persons are in the same situation.

Martha Simpson is 66 years old. Her job pays her $13,936 a year; she has a pension income of $11,064, and she receives Social Security benefits of $5,072, for a gross income of $30,072. This is offset by $2,950 in federal income tax, $1,047 in Social Security taxes (FICA), $355 in taxes on the Social Security benefits, and $496 in the new Medicare surtax. This leaves a net income of $25,224.

Now look what happens when Mrs. Simpson takes a job that gives her a $1,500 raise. Her wage income increases to $15,436; her pension remains at $11,064, but because she is penalized for working, her Social Security benefits fall by $750 (half of the $1,500 raise), for a gross income of $30,822. This is offset by $3,371 in income taxes, $1,159 in FICA taxes, $512 in her Social Security benefit tax, and $583 in the Medicare surtax. She is earning $1,500 more a year, but her net income has fallen to $25,197. Mrs. Simpson is earning more but keeping less.

This is lunacy, but this is how the system works. Consider another of Goodman's case studies, this one involving an elderly couple, each of whom earns $8,880. Their combined income is $17,760, augmented by $18,640 in pensions and $11,400 in Social Security benefits.

After paying income tax, FICA tax, benefit tax and Medicare surcharge, they have $41,095 left. Then one of them gets a raise of $1,000 a year. Are they better off? No, indeed. The cruelties of the system cost them $500 in Social Security benefits; their other taxes go up, and they wind up with $41,077, or $18 less than they had before.

Why work? Listen for a moment to Jim Peterson, 69 of Bend, Ore. He begins by noting a shortage of pharmacists in both government agencies and the private sector. Jobs are available and the work needs to be done. He writes:

"I also enjoy my work and am proud of my ability to perform as fast and as well as those who came to the profession more recently. The stimulation of mental activity is a vital part of my health and well-being.

"At the present time I receive about $8,400 annually from Social Security. Under the present rules I can earn an additional $8,880 per year and still keep all of the $8,400. But if I earn more than the $8,880 per year. I lose $1 of Social Security for every $2 of earned income over the cap of $8,880.

"This means that in 1988, when I earned about $18,000, the Social Security benefits were reduced by about $4,800. Combine this with the 13 per cent FICA tax for the self-employed, as well as the income tax, and the effective tax rate is about 65 per cent. My wife also has self-employment income, and when we go above $31,000 per year (adjusted gross), we have to pay some income tax on the Social Security income.

"I know that I'm not telling you anything you didn't already know. I just wanted to tell you how I feel about it: I don't feel good about it."

Peterson could just stop working when his annual earnings reach $8,880—thousands of retirees do just that—but he has to maintain some continuity if he is to keep up his skills. He asks, "Wouldn't it make good sense to eliminate the income tests altogether?"

It makes good sense to me. Something is absolutely, indefensibly wacky when middle-income old folks see their marginal income taxed at rates that make work a fiscal felony.

SCHOOL DAY OILSPILL LESSONS

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. MILLER of California. Mr. Speaker, on April 21 the Associated Press ran a story about a group of second- and third-graders in Ketchikan, AK. The children had created beach scenes in plastic containers.

When they arrived at class the students found someone had poured motor oil over the terrariums they had worked so hard to construct. The teacher wanted the children to experience in a small way the devastation felt by the people in Prince William Sound. Children have learned a hard lesson from this oilspill and have even lost a bit of innocence.

Mr. Speaker, we have an obligation to learn from this incident as well. We have an obligation to make sure that such needless waste of valuable and—when not misused—boundless natural resources does not happen again.

I'd like to share with my colleagues a few other letters from Bay area fifth-graders on the *Valdez* spill. Their candor provides a fresh perspective on the spill and its consequences.

DEAR CONGRESSMAN MILLER: Hi! My name is Claire. Our class did an essay about the oil spill. Is there anything else you can use to clean it up? I hope there is so the fishermen can take a break and so no more marine life will die. Please try.

Sincerely,

CLAIRE RECLOSADO.

DEAR CONGRESSMAN MILLER: Hi! We've heard of the oil spill in Valdez. We were concerned about this event, we also did activities to show we cared. Every bit of land belongs to everything on earth, but it isn't right taking land from animals is it? Well, good luck and please help the animals from getting hurt again.

Truly your friend,

MARY MANALOTO.

DEAR CONGRESSMAN MILLER: I think that you shouldn't let them drill in the Alaskan Wildlife Refuge.

SHAWN SMITH.

DEAR CONGRESSMAN MILLER: I'm worried about the wolves and animals in Alaska. From,

RICKEY E. MEDDERS.

DEAR CONGRESSMAN MILLER: I have heard of the worst oil spill ever occurred in the world. I think that it has caused too much trouble to the people as well as the wildlife. Please do something to have these people involved clean this up in order for the sea-life and birds to go back to their every formal life.

Sincerely,

DEBORAH DICKERSON.

DEAR CONGRESSMAN: We are talking about the oil slick. I used to live in Alaska. It is beautiful and this oil slick is harming it badly not to mention the marine life. Try to work faster!

Yours truly,

JAMES JEE BROGDEN.

DEAR CONGRESSMAN MILLER: I'm concerned about the oil spill. Somebody, but I don't know who, wants to do an oil experiment on a land where animals live. I don't think that's fair because animals have to have somewhere to live just like people. Why don't they just do the experiment somewhere else?

Sincerely,

KENITRA DAVIS.

THE CHALLENGE TO INDIAN TRIBAL GOVERNMENTS

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. RICHARDSON. Mr. Speaker, I would like to bring to the attention of my colleagues the following article on the history and current situation of the Navajo tribal government. I feel the article is especially timely in light of the recent hearings on the Navajo tribal government in the Senate, and will help put the present turmoil in context. The author, John R. Brown, served from 1975 to 1979 as director of the Navajo Nation's Office of Management and Policy Analysis. He offers an informed perspective on our Nation's largest Indian tribe and presents suggestions for increasing the accountability of tribal government to the Indian people that merit our serious consideration.

The article follows:

[From the Albuquerque Journal, Feb. 26, 1989]

WINDOW ROCK CRISIS CREATES OPPORTUNITY FOR POLITICAL REFORM

(By John R. Brown)

Fallout continues from hearings of the Senate Select Committee on Indian Affairs'

subcommittee investigating "corruption" in Indian Country. The hearings have created an impression that tribal governments—Navajo in particular—are unusually subject to corruption and inherently unstable.

The Navajo Tribal Council's attempt last week to force Chairman Peter MacDonald into administrative leave appears to be a serious and deliberate first step toward significant reform.

Unfortunately, MacDonald's assertion that "accepting gifts" is just the "Navajo way" will hardly reassure senators that the stories they have heard don't reflect a pattern of fraud which Congress must stop. That could seriously impede tribal political and economic development—which will be achieved through less control by Congress and more accountability to the Navajo people.

It is important to recall that prior to U.S. domination, Navajos had no central, hierarchal political structure. The economic unit, the extended family, was largely self-sufficient. Navajos were a cultural nation, bound together by language, land and tradition. Political authority was decentralized and personal.

After agreeing to the 1868 Treaty, the Navajo people returned to a fraction of their aboriginal homeland, where the BIA set up a form of "indirect rule." After oil was discovered, a single entity was needed to "speak for the Navajos" and sign leases in their name. In 1923, the Navajo Tribal Council was established.

Navajos learned to use this BIA "front," the tribal government, to challenge inimical policies and demand federal adherence to treaty obligations. About 1950, the federal government tried to end its responsibility for protecting tribal interests through a policy known as "termination," and Navajo leaders began to make the Tribal Council their own instrument for defending their sovereignty and guaranteeing the integrity of their land base.

Independence movements of emerging nations during the 1950s focused first on attaining political power. Like them, Indian tribes struggled for political autonomy and successfully regained recognition of their "limited sovereignty." In the 1960s, "termination" was abandoned. By 1974, when Congress passed the Indian Self-Determination Act, Navajo leaders had already built what seemed to be a solid base for a strong Navajo Nation government.

The 1960s began with optimism: infusing sufficient capital would cause tribal economies to "take off." Federal funding for Navajo programs increased. The Navajo Nation government began to review the terms of leases under which multinational companies were extracting Navajo mineral wealth, and to insist on getting a better deal.

Productively investing this new revenue to build a Navajo economy was not easy. Because private enterprise hardly existed, planners assumed the NNG would have to be the "engine" of development. In MacDonald's first term as chairman (1971–75), he launched an ambitious 10-year plan. The reasons for its failure are complex, but clearly include export of large profits by mining interests and deliberate strategies by border town businesses to maintain Navajo dependence.

As the prospect of realizing economic goals receded, "regime maintenance" became important. The appearance of progress, at least, could be sustained while federal funding was high and energy prices soared. MacDonald was twice reelected based on his ability to reward constituencies which supported his administration. His loss in 1982 coincided with shrinking federal funding.

The concept of the Navajo Nation as a political entity is still an abstratction to most Navajos at the hogan level. The NNG has nearly replaced the BIA in delivering services, but that fact doesn't require Navajos to owe allegiance to it any more than to the Bureau. To many Navajos, the legitimacy of the NNG rests in their ability to send a relative to Window Rock as a Council delegate to extract resources like power line extensions or road improvements.

The idea that their government can legitimately extract resources from them is not historically part of what Navajos understood "government" (either in Washington or Window Rock) to be about. Proposals that Navajos should pay tribal taxes, serve as teachers in Navajo schools in exchange for scholarship assistance, or treat tribal housing loans as repayable obligations rather than as grants, fared poorly in the recent past. Navajos are not more inclined than anyone else to seek a free lunch. But the NNG is still viewed by many as something external—a pipeline for benefits. Thus the diversion of public wealth to private interests comes as no shock to many Navajos. ("Allegations Don't Faze Navajos," read one Journal headline on reaction to the Senate hearings.)

As revenues decline, however, diverting national income to reward favored constituencies with economically non-productive benefits risks bankrupting the treasury. (The Council's agenda this session was to include a proposal to mortgage presumed future mineral revenues to sell $100 million worth of bonds for uses whose economic impact cannot be predicted.)

What alternatives exist? Congress will be tempted to tighten controls to make tribes more "accountable," making it more difficult for them to govern effectively. Instead, both Congress and the Navajo Tribal Council should pursue policies which increase tribal governments' accountability to the Indian people.

The 1988 Self-Determination Act amendments encourage development of tribal self-government. Congress should go further. Self-governance is not simply the transfer of BIA programs to tribal control. That merely shifts an administrative burden, often without considering the total cost of the transfer to the tribe.

Self-governance means developing tribes' institutional capacity to plan and implement policies and programs to meet the needs of their people. This requires that the people know what their governments are up to and hold them accountable for their actions. Tribes should have greater flexibility to set priorities for the use of all funds, subject to oversight by tribal members themselves. Incentives are needed to strengthen tribal councils and create other means for participation and information sharing.

For the Navajo Tribal Council, this crisis presents a unique opportunity to build a securer foundation for NNG legitimacy, by developing local institutions accountable to the people. The council should encourage the development of local groups—business associations, cooperatives, school boards, etc—concerned with economic or social progress, as well as local governments.

Because chapters (Navajo local administrative units) tend to be dominated by certain families, often represent only traditional economic (grazing) interests, and have no real authority beyond veto power over any proposed change, they may not be the best vehicles for building new, responsive institutions. The MacDonald administration regarded loss of central control as a threat to the nation. It saw demands for more local autonomy by "growth center" communities as divisive and would not delegate decision-making power.

The council can now enact enabling legislation to allow growing communities to establish special districts or general local governments which can plan and make land use decisions, and control locally raised funds for specific purposes. These new communities, including younger people less wedded to traditional economic patterns, may become agents of change, forging new models for economic and political relations.

The Navajo Tax Commission recently proposed instituting income, sales and property taxes affecting tribal members. The proposal was criticized because the new revenues would accrue to the general fund. But if it were modified to let communities keep a share of the taxes raised locally, it might be more attractive.

Such policies will strengthen the legitimacy of the NNG, by giving Navajos a reason to hold their government accountable to them. Real local government will offer Navajos opportunities to develop "citizenship values" by participating in making informed choices about financing and providing public goods.

These reforms will enable Navajos to lessen their reliance on traditional family ties of affection which reached into government only to drain resources from it, and to strengthen participation in the civic realm with its insistence on the reciprocal rights and obligations of citizenship. This change is essential for sustaining Navajo political autonomy and economic progress.

LIBERALS ENCOURAGE SOVIET ARROGANCE

HON. GERALD B.H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. SOLOMON. Mr. Speaker, for anyone who is paying attention, it's obvious that Mikhail Gorbachev, behind all that charm, may be the most dangerous Soviet leader yet.

Through smiles and gracious manners, he may yet achieve what is, alongside scuttling our SDI, the highest goals of Soviet foreign policy, putting a wedge between the United States and Europe.

As usual, the Soviets are getting their assistance from the American left-wing, which believes as an article of faith that America is to blame for all the tensions in the world. That combination of Soviet arrogance and Western liberal naivete was well described by columnist William Safire.

I submit his column for the RECORD.

WESTERN DISARMAMENT LOBBY AIDS GORBACHEV

(By William Safire)

ATLANTA.—Emboldened by the success of his scheme to subvert NATO with a Russo-German entente, Gorbachev has just issued an ultimatum: Unless the Western alliance drops its intention to modernize the short-

range missile that helps Europe offset Soviet military superiority, the Soviet Union will violate the intermediate-range treaty it signed with such fanfare only last year.

How's that for blustering arrogance? Unless he gets his way—unless we give up our right secured in previous treaties to maintain a credible local nuclear deterrent—then forget about Reagan's INF deal.

This "new thinking" is revealed to be the same old duplicity: while the U.S. considers treaties to carry the force of law, Gorbachev has just vividly demonstrated he does not consider his nation bound by treaty any more than did his predecessors.

Does he expect to get away with threatening unilateral abrogation? Yes. He counts on his apologists in the West's disarmament lobby:

West Germany's devious foreign minister, Hans-Dietrich Genscher, who sees a Fourth Reich rising from NATO's ashes to dominate Europe's economy; the grand old American negotiator Paul Nitze, whose ill-advised "walk in the woods" would have given the Soviets what they later had to trade real missiles for in the now-threatened INF treaty; the brilliant Nitze biographer and disciple, Strobe Talbott of *Time* magazine; Democratic Sens. Sam Nunn and Joseph Biden, grabbing any device to whack at executive power, and assorted old mutual-assured-destructionaries.

Adding to the weight of the Gorbachev intimidation, and contributing to the systematic snookering of Secretary of State Baker in his foreign travels, is support for the Soviet no-nuke position from the ambush of deep background by Ronald Reagan.

The former president, irritated at the contrast in style ostentatiously shown by his hands-on, in-touch successor, has let it be known that Bush is failing to capitalize on the momentum of detente established in the Gorbachev-Reagan embraces.

Thus does the long-trusting Left combine with the newly entranced Right to squeeze the sensibly cautious Center. Resisting the stampede to denude our defenses, President Bush last week brought forth the fruit of his four-month strategic review in an important speech at Texas A&M.

"Containment worked," he said, crediting the recent Soviet reforms to internal contradictions and Western resolve rather than any Kremlin change of heart.

After dutifully touching the bases of hope ("we are approaching the conclusion of an historic postwar struggle"), he proposed that we move "beyond containment" to a "new path"—one that will respond to realistic change in Soviet behavior where it most endangers freedom.

"Promises are never enough," he warned, and listed the means to earn trust; reduce the overwhelming Soviet forces, free Eastern Europe, stop supporting terror in the Middle East and subversion in Latin America, and "achieve a lasting political pluralism and respect for human rights."

This unsentimental better-safe-than-sorry approach was not what Gorbachev or the world's detenteniks wanted to hear. They wanted a "bold new initiative"—specifically, a pre-emptive concession to strip our forces of nuclear arms and make it possible for Gorbachev to maintain military superiority on the cheap.

But the Bush administration's prudent strategy does not throw away containment's gains. To his meat-and-potatoes approach, he felt the need to add an "open skies" sauce, which will be useful in verifying conventional arms cuts; the central thrust, however, is to press for what is in the free world's interest; free the captive nations and peoples, permit market forces to introduce prosperity and stop causing trouble around the world.

The no-nonsense strategy, previewed in Bush's recent speech about Poland, drew on the thoughtful historical analysis made public April 1 by Robert Gates, deputy national security adviser, who reminded us "for 70 years we repeatedly have seen a system in crisis proclaim reform and turn to the West for help while the essential features of that system at the end of the day remained unchanged."

I remember writing hail-detente speeches for President Nixon; this time around, I'm for Bush's "new path," requiring the steady earning of trust.

Gorbachev already has succeeded in fraying the free world at its German edge, and Genscher is in effect sending the Americans home.

Good luck, Europe, on your next treaty with the East; the Soviet dictator has just reserved the right in advance to abrogate it at will.

GOODWILL AND BAD FAITH

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. PORTER. Mr. Speaker, I support tough capital standards for financial institutions, but these standards must be fair.

Following a rash of S&L failures in the early 1980's, the Federal Home Loan Bank Board urged healthy S&L's to acquire insolvent S&L's and promised them that their capital requirements would be adjusted for the debt burden that they took on, a practice known as supervisory goodwill which is accepted under the generally accepted accounting principles. The solvent S&Ls saved FSLIC in the neighborhood of $25 billion by accepting this burden.

Now there is talk of discounting supervisory goodwill toward capital requirements, an action that would bankrupt as many as 75 otherwise healthy S&L's in Illinois alone and cost the taxpayers billions of dollars.

If supervisory goodwill is discounted in capital requirements we will be welching on our promise to S&L's and imperiling the very existence of the thrifts that responded to the call for help from the Home Loan Bank Board in the early 1980's.

INTRODUCE LEGISLATION TO COMPENSATE FOR INJURY OR LOSS OF MONTANA'S 1988 CANYON CREEK FIRE

HON. PAT WILLIAMS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. WILLIAMS. Mr. Speaker, today I am introducing legislation to provide compensation for injury or loss as a result of the 1988 Canyon Creek fire in Montana.

Mr. Speaker, on June 25, 1988, lightning started a fire in the heart of Montana's Scapegoat Wilderness. The resulting blaze, which came to be known as the Canyon Creek fire, was declared a "prescription fire" and allowed to burn in accordance with a comprehensive fire management plan implemented in the Scapegoat and Bob Marshall Wilderness Complex in 1981.

Although state-of-the-art techniques were apparently employed to predict the fire's behavior and keep it inside designated boundaries, the Canyon Creek fire escaped the wilderness.

Firefighting personnel and equipment were limited for the Canyon Creek fire. Priority was given to wilderness—fires that did not meet prescription criteria—which were raging throughout the west. Helicopters were urgently needed to suppress spot fires on the west side near Lake Mountain but were unavailable. Because of the lack of manpower, crews could not attack a critical spot fire on the east side until 48 hours after it was reported.

The Canyon Creek fire continued to threaten private property. Efforts were focused on the North Fork of Blackfoot, homes near Cooper's Lake, and on fronts advancing east toward the plains. On September 6, more than 75 days after the fire had started, a catastrophic wind tripled the size of the Canyon Creek fire. Fueled by gusts in excess of 50 miles per hour, the fire blasted through containment lines, threatened crews, and forced evacuations on both sides of the Continental Divide. The firestorm moved through 180,000 acres in a single burning period. Included in the destruction were 40,000 acres of mostly private land, millions of board feet of marketable timber, ranch buildings, 200 miles of fence, 1,500 tons of hay, and 100 head of cattle.

No lives were lost that night, but people fled their homes only to return and find outbuildings burned and cattle dead.

By the time the Canyon Creek was contained on September 18, it had covered more than 240,600 acres of forest and range land and consumed many thousands of acres of private pasture, timber, buildings, livestock, and other personal property.

Although the Forest Service has contracted to rebuild 40 miles of fence to keep livestock off roadways and has purchased and helped distribute 1,000 tons of hay, those efforts just are not enough.

As a result, those folks who had private property losses are left with only one option: the Federal Tort Claims Act, which is the only readily available means of addressing possible losses. A major test of coverage under this act is the presence of negligence. Some acts may be viewed as negligent but losses resulting from such acts might be exempt from coverage by the "administrative discretion" exception in the act.

It seems to me that the Federal Government has a responsibility to provide more assistance than has been shown to date for those folks who incurred losses to their property as a result of the management of the fire in the Scapegoat Wilderness. The fact is that if the fire were started on private land by the landowner and spread to the wilderness the

Federal Government certainly would be pursuing compensation for damages and the expense of fighting the fire. Now that the shoe is on the other foot the best the Federal Government has done is provide 40 miles of fence and a few 100 tons of hay to those private landowners. This legislation will assist those folks recover damages for loss of qualified property as a result of the fire in a timely and efficient manner.

LEBANON, TO BE SILENT IS TO BE AN ACCOMPLICE

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. GEJDENSON. Mr. Speaker, Syria is the problem in Lebanon. Syria is destroying the very people who love their country too much to leave it. Ninety-eight percent of the recent casualties from Syrian fire are women, children, and the elderly. Lebanese Gen. Michel Aoun has pleaded with the Syrians to shell his men. "Why don't they target my army: I'm the one firing at them." With 40,000 troops, Syria has occupied almost 70 percent of Lebanon since 1976. According to Joyce R. Starr, Center for Strategic and International Studies in Washington, Syrians have caused more casualties than Lebanon's civil war and the Israeli 1982 incursion combined.

At the same time, annual exports of drugs from Lebanon, particularly from the Bekaa Valley now controlled by Syrian forces, amount to $1 billion a year. Flora Lewis, veteran foreign affairs journalist, estimates that this amount is more than the total annual Arab contribution to the PLO. If the United States is numbed by the devastating carnage in Lebanon, the drug issue alone should renew our concern about Lebanon.

The history of Lebanon is the history of violent and oppressive foreign intervention counterbalanced by its role as a haven and refuge for those suffering from political and religious persecution. It is a history of war, domination, and crisis offset by the richness, wealth, and diversity of its people and natural resources. Throughout history, Lebanon has served as a magnet for those seeking power and control, and for those seeking shelter from persecution and oppression.

In the Ancient World, Lebanon supplied timber to its neighboring powers throughout Egyptian, Assyrian, and Persian rule. The "Mountain," as Lebanon was called, was a haven for those opppsed to Arab domination. Christian nomads made advances in the seventh century and the "Mountain" assumed its historic function as a refuge for racial and religious minorities. Gradually Islam penetrated Lebanon and in the 9th and 10th centuries Muslim sects began to settle there. In the 11th Century the Druze became established.

The Ottoman period was one of ravage, intrigue, foreign alliance, and open force. The Ottomans fostered a mistrust between the Druze and the Maronities that was used to maintain their influence over Lebanon. The later 19th century witnessed increasing prosperity, but by 1918, Lebanon was occupied by British and French forces. The Lebanese spent much of the early decades of the 1900's trying to oust the French and by 1946, French troops withdrew from the country.

In 1958, a political crisis accompanied by widespread insurrection led to U.S. involvement with 10,000 U.S. troops. By 1968, Palestinian guerrillas increased their activities and Lebanon became a target for Israel's grievances against the Palestinians. And, through the 1970's, Lebanon has suffered from the basic problems of the Christian-Muslim balance and intercommunal fighting that has never been far from the surface. By 1976, Syria was increasingly involved in Lebanese affairs and has remained so.

Since the outbreak of civil war in April 1975, 100,000 have died and a once prosperous country of 3.5 million people is now in virtual ruin. Since March 14 over 350 people have been killed and over 1,000 wounded. The latest assassinaltion of one of Lebanon's leading voices of moderation, Sheik Hassan Khaled, has dealt a serious below to efforts to halt the bloodshed.

The tragic history, including the massacre of our marines, makes the United States wary of any real involvement in Lebanon. The politics of Lebanon are messy, and yet, anyone concerned about peace in the Middle East, must focus on the politics of Lebanon. The latest round of extreme artillery fire in Lebanon cannot be met with a deafening silence on the part of the United States. We must speak out on the estimated 100,000 shells that have fallen on Christian areas in just an 8-week period.

The politics of Lebanon are interwoven with the politics of the region. In the last 4 years, Syria has transferred its alliance with the Christians to the Muslims and Palestinians. General Aoun, the country's Christian leader is matched with PLO Chairman Yasir Arafat, both hostile toward the Syrian President Hafez al-Assad. Iraq, another foe of Syria, is providing arms to General Aoun's forces. The bizarre political alliances are just one indication of the complex politics of the country, and the importance of Lebanon in any regional peace effort.

At the same time, we must come to terms with the reality that peace in the region has never been predicated on Israel's peace initiatives. The carnage in Lebanon dramatically demonstrates the intricate politics involved and the important role Syria has played in prolonging the agonies of Lebanon and the region.

U.S. Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze have called for "a national dialog on reconciliation on Lebanon." They both support the "sovereignty, independence, and integrity" of Lebanon. But we need to do more. Reagan's ill-fated "policy," in quotes because there was no policy, proves that we must contribute more than our hostages and victims as we look to a role in Lebanon's future.

We need to work with our allies and redouble our recent modest efforts to forge a meaningful cease-fire. Lebanon is not for the fainthearted. We must speak out in a clear and forceful manner on the role of Syria in the asphyxiation of a nation. We are all weary of the bloodshed and carnage that confronts us daily as we view the routine destruction of a people and a country. But the bloodletting in Lebanon cannot be met by silence. Our humanity dictates that we must be heard.

APPLIED TECHNOLOGY EDUCATION AMENDMENTS

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. HAWKINS. Mr. Speaker, during our debate on the Miller amendment to disregard benefits under the Perkins Act in determining eligibility under various other Federal programs, I referred to correspondence I have exchanged with Chairman ROSTENKOWSKI of the Ways and Means Committee and Chairman DE LA GARZA of the Agriculture Committee. I would like to insert these letters in the RECORD at this point:

COMMITTEE ON EDUCATION AND LABOR,
Washington, DC, May 8, 1989.

Hon. E DE LA GARZA,
Chairman, Committee on Agriculture, Washington, DC.

DEAR MR. CHAIRMAN: The Carl D. Perkins Vocational Education Act Amendments, H.R. 7, is scheduled for consideration on Tuesday, May 9. At that time, I intend to offer an amendment to exclude as income for federal program eligibility, financial aid, student assistance, and dependent care received under the Perkins Act.

Under current law, federal programs, including the Food Stamp Program, count student financial aid, transportation costs, and child care administered through the Perkins Act as income in determining program eligibility. The result is that financially disadvantaged students, most of whom are women and single parents, are forced to choose between a decrease in their federal program allotment and attending their local community college or training program. This is contrary to Perkins' stated purpose of bringing more women into the vocational education system, and is not the result we intended when we passed the 1984 Act.

A similar problem existed with assistance received under the Higher Education Act. Recognizing the unfairness of this situation, we amended the Higher Education Act of 1986 to include language which excludes financial aid and student assistance received under the Higher Education Act from being counted as income for the purposes of determining eligibility for federal programs.

The language of my amendment to the Perkins Act mirrors the exact language of the Higher Education Act with the additional exclusion of "dependent care."

During the Perkins reauthorization hearings, witnesses testified that many women received reduced program allotments because they received child care assistance from the Perkins Act. Many women, forced to choose between feeding their children and attending school, dropped out of the one program which could have helped them attain financial independence from federal assistance programs.

My amendment corrects that problem by excluding dependent care when determining program eligibility. Although we expect the number of women who will be able to take advantage of the "dependent care: exclusion to be relatively small, this exclusion is ex-

pected to have significant impact for those able to benefit from it.

I am aware that my amendment presents issues over which your Committee may claim jurisdiction and would like your advice on how to proceed expeditiously in conference should my amendment be adopted. I understand that our staffs have been working together to address that issue.

I would appreciate knowing your response to this jurisdictional matter as soon as possible. If you have further questions, they may be addressed to Mr. Jack Jennings, counsel, at x54368.

Sincerely,

AUGUSTUS F. HAWKINS,
Chairman.

COMMITTEE ON AGRICULTURE,
Washington, DC, May 8, 1989.

Hon. AUGUSTUS F. HAWKINS,
Chairman, Committee on Education and Labor, Washington, DC.

DEAR MR. CHAIRMAN: Thank you for your letter informing me of the proposed amendment to H.R. 7 that would affect the Food Stamp Program, a program under the jurisdiction of the Committee on Agriculture.

The amendment provides that the portion of student financial aid received pursuant to the Carl D. Perkins Vocational Education Act, by students attending school on at least a half-time basis, that is made available for attendance costs shall not be counted as income or resources in determining eligibility for assistance with Federal funds. As you know, section 5(d)(3) of the Food Stamp Act, as amended, already excludes from income such benefits "to the extent that they are used for tuition and mandatory school fees." The Committee on Agriculture intends to explore in detail the treatment of financial assistance in the Food Stamp Program when the Food Stamp Act comes up for reauthorization next year.

In the interest of expediting consideration of H.R. 7, I do not intend to request referral of the matter to the Committee on Agriculture. However, this action is not intended to waive the Committee's jurisdiction over the Food Stamp Program, and should this legislation go to Conference, the Committee on Agriculture intends to request to be included as conferees on this and on any other provision affecting a program within this Committee's jurisdiction.

I would appreciate your inclusion of this letter exchange in the record.

Sincerely,

E (KIKA) DE LA GARZA,
Chairman.

COMMITTEE ON EDUCATION AND LABOR,
Washington, DC, May 8, 1989.

Hon. DANIEL ROSTENKOWSKI,
Chairman, Committee on Ways and Means, Washington, DC.

DEAR MR. CHAIRMAN: The Carl D. Perkins Vocational Education Act Amendments, H.R. 7, is scheduled for consideration on Tuesday, May 9. At that time, I intend to offer an amendment to exclude as income for federal program eligibility, financial aid, student assistance, and dependent care received under the Perkins Act.

Under current law, federal programs, including the Food Stamp Program, count student financial aid, transportation costs, and child care administered through the Perkins Act as income in determining program eligibility. The result is that financially disadvantaged students, most of whom are women and single parents, are forced to choose between a decrease in their federal program allotment and attending their local community college or training program. This is contrary to Perkins' stated purpose of bringing more women into the vocational education system, and is not the result we intended when we passed the 1984 Act.

A similar problem existed with assistance received under the Higher Education Act. Recognizing the unfairness of this situation, we amended the Higher Education Act of 1986 to include language which excludes financial aid and student assistance received under the Higher Education Act from being counted as income for the purposes of determining eligibility for federal programs.

The language of my amendment to the Perkins Act mirrors the exact language of the Higher Education Act with the additional exclusion of "dependent care."

During the Perkins reauthorization hearing, witnesses testified that many women received reduced program allotments because they received child care assistance from the Perkins Act. Many women, forced to choose between feeding their children and attending school, dropped out of the one program which could have helped them attain financial independence from federal assistance programs.

My amendment corrects that problem by excluding dependent care when determining program eligibility. Although we expect the number of women who will be able to take advantage of the "dependent care: exclusion to be relatively small, this exclusion is expected to have significant impact for those able to benefit from it.

I am aware that my amendment presents issues over which your Committee may claim jurisdiction and would like your advice on how to proceed expeditiously in conference should my amendment be adopted. I understand that our staffs have been working together to address that issue.

Sincerely,

AUGUSTUS F. HAWKINS,
Chairman.

COMMITTEE ON WAYS AND MEANS,
Washington, DC, May 9, 1989.

Hon. AUGUSTUS HAWKINS,
Chairman, Committee on Education and Labor, Washington, DC.

DEAR MR. CHAIRMAN: Thank you for your letter alerting me to an amendment you plan to offer during consideration of H.R. 7, the Carl D. Perkins Vocational Education Act Amendments. The amendment would exclude as income certain benefits received under the Perkins Act for purposes of determining eligibility for Federal programs.

This amendment could apply to a variety of Federal programs, including several within the jurisdiction of the Committee on Ways and Means, the most important of which is the Aid to Families with Dependent Children (AFDC) program. Because existing AFDC regulations appear to be consistent with your amendment, I have no objection to the House considering it.

Thank you for taking the time to bring this matter to my attention. I am happy to work with you on this amendment, and trust that this will not serve as a precedent altering the responsibility which both of our committees have for determining eligibility for programs within its jurisdiction. I would appreciate your making this letter a part of the debate on your amendment.

With warm regards, I am

Sincerely,

DAN ROSTENKOWSKI,
Chairman.

TRIBUTE TO THE U.S. CENSUS

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. GREEN. Mr. Speaker, I rise today to pay tribute to the U.S. Census and to introduce a resolution to commemorate its bicentennial. The decennial census was established with the founding of the American Republic and has been integral to the representative form of government that we have shared under the U.S. Constitution. Article 1, section 2 of our Constitution sets forth the purpose of a census to establish a truly representative government.

The census has been important to the distribution of Federal funds to the States for numerous programs ranging from mass transit to community development block grants. The census was necessary to give effect to the Supreme Court decisions regarding the apportionment of electoral districts and the rule of one person, one vote. In our quest for knowledge, the census has been instrumental in the development of data processing and has provided information that is vital to marketing, economic planning, public policy, and the analysis of social trends. In addition, the census creates jobs. The Department of Commerce will hire approximately 480,000 temporary employees for the 21st decennial census. That will be the largest peacetime personnel mobilization ever undertaken by the Federal Government.

For all its merits, it is important that we in Congress recognize the bicentennial of the U.S. Census. My resolution would encourage the Commission on the Bicentennial of the U.S. Constitution and the Secretary of Commerce to observe the bicentennial of the census with the appropriate ceremonies and activities. I encourage my colleagues to support the resolution because I believe that proper recognition will greatly improve the quality of the 1990 census.

TRIBUTE TO THE SACRAMENTO ARMY DEPOT

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. MATSUI. Mr. Speaker, it is a tremendous pleasure to rise on this occasion, to offer a well deserved tribute to the Sacramento Army Depot. Earlier this spring, the Sacramento Army Depot was named to be the recipient of the Army's "Community of Excellence" Award as the best small Army installation in the United States.

Base officials and community leaders have traveled from Sacramento to gather at the Pentagon this morning to receive this award. I

am proud to be able to join with Army officials to honor the Sacramento Army Depot, and to thank them for a job well done. The Army Depot, which employs approximately 3,000 civilians and 300 military personnel, is often cited for the role it plays in the greater Sacramento economy. This award, however, signals our recognition of the outstanding dedication, expertise and pride in workmanship demonstrated by the depot's workforce.

Col. Richard T. O'Neill, Commander of Sacramento Army Depot, Andrew G. Skonberg, Civilian Executive Assistant, and their outstanding staff, can be justifiably proud of their efforts to implement a program of total quality management. The Army Depot, which is primarily responsible for the Army's communications and electronics repair, has earned its reputation for providing a top-quality product to its customers. The award being presented today is simply further proof of the outstanding work that goes on each day at the Army Depot.

Along with a trophy, as well as an Army Community of Excellence flag, the Sacramento Army Depot will recive a check for $100,000, which can be used for quality of life improvements at the base. This award is a most appropriate way to reward all those whose efforts have led to this achievement. These funds can be used to benefit all those who work at the base, to improve the quality of life for every employee at the facility.

Mr. Speaker, I am proud to be able to offer my congratulations to the Sacramento Army Depot for receiving this high honor. I know that they will continue to earn the respect, both within the Army, and in the Sacramento area, that the Community of Excellence Award represents.

AGUSTUS A. ADAIR, PH.D: FAREWELL TO A POLITICAL MENTOR

HON. KWEISI MFUME

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. MFUME. Mr. Speaker, today I rise in honor of the memory and the life's work of Dr. Agustus A. "Gus" Adair. Gus Adair passed unexpectedly from this world on Friday May 12, 1989. I was deeply saddened upon learning of Dr. Adair's death and immediately began calling everyone I knew to share our grief over the passing of an honest gentleman, scholar and Christian.

This morning I attended the services for Gus at Union Baptist Church in Baltimore, where he attended service for many years. Rev. Harold Vernon Dobson, Rev. Wendall Phillips, Judge Joseph Howard, Dr. Homer Favor as well as many members of the Union Baptist Church family, and other prominent members of Baltimore's political and academic communities came out to bid their farewell to a friend whom we shall miss dearly.

Mr. Speaker, those of us within this great Chamber know that Gus Adair was no stranger to Capitol Hill. Dr. Adair came to the Congress in 1961 as an American Political Science Association fellow. At the time of his arrival to the Hill, Washington only had four lawmakers of African-American descent and very few such staff persons. Gus Adair was an ardent student of political science and he quickly mastered the intricacies of the congressional policies and procedure. Gus Adair learned and then taught his students that Congress is built on more than just personalities. Success and effectiveness are built on the twin foundation of desire to help people on one hand, and the knowledge of how to get things done on the other.

In 1967 Gus began meeting privately with an informal think tank of Baltimore community activists and intellectuals known humorously by friends as "the Goon Squad." The Goon Squad met to discuss strategies and mobilization efforts to combat race discrimination through economic and political empowerment. It was during this time that my predecessor, the Honorable Parren J. Mitchell, tapped Dr. Adair's experience and dedication to equality to organize his campaign efforts of 1968, 1972, and 1974. Parren often stated that he drew Dr. Adair into his inner circle because of Gus' invaluable judgment, wisdom, and "absolute integrity." These were the very qualities that encouraged Parren to later enlist Gus Adair's support in the formation of the Congressional Black Caucus in the early 1970's.

Gus Adair served as the executive director of the Black Caucus from 1973–75. Dr. Adair took pride in the part that he played in building the Black Caucus and those Members of the caucus who were here in the House during that period can attest to his leadership, humility, unassuming demeanor and charismatic attitude toward the success of this endeavor.

Mr. Speaker, I had the opportunity of experiencing my personal relationship with Dr. Adair evolve from an instructor 15 years ago, to a colleague at Morgan State University, political mentor and friend. While a student of Dr. Adair's at Morgan State, I recognized early that Gus was a progressive political intellectual from the old school, with the fight and determination for equal justice and freedom ebbing from his words and his scholarly writing. Gus Adair always took personal pride in my political career from my beginnings with the Baltimore City Council in 1979, to my second term in the U.S. Congress.

Mr. Speaker, Agustus A. Adair was one of the seven opponents who ran in the 1986 Democratic primary for the Seventh Congressional District seat. The race was a hotly contested campaign which required everything that each candidate had to offer. You could always count on Gus Adair to be well prepared to eloquently answer any questions asked during the candidates forums we attended together. In fact, Gus was the first one to congratulate me upon my election night victory.

Mr. Speaker, over the last two decades Morgan State University's Political Science Department has arguably produced more elected officials than any other school in Baltimore City. If there is one element that binds all of these individuals together, it is the instruction and inspiration to serve the people that we received from Dr. Adair. Gus Adair was a complete person. He was consistently active in his church and countless number of community organizations. He always believed that if you were not in the business of helping people then you were not doing anything.

Mr. Speaker, reducing Agustus A. Adair's life's work and dedication into a statement was probably one of the more difficult tasks that I have ever undertaken. His words of personal encouragement and the stories of his days on Capitol Hill still run through my mind today. I thank Gus Adair for sharing his knowledge and expertise with those of us who expressed an interest in politics and Government. If Dr. Adair recognized that you had the potential to go on to do great things for your community, then he let you know it, and showed you the best route to take and the people you needed to speak to.

Finally, Members of Congress, the Congressional Black Caucus, Morgan State University, Union Baptist Church, and the entire city of Baltimore has lost a mover and shaker. Agustus A. Adair stood by his life long convictions to his faith and the whole family of man. Although he has departed this world in the flesh, his memory shall forever live within the dreams and aspirations of countless people he positively influenced through his honesty and integrity.

TWO OUTSTANDING ST. CLARE GRADE SCHOOL TEACHERS RETIRE

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. HERTEL. Mr. Speaker, I rise today to recognize two outstanding teachers, Connie Minkwic-Wisniewski and Mary Hynes who are retiring after over 25 years of service to St. Clare Grade School in Grosse Pointe.

Each one has touched the lives of many students and will be missed deeply by the entire St. Clare community. Connie began her teaching career in 1960 teaching the first grade. She has taught first grade her entire career and has enjoyed every minute of it. She is best known for her marvelous sense of humor which has made her popular with all of the students.

Mary began teaching at St. Clare in 1968 and has spent most of her career teaching second grade and has taught third grade for 3 years. She, like Connie, enjoys working with young children and is known to be gentle and patient with all of the students. She is looking forward to enjoying her free time and has already signed up to take an art class.

Both Connie and Mary have touched the lives of many students at St. Clare Grade School and will always be remembered for their lifelong dedication to education. My colleagues please join me in honoring these outstanding teachers and wishing them well as they enter their retirement.

SALUTE TO MATHCOUNTS CHAMPION CARWIL JAMES

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. STOKES. Mr. Speaker, the front pages of our Nation's newspapers are often filled with stories about a nation plagued by drug abuse and violence. Sadly enough, these negative reports that dominate the media involve our youngest and most vulnerable citizens—our children. It is, therefore, heartwarming to hear accounts of youth who haven't fallen victim to these problems, and who have excelled beyond our highest expectations.

Such is the case of Carwil James, a student at the Hawken School in my congressional district of Cleveland, OH. Carwil was one of four students to represent his school and the State of Ohio in the 1989 National Mathcounts competition recently held in Washington, DC. The competition provides young scholars the opportunity to exhibit their mastery in math and to compete with their counterparts from across the Nation. I am pleased to report that Carwil and his Hawken teammates placed in the top 10 in this year's event.

Mr. Speaker, I was honored to welcome Carwil and his parents, Mr. and Mrs. Frank James, to Washington during their stay. Not only has he excelled in the field of mathematics, but this bright and articulate 13-year-old is a computer whiz who authors a computer newsletter, is enrolled in the Center for Talent Development at Hawken School, maintains a 3.8 grade point average, and has scored over 1,300 on the SAT. I know that Carwil's parents and the entire community share my pride in this young man.

Mr. Speaker, our youth are the key to our future. With stars like Carwil Jones, we are hopeful for a bright and promising one.

GAMBIA

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. YATRON. Mr. Speaker, this morning I had the honor and privilege of meeting with a delegation of Government officials from The Gambia. The delegation included the President of the country, Sir Dawda Jawara, Ambassador Sallah, and Foreign Minister Sey. It was a most infomative and useful session. President Jawara is a very impressive and highly articulate statesman. He has many interesting observations about world developments.

The Gambia is a small country on the West African coast. It is a parliamentary democracy with an elected president and legislature. The Gambia has been politicaly stable since independence in 1965 under the leadership of President Jawara. While his ruling People's Progressive Party has led the parliament, several opposition parties actively participate in the government.

Mr. Speaker, The Gambia has one of the best human rights records in Africa. The Government is very concerned about this issue and wants to be Africa's human rights leader. The Gambia has an independent judiciary with due process safeguards, free and fair elections, and basic civil liberties such as a freedom of press, speech, religion, assembly, and association. A testimony to the confidence and respect other African countries have for The Gambia's human rights record is the fact that The Organization of African Unity chose this country as the site of the OAU's new Human Rights Commission. The Commission will endeavor to promote respect for human rights in Africa by educating the continent's population on the issue and by receiving and acting upon specific human rights complaints.

The Gambia has also started its own human rights institution, The African Center for Democracy and Human Rights Studies which will be involved in scholarly research and technical analysis to advance the human rights process throughout the world. I understand that USAID has provided $26,000 for the center, which is an excellent way in which our foreign assistance can promote human rights and ensure it remains a core component of American foreign policy. The Gambia has been very active the U.N. Human Rights Commission, and supported important resolutions regarding human rights abuses in Cuba.

As Chairman of the House Subcommittee on Human Rights and International Organizations, I am hopeful that we can help President Jawara in his efforts to advance the cause of human rights not only in Africa, but throughout the world. He deserves the highest commendation for his sincere efforts and leadership. His country and people should be recognized by all of us for their pivotal role and significant contribution to the human rights agenda.

CONGRESSIONAL CALL TO CONSCIENCE VIGIL FOR SOVIET JEWS

HON. THOMAS J. BLILEY, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. BLILEY. Mr. Speaker, I rise to join the congressional call to conscience vigil for Soviet Jews. Over the last several years we have seen a warming of East-West relations and I urge Soviet leader Gorbachev to continue this trend in glasnost and perestroika by proceeding in the rise in the number of emigres. In 1988, there were a total of 19,393 Jews who emigrated from the Soviet Union.

The Baltic nations have been given the opportunity to demonstrate their nationalism. At the same time there has been continued repression of nationalism in Soviet Armenia and Georgia. This random policy towards the Soviet people confirms the inconsistencies that are still faced by that changing nation. It seems the extremities of Soviet policy have remained the same; borders are still closed, democracy is still controlled by the party and Jews are still repressed. We must continue to urge the Soviets to put their words into definitive action. We must encourage them to open their borders to allow for the free movement of their people. The desire to leave the Soviet oppression and tyranny remains with many Jews who are trapped in a country where the practice of their beliefs prompts their persecution. These Soviet Jews are not nonconformists nor are they rebels, they are simply fighting for the privileges that are embodied in the freedoms that we Americans so thoroughly enjoy. The United States is the nation leading the charge for democracy and freedom and we are obligated and responsible for promoting these liberties in those nations who do not respect the innate fundamental freedoms of their people.

Let me take, for example, the story of Valery Anatolyevich Palatov, a 45-year-old Soviet Jew living in Leningrad. He is currently seeking to emigrate from the Soviet Union so that he may join his son and daughter in the United States. In 1979, while Valery was working as an engineer and studying to receive his Ph.D. in physics, he gave his permission, as required by the Soviets, for his children to emigrate to the United States. The result of his required permission for their departure, was the loss of his job and his ability to complete his Ph.D. schooling. Due to his situation, he has been unable to find a job in the field where his specialties lie. He is currently a computer programmer.

In 1987, Valery received the necessary invitation from his son which initiates the emigration process. On February 21, 1987, Valery was denied the necessary visa on the grounds that he had been exposed to classified information while in his job as an engineer which was terminated in 1979. On April 6, 1988, after another attempt to receive a visa, he was once again denied, and was further denied a third time on October 17, 1988. In each instance, the same reason has been listed for the denial; his access to state secrets. Each time no time limit for his detention was indicated. This case remains to be resolved.

Valery continues to work toward his freedom and his emigration from the Soviet Union, his colleague from work, who held a higher security clearance than Valery in his position as engineer, was allowed to emigrate in 1988. This is a striking example of the arbitrary and inconsistent manner in which permission to emigrate is distributed. We must monitor the Soviets and urge them to standardize and structuralize their emigration process. We must work to eliminate the arbitrary nature of the current system to allow for the release of those Soviet Jews who wish to practice their religion as they see fit without being persecuted.

Mr. Speaker, let us take an opportunity to renew our commitment to the Jews who are attempting to emigrate and continue our persistence in encouraging the Soviet Government to proceed structurally with its reforms. Let us honor these Soviet Jews and be encouraged by their strength and resolve. Their plight is one which allows us, as Americans, to remember to be grateful for the freedoms and liberties on which this country was built.

LEGACY OF JOE VOLKER WILL ALWAYS BE WITH US

HON. BEN ERDREICH

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. ERDREICH. Mr. Speaker, there are many individuals who spend their life in dedication to a cause or a movement, but there are few whose life's work actually makes a fundamental difference in the history of their State and Nation. We in Jefferson County, AL, recently lost just such a person, and all of us mourn the passing of this great man.

Dr. Joseph F. Volker first arrived in Birmingham in 1948 to serve as dean of the newly-created dental school at the University of Alabama. By the time he retired as chancellor of the University of Alabama system in 1982, his vision and energy had transformed the local economy and quality of health care for Alabamians and the world, through the development of the University of Alabama at Birmingham into a internationally-acclaimed medical center and university.

He took the Birmingham campus of the University of Alabama, originally only an extension center with no faculty or facilities, and, with the help of many others, turned it into an independent university within the system. Today, as the county's largest employer, UAB is a vital force in Jefferson County. And its medical center is of a caliber that few other medical facilities in the world can match.

The changes that Joe Volker brought to Jefferson County benefited our community dramatically, and his legacy is one that will always be with us.

I would like to share with my colleagues in the House two editorials that recently appeared in the Birmingham News and the Birmingham Post-Herald, highlighting the dreams and aspirations that Joe Volker had for Birmingham, for Alabama, and the Nation, and his efforts that turned his dreams into reality:

[From the Birmingham News, May 5, 1989]

JOSEPH F. VOLKER

Had Joseph Volker ended his career in 1939 without ever having stepped foot in Alabama, he would still have been a famous man worthy of honor for his contribution to the betterment of mankind.

But throughout his life, Dr. Volker seemed driven by a desire to do something more, something better. The monument to that drive is a world-class medical facility on Birmingham's Southside and the bright future it represents for a reinvigorated city.

Dr. Volker died Wednesday night. We mourn his passing.

Birmingham and the world have lost a great mind, a great asset and a great man.

Dr. Volker received national recognition in 1939 when he became the first scientist to prove fluoride prevents tooth decay. A few years later at age 34, he was named dean of the Tufts College Dental School. Shortly thereafter he came to Birmingham to head a new dental school here.

Looking out on the University of Alabama at Birmingham's sprawling campus now, it is hard to imagine what Dr. Volker encountered. He had no facilities and no faculty. It took him 45 days to round up students.

In the years following he recorded a good many "firsts" before his titles. He was the first director of research and graduate studies at UAB, first vice president for health affairs, first director of the medical center campus.

Later of course he was named first president of UAB and the first chancellor of the University of Alabama system.

People around the world honored Dr. Volker's achievements. The governments of Czechoslovakia, Thailand and Iceland gave him top honors. He was given an honorary degree from Louis Pasteur University in France and named to the prestigious Institute of Medicine of the National Academy of Sciences in this country.

People in Birmingham will remember him as the father of UAB and thus the man who helped provide this city with a caliber of health care few others anywhere in the world can match and who charted a course for the city's economy into the 21st century.

JOSEPH F. VOLKER

Few individuals deserve credit for changing the course of a city, but Dr. Joseph F. Volker, who died Wednesday, certainly belongs in that select group.

When Volker came to Birmingham in 1948 to serve as dean of the University of Alabama's newly created dental school, this area's economy was heavily dependent on the steel and iron industry. When steel did well, so did Birmingham. But when heavy industry fell on hard times, so did Birmingham.

By the time he retired as chancellor of the UA System in 1982, this area was no longer bound to the fate of a single industry. We now have a diversified economy and an international reputation in the medical and biotech areas.

The change in our economy is also producing—albeit slower—changes in public attitudes. The can-do entrepreneur spirit that created Birmingham had long since given way to a branch-plant mentality by the time Volker arrived. Traces of that community inferiority complex remain, but an influx of well-educated people attracted by the job opportunities now available in this area and the retention of bright young people who might previously have left for opportunities elsewhere have helped to revive the idea that this community can do things for itself.

Volker did not do it by himself. Many people in both the public and private sectors have contributed to the growth of the UAB medical center and related enterprises.

But many of those people were brought to Birmingham by Volker, first as the dental school dean, then in a variety of administrative posts, including being the first president of the University of Alabama at Birmingham when it became an independent university within the UA System.

It was also Volker who had the dream of transforming what was originally an extension center into a multificated university. UAB is a monument to his ability to transform that dream into reality.

Joe Volker established himself as a scientist before coming to Birmingham when he proved that fluorides could be used to prevent tooth decay. And he continued to keep in touch with dental and medical research throughout his career. But it was as an administrator, dreamer and inspirer of people that he left his greatest mark. He was a major force in shaping the Birmingham of today.

TRIBUTE TO THOMAS J. BROWN

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. SCHEUER. Mr. Speaker, on Sunday, May 21, many who remember a rare, courageous, idealistic man named Tom Brown, will gather in the Bronx to try to honor that memory in a way that befits Tom's life by establishing the Tom Brown Memorial Scholarship Fund.

Today, I want to honor Tom's life, his ideals, and his commitment to service.

Tom's entire adult life was devoted to helping and serving other people.

Tom Brown was born in 1943, grew up in the North Bronx and went to one of New York's competitive high school's for high achievers—Stuyvesant High School in New York City.

By the time he had finished college, in 1963, John Kennedy had said "Ask what you can do for your country!"

Tom asked himself that question, and answered the question as a young idealist would.

He entered the brandnew Peace Corps to use his training in agriculture, political science and economics, and was sent to promote community development in rural Chile.

When he returned home in 1965, he remained an idealist, eager to use his new experience in solving important problems in his own country.

First, Tom earned a masters degree in Latin American studies, then returned to New York City to help ensure that its Community Development Agency would achieve the goals of its antipoverty programs.

Tom was praised by Commissioner George Nicolau who found in him attributes essential to antipoverty work: Cultural awareness, personal experience in working with the poor, and a broad interdisciplinary knowledge of the political, economic, historic, and social forces that are involved in carrying out development programs.

He left that agency in 1969 to continue antipoverty work in a different way: Working for the City University of New York, in programs aimed at helping students whose educational or economic background had put them at a disadvantage in obtaining higher education.

In 1977, Tom returned to community development work, this time in the Bronx community where he lived with his wife and children. He was appointed district manager of Community Planning Board No. 11, Bronx, and became known as someone who took no political sides at all, but worked for the benefit of district residents.

Tom worked with merchants' and tenants' organizations, with local and borough representatives of city agencies, and testified at public hearings and meetings. He worked hard to improve municipal service delivery, and for the quality of neighborhood life.

He fought hard for both large goals, such as the revitalization of a commercial area, or the establishment of a new police precinct, and he fought for smaller gains, such as demoli-

tion of an unwanted newstand, or the planting of a tree.

Tom received many, many awards, and with his staff was given credit for making the Community Planning Board No. 11, Bronx, one of the most vital and effective community boards in the city.

After a heart transplant in 1985, and a rare lymphoma in 1987, Tom Brown died of cardiac arrest, at a community planning board meeting, in 1988.

The Tom Brown Memorial Scholarship Fund is a truly fitting way to perpetuate the memory of this man, his life, his ideals, and his commitments.

MINIMUM WAGE

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. MILLER of California. Mr. Speaker, there is a fundamental belief in this country that people who work shouldn't be poor. Historically, the minimum wage has been a living wage. The painful truth is that the current minimum wage is not a living wage, it's a poverty wage. For the minimum wage workers of this Nation, to work is to be poor.

Today, in more than half the States, minimum wage workers remain eligible for food stamps and welfare. In most States, they qualify for Medicaid, low-income energy assistance, and free school lunches for their children. The taxpayers should not be the coemployers by subsidizing the employment of these men and women. Instead, we need to guarantee that the wage these workers earn will be sufficient to raise them above the poverty level.

The concept of labor protections is to guarantee to workers basic human dignity by preventing their exploitation. The increase in the minimum wage, which this bill provides, will best serve the interests of working people and the proud history of the Fair Labor Standards Act.

Many assume that minimum wage workers are teenagers working part-time at fast food restaurants. But half of all minimum wage workers are employed full-time, and nearly two-thirds are women, many of whom are the sole support of their families, many of them working part time because they cannot afford child care. Minimum age workers often remain in or near the poverty line even if there is another wage earner in the family.

Almost exactly 51 years ago, Franklin Delano Roosevelt sent the Fair Labor Standards Act to Congress and eloquently explained why Government has a legal and moral obligation to establish minimum working conditions. FDR said:

Our Nation, so richly endowed with natural resources and with a capable and industrious population should be able to devise ways and means of insuring to all our ablebodie working men and women a fair day's pay for a fair day's work.

A self-supporting and self-respecting Democracy can plead no justification for the existence of child labor, no economic reason for chiseling workers' wages or stretching workers' hours.

For a half a century, the Fair Labor Standards Act has promised workers a decent wage. It is time we make that a reality for the minimum wage workers of today.

I think that this legislation provides us with an opportunity to demonstrate what this Congress really stands for when we say that we are for the dignity of labor, we are against welfare dependency, and we support encouraging people to become self-supporting and to take jobs.

CONFERENCE REPORT ON THE FAIR LABOR STANDARDS AMENDMENTS OF 1989

HON. KWEISI MFUME

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. MFUME. Mr. Speaker, on Thursday, May 11, 1989 the House of Representatives voted to pass the conference report on the Fair Labor Standards Amendments of 1989. This initiative would increase the minimum wage from $3.35 to $4.55 by 1991. As we are all aware, President Bush has already indicated that he will veto the measure. However, my opinion differs somewhat from the majority of my fellow Americans in that I do not believe that the President of the United States will turn his back on the vast population of working poor in this Nation.

The President has expressed sincere compassion for the working population; especially the working poor. I am, therefore, challenging his commitment to bringing forth a kinder and gentler Nation.

As I have stated in the past, the minimum wage has seen an increase only seven times since its inception. Seven years have passed since low-income workers have seen an increase and during this period the rate of inflation has steadily climbed. This is the first time in recent years that the House and Senate have gained this much ground in creating a fair and equitable minimum wage increase. Moreover, two-thirds of Americans have expressed their support for an increase in the minimum wage—this two-thirds include not only the working poor, but the American population in general. These Americans do not want to see the AFDC lines lengthen when people give up hope of ever earning a decent living to support their families.

Mr. Speaker, if a Presidential veto is imposed, who knows when we will have the opportunity to tackle this crucial issue again.

Mr. President, I implore you to stand by your promises and commitments made just over 100 days ago.

FLOYD A. HAWKINS, SR.: A LEGACY OF DEDICATION AND VOLUNTEERISM

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. HAWKINS. Mr. Speaker, too often we take for granted the wonderful contributions of our Nation's volunteers. For this reason I sponsored a House passed resolution last year which encourages private employers to recognize volunteer experience on employment applications.

I would like to submit an article written by Nick Penning of the American Association of School Administrators in the Arlington Courier entitled "The Man Who Fed the Bees," which eloquently portrays the contribution of a dedicated and caring volunteer, Mr. Floyd A. Hawkins, Sr., who recently passed away. Floyd Hawkins, through his tireless volunteer efforts in Arlington, VA, enriched the lives of countless young people and others in his community with his talent and energy. I think you will agree after reading the article that the service provided by our country's volunteers, especially those like Floyd Hawkins, represent an invaluable resource to our fellow citizens.

THE MAN WHO FED THE BEES

In a town that thrives on power, on macho threats and political skullduggery, he raised bees. Not only did he raise them, he preached them, taught them, praised them as God's perfect handiwork.

And all of Arlington is a little less vibrant tonight because the 93-year-old body of Floyd A. Hawkins, Sr., finally gave out last October 30.

He's been here since June 7, 1895, when he was born in Washington. But we met him only last March when he taught the art of beekeeping to our 12-year-old daughter, Lisa, in an Arlington County 4-H program. Every Saturday, from March to June, he welcomed Lisa and her classmate into his home in South Arlington, just as he'd done with countless other young people over the past 50 years.

We didn't know this was to be Floyd Hawkins' last class. We had no way of knowing that this gentle but strong man was slowly dying, even as he gave his last measure of energy to our daughter, his community and his church.

Floyd Hawkins was an institution in Arlington. Every year at the County Fair you'd see him at the 4-H table, this elderly gentleman with his fascinating glass display case full of buzzing, live bees. He never tired of answering questions, of pointing out the queen bee, of turning on the light inside us with his own special light of wonder.

We knew he'd been ill, because he had to cancel a couple of Lisa's classes so he could go to the hospital. But then he'd be back and the class would go on—the building of the frames for the combs, the melting and molding of the beeswax, the hours of patient instruction in the ways of the honeybee. In 1985, he was cited by Arlington County for having given more than 30,000 hours of volunteer service to his community.

Even after his hospitalization, he was still at it. Still loading up his car with the display hive, wax, combs and honey for the 4-H display at the Fair this past August, still driving himself, still going all over the exhibition floor with the help of two canes, which he'd not had to use before, still smiling his wise and gentle smile, still sharing his firm handshake with friend and stranger alike.

Little St. John's Baptist Church on Columbia Pike, where he had been a deacon, filled with his memory at this funeral, as tribute was paid to a man who lived his life so well.

"Thirty-thousand hours!" exclaimed one of the five visiting ministers who came to eulogize Mr. Hawkins. "Who will take his place?" We all knew the answer; it will take dozens of us to fill the void left by his passing.

As Lisa and I listened, it became clear that as much as Mr. Hawkins had given to 4-H young people and to bees, he'd also given to his church, to the YMCA, his citizen's association, the NAACP, and his family. Somehow, there had been enough of him to go around to satisfy us all.

Normally, it's only the big shots who get noticed in a world capital like ours. In daily life, and even in death, we seem to overlook truly rare and great people like Floyd Hawkins because his possessions were few and his power seemingly limited.

One visiting minister told a story that sums up what a lot of us thought of Floyd Hawkins. He said that a preacher had died and at the pearly gates was confronted by an angel who demanded to know who he was. The preacher said "I'm the man who built the two churches."

But the angel said, "We have no record of that."

So the preacher said, "I'm the one who gave the money for a worthy cause."

But again the angel said, "We have no record of that."

So the preacher began to walk away, and as he did, the angel called out, "Wait! Are you the one who fed the sparrows?"

"Yes," the preacher replied.

"Well, the Man who made the sparrows would like to see you."

"I have a feeling," the visiting minister said, "that when Brother Floyd reaches that gate he'll be asked, 'Are you the one who fed the bees?' And he'll say. 'Yes, I am.' And the angel will say, 'The Man who made the bees would like to see you.'"

Floyd A. Hawkins was a wonderful, beautiful human being. Millions and millions of flowers bloom each spring in Arlington and throughout the Washington area because of him. And even though he supped with no head of state, we in this nation's capital are all the richer for having had the honor to share this short life with him.

OUR REAL DEFICIT IS $260 BILLION

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. PORTER. Mr. Speaker, we are running as fast as we can, but we aren't getting anywhere.

Forget for a minute that this year's budget resolution relies on foolishly optimistic economic assumptions, forget that transfers of payments from one fiscal year to another are called savings, forget that the Social Security reserves are being spent.

None of that matters because we are going to meet Gramm-Rudman, right?

Sure, we'll claim that we managed to squeeze under the $100 billion limit. If we cooked the books enough we could probably balance the budget this year with no spending cuts and no new taxes.

The problem with Gramm-Rudman is that it allows us to gauge our deficit reduction successes on meaningless, arbitrarily chosen numbers and to include or exclude whatever we want.

We may or may not meet the Gramm-Rudman deficit reduction target of $100 billion, this year. Whether we do or not, one thing is for sure. The national debt doesn't understand the Houdini budgeting we practice here. According to CBO, its going to increase over $260 billion in fiscal year 1990 whether we claim to meet Gramm-Rudman or not.

That's right. While the deficit is supposedly dipping below $100 billion, the national debt, the true, undeniable gauge of our irresponsibility is increasing totally out of relation to the fake numbers we will use here on the floor today.

The national debt represents the hard money that our children will have to pay interest on for their entire lives.

This budget resolution will pass today. Later in the year we will claim we met Gramm-Rudman or maybe if we're feeling particularly guilty we'll have a small sequester. But when all is said and done and they balance the books for fiscal year 1990 over at the Treasury, we are going to end up owing $260 billion more than we did last year.

That is the truth about this budget.

TRIBUTE TO SEBASTIAN LUPICA

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. STOKES. Mr. Speaker, I rise today to pay special tribute to Mr. Sebastian Lupica, former executive secretary of the Cleveland AFL-CIO Federation of Labor. In January of this year, Sebastian Lupica, known to many as "Lupe," retired as the executive secretary of the federation, a post he held for the past 26 years. On June 1, friends, colleagues, and dignitaries will gather in Cleveland, OH, to pay tribute to this distinguished leader and committed individual for his many contributions.

I have known Sebastian Lupica for over 20 years. He is one of the many success stories to come out of Cleveland. It is truly a privilege to know someone who is deeply committed to the welfare of the hard-working men and women who represent the spirit of the labor movement in Cleveland. No one has worked as hard as Sebastian Lupica to insure that union members received good wages, had decent work environments, and were given adequate benefits for their labor.

Lupica had a strong grasp of the problems facing many union members because he experienced similar obstacles in his own life. Sebastian Lupica was born, raised, and educated in the Cleveland area. His father, a Sicilian immigrant, owned a neighborhood grocery store, which was a popular meeting place for the community. The store also was the place where Lupica was offered his first job as a painter.

In 1934, Lupica became a full-time painter and a member of the Painters Union. Immediately, he became a leader and was an integral part of the reform movement which changed the face of unions during the late 1930's. Lupica emerged from that upheaval as an elected business representative for the Painters', ending his career as a painter and beginning his lengthy union career.

As a business agent, Lupica worked diligently for the interests of union members. His dedication to the job was a major factor in his favor when he was elected executive secretary of the Painters District Council No. 6. One of his many accomplishments in that post was creating the Painting and Decorating Institute, a trade organization that allowed the union and painting contractors to promote their industry. The institute was credited with forging a successful cooperation between labor and management that led to the producing of more jobs for union painters and more profits for painting contractors.

When Lupica was elected executive secretary of the Cleveland AFL-CIO Federation of Labor, he promised to work together for the best interests of union members and the community. In this respect, Lupica made tremendous gains. During his tenure, the federation increased its participation in community affairs by making a direct impact on the growth and development of Greater Cleveland. Lupica also was instrumental in campaigns to improve education on all levels. He was the principal labor spokesman in the Cleveland area during the long fight for the National Medicare Program. Federation Towers, a retirement complex for seniors was founded by Lupica and sponsored by the federation.

Throughout this union career, Lupica distinguished himself as a level-headed negotiator, who was successful in settling local labor disputes before and after they reached the strike stage. He had a unique ability to understand the plight of his fellow brothers, which all allowed him to be an effective mediator. This compassion earned Lupica the Annual Civic Award from the Cleveland Council, Knights of Columbus for "his lifelong career as a constructive labor leader."

Mr. Speaker, Sebastian Lupica earned the respect of Clevelanders for his level-headed approach toward labor issues. He never alienated the man and women who depended upon him to be their collective voice at the bargaining table. Sebastian Lupica is a great friend to the city of Cleveland, paving the way for its continued growth and enticing job-making industries to Greater Cleveland. His admirers all agree that Sebastian Lupica made a lasting impression on the labor movement in Cleveland and statewide because of his experience and expertise as a stable union officer.

Sebastian Lupica has been a long-time friend and a loyal supporter during my career as a legislator. When I was elected to Congress in 1968, Sebastian Lupica was the executive secretary of the AFL-CIO. The endorsement of the AFL-CIO was pivotal in my election as the first black representative from the State of Ohio. Sebastian Lupica shares my commitment to improving the quality of life for the people whom we serve.

Mr. Speaker, it is an honor to join the community in celebrating his distinguished service. I hope my colleagues will join me in saluting Sebastian Lupica for his commitment to the working men and women of Greater Cleveland.

FLORIO HAILS SIX HONOREES OF YOUNG BLACK DEMOCRATIC ORGANIZATION OF MERCER COUNTY, NJ

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. FLORIO. Mr. Speaker, the Young Black Democratic Organization is honoring six individuals who have devoted much of their time and energy to the betterment of themselves, their families, and their communities. The recipients are Nelson Mayo, Bettye Monroe, Marion Allen, Kelvin Ganges, Catherine Graham, and Assemblyman John Watson. Each has offered their talents and intellect in a manner that reflects a commitment to the spirit of public service and public trust.

Nelson Mayo, principal planner with the city of Trenton, has directed his efforts in Trenton for many years and is indeed deserved of this recognition. He has extended his role beyond his official role with city government to the Planning Board of Mercer County, the Trenton Branch of the NAACP, and the West End Neighorhood Civic Association Executive Board.

Bettye Monroe, vice chairperson of the Mercer County Democratic Organization, has truly taken a leadership role in Mercer County for the last 30 years. In her many civic associations, Bettye has displayed a unique commitment to the needs of the Democratic community in Mercer County. I am very much aware of the fine work she has performed as vice chairperson and State Committeewoman as well as her involvement with such respected community groups as the Trenton Education Development Corporation, the NAACP, and Central West Civic Association.

Marion Allen, Jr., exemplifies a dedicated teacher who constantly strives to achieve the best education for the students of the Trenton Public Schools. Also a member of numerous civic and religious organizations—a life member of the NAACP, the Democratic Committee, and Mt. Zion Church. It is evident that his commitment to the benefits of a full education are proven not only by his words, but by his deeds as well.

Kelvin Ganges, chief of staff to Assemblyman John Watson, has excelled in government service since graduating from Trenton State College—my alma mater—in 1975. Twice named Outstanding Young Man of America by the U.S. Jaycees, he has developed remarkable experience in public service that will undoubtedly serve him well in his future endeavors.

Catherine Graham has been singled out in the past for her achievements and this recognition is equally as deserved. Director of the Trenton Department of Health and Human Services, she has hands-on experience in the development and implementation of programs designed to assist those in need. With her past experience as education advocate and numerous memberships in community groups, Catherine knows the difficulties experienced by our State's urban population—particularly the black youth—and is to the commended for her efforts and commitment.

Assemblyman John S. Watson of the 15th Legislative District is serving his fourth term in the New Jersey Assembly. A member of the Appropriations Committee, he represents a thoughtful and dedicated voice for smart spending in State Government. Of particular interest, and success, for John is in the area of affordable housing. Serving as vicechairman of the Housing and Urban Policy Committee, his work has brought results not only for his constituency but for the entire State. Since being elected to the Mercer County Freeholder Board in 1972, John has served admirably and is certainly the embodiment of a quality legislator and public servant.

Mr. Speaker, each of the individuals I have brought to your attention, and the attention of my colleagues, is deserved of this recognition by the Mercer County Young Black Democratic Organization and I respectfully ask that you join me in paying tribute to them. We in government are keenly aware of the need for talented individuals to participate in the development and administration of public policy. These honorees represent that ideal and I commend them for their selfless efforts.

AN AWARD FOR DONALD RAY PAUL PERICLE

HON. RICHARD H. LEHMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. LEHMAN of California. Mr. Speaker, I rise before my colleagues today to commend Donald Ray Paul Pericle for being selected as the U.S. Postal Services Western Region Handicap Employee for 1988. This is a very appropriate tribute to a young man who has overcome great odds.

Donald was born with a rare genetic disease called phenylketonuria [PKU] which is caused by the body's failure to oxidize an amino acid. Unless treated early, the condition can cause severe brain damage. For most people this debilitating disease would have meant a life of dependence and constant care. But Donald is quite an extraordinary person. Doctors once thought he would not develop beyond the mentality of a 2-year old. With the support and encouragement of his family and friends, however, he has conquered one foe after another.

Today, Donald is in Washington, DC, to accept an award given by the U.S. Postal Service for his exceptional performance as a postal service employee. He has worked as a custodian in the Main Post Office in Stockton for the past 4 years. Those who work with Donald describe him as a hard-working, conscientious young man with a positive attitude toward life. This is not Donald's first award, though, as he is also an accomplished athlete. He has won a gold medal in the long jump and bronze medal in the 300-yard dash in the Special Olympics. He skis, plays tennis, racquetball, basketball, and baseball.

It is a honor for me to be able to recognize Donald for winning this award. His perseverance and courage in the face of adversity are an example to us all. Donald has come a long way and I truly commend him.

CANCER RESEARCH IN SERIOUS DECLINE

HON. ROBERT A. BORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. BORSKI. Mr. Speaker, for the last several decades cancer research has been strongly supported by the Congress.

However, due largely to budget constraints, appropriations for cancer research have not kept pace with available opportunities for advances, and in fact have not even kept pace with inflation in research costs over recent years.

Dr. Robert C. Young, president of Fox Chase Cancer Center in Philadelphia, wrote an article which appeared in the Wall Street Journal on May 11, 1989. The article describes in considerable detail serious difficulties facing the cancer research effort.

I would like to call the attention of all my colleages to this article and I have submitted it for the RECORD. Anyone who is concerned about cancer research should be interested in Dr. Young's comments.

[From the Wall Street Journal, May 11, 1989]

TIGHT-MONEY CASUALTIES IN THE WAR ON CANCER—DWINDLING SUPPORT FOR RESEARCH

(By Robert C. Young)

Every day 1,350 Americans—500,000 a year—die of cancer, yet current government policy seems to indicate we have done enough, or at least all we can do. The paradox is that the priority of cancer research is declining in the eyes of our elected leaders just when the research prospects are so promising and the impact of cancer on Americans is so great.

We have learned more about cancer in the past 15 years than in the preceding 100, and we are poised for even greater progress. Advances in molecular biology let us probe the inner workings of cancer cells. Patients benefit from new biologic therapies, new systems to target drugs and overcome cancer cells' resistance to treatment, and other novel means of controlling cancer that were only theoretical 10 years ago.

But just as our investment is starting to produce important results, the federal government is dismantling the national cancer-research program. The 3.2% increase for cancer research in the proposed fiscal 1990 budget for the National Cancer Institute will not even keep up with inflation and does not begin to maintain the critical superstructure that has been put in place over the past 15 years. Phasing down or eliminating vital programs will hardly speed progress against cancer and indeed may compromise progress severely.

Consider what will happen unless Congress allocates more money than the new budget proposes:

Five of the 60 comprehensive and specialized cancer centers nationwide will no longer receive support, and we will lose another five the following year.

Two out of seven of the cooperative group programs linking community physicians with the clinical-research network—programs that provide vital answers about optimal clinical care—will no longer be supported, or else funds for all seven programs must be cut to the bone.

Only 30% of approximately 2,800 meritorious research proposals approved for funding will actually receive National Cancer Institute support this year, compared with 46% of about 1,990 such proposals in 1979. How can cancer research progress rapidly if more than two-thirds of the good proposals aren't funded?

Consider what already has happened as a result of dwindling federal support for cancer research:

The National Cancer Institute has lost 20% of its cancer-research staff in the past five years. Today, only three professionals manage the $100 million-a-year centers program. At NCI, recruiting cancer researchers at leadership and other levels has become increasingly difficult. Those in leadership positions are reluctant to supervise programs that are experiencing a reduction in research activity. Constant hiring freezes limit staff, and salaries are not competitive with those offered by other institutions.

Federal construction grants for specialized cancer facilities, so vital to the development of the nation's cancer-research structure, were phased down gradually and finally ended two years ago.

Is a nation at peace really willing to accept as inevitable the fact that cancer kills more Americans each year than died in both World Wars, the Korean War and the Vietnam War combined? Cancer is the second leading cause of death in this country, and is the greatest single cause of years of life lost to a disease before age 65.

Clearly, both public and private funds are necessary. But federal cutbacks have placed increasing and probably unrealistic demands on private philanthropy. Corporate support, especially from pharmaceutical firms, continues to aid cancer research, but such support focuses heavily on potentially profitable treatments rather than on the basic science that makes them possible.

Armand Hammer, chairman of the President's Cancer Panel, recognized the need for strong national involvement when he launched a four-year fund-raising drive in October. His "Stop Cancer" program aims first to raise $500 million from donors who have never before aided cancer research and then to channel this money to the National Cancer Institute to secure federal matching funds. This enormous undertaking, if successful, will certainly help.

But even if the private sector could sustain such extraordinary efforts indefinitely, the nation still needs about $1 billion in additional cancer-research funds this year, not over four years, to avoid cutting important programs. Funding for work on the major public-health problem of cancer cannot rely primarily on private efforts.

Faced with a mounting budget deficit that must be cut, federal officials and legislators indeed have hard choices to make. But hard choices need not and must not be foolish ones.

The answer to adequate, stable funding for cancer research is to make sure our legislators examine our national priorities in terms of our national values. Raising the federal tax on cigarettes by just 10 cents a pack, for instance, could provide enough added revenue to reach adequate levels of cancer-research support, with money left over to reduce the deficit.

To maintain and realize the nation's investment in cancer research, and to maintain an acceptable investment in scientific training for the new generation of researchers, the proposed federal budget for cancer needs to be increased by slightly less than the $1 billion our nation spends on medical care every day. We can afford no less.

THE FINAL REPORT AND RECOMMENDATIONS FROM THE HEALTH COMMUNITY TO THE 101ST CONGRESS AND THE BUSH ADMINISTRATION ON TOBACCO USE IN AMERICA

HON. MICHAEL A. ANDREWS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. ANDREWS. Mr. Speaker, today, the final report and recommendations from the health community to the 101st Congress and the Bush administration on tobacco use in America is being released. It is the result of the first national conference on tobacco and health that had the active participation of Members of Congress. More than 200 leaders in public health and the Federal Government attended this conference, which was held in Houston, TX, on January 27 and 28, 1989.

We held this conference because tobacco use is the No. 1 preventable cause of death in the United States. Nearly 400,000 Americans die each year due to smoking.

Twenty-five years ago, the Surgeon General declared that cigarette smoking is a direct threat to a user's health. Since then, about half of all living American adults who ever smoked have quit.

While we are gaining on some fronts, we are losing the battle with our children. Each year, a million young people start smoking—that's about 3,000 a day.

These young smokers are children. Half of the young people who start smoking have not turned 14 years old.

I initiated this conference to develop a realistic agenda and strategy for the 101st Congress. During the 100th Congress, the flight ban on smoking was enacted due to the efforts of Congressman DICK DURBIN. During the 99th Congress, the 16-cent cigarette excise tax was made permanent. Much more needs to be done and this conference has given us an agenda.

The conference recommends that:

1. The U.S. Food and Drug Administration should be given some authority over all tobacco products.

2. Tobacco advertising must be restricted to eliminate its influence on our Nation's children.

3. Excise taxes on tobacco products should be increased to discourage use by children.

4. The ties between the Federal Government and the tobacco industry should be severed by eliminating the Tobacco Price Support Program.

5. Nonsmokers should be protected from involuntary smoking in airplanes, in all public places, and in the workplace.

6. The Federal Government should end its support of foreign markets for U.S. tobacco products while we discourage tobacco use within our country.

The conference also concluded that the major health-related organizations must work together more effectively to implement these recommendations.

Members of Congress must also work together more effectively. Congressmen DICK DURBIN and BOB WHITTAKER are cochairmen of the bipartisan Congressional Task Force on Tobacco and Health, which was recently formed as a result of the Conference on Tobacco Use in America.

Many bills have been introduced to implement these recommendations. I have introduced H.R. 718, the Smoking Cost Recovery and Education Tax Act. It increases the cigarette excise tax by 25 cents and establishes a counteradvertising and education program aimed at youth and minorities. We know it will stop 1 million young people each year from smoking.

Last week, the General Accounting Office issued a report that demonstrates how inflation has eroded tobacco excise taxes. If tobacco excise taxes had been indexed for inflation since 1965, the Federal Government would this year alone, receive an additional $2 to $6 billion in revenue. Thousands of lives could have been saved. The time for a tobacco excise tax increase is now.

I would like to thank the American Medical Association, the American Cancer Society, the American Heart Association, and the American Lung Association for cosponsoring the Conference on Tobacco Use in America. I would also like to thank the University of Texas M.D. Anderson Cancer Center for hosting the conference and the American Medical Association for underwriting the conference.

The final report of the 1989 Conference on Tobacco and Health gives us a blueprint for action. It will be sent to all Members of Congress. I urge my colleagues to join the Congressional Task Force on Tobacco and Health to implement this report.

SPELMAN COLLEGE STUDENTS PRAISE NEW PRESIDENT AS "AN INSPIRATION"

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. STOKES. Mr. Speaker, I rise today to acknowledge a woman who is a ray of hope and a beacon of inspiration for the more than 1,700 young women, studying at Spelman College in Atlanta, GA. Dr. Johnnetta Cole made history in 1987, by becoming the first woman President of Spelman College. In addition, Dr. Cole became one of only 300 women in the United States, who are heading institutions of higher education.

Dr. Cole's commanding leadership has enhanced Spelman College, a premier historically black college more than 100 years old, with a proven reputation for providing quality education for young black women. Not long after Dr. Cole's inauguration as president, the school received a gift of $20 million from Mr. and Mrs. Bill Cosby, the first endowment of that amount given to a black college.

Dr. Cole is a unique and outstanding leader and role model for young people to emulate. She is committed to nurturing the minds of her students and to developing their leadership potential. Dr. Cole believes strongly in empow-

ering her daughters so that they can deal effectively with obstacles, such as racism, sexism, and discrimination, which black women inevitably will confront.

Mr. Speaker, I am deeply impressed with Dr. Cole's leadership abilities and the good work she is doing at Spelman College. I am pleased to share with my colleagues a recent article from the May 1989, American Association of Retired Person's News Bulletin, regarding Dr. Cole.

SPELMAN COLLEGE STUDENTS PRAISE NEW PRESIDENT AS "AN INSPIRATION"

(By Susan Crowley)

As students mill around outside on an unseasonably warm, blue-sky winter day, the mood at Atlanta's Spelman College is decidedly upbeat. Yet the high spirits on campus these days have more to do with a woman named Johnnetta Cole that with the balmy weather.

"She's an inspiration," junior Cindy Brooks of Atlanta says of Cole, the first black woman president of Spelman, a highly regarded, 107-year-old college attended predominantly by black women. "She's just given this place a lift."

Inside the old brick administration building, Cole emerges from her office. She is elegant and stately, with a radiant smile.

Cole has reason for good cheer. Her presidential inauguration in November was what she calls "a very special victory for black women." Of 3,000 U.S. institutions of higher education, 300 are headed by women; only 22 by black women.

On the heels of her inauguration, entertainer Bill Cosby and his wife Camille gave Spelman $20 million, the largest individual gift ever to a black college. A few weeks after that Cole, at age 52, married her childhood sweetheart.

But behind Cole's amiability is a powerful single-mindedness about education—especially that of African-American women—and achieving racial equality based on social justice.

For both individuals and societies, "the most consistent tool for change is education," says Cole. "In the process, you have to develop the capacity to feel, to care," she adds, massaging the last words as if she were speaking from a pulpit.

She adds, "but, the first thing we have to do is to stand and admit we have a problem."

"On every single count," she continues, "our black folk are dying faster, our kids drop out of school more quickly, our teens are pregnant more often, we are unemployed two and half times more [than whites] and our older people are worse off."

Nonetheless, Cole is optimistic that the country is emerging from a period of "meism," an attitude she wants her 1,700 Spelman "daughters" to avoid. "Yes, I want them to be leaders, but they have to combine advancement in their careers with service to the community."

Cole's own career has centered on teaching and scholarship. Born into a middle-class family in Florida, she entered Fisk University at 15 and transferred to Oberlin College.

After earning her doctorate in anthropology at Northwestern University, Cole taught that subject at the University of Washington, the University of Massachusetts and Hunter College. In July 1987, she was named president of Spelman.

Cole balks at being a role model. She hopes, instead, to show in broad strokes that women, "and particularly women of color, can do what we want to do" and can play a "multiplicity of roles."

"I also want to be a model of someone who sees family coming in different forms," say Cole, reflecting partly on her own family situation.

With three grown sons from her first marriage, Cole knows the psychological costs of working and mothering, especially as a single parent.

"It is important for those who are younger to decide they don't have to automatically give up something. Family life can exist with a career, but they better find the right partner."

Cole's new "partner" is Arthur Robinson, an official with the National Library of Medicine in Bethesda, Md. "Boy, are we part of the modern world," says Cole of her commuter marriage.

As a child, Cole lived near Robinson in Florida and then in Washington, D.C. Thirty-five years passed with no contact between them. Robinson then heard about Cole's appointment at Spelman, called her up and married her 17 months later.

"I've never been happier in my life," says Cole although she acknowledges her job is exhausting.

She spends a good deal of time fund raising. "Some folk think that we're the school Dr. and Mrs. Cosby took care of so we don't need anything else. That is so dangerous because our needs are tremendous."

Cole seems energized by life among her "daughters." She sees herself "fundamentally as a teacher," and although she cannot spend much time in the classroom now, she does hold open office hours for students. They stop in for financial, job and academic advice or "just to see what the inside of the president's office looks like."

"What I like most is walking out on this campus and interacting with these students," Cole says. "I can't tell you the pleasure I get from this."

The feeling seems to be mutual.

PHIL PORTNOY: OUTSTANDING CITIZEN

HON. MATTHEW J. RINALDO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. RINALDO. Mr. Speaker, I rise today to pay tribute to an outstanding individual who has devoted many years of his life to the betterment of public education in Union, NJ, and to raising funds for people who are in dire need of costly medical tratment.

As director of public relations the past 15 years for American Bakeries in New Jersey, Mr. Phil Portnoy has cast bread on troubled waters. Through the Phil Portnoy Humanitarian Association, which he founded 12 years ago, he has raised over half a million dollars to help those in need with medical treatment, transportation and equipment as required. In every case, the individuals had exhausted their insurance or had no health plan coverage. With no where else to turn for help, they were aided by the Phil Portnoy Humanitarian Association.

He has been active in many major causes in Union Township. They include the Union United Way, the March of Dimes, Union Football Rockets, Union Little League, where he served as a coach; the Union Boys and Girls Club, and Camp Fatima for the handicapped.

For the past 20 years, Phil Portnoy has served as a member of the Union Township Board of Education, whose schools were cited by Former Education Secretary William Bennett as model schools. For 6 years, Phil Portnoy served as president of the school board, in addition to his many other civic endeavors.

In a community where families are involved in supporting education, recreation and community activities, Phil Portnoy has been a positive leader and popular figure. He has served as past president of the Union Football Rockets; president of Union Lodge of B'nai B'rith; and was selected for serveral community awards, including Man of the Year by the Union Chamber of Commerce, the Service Award of the Union Exchange Club, the Outstanding Citizen Award of the Temple Israel of Union, and Man of the Year by memorial General Hospital and the Knights of Columbus.

On June 9, Phil Portnoy will be honored by the citizens of the community he has helped and worked with over the last two decades. It is a tribute that is well deserved to one of Union's finest citizens.

SUPPLEMENTAL FUNDING FOR VETERANS' HOSPITALS IS A "DIRE EMERGENCY"

HON. DEAN A. GALLO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. GALLO. Mr. Speaker, I rise to express my deep concern for those individuals whose true needs are being compromised by delays blocking action on supplemental funding request. For over a month, action on this measure has been delayed by attempts to add spending for many other programs. This bill should not be a vehicle to further the cause of other spending bills, no matter how good that other legislation might be. If it is not a dire emergency, it does not belong in the bill. Today, I joined with my colleague, Representative SIL CONTE, in support of a clean bill that provides funding for only veterans programs.

The dire needs of our veterans and others have not gone away, they have only worsened.

In a letter dated May 16, 1989, from Ed Derwinski, Secretary of the Department of Veterans' Affairs, he states: "Each day that supplemental funding is not forthcoming, the level of service provided by the VA's medical system is diminished. The VA has virtually exhausted its flexibility to borrow from non-payroll accounts to support the employment level necessary to properly treat veterans. Inventories of supplies are low, and the purchase of necessary medical equipment will have to be postponed until next fiscal year."

Secretary Derwinski's letter goes on to explain that the employment level at VA hospitals is 4,000 below what is required, that outpatient treatments will be reduced by 600,000 visits, and that funding for at least 96 capital accounts will be stopped.

As a member of the House Appropriations Committee, I supported the President's $2.1

billion supplemental funding request. The President's request meets the real needs of our Nation's veterans.

However, the bill that came to the floor over a month ago not only broke the budget agreement for fiscal year 1989 but it threatened our ability to meet the budget targets for years to come.

The budget agreement for fiscal year 1989 set strict ground rules for added spending: If you want to add to one area of domestic spending, you have to find equal savings in another area of domestic spending. The same goes for defense.

The bill that came to the floor broke the agreement by adding an additional $2.7 billion in spending with no offsetting reductions. Whereas the President submitted his request in strict accordance to the budget agreement, this bill has ballooned to over $5 billion in new budget authority.

Unfortunately, the continued delay in reaching a true agreement threatens the ability of VA hospitals to provide services to our veterans.

Mr. Speaker, the continued delay in action on this important legislation is a regrettable reminder of what is wrong with the budget process in Congress.

Each and every day, my constituents have to make the hard choices, setting budget priorities for themselves and their families. They may have to put off the purchase of that new car in order to pay for their children's dental bills. They may have to save just a little bit longer for that family vacation, or they may have only enough for the basic needs of housing and shelter. They make the hard choices.

Yet, here in Congress, we continue to spend without restraint. When the dental bills come due or the car breaks down, we use it as an excuse to go on a shopping spree.

The House should bring forth a clean bill that meets the truly dire needs of our veterans and others. We should do the work that our constituent's have sent us here to do—set priorities, make the tough choices and respond to the emergency needs of our citizens.

Mr. Speaker, I urge this House to move without delay to approve the supplemental funding request for our veterans' hospitals.

SAVE THE AFRICAN ELEPHANT FROM EXTINCTION

HON. ANTHONY C. BEILENSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. BEILENSON. Mr. Speaker, today I am introducing, along with our colleagues Mr. FIELDS, Miss SCHNEIDER, Mr. PANETTA, Mr. KASICH, and Mr. DONNELLY, a resolution calling on the administration to support international efforts to save the African elephant from extinction by halting worldwide trade in ivory.

I am convinced that unless the international community takes drastic action to halt poaching, the elephant will not survive the century. Fifty years ago there were some 10 million elephants roaming over most of Africa's vast forests and savannahs. When I first introduced the Elephant Protection Act in 1976, about 1.5 million remained. Today we believe there may be as few as 400,000, and they are being killed at a rate of 70,000 a year. Conservation efforts in Africa cannot succeed so long as the demand for ivory here in the United States, in Western Europe and in Asia reamins as high as it is.

Mr. Speaker, the Governments of Tanzania, Kenya, Gambia, Chad, and Somalia have called on the international community, through the Convention of International Trade in Endangered Species [CITES], to half trade in ivory, recognizing that they simply cannot win a war against well-armed and well-equipped gangs of poachers who are selling elephant ivory on the black market for upward of $100 a pound.

The Secretary of the Interior, Mr. Lujan, has wisely decided to back this proposal, and has announced that the United States will support an appendix I listing for the African elephant when CITES next meets in October. Our resolution endorses the Secretary's decision, and calls on the administration to initiate diplomatic efforts to obtain broad international support for the establishment and effective enforcement of a ban on trade in elephant ivory. If we are truly serious about saving the elephant from extinction, it is crucial that we gain the active support of Japan and Hong Kong, who together import the overwhelming majority of ivory which leaves Africa every year.

Our resolution also calls on the administration to provide financial and technical assistance to the efforts of African countries to conserve and rebuild elephant populations. Tourism has become an important source of foreign exchange in many countries, and wildlife conservation has therefore become an important priority. But they desperately need our help—their financial and scientific resources are simply too meager to be effective.

As the largest, as well as perhaps the most magnificent and best loved creature in the world, the elephant has become an important conservation symbol in Africa, much like the bald eagle in this Nation. It is terrible to imagine a world with no elephants—but that is exactly what will happen if we do not act immediately. Experts say we have very little time—the elephant has very few years left. I call on my colleagues to support this resolution.

A TRIBUTE TO THE PEOPLE OF AMHERST, NY

HON. BILL PAXON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. PAXON. Mr. Speaker, today I rise to commend the town of Amherst, NY, on the recent report that it is the safest community in the Nation in which to live.

According to the preliminary Federal Bureau of Investigation Uniform Crime Report released April 24, 1989, the town of Amherst has the lowest crime rate in the Nation among 187 cities and towns with populations over 100,000.

The FBI Uniform Crime Report examined the rate of incidence for such crimes as murder, rape, assault, robbery, burglary, larceny, and car theft in cities of similar population size and determined that Amherst was the safest in the Nation with a crime rate of just 3,034 crimes per 100,000 people.

In addition to this first place finish in the crime rate category, Amherst also had the lowest murder rate statistic in the Nation—claiming not one single murder in the town this past year.

This is truly a marvelous accomplishment for the people of the town of Amherst, Mr. Speaker, and is also a fine example of the great things that can happen when individual citizens join together and become involved in enhancing the quality of life of our community.

Additionally, high praise deservedly belongs to the many brave and dedicated members of the Amherst Police Department under the extremely capable leadership of Chief John B. Askey.

The supervisor of the town of Amherst, Mr. Jack Sharpe, recently remarked that "one of the main reasons people move to Amherst is our police protection." Mr. Sharpe is absolutely correct in making this statement and Amherst is indeed a wonderful place to live and work.

WHITEMAN AIR FORCE BASE WINS BLANCHARD TROPHY AGAIN

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. SKELTON. Mr. Speaker, for the past 22 years the Strategic Air Command has conducted a competition to assess the abilities of our country's missile units. The victor of the competition wins possession of the Blanchard Trophy and the designation as the best missile wing in the U.S. Air Force.

The competition was recently completed at Vanderberg Air Force Base, CA, and it is my pleasure to inform the Congress that for the fifth time, the Blanchard Trophy was awarded to Whiteman Air Force Base, located near Knob Noster, MO. Whiteman won the original competition and was the first four-time trophy winner. The 351st Strategic Air Wing men and women now have the distinction of claiming to be the only five-time winner of the Blanchard Trophy.

It is a pleasure for me to commend the outstanding personnel at Whiteman Air Force Base. They are a credit to the Air Force and to their country. Individuals who should be recognized as key contributors to this achievement are:

1989 COMPETITION STAFF

Wing Commander, Colonel Thomas E. Kuenning, Jr.

Deputy Commander for Operations, Colonel Milton F. Schrepel.

Deputy Commander for Maintenance, Colonel Stephen L. Benedict.

Deputy Commander for Security, Colonel Evans W. Moore, Jr.

Commander, CSG, Colonel Thomas B. Goslin, Jr.

Commander, 2154 ISS, Lt. Col. Allyn K. Mills.

Commander, 351 CE, Lt. Col. Roland W. Johnston.
Commander, FMMS, Lt. Col. Nedom Ramsey, Jr.
Commander, 510 SMS, Lt. Col. Nicholas Motowylak.
NCOIC, 351 OMMS/MBA, CMSgt. Douglas A. Pierce.
Senior Enlisted Advisor, CMSgt. Jack Bryant.

OUTSTANDING UNIT ENLISTED PERSONNEL

MSgt. Arthur Avant, Jr.
SSgt. Mark James.
SSgt. Michael Keyser.
SSgt. Sheri Perry.
SrA. Robert Shows, Jr.

1989 "OLYMPIC ARENA" COMPETITORS

MAINTENANCE

MHT (Missile Handling Team): SSGt. Michael Dawson; Sgt. Steve Bailey; Sgt. James Garvin; A1C. David Marshall.
MMT (Missile Maintenance Team): SSgt. Robert Bixler; SSgt. Sam Brown; SSgt. David Malone; SSgt. Billie Miller; SSgt. Tim Moore.
Mech (Mechanical Shop): Sgt. Timothy Murphy; A1C. Wesley Wingo.
FMT (Facility Maintenance Team): SSgt. Gregory Loyd; A1C. David Mueller.

OPERATIONS

Crew S-211: MCCC. 1Lt. Scott Dumbauld; DMCCC. 1Lt. Greg Howell.

TSgt. Charles Hardy.
Sgt. Steven Pelanger.

THE CLINGER LUMBER CO. CELEBRATES 135 YEARS OF BUSINESS AND SERVICE

HON. GEORGE W. GEKAS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. GEKAS. Mr. Speaker, I would like to bring to the attention of my colleagues the accomplishments of the Clinger family of Milton, PA. As proprietors of the Clinger Lumber Co., this family has faithfully served the Milton community since 1854. From the days when the Clinger Lumber Co. was but a small saw mill along the Pennsylvania Canal, the growth of Milton and the Clinger family business have been inexorably tied.

This year marks the 135th anniversary of the Clinger Lumber Co. On May 25–27, 1989 the Milton community will pay homage to the Clinger family as they celebrate this event. Special tribute will be given to Daniel Clinger III. This fine American served his Nation during World War II and successfully managed the Clinger Lumber Co. for five decades. In the tradition of all enduring family businesses Daniel's sister Mary ran the business while he served his Nation. In 1954 the Clinger Lumber Co., under the guidance of Daniel Clinger III, expanded its service to the Milton community with the opening of a retail outlet. The Clinger Lumber Co. continues a tradition of service under the leadership of James Clinger and his wife, Jorjia.

I ask my colleagues to join with me in celebrating the accomplishments of one of central Pennsylvania's oldest family owned businesses. The Clinger family has exhibited the finest aspects of American entrepreneurship during the 135 years they've managed the Clinger Lumber Co.

HUMAN RIGHTS FOR SOVIET JEWS

HON. GERRY SIKORSKI

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. SIKORSKI. Mr. Speaker, the Congressional Call to Conscience Vigil has, for many years, provided Members of Congress the opportunity to speak out against Soviet oppression and enlighten the world to the plight of Soviet refuseniks who have been denied their basic human rights. I, too, rise today to appeal for freedom for the people who have been persecuted for so many years in the Soviet Union. However, I rise today not only to beseech the Soviet Union to expand and legalize their human rights reforms, but to implore Members of Congress and the administration to rectify the injustice that has been perpetrated on these people once they finally do receive permission to emigrate.

Soviet Jewish emigres now face additional obstacles from the United States. The administration has changed the longstanding United States policy to grant all Soviet Jews and religious minorities refugee status on the presumption that a Soviet Jew, by the fact that he/she lived in the Soviet Union had suffered from political persecution. This decision has left many Soviet Jewish emigres stranded citizenless on the shores of the Mediterranean in Ladispoli, Italy. It has also sent a dangerous signal to President Gorbachev about the sincerity of our commitment to the free emigration of Soviet Jewry.

These refuseniks have been living with fear, discrimination, and multiple persecution in their homeland brought on solely by their religious beliefs. They have been given our assurances of freedom during our visits with them in the Soviet Union. They have been the pivotal point of our diplomatic polemics and our foreign policy. Summit after summit, we've been arguing, negotiating, and conditioning our agreements with the Soviet Union on the basis of this group's right to emigrate.

Now, refugee status is granted only if in the course of a 15-minute interview with largely untrained United States Immigration and Naturalization Service officials, Soviet refugees can prove a well-founded fear of political persecution.

According to Robert Eddy, chief INS official in Rome, the new policy's implication is that discrimination no longer amounts to political persecution.

This is tantamount to shifting the burden of proof to the victims, whose understanding of the process as well as their understanding of English is usually insufficient to create testimonial quality evidence on their behalf.

Therefore, over 2,400 individual cases of Soviet Jews have recently been denied refugee visas on the pretext that they do not fit the precise, new, glasnost-sanitized definition of a political refugee.

Today there remain 294 citizenless people who have been double denied and wait on refugee row for the only hope they have: a retroactive policy reversal.

Why? What has changed?

Is it because we have been somewhat successful in our efforts to move Secretary Gorbachev to make a few of the concessions we have been pursuing for so many years?

Is it because of the public relations ramifications of the word glasnost?

Is it because the Semyon Mikhoels Jewish Cultural Center in Moscow is now open? Let me say that though pleasing to the West, virtually no Jewish programs are held in this rarely used monument to Judaism run by the Soviet Government. Even the Mezuzah, put up by Elie Wiesel at the much publicized dedication, was removed after the cameras were gone. This building is a hollow shell, perhaps indicative of the true nature of Jewish cultural freedom in the Soviet Union.

Is it because a new yeshiva, a school where Jews can learn their history and religion, was established. It, however, remains without the legal school status that Soviet law requires to prevent those people who are studying there to be classified as parasites of society,—a crime in the Soviet system.

Is it because the Soviet authorities have been continually denying the Jewish Cultural Association a permit to demonstrate outside the headquarters of the Anti-Zionist Committee.

Is it because Jews really do now have the opportunity to advance and achieve in the Soviet educational system and in the Soviet work force based on their merit and their ability? In fact, they do not. In fact no Jew could have run in the recent "open" elections and Boris Yeltsen won't be championing their cause.

This vaunted word "Glasnost" has not eradicated anti-Semitism and political persecution of Jews in the Soviet Union. Anti-Semitism is flourishing in the Soviet Union under Glasnost and the need of these refugees to emigrate has become even more pronounced. In addition to Pamyat, other national anti-Semitic organizations have been established including the Committee of the Soviet Public Against Diplomatic Relations with Israel.

Remember, none of the reforms that have been publicized to the world's media have been legalized or institutionalized. If President Gorbachev fails—these reforms can fail with him.

Remember, the Soviets are continuing to deny many Jewish applicants based on the

spurious pretext of possessing "state secrets" from jobs left decades before.

Remember, the motivations of the Soviet government are not humanitarian, but rather a desire to benefit in trade and technology from good relations with the United States—relations they know are contingent upon their human rights record. How significant will human rights be perceived by the Soviet Union if our foremost case of Soviet Human rights abuse—emigration of Soviet Jews—proves to be unworthy of our time, money and sympathy.

THE INTEGRITY OF THE U.S. FOREIGN AND HUMAN RIGHTS POLICY IS AT STAKE.

Rudolf Kuznetzov, head of All-Union OVIR, has said, "Things really look funny: Western countries, including the United States, declare that the Soviet Union should step up emigration and allow people to leave the country freely. But they won't accept all those who have been permitted to leave the Soviet Union." He also claims that the American Embassy has requested the Soviet Union to delay issuance of emigration visas.

The Moscow Journal has printed articles stressing the difficult requirements and screening process of Soviet Jews applying for refugee status. They are taking selections from the American press reporting that Soviet Jews cannot participate in the democratic process and are becoming second class citizens in an attempt to discourage emigration. If Soviet Jews want to be second class citizens they might as well stay at home.

Most importantly the Soviet press have used Western insistence of documented evidence as proof of their innocence of Western charges of persecution and human rights violations.

Over 4,200 Soviet Jews were released from the Soviet Union last month, however, allotment numbers for the second quarter of fiscal year 1989 have been filled. Even though the allotments from the third and fourth quarter have been frontloaded, based on the current caseload we will be 5,000 numbers short of refugee visas this year. This does not take into account the approximately 4,000 people who are being released every month.

House Concurrent Resolution 73, a concurrent resolution I introduced with Senator GRASSLEY in March and cosponsored by 49 of our colleagues, calls for a return to the operating presumption of the INS for the last 8 years: a Soviet Jew, Pentecostal, or other religious minority by the fact that he/she lived in the Soviet Union has suffered from political persecution. In addition, it addressed the need for increased allotment numbers and appropriation funds.

The special immigrant category that the administration is recommending does not honestly respond to the human concerns. It certainly does not address the long term difficulties of increased immigration of refugees from the Soviet Union.

The Immigration and Refugee Subcommittee held a hearing on the unjust situation facing Soviet emigres in Ladispoli, Italy. I had the opportunity to testify before the committee. Recent legislation introduced and reported by Congressman MORRISON, chairman of the subcommittee, incorporates what I was trying to accomplish. Hopefully, all this activity will move the administration to realize the foolishness of their decision and reverse it. I urge you to join with me in supporting legislative redress of this problem.

The Soviet Union has made some real strides in allowing Soviet Jewish emigration. Yet, the fact that there is still a need for the congressional call to conscience is proof of the continued anti-Semitism and persecution of Jews in the Soviet Union. There are still many long time refuseniks who are being denied visas and are used by the Soviet Union to gain political concessions from the West.

I have been working for many years to help Soviet Jews achieve their dreams of freedom. I will continue to apply pressure to make all our agreements with the East contingent on the release of prisoners of conscience and continued reforms of human rights in the Soviet Union. I will continue to work for a retroactive reversal of the capricious administration policy and I will continue to speak for Soviet Jews, who unfortunately, do not yet have the voice to speak for themselves.

THE ROMANIAN ASSAULT ON HUNGARIAN IDENTITY

HON. EDWARD F. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. FEIGHAN. Mr. Speaker, the remarks that I make today address the desperate plight of the ethnic Hungarians in Romania. Ethnic Hungarians, who make up approximately 8 percent of the Romanian population, are being subjected to a campaign of systematic ethnic destruction by the Government of Romania. Last year, we passed House Resolution 505 which protested in the strongest of terms the Romanian Government's treatment of its national minorities, but their persecution continues, and we must continue to speak out.

Romania has one of the worst human rights records in the world, and ethnic Hungarians have borne the brunt of the abuse. They are the victims of forced migration and subject to beatings if they use their Hungarian language. They are the target of hostile propaganda designed to denigrate their cultural identity, and incredibly, ethnic Hungarian parents are even forbidden to give their children traditional Hungarian names.

During 1988 alone, approximately 18,000 ethnic Hungarians fled to Hungary from Romania, which represents the first time in recent history that refugees from one Warsaw Pact country have sought refuge in another. Responding at least in part to the compelling nature of this situation, the Government of Hungary has reversed its previous policy of returning Romanian refugees caught at the border. Unfortunately, attempts to flee to Hungary are fraught with danger and often end in tragedy. In one incident, a Romanian guard on horseback actually pursued a refugee into Hungarian territory and shot him dead.

The situation in Romania will only change if the world community refuses to keep silent. The United States-Helsinki Watch Committee, a nongovernmental organization founded to promote domestic and international compliance with the human rights provisions of the 1975 Helsinki accords, has released a report entitled "Destroying Ethnic Identity: The Hungarians of Romania," which discusses the current situation there. I commend this report to all my colleagues who are concerned with this desperate situation.

GOOD NEWS IN EDUCATION FROM JOHNSTON CITY, IL

HON. GLENN POSHARD

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. POSHARD. Mr. Speaker, it's time for some good news. Put aside, for just a moment, the talk about mediocre performance in America's high schools. Here's some good news about what's happening in the classroom, and I'm proud to say, it comes from a school in my district.

Let me brag for just a minute about the mathematics team from Johnston City High School, Johnston City, IL.

Four years ago there was no team. This year, they claimed second place in the Illinois class A mathematics championships. And I'm told the other schools had better watch out next year.

Coach Ron Nagrodski has taken a difficult subject and made learning fun. The students have followed the lead and participation on the mathematics team has gone from only 1 person 4 years ago to 34 this year, and being on this team is now one of the popular things to do at Johnston City High School.

You better believe these kids are learning to state the domain of square roots and figure out the famous two trains leaving the station problems we've all wrestled with. Their performance in the competition shows that.

But believe this too. They're learning what it means to work on a team, to depend on each other, to work hard and realize goals, and in this case, accept a measure of defeat with pride and dignity, hardening their desire to do better next time.

Those are the things we want our kids to learn in school. Of course, we want accountants who can calculate and engineers who can span the pass correctly. These are the people who will do that for the next generation.

But we also want students who care about their school, who come to learn in an environment that's stimulating, and maybe, just maybe, have a little fun along the way.

I asked Mr. Nagrodski if his students were available to balance the budget, and he suggested they were not miracle workers. But he did say they could give calculating the national debt a try, accepting of course the ever changing nature of that elusive figure. But if there are any high school students who can do it, my guess is it's the ones on the mathematics team at Johnston City High School.

I would like to enter their names into the RECORD, to commend them for their efforts this year and to wish them success in the years to come.

JOHNSTON CITY HIGH SCHOOL MATHEMATICS TEAM

Lori L. Chamness, Amy Marie Dixon, Heather Leigh Miles, Michelle Lanette Rossin, David James Stewart, Clint Alan Becker, Lesley Anne Johnson, Joyce Annette Bennett, Chadwick Dent Curry, John Clayton Gwillim, Amanda Kay Curtis, Jeffrey D. Huntsman, Aaron Dale Oliver, Maelena Kaye Smith, Loren David Anderson, Jason Henry, Katrina Jo Kragness, Travis J. Cockburn, Darin Keith Dascotte, Michelle Dawn Mathews, Deidre Anne Miller, Chanda Marie Smith, Tony Ernest Arnolds, Lenny Eugene Clark, Scott Allen Hancock, Bethanne Pyle, Anthony Brian Stephens, Ed Shaw, Tim D. Carney, LeeAnne Biermacher, Craig David Compas, Jereme Scott Long, Dale Allen Ray, Doug Alan Woolard.

Teacher: Ron Nagrodski.

THREE THIN DIMES

HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. PARRIS. Mr. Speaker, my colleagues on the other side of the aisle have spent a considerable amount of time alleging that just "three thin dimes" are keeping us from passing a minimum wage bill. If indeed that were true, why don't the Democrats accept the Republican substitute. Does it make sense to hold out and, in effect, have no wage increase for just three thin dimes?

We should also understand that if the President had proposed increasing the minimum wage to $10, the Democrat majority would have support raising it to $12 or $15—all for the wrong reasons.

Let's stop all the political rehtoric and give the minimum wage earners of this country the increase promised by the President. It is only right and reasonable.

DEPARTMENT OF DEFENSE INSPECTOR GENERAL TENURE ACT AND THE DOD AUDIT IMPROVEMENT ACT

HON. H. MARTIN LANCASTER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. LANCASTER. Mr. Speaker, yesterday my colleague, JOHN KASICH, and I introduced two bills which would make major improvements to the Department of Defense's audit organizations. For the past several years, we in Congress, have been rocked by procurement scandals, waste and inefficiencies in the Department of Defense. A number of us have been distrubed by the performance and apparent lack of independence of the 22,000 individuals within DOD who are charged with auditing, investigating, and inspecting. These individuals are the Government's first line of defense to combat fraud, waste, and mismanagement. Yet, too often, they are not the ones who uncover and make public these problems. Both of these bills increase the independence of DOD's auditors and investigators while, at the same time, making structural changes that will improve their objectivity and effectiveness.

H.R. 2361, the DOD Inspector General Tenure Act, will do much to improve the overall independence and performance of the DODIG. This act will provide for a 10-year term of office for the DODIG and will grant the IG the right of testimonial subpoena power. At the same time, it will expand the duties of the IG to include supervision of the Defense Contract Audit Agency and all military auditor/inspector operations.

H.R. 2362, the DOD Audit Improvement Act, is modeled after the Inspector General Act that has been so successful throughout Government. This bill establishes an auditor general within each military department, appointed by the President and confirmed by the Senate, for a 6-year renewable term. This act would consolidate all audit, internal review, fraud, and white collar investigators and military inspectors into one organization. This organization would be a focal point within each military department for combating fraud, waste, and mismanagement. It would also provide improved coordination of these resources, and has the potential to reduce the number of audits being conducted. This would address one of the concerns of the Packard Commission that defense contractors are being overaudited. Finally, this bill would realign personnel resources within the Department to better attack procurement fraud.

We hope our colleagues read these bills and support them. They are reasonable solutions to systematically attack the problems within DOD.

A CONGRESSIONAL SALUTE TO HONORARY MAYOR JOE MARINO

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. ANDERSON. Mr. Speaker, I rise today to pay tribute to an outstanding individual who has devoted over three decades of his life to the Los Angeles area. Joe Marino will be honored on Thursday, May 18, 1989, at the San Pedro honorary mayor's campaign banquet for his tireless service as the San Pedro honorary mayor for 1988–89. This occasion gives me the opportunity to express my sincere appreciation for his many years of hard work and unending commitment.

Joe Marino is a retired public educator who served the young people in the Los Angeles area for the 34 years. He served 25 years as an administrator of elementary schools and received recognition as principal of the year in 1985 before his retirement in 1987.

Aside from his teaching career, Joe has been deeply involved with social and civic organizations. Despite this responsibilities as honorary mayor of San Pedro, he is also currently serving as president of the San Pedro Centennial Committee, Inc., a position he has occupied since 1987. He was a judge for several Lions Club speech tournaments and also for the 1989 Miss San Pedro Scholarship Pageant. As a member in the San Pedro Elks Lodge, he served as a committee member for this organization's scholarship program and has spent the past 20 years as the Elks Lodge indoctrination leader. He was also captain of the retreat league for Mary Star of the Sea Catholic Church of San Pedro.

Joe Marino has used his ability to speak to a crowd in numerous appearances as a guest speaker. He was the keynote speaker for the region A leadership conference for the junior high student leaders organization, as well as for the 1988 careers conference sponsored by the San Pedro Rotary Club. He has also spoken before numerous organizations on community interest topics. Some of these speeches have been before the Delta Kappa Gamma, Business and Professional Women, Lions Club, Kiwanis Club, Soroptimist International, Habor Occupational Center, and parent teacher association groups. Perhaps one of his finest performances was rendered as master of ceremonies for the Harbor View House Benefit Cruise Night sponsored by the San Pedro Chamber of Commerce. Based on his many accomplishments and unsurpassed involvement in the community, it is no wonder he is so well respected and honored.

My wife, Lee, joins me in extending our congratulations to this caring and giving man. He is truly a remarkable individual who has devoted his talents and energies to enriching the lives of so many other people. We wish Joe Marino all the best in the years to come.

TRIBUTE TO RUTHIE ROBERTS SPACKMAN

HON. HOWARD L. BERMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. BERMAN. Mr. Speaker, I rise today to pay tribute to Ruthie Roberts Spackman, a truly outstanding citizen of my 26th Congressional District of California. Ruthie will be honored by the Sylmar Chamber of Commerce at their annual honorary sheriff's dinner for her service as Sheriff over the past year. Ruthie will soon be moving to Florida and will be missed by the San Fernando Valley community.

Ruthie has worked tirelessly for 4 years on the vestry—board of directors—at St. Simons Episcopal Church and was actively involved in the church's organized activities. She served as youth activity director for 2 years and was chairperson for the fall festival fundraising weekend. She directed, produced, and performed in the impressive fundraising dinner and show.

Ruthie has a long history of community service with the Sylmar Chamber of Commerce. In 1986, she joined the women's division of the chamber and soon after was appointed chairwoman of the hospitality committee. In 1988, Ruthie was elected first vice president of the chamber.

Ruthie is a wonderful singer and entertainer who has used her talents over the past 4 years at numerous fundraisers for the church and the chamber. These special events include: The annual Christmas party for the Women's Division, the Women's Division anni-

versary dinner 1977–88, the honorary sheriff's fundraising dinner and the honorary mayor's dinner. She is also a regular entertainer at the Burbank Elks Lodge. Ruthie is also well known and loved in Sylmar for the special shows she provides for many of the local retirement centers.

I am proud to give special recognition to Ruthie Roberts Spackman and I invite my colleagues to share in this expression of admiration and gratitude. We will dearly miss her in Sylmar.

HONORING BERNARD SCHAPIRO

HON. BENJAMIN L. CARDIN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. CARDIN. Mr. Speaker, on May 23, 1989, Mr. Bernard Schapiro will be honored on the occasion of his 90th birthday by STEP of Baltimore, MD. STEP is a vocational rehabilitation program, which Mr. Schapiro helped create for the psychiatrically disabled population.

Bernard Schapiro also helped create a community-based psychiatric rehabilitation program, PEP [People Encouraging People] linked with Sinai Hospital in Baltimore in 1978. He has remained active in PEP, and is PEP's chairman emeritus. This organization has been used as a national model.

Bernard Schapiro has gained a great deal of satisfaction in his work to help less fortunate individuals, particularly those crippled by the pain of mental illness, to regain a sense of worth and to become productive, employable members of the greater Baltimore metropolitan community.

I urge my colleagues to join me in honoring Bernard Schapiro for his many years of community service, as he celebrates his 90th birthday.

NORWEGIAN CONSTITUTION DAY

HON. DONALD E. "BUZ" LUKENS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. DONALD E. "BUZ" LUKENS. Mr. Speaker, I am proud to commemorate the 175th anniversary of the Norwegian Constitution. It is a pleasure to salute a nation which has worked tirelessly for so many years to achieve and perpetuate a society based upon justice, freedom, and equality.

The Norwegian Constitution was adopted on May 17, 1814, as a result of the turbulence and tumult of the Napoleonic Wars. As the armies of the French swelled over continental Europe, the very existence of Norway was threatened. It had been coupled with Denmark as the Twin Kingdoms under King Frederick VI. He had promised to cede Norway to Sweden once the great wars had finally run their course. To the Norwegians, this was unacceptable: the Swedes had been their enemies for many years.

So the Norwegians and Crown Prince Christian Frederick struck out on their own to form an independent nation, free from the interferences of both Denmark and Sweden. At first, the Crown Prince had considered setting himself up as king but instead wisely decided to call for an assembly to write a constitution. It was a great creation, fired by the desire for personal freedom and national independence. A constitutional monarchy was formed and Christian Frederick chosen as king. Following the example of the United States, the Norwegians set their new government up with a separation among the executive, legislature, and judiciary.

But more than the structure of government was provided for by the constitution. The world wide wave of freedom and human rights spread over Norway. Basic human rights and civil liberties were guaranteed so that the government could not infringe upon them. As bold as the new constitution was, it could not save Norway from the invading Swedish armies which were bent on enforcing Frederick VI's promise. Finally an Act of Union was negotiated with Sweden which allowed the provisions of the May 17 Constitution to remain. To this day, the Norwegians are governed under the provisions of that great document.

Commemorating a constitution and a people so dedicated to freedom is a great pleasure. The example set by the Norwegian Constitution is one that can be marveled at to this day. As long as its people remain committed to democratic principals, it shall always be a tremendous nation.

THE EAST RUTHERFORD EMERGENCY SQUAD: 50 YEARS OF PUBLIC SERVICE

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. COURTER. Mr. Speaker, I would like to take this opportunity to recognize a distinguished group of Americans, the East Rutherford Emergency Squad, of East Rutherford, NJ. This volunteer organization has responded to the needs of the people of East Rutherford for the last five decades. They have continually shown their concern for the welfare and safety of their fellow citizens, even at their own risk. They have served selflessly and without any compensation other than the knowledge that they are performing a vital public service.

It may be transportation home from the hospital for a senior citizen, or a heart attack suffered in the middle of the night. It may be to assist the East Rutherford Fire Department in putting out a blaze, or to render first aid at the scene of an automobile accident. Whatever the call, the East Rutherford Emergency Squad has met the task for 50 years.

The squad has grown over the years to help meet its increased responsibilities. The current membership consists of approximately 35 volunteers, equipped with two ambulances and a rescue vehicle. The volunteers must undergo training in first aid and CPR and meet New Jersey standards for licensing in those procedures.

I would like to extend my congratulations to the president Jerry Winston, Capt. Allan DeRosa, Lt. Ray Parrish, 2d Lt. Mickey Cappadonna, and the rest of the East Rutherford Emergency Squad on their 50th anniversary. The residents of East Rutherford have been most fortunate to have the service of the squad, and I am sure that they join me in saying thank you for all of your efforts and good luck in the future.

THE RURAL HOUSING IMPROVEMENT ACT OF 1989

HON. JOSEPH M. McDADE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. McDADE. Mr. Speaker, I am introducing bipartisan legislation today, the Rural Housing Improvement Act of 1989, which addresses the growing problem of rural areas not being adequately served by our present housing mortgage delivery system.

Representatives of America's small towns and rural areas are finding with increasing frequency that our constituents are having a difficult time finding and financing affordable housing. The existing Federal Housing Administration and Veterans' Administration loan guarantee programs are not widely used in rural areas, and the Farmers Home Administration grants and subsidies are underfunded and too restrictive.

Lending institutions are not participating in existing Federal loan guarantee programs in rural areas because they want to deal in larger volume loan packages and they find the Federal paperwork requirements to be overly burdensome. Also contributing to the problem is the number of older homes that might be financed if not for the amount of rehabilitation that needs to be undertaken to qualify for Federal housing mortgage programs.

My legislation expands existing Federal programs in a way that will open the doors of home ownership to many rural residents who have been, in effect, locked out of housing opportunities. The bill is designed to assist low and moderate income people in rural areas where there is a serious lack of mortgage credit availability. It would accomplish this in a cost-effective manner and in a way that would not compete with or reduce authorizations for very low income assistance.

The Rural Housing Improvement Act establishes a new and separate program authority under the section 502 FmHA program to provide 100 percent loan guarantees to buy or construct a modest single family residence. The bill expands the current program to include moderate income people. It would allow Farm Credit Banks, insurance companies, credit unions and housing finance agencies—as well as banks, mortgage companies and savings and loans—to act as lending institutions. To offset any loan losses incurred, FmHA would charge lenders a 1-percent loan guarantee fee.

The bill would establish a program for the preservation of existing and substandard housing suitable for homeownership by provid-

ing guaranteed loans for repair and rehabilitation of rural housing.

My legislation also creates a secondary market for the rural housing loan program under the authority of the Federal Agricultural Mortgage Corporation. Farmer Mac's authority would be expanded to guarantee home mortgage loans originated by approved lenders in rural areas.

I am pleased to report that the chairman and vice chairman of the Subcommittee on Housing, HENRY GONZALEZ and MARGE ROUKEMA, are holding hearings tomorrow on underserved rural areas. They are to be commended for their commitment toward improving housing opportunities in our Nation's rural sections. I look forward to testifying at those hearings and working with them in their efforts to make Federal housing programs more responsive to the needs of rural Americans.

Three members of the Subcommittee on Housing, Congressmen DOUG BEREUTER, TOM RIDGE, and PAUL KANJORSKI, are original sponsors of the Rural Housing Improvement Act of 1989. I invite my colleagues to sponsor this needed and worthwhile legislation.

ADULTS HEALTH DEVELOPMENT PROGRAM

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. HOYER. Mr. Speaker, as you know, May is Older American's Month. Therefore, I would like to tell my colleagues about a special program, the Adults Health Development Program, which was established in my congressional district, the 5th District of Maryland, at the University of Maryland at College Park in 1972. The Adults Health Development Program could serve as an excellent prototype for other universities that want to establish intergenerational health and wellness promotion programs.

Health and wellness promotion programs help to keep our Nation's senior citizens healthy and active. As the graying of America continues and as health costs continue to rise, it is essential that we develop and support creative, cost-effective and innovative programs which help to reduce health care costs. Health promotion programs, like the one developed at the University of Maryland, can do just that.

The Adults Health Development Program unites older adults and students in a multiracial, multicultural, mutually supportive environment to work towards promoting health, wellness, and intergenerational understanding. Trained students help older adults improve their health and quality of life. The young adults also have the invaluable experience of developing a close relationship with a senior citizen.

Mr. Speaker, I insert the article, "AHDP: Toward Developing A National Network to Promote Health and Wellness," which further describes the University of Maryland program. I urge my colleagues to read this article and encourage the development of wellness programs in their own communities.

[From Aging Network News, Dec. 7, 1985.]

AHDP: TOWARD DEVELOPING A NATIONAL NETWORK TO PROMOTE HEALTH AND WELLNESS

Over thirty years ago, Dan Leviton, graduate student, met Professor Warren R. Johnson at the University of Maryland, located in College Park, Maryland. Professor Johnson was a visionary and pioneer in the field of health education and human sexuality. He was the founder and Director of the Children's Health and Development Clinic (CHDC). The purpose of this clinic was to promote positive body image and psychomotor functioning of children, especially those with developmental problems. Activity and health education were combined in this revolutionary program to promote normal development in the young participants.

Professor Johnson became advisor, mentor, friend, and later colleague to Leviton. His philosophy of the CHDC and comprehensive view of the world would later help to lay the foundation for the development and implementation of the Adult's Health and Development Program. He also assisted Leviton in choosing his dissertation topic in the area of death and dying. This made both Professor Johnson and Leviton pioneers in their respective unconventional fields . . . sexuality and death and dying.

The association with Professor Johnson launched Leviton into a career as death and dying educator and thanatologist. His course on death and dying became one of the most popular classes at the University of Maryland in the 70's and 80's . . . and most importantly, the Adult's Health and Development Program (AHDP) came to life.

In 1972, Leviton established the AHDP at the University of Maryland. He credits his seven years of involvement with the CHDC and his interest in death and dying to developing the program. The philosophy of the AHDP is to bring a diverse group (young, old, white, non-white, Jew, gentile, Hispanic, Asian, healthy, and disabled) together to work toward common goals and create shared experiences. Leviton believes strongly that economic deprivation and global conflicts can often pit segments of society against each other. The AHDP can be seen as one means to eliminate social sterotypes and scape goating.

PROGRAM PROFILE

The AHDP is part of the College of Physical Education, Recreation, and Health and has a loose working relationship with The Center on Aging. The AHDP is truly interdisciplinary in focus in that its program staff (faculty and students) are affiliated with the disciplines of physical education, recreation, health education, human development, psychology, and education. Students are able to earn university credit for their participation in the program and often volunteer for several semesters. Medical students can also receive elective credits through enrollment. Community volunteers are also involved in this program. It is not unusual for 90 volunteers to participate in a semester. The average age of the program staff is 23 years with the youngest having been 14 years old.

The number of older adult members who participate in the AHDP varies, usually from 45 to 90, which tends to remain consistent over time. The average age of these individuals is 74 years. Diversity could be the appropriate description of these older adults. Over 33 percent of the participants are institutionalized patients residing at a Veterans Adminsitration medical facility; about 25 percent are Hispanic community residents; while the remainder are black, white, and Asian, residing in the community. Most of the participants residing in the institutional setting are male, while two-thirds of those individuals residing in the community are female. The family income of these individuals is bi-modal, that is, about 33 percent reported income less than $7,000 annually, while 33 percent reported income over $20,000 annually. Health status is as diverse as race, income, and nationality. Some have been afflicted with Alzheimer's Disease, cancer, obesity, arthritis, Parkinson's Disease, diabetes, or are recovering from bypass surgery and cerebrovascular stroke. There are others who are physically healthy and active. Finally, many of these individuals have psychiatric problems such as uni-polar and bi-polar depression and schizophrenia.

The cornerstone of the AHDP is the pairing of program staff with an adult. Both learn from this reciprocal interaction. The program staff bring their professional knowledge and expertise to the older individual and assess their special needs to help plan for their activity in the program. The older adults bring their life experience to the young program staff. They have experienced the world wars, the Great Depression, the Korea conflict, intimidation of the Ku Klux Klan, and repression in Latin America. These individuals have survived to share their story and are repositories of history. They can share their long experience and be helpful to the program staff in solving their personal problems.

A TYPICAL SATURDAY

The AHDP program consists of nine programs scheduled on Saturday during a school semester. Each Saturday, from 8:00 a.m. to 8:30 a.m., the Group Leaders meet to discuss organization programs, mix-matched members, and program scheduling. From 8:30 a.m. to 9:30 a.m., program staff receive training on various topics related to the aging process. Topics at these sessions may include activity-disengagement theories, physical fitness safety, intimacy and sexuality, Organic Brain Syndrome, psycho-social stress, etc. After the presentation of these topics, staff break into small groups to translate the concepts they have learned to their experience with the older adult with whom they are paired during the program. This training feature is not fixed in stone but can be changed through program staff evaluation and insight from the director, associate director, consultants, and group leaders.

At 9:30 a.m., the older adults arrive on the college campus. They usually go with their assigned program staff member into either a high or low physical fitness group for stretching, warm-up, and social activity. Others not interested in this can immediately initiate the activity which they enjoy. Activities can include a sing-a-long, aerobic activity class, dance, or yoga. Or it might be weight training, bowling, swimming, walking, floor tennis, trampolining, table tennis, etc. These activities are planned to promote physical fitness and fun for the older adult.

Program staff assess the older adult's physical health status, and create a program of activities which may be beneficial in addressing the physical, emotional, and spiritual needs of the individual. Once the plan is put into action, it is evaluated and modified as necessary.

At 11 a.m., the health education hour begins. The director, a guest speaker, or pro-

gram staff may discuss these topics: predictors of life satisfaction and successful aging: coping with stress; medical problems associated with aging; drug interaction and side-effects; recreation and leisure; osteoporosis; and finally, grief and bereavement. During this segment, special topics may be presented to the Hispanic participants through an interpreter. The health education series is totally optional. The older adults can continue to participate with their physical activities if they choose. During some semesters, there is an option of joining a growth and awareness group led by a doctoral student from the Department of Psychology.

At noon, lunch is served in a common room. This aspect of the program, along with the health education hour and the physical activities with a friend, promote sharing among the young and old. After the older adults leave the campus, the program staff meet again to discuss the day's activities, successes or problems, etc. This meeting ends at 1:30 p.m.

The AHDP is present and future oriented. It promotes wellness through its activity program and health education segments. Theory and knowledge are translated into practice. Intervention is initiated if a program participant needs assistance. Support can be provided to the individual by their assigned program staff member. Finally, rehabilitation is built into the program. Those participants recovering from physical afflictions can work with trained staff to improve mobility and functioning.

Play and activity are important ingredients that will affect the health and well-being of people . . . that is, both the older adult and the young program staff benefit from participation in the AHDP.

THE FUTURE: TOWARD A NATIONAL NETWORK

While an official academic course, the AHDP receives no funding from the University of Maryland. Older adults are asked to pay $50.00 per semester; however, no one is ever denied access to the program. Partial and full scholarships are available to those in financial need.

Funding for the continued operation of the program is also received through the rental of *Smiles*, a film that describes the program, and revenues from workshops. C&P Telephone, Xerox, Geico Insurance Company, and the Washington Redskins Alumni Association are a sampling of those corporations that are represented on the program's Board of Directors. This Board continues to assist the AHDP program in fund raising.

In 1984, the AHDP camp concept was developed to finance the existing program and to provide a model for the establishment of a National Network Plan. This camp is a four to seven day program modeled after the campus AHDP program. Wellness, exercise, health promotion, and fun are the main features of this camp which caters to those individuals 50 years and older.

Many organizations are examining the AHDP and its effect on the elderly. Some say that it can delay institutionalization. Others see it as a way to provide the older adult participants with more control of their lives . . . and organizations would like to see the AHDP program implemented nationally. Leviton states that the Public Health Service is very interested in integrating the program into their national network of Community Health Centers. The American Association of Retired Persons has encouraged submission of a proposal to develop the AHDP program at other universities and colleges, partially supported by camps in their community. Even politicians are noticing the potential of this national network. Former Congressman Paul G. Rogers who served as Chairman of the U.S. House Subcommittee on Health and the Environment and Congressman Steny Hoyer (MD) have publicly supported the AHDP national network concept.

Leviton has certainly been in the forefront of the early movements of death education and health promotion. Through his expertise in these two areas, determination and vision, he continues to strive to promote dignity and well-being of the elderly through the development of the AHDP national network.

For further information concerning the AHDP program, contact Dan Leviton, Ph.D., University of Maryland, Adult's Health and Development Program, College Park, MD 20742 (301) 454-3295.

WESTMINSTER ELEMENTARY ONE OF PALMETTO'S FINEST

HON. BUTLER DERRICK

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. DERRICK. Mr. Speaker, I would like all of my colleagues to be aware of the fact that Westminster Elementary School recently was honored as the "Palmetto's Finest" in my district.

A banner now on display there proclaims Westminster Elementary as one of only six schools so honored in South Carolina.

All of us realize that an elementary education is one of the most important experiences for any child. After the family, elementary school is the most influential institution in their lives. In most cases, this is where our youngsters first learn about themselves and the world around them.

I have had the pleasure of visiting countless schools since my election to Congress 15 years ago. And I'm pleased to report that many of the students I've talked with recently seem to be getting more out of school than ever before. Teachers are challenging them to excel and they're responding to the challenge.

Westminster Elementary's faculty, students, and parents have reason to be proud of this special recognition. At a time when our schools are coming under close scrutiny—and in some cases being criticized—it is clear to all of us who know of the high educational standards being set and maintained there, that Westminster Elementary is obviously doing a lot of things right.

A TRIBUTE TO ERNIE E. WISSINGER OF BLAIR COUNTY, PA

HON. BUD SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. SHUSTER. Mr. Speaker, I rise today to share with the Members of Congress the outstanding achievements of Mr. Ernest E. Wissinger of Blair County, PA. Since 1946, Ernie has been the steward of the major growth and expansion of his grocery markets in Blair County, and he is being honored by his friends on Monday, May 22, 1989 in a salute to his many achievements.

What makes Ernie Wissinger a truly outstanding American is the fact that he not only was successful in his many business enterprises, but that he always gave back to his community the fruits of his success. He shared not only his financial support, but he gave of himself. His interests were not focused on one group, but on many. He served on the board of directors of the Blair County Easter Seals Society; he was the Penns' Wood Council of Boy Scouts Man of the Year; he received the Altoona Rotary Paul Harris Fellowship Award; he was director of Junior Achievement of Blair County. He supported the Altoona Symphony Orchestra, Pennsylvania Public Television, and the Altoona Family YMCA.

I believe I speak for Ernie when I mention his greatest achievement, however, and that is his family. His beloved wife, Ruth, recently passed away. Ernie should be comforted by the knowledge that he was a devoted husband and that their union was blessed by children, grandchildren and great-grandchildren. Ernie is a dedicated family man and one look at this beautiful family is testimony to his dedication to them.

Blair County has been enriched by Ernie Wissinger's presence, and I stand here today to add my personal salute to this great man.

CONGRESSMAN DAVID OBEY ON MEDIA COVERAGE OF THE CONGRESS

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 17, 1989

Mr. LANTOS. Mr. Speaker, Congressman DAVID OBEY, our distinguished colleague from Wisconsin, has a long and illustrious career in the Congress. He has played an important role during his service in this body in bringing about important and progressive changes that have taken place here. On the matter of ethics, the gentleman from Wisconsin has been one of the preeminent leaders in the passage of the ethics legislation for Members of Congress.

Recently, Mr. Speaker, Congressman OBEY delivered an important speech before the Center for National Policy in which he raised a number of highly significant issues with regard to the national news media and media coverage of the activies of the Congress. That speech deserves the attention of those of us who serve in this House, as well as the American people.

Mr. Speaker, I insert Mr. OBEY's speech in the RECORD:

REMARKS OF CONGRESSMAN DAVID OBEY

There is a whole lot that I would rather talk to you about today. I would prefer to talk about foreign policy issues, about economic issues, about ideas I have for changing the budget process, but, because I care about the democratic process and democratic institutions, today what I want to talk to you about is the subject of ethics.

I do so with some trepidation. I doubt it would do any good. As my favorite philosopher, Archy the Cockroach, observed once, "Just as soon as the uplifters get a country reformed, it slips into a nose dive." In doing so, I want to talk a little about the Congress, the press, and the health of our political institutions. I do so from the perspective of a life-long, idealistic, Wisconsin progressive reformer.

Let me start by saying that I have worked 20 years in this city, and I have never liked this city less than I do at this moment. I know of no Member who has been a stronger critic of Congress than I have been. Some examples:

(1) I wrote the code of ethics under which the Speaker is now being judged. That act cost me the chairmanship of the Budget Committee in 1980 because those reform efforts cost some Members $100,000 a year and they never forgave me for it, even though I was simply doing a job I was asked to do by the leadership for the good of the institution.

(2) I wrote the rules changes that blew up the concentration of power on the Appropriations Committee in the hands of a few old bulls who ran the Appropriations Committee like their own plantation.

(3) The last campaign reform bill that successfully passed the House of Representatives was my bill—the Obey-Railsback bill.

(4) In '81 and '82, when the Congress was swooning before Ronald Reagan and swallowing the tax and budget frauds that led to today's disgraceful deficits and even more disgraceful abandonment of the poor and the poorly connected, I authored the major progressive alternative to both the Republican and Democratic packages and raised more hell about the institution's knee-buckling than anybody around. So, I think my credentials as a critic of Congress are safe.

But, I think I am a responsible critic and a careful and fair one. I criticize to strengthen, not to injure, the institution, which is the world's oldest, truly independent legislative body. I devote so much of my time to institutional questions because I do not believe democracy can function as an atomized society. Democractic societies require strong institutions in order to preserve democratic values, and no institution is more important or more vulnerable to the pressures and passions of society than the Congress.

Political electricity runs hotter through congressional wiring than it does through any other branch. The courts function largely behind closed doors. They ask questions in public but make choices in private. They are designed by our Founding Fathers to be insulated from and unresponsible to public pressures. There is plenty of insulation on their political wiring. The Presidency is less insulated but is again, by design, much more remote and insulated from daily grass roots heat than is the Congress. If you doubt that, compare the visitors in President Bush's Office each day with the visitors in mine. When the President wants to put a little extra on his political fast ball or when he wants a little more insulation from the heat of the political current, he relies on the heavy duty protection afforded by his role as Chief of State.

The Congress has no such political insulation. We were designed by our Founding Fathers not to. We can't put a top secret classification label on our mistakes. We make our mistakes on C-span, in full public view. We don't work in the bowels of the Executive Office Building or in the almost cloistered chambers of the Supreme Court. We work in an open room, with the public looking right down on us and our adversaries seated 10 feet away. We are immersed in political sparks every weekend when we go home to our districts. And because Congress is so vulnerable to voltage surges in the political system, I cannot stand by and allow some of the viciously warped attacks on that institution to go unanswered.

The last attack on Congress, as an institution, has come in the context of the Nation's most recent concern with ethics. I think ethics are important in a democracy. They define relationships in our private lives, and they are crucial to public confidence in our public actions. But, ethics need to be applied in their broadest sense, and they should be practiced as much as they are preached by the one institution which has often applied a different standard to Congress than it has to itself—the Washington Press Corps.

I have immense respect for the press as an institution and profound respect and even affection for many reporters. People like Dave Broder, Al Hunt, Dave Rogers, Haynes Johnson, Jack Kole, Liz Drew, Charlie McDowell, Rich Cohen, Mary McGrory, and others are valuable, national resources. So are many others. They help make this society work. But, too many others, even some who on most occasions do a first-rate job, often display a mean-mindedness and reckless disregard for balance and fair play in their skewing of the Congress.

While the Post has won the annual award, I think I would like to nominate for the Morton Downey Award of the Month two publications with a fine history who ought to know better—Time and Newsweek. Time and Newsweek, in their coverage of the payraise issue and the Wright case, have, in their broad brush since coverage of the Congress as an institution, displayed the ethics of an alley cat.

Let me give you some examples: First, the payraise coverage. Newsweek ran an article on February 13 which said that "The case for a congressional payraise is far from clear." So far, so good. Who could quarrel with their right to say that? But, the problem is, that the article then went on from there to cite as evidence the fact that most Members take speaking fees of up to $2,000 a clip. In the Senate, up to 40 percent of their salary.

That article perversely ignored the fact that the payraise had been proposed as part of a trade off that would have eliminated the very income Newsweek implied would be a supplement to the new public salary. Buried 5 columns away was a one sentence reference to Congress' intention to eliminate that income. My point? If they wanted to kick the payraise, be my guest. But don't through sleight-of-hand writing, put it in a false context.

Time was similarly selective in its use of numbers to describe the relationship of the payraise to inflation, by focusing only on the years from 1987 to 1989, conveniently forgetting the 13 years in the last 20 that Congress voted to exclude itself from payraises.

Time magazine in its stories on pay and on the Jim Wright probe showed an interesting willingness to take note of the speaker's physical features. What was described on February 13 as "Country boy grin" (that is considered a compliment where I come from, but in this town it is often an elitist put-down by urban snobs) had evolved to a "leering grin" in its April 17 issue which was also embellished with references to "slick-backed hair and caterpillar eyebrows". If we are going to get in the business of dragging in physical or facial features to set the tone for analysis, I can frankly say that there are a few reporters whose looks don't especially thrill me, either.

That same Time magazine article then went on to suggest that the Speaker's dealings were "probably not unseemly enough to violate the shabby standards of Capitol Hill." That is an interesting comment, written by a reporter who fought against further disclosure of income for reporters during the recent squabble in the House peridoical gallery. It is also a quaint comment, given the history of that same magazine's coverage.

Gaylord Nelson, whose ethical standards I believe are unquestioned, told me recently that unless memory fails him while he was holding hearings on generic drug pricing and drug company profits, those hearings were being thrashed by a reporter, who worked for Time magazine and who held large holdings of drug company stock. I don't suggest that Time magazine has shabby standards because of the questionable conduct of an individual reporter who may have had a conflict of interest, but I think the House of Representatives is entitled to the same kind of fair review.

But the worst example of institution trashing that I have seen in my 20 years here was the article that appeared in Newsweek on April 24 about the Congress. The kindest sentence in that article was one that read: "As a group today's Congressmen are less venal and better educated than their predecessors." And, oh yes, it had one other 5 word positive reference to the Congress: "Many are diligent and honest", it said, but even that statement was contained in a sentence that was an attack on Congress and in an article that was a relentless 16-column 6-page hatchet job on the Congress as an institution. Peppered with words such as brothel, venal, spineless, meaningless, sterile, whore, loathing, hypocrisy, filthy, infamous, and parochial. It described a congressional lifestyle with terms such as exotic and splendor. It even calls the Republican Club elegant. To anybody with taste, the Republican Club is about as elegant as Ritter & Deutsch Funeral Home in my home town and just about as inviting.

That article attacks Congress for its obsession with visibility and works overtime to leave the suggestion that the average congressional day is spent in an obsessive hunt for television coverage. It has a long section suggesting that a day in Congress could begin with an 8:00 C-SPAN interview, followed by a rush to the hearing covered by C-SPAN, followed by a dash to the TV gallery for interviews, and a rush to do satellite feeds to your district, followed by an afternoon session to convert a floor statement into a campaign spot (something, by the way, which is absolutely against House rules as any cub reporter should know), capped by a 5 p.m. cable news interview. It even then goes on to ridicule our lust for squeezing in an appearance on "Good Morning America," sandwiched in between a mud wrestler and a stripper.

I would make just 3 points in response to that tripe: (1) I did not know that Congress was responsible for the junk that often passes for news on network morning TV shows. (2) I thought that C-SPAN was a public service installed in response to public and press demand, not the other way around. I do not recall that the press had to be dragged kicking and screaming into sup-

porting televised coverage of the House. It seems to me it was the other way around—that Congress was most reluctant to put the House in daytime competition with network soaps. (3) In terms of our hunger for network coverage, I would simply like to point out that I have turned down 21 requests for network interviews over the last year. I have accepted only 5 or 6 because I get tired of serving for 12 seconds as a fleeting talking head in somebody else's already written script.

My day, if there is anyone from Newsweek listening, is quite different. It begins, usually at 8:00, not with C-SPAN, but in my office or somewhere on the Hill doing the business I'm paid to do. From 9:00 to 10:00, I'm usually being prepared by staff. From 10:00 to 12:00 or 1:00, I'm usually in a hearing. When those hearings are done, I usually wind up back in the office or on the floor. Most of that time is spent on the phone or dealing with other Members. I generally leave my office about 7:30 or 8:00 that night. And after taking time to watch Night Court or Cheers, in order to wind down, if I get home in time to do that, I settle down to a good 2 hours of evening reading to be ready for the next day's hearings. Two days last week, because of a serious problem in my district, I did not get home for supper until 10:00.

I, frankly, spend much of my time avoiding national news magazines because my experience is usually that you spend 20 minutes or so to help some reporter understand a story, and as often as not, the story will be quite different than was suggested to you during the interview. It, frankly, isn't worth the bother for people like me who often have to choose between doing our work or taking the time to explain it to some Washington press person, who thinks that the continent ends with the Appalachian Mountains.

The Newsweek article also says that staff aides are raised in a culture where trading votes for money or pleasure is just another day at the office. That is so piggish it doesn't deserve comment.

The author also talks about junkets to Paris Air Shows. I have never been to the Paris Air Show, myself, but I wonder how many news magazines who annually make reference to it ever run stories about fun loving congressional junkets to places like the Sudan, Ethiopia, the Philippines, Calcutta, Peshawar, Managua, Honduras, or Contra camps where you can have the fun of sitting and talking with 17-yr. old kids with their faces, arms, and guts blown away. Am I saying they shouldn't report the Paris Air Show? I don't care. I am saying that it might be nice if in the same story that ran 2 weeks ago they had reported some of the others.

The article also swoons about the fancy receptions we get to go to. Have you ever seen B-339 Rayburn? Do you really think that we want to go to those receptions? We sometimes do, out of courtesy to local constituents who having traveled 1,000 miles have the quaint idea that it would be nice if they could see their Congressman. Those receptions are like Ronald Reagan's remark about California Redwoods: "When you seen one, you seen them all."

The article also says, "Members live a virtually expense-free existence." If that is so, why do I pay 40% of the cost of my health coverage in insurance premiums when in the private sector, many corporations cover 60, 80 and 100% of the cost of health premiums? If we have free health care as was indicated with nauseating regularity by many stories during the payraise fight, why did I have to pay $1500 for my stay in the hospital two months ago? If we live in an expense-free existence, why is it that after 20 years of service here, outside of my home in Washington, my home in my hometown, and a $10,000 ½ share of a tiny cottage in my district, I have $15,000 in savings and absolutely no other investments, holdings, or investment income of any kind?

Newsweek also revealed the shocking news that the Senate and House Members get an allowance "for sojourns back home to mix with constituents on 4-day weekends." That shocking revelation appeared one sentence before the comment that those same Members "live in an essentially insular world". How we can live in an insular world when constituents lobby us in our offices every day and when we return to our districts every weekend was not quite explained. It is those very trips home that guarantee that Members of Congress will live in a far less insular world than members of the press corps, who spend most of their lives within the jaded and cynical confines of Washington, D.C. Any member of the press who thinks that those 4-day weekends are vacations is hereby invited to travel with me to my district the next time I go home.

I should not have to say this, but I will. Those trips back home are a necessary part of our staying in touch, maintaining an awareness of what is happening in the districts we represent. But they do exact a heavy personal toll. I average, over the course of 2 years, about every other weekend back in the district. That is a lot of weekends to deny your wife and your kids. I don't do it because I love traveling around airports missing connections. I do it because it is the price the public expects us to pay to stay in touch, and I make absolutely no apology for it, except to my family for the loss of the shared experiences of birthdays, baseball games, and piano recitals that in the end make life special.

The article also says, "Most staff is employed to enhance re-election." Is George Bush's staff hired to diminish his? Are reporters hired to lose circulation? We've all also seen the stories, reviewing in shocked tones, the fact that Members of Congress actually have offices, and desks, and typewriters, and telephones, and parking spaces. What is so shocking about that? Do you know of any business executive who doesn't consider that a normal part of doing business?

I vote hundreds of times a year. I receive 50,000 letters from home each year. And you know people who write those letters have the quaint notion that the votes I cast should be well thought out and they expect me to answer their letters. Occasionally, they even expect a thoughtful response. If staff is a perk rather than a business necessity, then why can't Time and Newsweek put out their magazines without benefit of the helping hands from their Washington reporters. I represent 530,000 people. How many members of the Washington press corps represent that many people? How many of you would pay the personal price? How many of you could do it as well?

The Newsweek article also excoriates Congress for the honoraria scam. I want to make only one point. Congress has no need to apologize to the press on that one. In 1977, when we were imposing tighter limits on outside income a number of highly respected members of the press opposed those limits, and instead, supported disclosure as an adequate protection of the public interest. Walter Pincus, wrote a very thoughtful article the day my reform package was on the floor, urging that it be defeated because it was too common-causish and went too far. He even attacked us for not having an exception for book royalties—we did, but he had misunderstood our package.

All I will say to the press on this score is at least Congress discloses both the source and the amount of its speaking fees. Compare that to the practice in the fourth estate. The Washington Post reported, for instance, that 2 respected columnists, earn $500,000 per year on speeches. Do you think they could enhance their political notoriety and hence their earning power by being more thoughtful or more hyper, more analytical or more confrontational?

A Newsweek reporter, who I find on most occasions to be a thoroughly professional and thoughtful reporter, suggested that she didn't mind disclosing her source of income but did object to answering how much she made several months ago, calling the request for information "voyeurism". Henry Fairlie and Ken Adelman pointed out that the more controversial journalists become the more they can earn on the lecture circuit. Newsweek's Rich Thomas, who favors disclosure, says his speeches are "on general economic policy"; so are mine. I love to talk about economics and budgets.

Of course, reporters are right when they say that there must be a higher standard than that of the market place for those of us in public service. That's why Members of Congress do disclose the amounts and sources of their outside income, even though those who report our actions and shape public opinion in the process do not—disregarding Adlai Stevenson's warning that "Those who corrupt the public mind may do evil just as great as those who steal the public purse".

I would simply suggest that as we see the press posing for more holy pictures on ethics, they ought to at least think about the ethical standards that allow them to smear an entire institution for the conduct of a few of our Members. And I think they ought to do some thinking about the standards of their own institution, as well. They also ought to ask why they have exhibited such a different measuring stick to some of their pet people in this town's power structure.

Example: the former Secretary of the Treasury held $250,000 in Chemical Bank Stock, a bank which had large debt holdings in the Third World, while he managed policy on Third World Debt, an issue of crucial importance to that and many other banks. I do not for a moment believe that any decision he made had anything whatsoever to do with those holdings. I think he is too honorable a man to think that way. But, if the chairman of the Foreign Affairs Committee had had similar holdings, he would have been crucified.

Or, what about the President? Mark Shields, God Bless him, tried to point out the difference between the press' handling of congressional appearances of conflict of interest with the incident in which 18 wealthy friends chipped in, at least $155,000 each, to buy a 7200 sq. ft. house for $2½ million for the use of President Reagan. The house was apparently purchased 2¼ years before the President left office. Shields observed, "Admirers of Reagan defended the house purchase by pointing out that Nancy never liked the ranch." I understand that the President is now paying rent for that

house, but everyone likes Ronald Reagan so no questions asked. But as Shields pointed out, "The House leader or chairman who accepted the kindness of 16 unnamed, independently wealthy benefactors would be committing political suicide. It is more than double standards, it's tough standards and no standards."

In response to some of the malarkey being peddled these days about the anxiousness of the Congress to shield any and all Members from the consequences of wrong doing, David Broder pointed out that "in the past 10 years, the House has moved to expell 4 Members for misconduct. * * * it has formally censured 4 Members." "Reprimands or other forms of mild fault-finding were voted on another dozen Members, most of whom have subsequently resigned from the House, been defeated or have removed themselves to less exacting and more permissive surroundings."

Broder then goes on to say, "That is hardly a pattern suggesting a calculated, callous indifference to the rules of conduct." He then goes on to point out that "Out of the 15 or more Members who have felt the stings of ethics investigations, only 3 have been Republicans." He then concluded by saying, "If the Democrats in control of that so-called corrupt institution are trying to punish their adversaries and trying to protect their own, they need glasses."

He concluded that by saying, "Contrast that record, if you will, with the repeated instances of cover-ups, conflicts of interest and plain old-fashioned corruption that have come to light in the executive branch in the past decade. And think about the number of times that a President has rushed out to defend, rather than denounce, the culprit—to pronounce that, in his eyes, Charley the chiseler is still a national hero or a good friend." As Broder noted, "The record shows that the House has done a whole lot more to cleanse itself than the executive branch can claim. So spare us please, this malarkey."

In judging the application of ethical standards, it might be useful to take note of the testimony of former Congressman Otis Pike, who appeared before the new House Task Force on Ethics on which I serve, just last week. Otis Pike was a tough, decent, valuable, gutsy, and ethical Member of the House of Representatives, who chose to leave the House, rather than change his personal financial income situation as required by the ethics package which I pushed through the House in 1977.

This is what he said last week: "Ethics has replaced mom, the flag and apple pie." Ethics are in and must have their day. So did the pursuit of witches in New England and heretics in Spain, both embraced by gentlemen so positive that they were uniquely qualified to oversee the morals of others that they had no qualms about inflicting excrucuating pain on those other people. Always, of course, in order to make them better people and the world a better place.

He then went on to say, "When you legislate ethics, you are shooting at a moving target. Anybody that can spend 10 or 20 years pondering what to do about easy issues like acid rain or where to dump nuclear waste may not be able to give enough lead to targets that have puzzled all the religions of the world for millenia."

He then went on to say, "Ethics is not as great a problem with Congress as is courage. This Nation was built by men who couldn't, and wouldn't have lived by your rules (the rules of the House). They were terrible men who drank caroused and gambled. Some kept mistresses; some were worse. They connived and made deals and some grew rich in office." "Robert Morris of Pennsylvania, who the old text books called the financier of the revolution was asked to get ammunition for Washington's Army. He did, through his own trading company and wrote, "There has never been so fair an opportunity for making a large fortune since I have been conversant in the world." Daniel Webster said the birthplace of the Revolution was a tavern in Boston. The Marines were born in a tavern. You can talk about ethics forever and pass more rules and reveal yourselves until all of your and your spouse's financies, food, drink, sex, religion, clothing, vacations and the hours and minutes and places of your arising and retiring are public records. You will never be held in high regard or deemed ethical while you say you can't balance a budget unless a constitutional amendment makes you; while you accept gloriously optimistic economic projections rather than deal with real ones; while you write a Gramm-Rudman bill and then spend days finding ways to get around it; while you let one man make $550 million a year while thousands sleep in the streets."

Everyone can discern their own meaning from Otis Pike's words, but let me tell you what they say to me. I believe all political institutions must continue to try to raise the ethical standards which guide them as they go about the Nation's business. I think my whole career demonstrates that belief. But I also believe that our Government cannot function unless there is a cooperative as well as a confrontational relationship between key institutions, in and out of government, who help this society function.

By all means, the press must continue to try to ferret out corruption and lack of ethical behavior. But it must be done in a way which strengthens the ability of all institutions to do a better job in confronting the questions that beset us. As George Will has often and thoughtfully noted, real ethical questions are far broader than simple questions of personal or financial behavior.

Public policy decisions should be evaluated in terms of whether they produce ethical results. A few weeks ago as I walked down Connecticut Avenue toward ABC News, I passed a number of homeless men. I could not help but think that the ethical failure of government to provide decent shelter for those poor souls was monstrously larger than the ethical failings we were about to discuss in the Tower and Wright cases.

When I first unpacked my bag of Wisconsin progressive values 20 years ago, as an idealistic 30-year-old newcomer to Congress, I had the idea that public decisions which deny decent shelter to today's poor and steal from the living standards of tomorrow's families in order to continue the fiction that wealthy people are overtaxed are at least as unethical as, say Judge Ginsburg's smoking a marijuana cigarette or a Cabinet nominee's feeling a female knee in public. So is lying to Congress about financing an illegal war. I still do. So is the unnecessary savaging of an institution of government which is crucial to the success of this country and this society.

So much for ethics. Let me also talk just a moment about two issues on which the Congress, as an institution is getting a bum rap. First, campaign financing. The conventional wisdom circulated in most press stories about campaign financing is that Congress conspired in a self-serving way to set up this treadmill of big dollar compaigns that litter the landscape.

Lord knows that I am frustrated by Congressional division of this issue, but it's about time that people who write about the issue face squarely the fact that the campaign laws we are operating under today were not designed by the Congress. They represent what was left of congressional efforts to reform the campaign process after the Supreme Court, in a spectacular example of naivete, equated dollars with free speech and threw out congressional efforts to limit the amount politicians could spend on campaigns.

The Court in its infinite wisdom has said that Congress cannot limit the amount of money spent by any politician to get elected. That has turned elections into auctions, and until the court recognizes its own mistake, we're unlikely to be able to do very much to fix up that problem. The Court has also told us that we cannot take any action that would effectively limit so-called "independent expenditures". You know what they are: that is when a lobby group gets mad enough at an individual Member of Congress to spend $100,000 or $200,000 in a TV blitz to get him licked, but pretends that that effort is not part and parcel of that Member's opponent's campaign. We're going to see a lot more of those. Just last Friday, a PAC Director told me that the new name of the game is going to be independent expenditures and coordinated directing of individual high dollar contributions. That is the wave of the future. Congressional politicians know that, and it's in their own best interest to try to do something about it, as well as the interest of the country.

I still support campaign reform legislation and limits on PAC's. But, I ask you a question. When the public still opposes public financing as a remedy, when, for instance, public opposition to it in my own district has grown by more than 20%, what is passable now? When the Courts forbid limitations on independent expenditures (which will certainly dominate the election landscape if PAC's are limited), and if politicians are denied the independence which in an ironic way comes from an ability to raise a large number of small contributions from a broad spectrum of PAC's so that no one or two sources of campaign dollars are very important, and were they then left vulnerable to huge war chests of single PACs willing to engage. In the Independent expenditure game, could that not make them less likely than before to resist the legislative demands of the single PAC with a reputation for going for the jugular? Don't newspapers like the Post, along with their squawking, have an obligation to help us find some answers to prevent tomorrow's nightmare before they wax so piously about Congress' inability to find those same answers.

Yes, Congress has resisted reforms I believe in. But would it not be fair for the press to direct just a little of its sanctimony at the Court and the 9 naive souls there who through their rulings have made it almost impossible to fashion a legislative remedy that would be both clean and fair. It is time for the Supreme Court to accept the consequences of its actions. As Sam Rayburn said once, If even "one of them had run for sheriff" they would have understood the practical world of political campaigning, and they would not be standing in the way of congressional efforts to wipe out those loopholes.

Secondly, the budget process. Virtually every budget process story I see bemoans the shortcomings of the "Congressional Budget process". But, the weaknesses of the budget process are not rooted in the arcane questions of congressional jurisdiction. They are rooted in 2 simple facts: (1) the country has decided it does not want any new taxes, after being told by two successive Presidents that we don't need them; (2) the newly resurrected form of Gramm-Rudman takes away from Congress the ability to even argue about administration economics assumptions, which are the basis of any budget. Under the new version of Gramm-Rudman, which is lying raised to a high art form, only OMB decides whether or not we are going to exceed the deficit targets defined in Gramm-Rudman. And so, the Congress has lost its effective ability to even argue about them.

What the country needs is not one more call for Johnny Goodwrench to change the process. What is needed is a simple recognition that political courage ought to be rewarded rather than condemned.

In the last 4 years, Congress has tried on 2 occasions to make everybody face the music on the deficit. First, Bob Dole and Pete Domenici tried it but they were cut off at the pass outside the White House door by Jack Kemp and his supply-side true believers. Jim Wright and Tom Foley tried to do it 2 years ago in the summit negotiations. But the problem in this town is that courage on the part of public officials is always much in demand until it is displayed, at which point it is often dismissed as tactical blundering. If you don't believe that, take a look at the price Jim Wright paid when he pushed for additional revenues before the stock market crash in 1985.

There have been a lot of stories written the last few weeks about how the Congress passed the buck on the budget resolution by adopting Alice-in-Wonderland numbers. Those stories are absolutely true. What's missing in those stories, however, is the explanation that those institutional winks where the priced demanded by the President and his negotiators for their support for any budget resolution. The executive branch of Government has 90% of the resources in this town when it comes to putting together a budget. Since 1921, they have had the responsibility under the law to begin the process. When the process begins with a public lie, there is very little that Congress can do except to point that out and ask the administration to deal again. When the administration says, "no, I want to play these," the Congress has little choice but to say, "OK, if that's the way you want it".

I don't like it, which is why I voted against the budget resolution this year because I didn't have the lung capacity to hold my nose as long as it would take if I had voted for it. But the fact is that the leadership of the Republican Party in the Senate and the Democratic Party in the House had made quite clear their willingness to change it. There is plenty of blame to go around, but in the end, everyone in this room knows, the roots of the problem lie in the fantasy story which the past and present occupant of the White House weaved for the people we are supposed to represent. And until Dorothy wakes us and goes back to Kansas, that isn't going to change. And that is the most unethical fact of all.

It is good to have from George Bush his suggestions for a code of ethics for Government employees. But unless that is accompanied by an honest budget which makes an honest attack on the deficit and creates a fair distribution of opportunity for all American families, this town will continue to give more attention to form than substance. And that will truly lead to the kind of public disillusionment which we simply cannot afford in a democratic society.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, May 18, 1989, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

MAY 19

9:30 a.m.
Armed Services
Strategic Forces and Nuclear Deterrence Subcommittee
To hold closed hearings on operational requirements of the U.S. Space Command, and proposed budget request for fiscal years 1990 and 1991 for the U.S. Space Command.
S-407, Capitol

Select on Indian Affairs
To hold oversight hearings on the U.S. Civil Rights Commission's effects on the White Mountain Apache Tribe.
SR-485

10:00 a.m.
Appropriations
VA, HUD, and Independent Agencies Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1990 for the Department of Housing and Urban Development and certain independent agencies.
SD-116

Environment and Public Works
Environmental Protection Subcommittee
To hold hearings on proposed legislation to control the manufacture, use, and disposal of ozone depleting substances.

HOUSE OF REPRESENTATIVES—*Thursday, May 18, 1989*

The House met at 10 a.m. and was called to order by the Speaker pro tempore [Mr. COELHO].

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
May 18, 1989.

I hereby designate the Honorable TONY COELHO to act as speaker pro tempore for today.

JIM WRIGHT,
Speaker of the House of Representatives.

PRAYER

The Chaplain, Rev. James David Ford, D.D. offered the following prayer:

Gracious God, as we encounter the difficult problems of our society—the alienation between families and groups, and the confusion in values and purpose and direction, may each of us judge our own lives and discover how and where we may better serve You by serving others. Help us to be aware, O God, of the resources available for our benefit and the benefit of all Your creation. May the faith of every person be so strengthened by the experience of Your grace and overwhelming love, that we may look to the road before us with hearts and minds full of your good spirit and hands eager to do the works of reconciliation and peace. This we pray. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. SOLOMON. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Chair's approval of the Journal.

The SPEAKER pro tempore. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. SOLOMON. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 284, nays 98, not voting 52, as follows:

[Roll No. 58]

□ 1022

So the Journal was approved.

The result of the vote was announced as above recorded.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore (Mr. COELHO). The gentleman from North Carolina [Mr. LANCASTER] will lead the House in the Pledge of Allegiance.

Mr. LANCASTER led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks, announced that the Senate had passed a concurrent resolution of the following title, in which the concurrence of the House is requested:

S. Con. Res. 38. Concurrent resolution providing for a conditional recess or adjournment of the Senate from May 18 or 19, 1989, until May 31, 1989, and the conditional adjournment of the House from May 25, 1989, until May 31, 1989.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2) "An Act to amend the Fair Labor Standards Act of 1938 to restore the minimum wage to a fair and equitable rate, and for other purposes."

FSX, A BAD DEAL FOR AMERICA

(Mr. McNULTY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McNULTY. Mr. Speaker, I rise to express my strong opposition to the agreement for the United States and Japan to jointly build the FSX fighter aircraft. I believe this deal is bad for America. We must not give away our highly advanced and sensitive technology—nor should we contribute to the establishment of a Japanese aerospace industry that can challenge our world leadership in this field.

As for their assurances that they would safeguard our technology, I hope my colleagues will recall the event of 1983, when Toshiba illegally sold our high-technology metal milling machinery to the Soviet Union. This enabled the Soviets to build quieter submarines and increase their ability to escape radar detection. It was a great blow to our security.

Since the end of World War II, we have done everything possible to help rebuild Japan's economy and transform her into a world economic power, and she has become the worst offender in fair trading practices of any nation today. We have given the Japanese the capability to outpace us in a variety of world markets while they deny us access to their own domestic markets.

Mr. Speaker, we have been subsidizing the defense of Japan for over 40 years. We are currently subsidizing their economy to the tune of $60 billion per year. Japan's relationship with the United States has been all take and no give. I think it is time for Japan to buy American for a change.

POWER SHORTAGES AHEAD FOR THIS SUMMER

(Mr. REGULA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. REGULA. Mr. Speaker, I would like to urge each of you to read the article in today's Wall Street Journal captioned: "Get Set To Lose Your Cool This Summer. Power Shortages Expected to Hit Much of the United States, Brownouts and Blackouts, Brace for Them."

It goes on to point out that as we look down the road over the next decade, we are going to be faced with a very substantial shortage of power in the form of electricity, that it will cause economic slowdowns, job loss and so on.

I think the point of all this is that we need to move forward rapidly on clean coal technology. We need to be very careful as we draft clean air legislation to insure that we do not put a chill on the availability of power, that we do not do something that is debilitating to our ability to have the necessary energy in the form of electricity to maintain economic growth and produce the jobs we need.

COMMENDING SECRETARY DERWINSKI ON AGENT ORANGE DECISION

(Mr. LANCASTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LANCASTER. Mr. Speaker, I rise today to commend Veterans Affairs Secretary Edward Derwinski's decision not to appeal the ruling recently handed down by U.S. District Judge Thelton Henderson.

As some of my colleagues may know, Judge Henderson, a Federal judge in California, recently ruled with a group of Vietnam veterans in a lawsuit to require the Government to recognize that agent orange caused severe health problems, including cancers, heart conditions, skin problems, and infertility.

Members of the Vietnam Veterans of America and the American Legion have long been fighting an uphill battle to obtain justice for veterans exposed to this defoliant during the Vietnam war. The decision confirms that the Government has not done its part to put an end to the suffering from the Vietnam conflict.

The ruling of Judge Henderson requires that the Department of Veterans Affairs put an end to the 10-year denial and now consider compensation claims from veterans. Every denial of an agent orange claim since 1985 must now be reviewed.

Mr. Speaker, the decision by the court, and Mr. Derwinski's decision not to appeal the ruling, are steps in the right direction. Congress must now move ahead with legislation to appropriately compensate these victims of this devastating chemical.

VETERANS AFFAIRS SECRETARY DERWINSKI WARNS OF HEALTH CARE BUDGET CRISIS

(Mr. SOLOMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SOLOMON. Mr. Speaker, during the discussion yesterday on the supplemental budget, there seemed to be a misunderstanding among some of us as to the position of Secretary of Veterans Affairs Ed Derwinski.

Let me read you a press release put out by Mr. Derwinski last night. It states:

V.A. Secretary warns of health care budget crisis. Secretary of Veterans Affairs Edward J. Derwinski today expressed his grave concern over Congressional failure to act promptly on an emergency supplemental appropriation for current year needs for the V.A. health care system.

Derwinski said, "Unless prompt action is taken, the V.A. will be forced to take measures to cut medical staff and services to veterans across the Nation."

I will remind Members that the Senate is going out today, will be gone for 2 weeks. We are going out next week. There is no opportunity to pass this supplemental if we do not do it now before 12 o'clock today. I urge you on behalf of all the veterans in the veterans hospitals in your district, let us do it today, please.

□ 1030

HAMMADI SHOULD BE EXTRADITED TO THE UNITED STATES

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, yesterday a court in West Germany sentenced convicted hijacker Mohammed Ali Hammadi to life imprisonment for the 1985 murder of United States sailor Robert Stethem.

Mr. Speaker, this is an outrage. How is it that a member of the U.S. Armed Forces can be brutally murdered by a known terrorist and then they give him a slap on the wrist? Because the life sentence will only be after they

cut their deal a few short years, and we all know it. They'll let him free.

I agree with the father of that slain officer that America should do everything possible to have West Germany extradite him for trial, and I believe he should receive his just reward, the death penalty.

We provide West Germany with a lot of help, a lot of money, and I think it is time they reciprocate. All we are asking them to do is send the hijacker and murderer, Hammadi, back, and I think the Stethems deserve a lot more justice from America at this point.

INTRODUCTION OF LEGISLATION PROMOTING EVOLUTION OF FREE SELF-GOVERNMENT IN PANAMA

(Mr. CRANE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CRANE. Mr. Speaker, today I am introducing a House concurrent resolution that is designed to try to promote the evolution of free self-government in the Republic of Panama and simultaneously secure United States interests in the zone and with regard to the Panama Canal.

What it would do is effectively prevent any loss of United States authority and control of the canal in the absence of freely elected democratic self-government in Panama, and this would apply not just to Mr. Noriega, but in the event Mr. Noriega were replaced by a similar gun-toting tinhorn dictator, the same principle would apply. There would be no transfer of U.S. authority or control until they have in place a freely elected government.

I would urge all of my colleagues to get behind this most worthy legislation.

LET US NOT RUSH TO JUDGMENT

(Mr. SKELTON asked and was given permission to address the House for 1 minute.)

Mr. SKELTON. Mr. Speaker, many in Europe and some here in this country have become euphoric over the pronouncements, the "new thinking," of General Secretary Gorbachev. Some on this side of the Atlantic are even ready to bring American troops home from Europe. They say the cold war is over.

Mikhail Gorbachev recently wrote President Bush that the Soviet Union has not sent arms shipments to Nicaragua since January. However, it appears that some 28 shipments from the U.S.S.R. have reached Nicaragua through April. Despite Mr. Gorbachev's "new thinking," old habits seem hard to break.

Caution is in order at this time. The "Good Book" advises that "the tree is known by its fruit." In many ways the fruit is still only a bud, despite Mr. Gorbachev's beguiling words.

Admiral Crowe, Chairman of the Joint Chiefs of Staff, finds more continuities than changes in the essential elements of Soviet military power. Earlier this spring he said, "I cannot rationalize a real reduction in spending for defense based upon force drawdowns announced by the Soviet Union * * * or the prospect that an arms agreement is just around the corner." Mr. Speaker, I say until old habits give way to "new thinking," let us not rush to judgment.

VETERANS' MONEY BEING HELD HOSTAGE BY CHRISTMAS TREE BILL

(Mr. BILIRAKIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BILIRAKIS. Mr. Speaker, I am in the well today because I am deeply sorrowed by the lack of respect that I think the House of Representatives is giving to veterans throughout America regarding the supplemental appropriations bill. We are all aware of the dire emergency of supplementing the current veterans' affairs budget, and that that was the primary reason for this legislation.

However, I feel compelled to say that I believe that the veterans' money is being held hostage by this Christmas tree bill. I find that a paramount concern of most Americans is that we balance the budget, and yet that goal is being thwarted by bills like this where programs less needy are tied to ones in desperate need, done in this way strictly intending to force us to vote for it.

The national commanders of the American Legion, the Veterans of Foreign Wars, and the Paralyzed Veterans of America all have written the leadership of the House asking that we pass a clean supplemental appropriations bill. Let us stop monkeying around with the money and services that are intended for those individuals who risked their lives for America.

They were brave enough to face enemy bullets and mortars. Are we brave enough to face tough budget questions? I certainly hope so.

ONE PENNY SEPARATES POOREST WORKING AMERICANS FROM A WAGE INCREASE

(Mr. HOYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HOYER. Mr. Speaker, the Senate joined the House yesterday in responding to the needs of working Americans by voting to raise the minimum wage to $4.55, its first raise since 1981, 8 years ago. The American people overwhelmingly support raising the minimum wage and for a very good reason.

The President, however, seems to be having a problem. There are the facts: While the minimum wage has remained frozen, average hourly wages have risen 35.9 percent, and the cost of living has increased 39.8 percent, but the minimum wage has been allowed to sink to its lowest level since 1955.

Mr. Speaker, I said on this floor a few days ago that it was but three thin dimes separating the Democratic Congress and the President of the United States. Today the chief of staff, Mr. Sununu, is quoted in the paper as saying that if it is $4.26 it will be vetoed today and tomorrow and tomorrow and tomorrow. It is one penny for the poorest Americans, one penny more than the President says he wants, that is separating the poorest working Americans from a fair wage increase.

VETERANS BEING TURNED AWAY BECAUSE OF THE SUPPLEMENTAL BILL

(Mr. McEWEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McEWEN. Mr. Speaker, today thousands of veterans will be turned away from our veterans' hospitals. An estimated 25,000 over the past 3 days have been rejected from outpatient clinics. There is a drastic shortage in the Veterans' Administration.

Many of us believe we need between $500 million and $600 million this fiscal year just to allow it to function as it has in the past. The President, in an effort to save money, requested only $340 million some 6 weeks ago and asked the Congress to act upon it.

Mr. Speaker, the debate today, and the reason we are not acting at this moment, is because of the question as to whether or not we want to throw another $400 million, $500 million, $600 million, $700 million, $800 million at the drug problem.

While veterans are being denied access to veterans' hospitals, we want to spend two, three, four times that to put in the basket for drugs when over 90 percent of the money there presently has yet to be applied for by the States. They have more money than they can spend presently, and yet we are unwilling to spend what is necessary for the Veterans' Administration to serve our veterans.

Mr. Speaker, something is drastically, drastically wrong.

VIETNAM VETERANS WANT DECENT WAGES, TOO

(Mr. APPLEGATE asked and was given permission to address the House for 1 minute.)

Mr. APPLEGATE. Mr. Speaker, Republican after Republican rose on this floor of the House of Representatives to condemn those who would hold back veterans' medical appropriations in the supplemental, and yet Republican after Republican rose on the floor of this House to condemn raising a minimum wage to a still less-than-respectable living wage. Tens of thousands of veterans work in those very low wage areas, or they do not work at all.

Where is the compassion for those veterans, most of whom are Vietnam veterans? They, too, want decent and respectable wages with which to raise their families.

Let us be consistent. I am afraid your compassion is leaking.

THE COOPERATIVE HOUSING OPPORTUNITY ACT

(Mrs. JOHNSON of Connecticut asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. JOHNSON of Connecticut. Mr. Speaker, today I am introducing legislation to provide Federal encouragement to cooperative housing projects for low- to moderate-income families. Many families today earn too much to qualify for current housing programs like section 8, but far too little to be able to save for their own home. In regions where housing costs have increased faster than wages, these families have very limited choices in housing.

My bill, the Cooperative Housing Opportunity Act, would give them such a choice by building a new partnership between public and private resources to make cooperative housing more widely available. Cooperative housing projects renovated with the help of the families themselves are already easing this problem in many communities. My bill pursues all the best goals of an effective housing program by providing a partnership between Federal and State resources, local control, and incentives for nonprofit and private sector involvement in housing solutions. Most of all, it would empower families, giving them affordable housing with a limited amount of equity in return for working to renovate and manage the cooperative.

Mr. Speaker, limited equity cooperative housing works and it should be a part of any new comprehensive Federal housing policy.

□ 1040

WE NEED TO PASS LEGISLATION FOR OUR VETERANS TODAY

(Mr. MONTGOMERY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MONTGOMERY. Mr. Speaker, since I have been here 20-odd years, legislation has been a compromise, and certainly we need a compromise today to work out something to where at least the veterans funding can come up on this House floor. If we even have to separate it from the dire supplemental legislation, we should bring it up so that we can at least get this veterans funding moving ahead.

I am told by the Secretary of Veterans' Affairs that week after next, and I want my collegues to listen to this date, week after next the Veterans' Administration in the medical care system will have to start laying off 800 professional employees in medical care each week until this dire emergency funding is passed. So it will not happen next week, but week after next 800 professional people will have to be laid off.

What happens when we do that? We turn away veterans and we do not have enough employees to take care of them, and the quality of the medical care goes down.

So Mr. Speaker, I hope we can get something done on this veterans emergency situation and done today.

LEGISLATION TO END THE SLAUGHTER OF ELEPHANTS

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker, 28 years ago I went to Africa for the first time to meet the leaders of several African nations. Seeing the herds of elephants and giraffes firsthand will live on in my memory as one of the most beautiful moments I have ever experienced.

Last week, I opened up an issue of National Georgraphic to an article describing the activities of poachers in Africa who, right now, are gunning down 200 to 300 elephants per day with submachine guns, and removing their tusks with chain saws.

I felt sick to my stomach.

Yesterday, I introduced legislation to end this slaughter. My bill places an immediate ban on the importation of all elephant products. It also expresses our desire to see elephants reclassified under the international CITES (Sightees) agreement, to ban trade of elephant products among the 101 CITES members.

I strongly urge my colleagues to cosponsor this bill to help stop the chainsaws, and ensure that there will never be a day when the people of Africa must visit a zoo to see a live elephant.

WE NEED ALL OF THE DIRE EMERGENCY SUPPLEMENTAL APPROPRIATIONS

(Mr. VOLKMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VOLKMER. Mr. Speaker, as Members of the House, I too along with 99⁹/₁₀ of the Members of this House would like to see that urgent supplemental up today to take care not only of the veterans matters but also other matters that are necessary, especially for drug enforcement. We need additional funding for the remainder of this year to adequately fight our war on drugs.

We just heard the President earlier this week on what we need to do, and we need to address that today as well as the veterans funding. We need to provide those additional funds for the fight on the war on drugs. That is just as important in my mind as making sure that our veterans receive the care necessary in our veterans hospitals.

So let us get on with it. Let the appropriations chairman bring up what he proposed to do yesterday and take up the bill, pass it, and send it on to the Senate today.

OAS KEEPS HEAT ON NORIEGA

(Mr. BROOMFIELD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BROOMFIELD. Mr. Speaker, over the years, many in Washington have voiced a low opinion of the work done by the Organization of American States. But last night's OAS resolution on General Noriega demonstrates that the organization can play an important role in achieving democratic reform throughout the Americas.

The resolution has put the OAS clearly on the side of the democratic forces in Panama. The verdict of Panama's voters and the graphic television pictures of Noriega thugs beating the democratic opposition candidates created a movement in this hemisphere for the ouster of General Noriega. Last night's OAS vote helps sustain the momentum.

Momentum in these matters is everything. The failure of yesterday's general strike shows that Noriega still has the power to intimidate the Panamanian people. But it is clear that criminals like Noriega are most successful when operating under cover of darkness. The OAS delegation will keep the international spotlight on Noriega and his thugs. Forcing Noriega to carry on his criminal activity in the light of international publicity

may be just what is needed to convince him to step aside.

MINIMUM WAGE

(Mr. HAYES of Illinois asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HAYES of Illinois. Mr. Speaker, from all indications and from what I read and what I have heard, President Bush intends to veto the minimum wage bill as proposed and approved by both Houses. I would like to request the President to think before acting, think of those people who are now living below the poverty line. Even $4.45 cents an hour certainly is not a lot of money and it does not take effect until some 3 years hence.

A person with a family having to live on $9,000 a year certainly does not have a lot of money, and to use the argument that it is going to cause jobs to disappear is one I have heard for years, even when I made 40 cents an hour as a result of the first increase under the Fair Labor Standards Act.

Mr. President, I request as one citizen, as one Member of the House of Representatives who represents people in great numbers who live below the poverty line, let them make some kind of wage that might lift them out of that level and help those kids get a decent living and stay away from crime.

FEDERAL EMPLOYEES FLEXIBLE WORK ARRANGEMENT ACT OF 1989

(Mr. WOLF asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. WOLF. Mr. Speaker, I rise today to introduce legislation that would allow Federal employees the same work scheduling opportunities that are being provided by leading private sector employers. This legislation, the Federal Employees Flexible Work Arrangement Act of 1989, would allow the Federal work force to keep pace with changes in technology and changes in the demographics of the working population, so that qualified and experienced individuals will continue to enter public service.

Private sector employers have recognized the needs of the workers of today by offering flexible schedule arrangements so that workers can spend more time with their families. These arrangements are responsive to the needs of today's work force, which is comprised of an increasing number of two-income families with young children, and an increasing number of employees with dependent elderly family members. The minor costs of allowing flexibility in work scheduling have been regained by private sector employers through more productive employees, and employees with greater job satisfaction. Flexible work scheduling has also allowed employers to retain valuable employees and to attract others who desire this flexibility.

The legislation I introduce today will allow the Federal Government, this country's largest employer, to respond to the realities of the work force by expanding job-sharing work arrangements and by exploring the feasibility of flexiplace work.

Job sharing occurs when two individuals who are similarly situated and skilled share one job. Job sharing has been successfully utilized in the private sector to allow men and women who wish to scale back their working hours to part-time status to do so. There are several resons why an individual would want to share a job—a new mother might want to reenter the work force but still spend time at home, an individual with an ailing parent might want to spend more time attending to that parent. Job sharing allows these workers to structure their lives to maximize time at home, while still maintaining a presence in the office. Thus, job sharers can maintain responsibility for important aspects of their jobs, can keep pace with changes that occur, and also spend needed time at home.

Job sharing requires skillful management to determine what jobs lend themselves to be broken down into two positions. It also requires the match of two individuals who can coordinate their skills and their schedules to fill one job. Job sharing is already authorized in the Federal work force under chapter 34 of title 5. Unfortunately, the actual utilization of this authority is low because these job-sharing arrangements currently arise only on an ad hoc basis. Two Federal workers discover that they would like to share a job and go to their supervisor for approval. The problem is that workers are often unaware that this type of work scheduling arrangement is permitted. It is also rare that employees are able to find a suitable match for a job-sharing arrangement.

Title II of the Federal Employee Flexible Work Act of 1989 would facilitate these matches by providing that the Office of Personnel Management [OPM] establish a clearinghouse information program that would allow Federal workers to locate others in a commuting area who want to share a job, and what jobs in the area could be filled by job sharers.

A second work scheduling arrangement that has been successfully implemented in the private sector is flexiplace work. Generally, flexiplace work is work that would ordinarily be performed in the home office, but under the flexiplace arrangement is performed outside of the office, either in the employee's home or in another setting remote from the home office. Currently, there are over 200 private sector firms that utilize flexiplace work. Some of the most successful of these include American Express, Best Western, Control Data, and New York Life Insurance. The public sector has also recently been investigating the feasibility of flexiplace work, with California and Washington State as leading examples.

The success of a flexiplace work program depends upon the type of job selected and the understanding by both employees and managers of their rights and responsibilities. Title I of this legislation would provide that agencies determine what, if any, positions within the agency could be filled in a flexiplace arrangement. Agencies would then set up a training program for employees and managers, and would determine which employees are eligible for participation. These programs would be subject to approval by the Office of Personnel Management, which would, 21 months after the beginning of the program review all of the participating agencies' experience with flexiplace work. OPM would then make recommendations to Congress regarding flexiplace in the Federal work force, analyzing the costs or savings of the program, and its effect on employee productivity, job satisfaction, and morale.

Flexiplace work has several hidden benefits—it decreases traffic congestion, it reduces commuting costs for participating employees, and it reduces pollution associated with automobile use. The primary motivation for exploring this work arrangement in the Federal work force, however, is that it provides flexibility for those employees with family or personal needs.

As the labor market makes it more difficult for all employers to fill positions with qualified and experienced workers, it is important that the Federal Government keeps pace with the private sector. This legislation does that by expanding job sharing and flexiplace work opportunities in the Federal work force.

H.R. 2435

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Federal Employees Flexible Work Arrangements Act of 1989".

TITLE I—DEMONSTRATION PROJECT

SEC. 101. DEFINITIONS.

For purposes of this title—

(1) the term "agency" has the meaning given it by section 4701(a)(1) of title 5, United States Code, except that such term also includes the United States Postal Service, the Postal Rate Commission, and a military department (as defined by section 102 of such title);

(2) the term "employee" has the meaning given it by section 2105 of title 5, United States Code;

(3) the term "Office" means the Office of Personnel Management; and

(4) the term "flexiplace work arrangement", as used with respect to an employee, means an arrangement under which the employee is allowed to perform the duties and responsibilities of such employee's position at home or another place apart from the employee's usual place of work.

SEC. 102. AUTHORITY.

(a) IN GENERAL.—Agencies may design and, upon approval by the Office, conduct experiments to test the feasibility and desirability of offering flexiplace work arrangements to their employees.

(b) PROCEDURES.—The Office shall by regulation establish procedures under which proposals for experiments under this title may be submitted. In addition to any requirements as to the required form or content of any agency proposal, the regulations shall indicate the deadline for submitting any such proposal. Regulations under this subsection shall be prescribed not later than October 1, 1989.

(c) GUIDELINES.—The Office shall prescribe guidelines with which all flexible work arrangements under this title must conform. The guidelines shall provide as follows:

(1) An agency conducting an experiment under this title shall be responsible for determining which positions or types of positions will be included. The procedures used in identifying the employees to be included in the experiment shall be consistent with—

(A) subsections (f) and (g) of section 4703 of title 5, United States Code; and

(B) the interest in having flexiplace work arrangements tested in a broad range of positions which vary on the basis of pay level, job functions, and other factors.

(2) Employees selected to test flexiplace work arrangements and the personnel who will be supervising them shall be given appropriate training, including training relating to any new or revised standards which will be used in performance evaluations.

(3) The agency may impose reasonable conditions to ensure the appropriate use and maintenance of any equipment or items provided for use at a participating employee's home or other place apart from the employee's usual place of work.

(4) The agency shall establish requirements relating to the frequency with which the employee must report to such employee's usual place of work each week or each month, as appropriate.

(5) Participation by an employee shall be voluntary. An employee may elect to cease participating in a flexiplace work arrangement at any time. The employing agency may terminate an employee's participation in such an arrangement if the employee's continued participation would not be in the best interests of the agency.

(6) Participation in the project will not adversely affect an employee's eligibility for advancement or any other rights or benefits.

(7) The limitations under section 1348 of title 31, United States Code (relating to telephone installation and charges) may be waived for participating employees in appropriate circumstances.

SEC. 103. TERMINATION DATE; REPORTING REQUIREMENT.

(a) TERMINATION DATE.—Experiments under this title shall terminate not later than September 30, 1991.

(b) REPORTING REQUIREMENT.—The Office shall review all experiments undertaken under this title and, not later than June 30, 1991, submit a written report to the Congress containing its findings. The report shall include—

(1) the Office's findings with respect to any additional costs or savings associated with flexibile working arrangements, as well as their effect on productivity, job satisfaction, and morale; and

(2) recommendations for any legislation or administrative action which the Office considers appropriate.

TITLE II—JOB-SHARING PROGRAM

SEC. 201. JOB-SHARING PROGRAM.

(a) ESTABLISHMENT.—Section 3402 of title 5, United States Code, is amended by adding at the end the following:

"(c)(1) The Office of Personnel Management shall establish and operate a program designed to facilitate the use of job-sharing arrangements in agencies.

"(2) Under the program, the Office shall serve as a clearinghouse for information pertaining to individuals seeking employment under job-sharing arrangements, and any positions which may or must be filled under such an arrangement.

"(3) Any individual wishing to be included in listings furnished under the program may be required to indicate the positions or types of positions sought, personal qualifications, days or hours of availability for work, and any other information which the Office may by regulation require.

"(4) An agency having positions appropriate for listing under the program shall inform the Office as to the availability of those positions. Agencies shall provide such information as the Office may by regulation require, including information relating to how the duties and responsibilities of each position would be apportioned under a job-sharing arrangement.

"(5) Information pertaining to any particular individual shall be kept available until the earlier of—

"(A) a written request by such individual to be excluded from the program; or

"(B) such individual's being placed in a position on a job-sharing basis.

An individual may not be included in listings under the program for more than 1 year, except upon the written request of such individual for an extension. An individual may receive more than 1 extension under the program, but each such extension shall be for not to exceed 1 year."

(b) NOTICE.—The Office of Personnel Management shall take measures reasonably designed to provide continuing notice to Government employees and applicants for Government employment relating to the availability of the program established pursuant to the amendment made by subsection (a).

DIRE EMERGENCY SUPPLEMENTAL

(Mr. KOLBE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KOLBE. Mr. Speaker, I have heard from scores of veterans wondering about the status of the dire emergency supplemental appropriations package and the only answer I have for them is to wait and see. Well, frankly, veterans can not afford to wait and see any longer.

Some $340 million are desperately needed to continue vital veterans' health activities. We are not talking about nice-to-have new construction projects. We are talking about basic clinical services, prosthetic limbs, and equipment. One constituent told me that the medical personnel at one clinic had to chip in just to buy bandages and tape. I ask you, where is the commitment to our veterans?

It is my subcommittee that is the source of much of the delay. My chairman is trying to ensure that we adequately fund the drug effort—and I commend him for this commitment. But if we appropriate all this money in fiscal year 1989, the result will be huge carryovers into 1990.

Stuffing hundreds of millions of dollars down the Justice Department's throat in fiscal year 1989 is ill-advised. We need to make the commitment to the war on drugs with fiscal year 1990 funds.

So, let us not hold up the funds that our veterans need this very moment when we have enough funds to support our current drug efforts during the balance of the fiscal year. I urge in the strongest terms possible for the passage of a clean supplemental to meet our obligations to our veterans.

□ 1050

FREE THE VETERANS' APPROPRIATION FROM OTHER FUNDING REQUESTS

(Mr. SCHIFF asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHIFF. Mr. Speaker, our veterans' centers, medical centers are in dire need of emergency funds right now. I have not heard any disagreement from either side of the aisle on that point. Yet we still have not passed an emergency funding appropriation for the veterans' medical centers.

The reason we have not done so is there is disagreement over other requests for emergency funding as to whether or not it qualifies under the criteria.

I respectfully suggest that the solution is to free the veterans' appropriation from being held hostage to other proposals and to have a clean vote up or down on funding the Veterans' Administration hospitals and to follow that with a vote, one by one, on other emergency proposals.

Some of them will pass, some of them will fail, but we will have the entire issue resolved in that way.

29-059 O-90-37 (Pt. 7)

ORGANIZATION OF AMERICAN STATES' CONSIDERATION OF THE PANAMA ELECTION FRAUD

(Mr. BEREUTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEREUTER. Mr. Speaker, in the 10 days since Gen. Manuel Noriega subverted his country's election process, chaos has ruled the streets of Panama. The so-called dignity battalions of General Noriega attacked and brutally beat, Guillermo Ford, the man that legally selected by the people of Panama to be their new Vice President. It was only by the quick reaction of his bodyguards, one of whom died in the effort, that Vice President-elect Ford's life was saved. Clearly, Mr. Speaker, the present situation is intolerable.

The Organization of American States met last night and will apparently meet today to consider actions in responding to Manuel Noriega and his band of club wielding thugs. Commendably, this meeting was called at the request of several latin American nations, for they recognize that Noriega's behavior threatens the stability of the entire region.

Early reports from its OAS meeting last night indicate that the OAS by a vote of 20 to 2, cited Manuel Antonio Noriega by name in its condemnation of the electoral crisis. Only Nicaragua—yes Nicaragua sided with Noriega and Panama. In addition, the OAS appears prepared to send its General Secretary to Panama in an effort to facilitate a transfer of power. As the OAS considers these important decisions, it is functioning precisely as it was intended to function—as a vehicle for united action in times of hemispheric crisis.

Mr. Speaker, the United States continues to be represented at today's OAS meeting by Secretary of State James Baker. President Bush is to be congratulated for encouraging the OAS to present a united front against last week's electoral fraud. This Member is certain that Secretary Baker will press the OAS for the strongest possible response to the Noriega Junta's outrageous behavior.

In addition, this Member would hope the OAS supports and applauds those Panamanians who bravely do take to the streets to protest this denial of their electoral rights by General Noriega and his doberman-like thugs.

Mr. Speaker, the Organization of American States is by charter and purpose ideally tailored to deal with the situation in Panama. It is the proper venue for the formation of a consensus response. Its 31 members are able to give the OAS a truly hemispheric voice. As the OAS acts on the theft of the election and postelection brutality in Panama, there will be no way for General Noriega to label it as American imperialism.

VETERANS' ADMINISTRATION MAKES HISTORIC DECISION ON AGENT ORANGE

(Mr. BONIOR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BONIOR. Mr. Speaker, last week the Department of Veterans' Affairs made an historic decision.

Secretary Edward Derwinski announced 1 week ago today that the VA will reconsider thousands of agent orange disability claims that previously had been denied.

This action marks an important turning point. The Federal Government now finally recognizes what the American people have known for years. Mr. Speaker, agent orange has caused serious illness in thousands of Vietnam veterans and our Government owes these veterans compensation for their pain and suffering.

I want to praise the leadership of Secretary Derwinski on this issue. It is my hope that soon Congress will begin working hand in hand with the VA to set up new and fair criteria for agent orange compensation.

CHEMICAL AND BIOLOGICAL WEAPONS NONPROLIFERATION ACT OF 1989

(Mr. PORTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PORTER. Mr. Speaker, the proliferation of chemical and biological weapons has reached tragic proportions.

Iran, Iraq, Libya, Ethiopia, Syria, and North Korea, along with 15 other countries, already have chemical weapons. Most of these countries developed toxic weapons with western technology.

CIA Director William Webster and chief U.S. export official Paul Freedenberg have said publicly that our own export controls in this area are weak.

Today, along with 80 original cosponsors, I am introducing the Chemical and Biological Weapons Non-Proliferation Act of 1989. This bill requires the Commerce Department to issue new export controls designed to stop the export of chemicals and technology easily used for chemical weapons production. I urge all memberts to cosponsor this needed legislation.

These new controls alone, obviously will not stop CBW proliferation. They will allow the United States to lead by example. We cannot rightly criticize West Germany and Japan for providing chemical weapons technology to Libya, when our own export controls may not prevent a similar disaster.

We must shore up these controls to ensure that no U.S. companies are responsible for further proliferation.

DELAYED ACTION ON VETERANS HEALTH CARE FUNDS WILL FORCE CUTBACKS ON LEVEL OF MEDICAL CARE PROVIDED

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, we have a crisis in veterans health care and we need to deal with it today. Now it is not me saying that, it is Secretary Derwinski who says that in a letter marked "Urgent," addressed to the chairman of the Committee on Appropriations.

The Secretary of Veterans' Affairs says it is important that the House act immediately. He also says that, "Delayed action will force us to take measures to cut back on the level of medical care provided."

Now that is already happening out there, that is not something that is going to happen a few days from now or a week or two from now; it is happening.

Already since July we have had 2,650 beds that have been closed, we have 133 facilities across the country who report a total shortfall of nearly $335 million for equipment, maintenance, and supplies; 50 percent of the facilities report elective-surgery delays and nearly all reported a delay or a reduction in pharmacy services; 113 facilities reported using funds allocated for contract nursing home care to offset budgetary shortfalls; 72 facilities reported delays in providing clinical appointments to all patients including service-connected veterans and 85 percent of the facilities indicated inpatient and outpatient reductions are imminent due to budgetary constraints.

That is terribly unjust. The veterans are suffering because we are unwilling to act. It is time that we act. The time is today. It has to be done before the end of legislative business today.

INABILITY TO DEAL WITH SUPPLEMENTAL APPROPRIATION BILL IS ROTTEN NEWS

(Mr. UPTON asked and was given permission to revise and extend his remarks.)

Mr. UPTON. Mr. Speaker, today is the 18th of May. We are going to have a real problem when we adjourn here in this body to go home for Memorial Day recess.

Now why would you talk about the Memorial Day recess today? Because this week the Senate is going to be getting out of session and they are not

going to come back until after Memorial Day.

Now what do most of us do? What do most of us public servants do over Memorial Day weekend? Well, we go to meet with our veterans groups, we talk at numerous cemeteries across our district, and we talk about the great love and freedom that so many men and women gave their lives to protect our country today.

Well, if we do not pass this veterans supplemental bill today, we might have a different tale to tell as we go to our cemeteries. We are going to have to tell our veterans, those who have survived, that the Veterans' Administration is turning away patients from hospitals, turning them away for low-priority care because we in this House since March 24 have not been able to deal with a supplemental appropriation bill.

Well, Mr. Speaker, I say that is rotten news. How can we go back and talk to our veterans about those who gave their lives and those who suffered injuries in those combat years that we are not able to deal with the business of this House? Some 2 months later we are not able to deal with the veterans supplemental.

Mr. Speaker, I say it is time to act today, this morning.

THOUGHTS ON LISTENING TO CROCODILE TEARS BEING SHED

(Mr. NAGLE asked and was given permission to address the House for 1 minute.)

Mr. NAGLE. Mr. Speaker, I have been sitting here listening to the crocodile tears being shed by my colleagues to my left, totally within their incapacity to recognize this crisis was created by a Republican administration previously under their control and that totally and utterly failed to adequately request or to seek funds or support needed funds for veterans hospitals.

□ 1100

It is great to cry about the crisis of the day, but Members need to ask the question how it came about. It came about in the last 8 years of the Reagan administration, more interested in sending money for freedom fighters in Nicaragua than taking care of the veterans of World War II and the Korean conflict.

It is great to sit here and cry because the money is desperately needed and the House will act, but do not lose sight of the problem historically created by their administration and their administration of the Veterans' Administration itself. It is great to say it is terrible we do not have the money, and trying to do it in a massive bill, doing it as quickly as Members can, but it is irresponsible to make the argument that somehow this is a Democratic problem when in fact the Veterans' Administration Hospitals have been under their administration for the last 8½ years.

MOVE FORWARD WITH THE SUPPLEMENTAL

(Mr. GINGRICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GINGRICH. Mr. Speaker, I think that it should be very clear to everyone who heard the chairman of the Committee on Veterans' Affairs a few minutes ago, the gentleman from Mississippi [Mr. MONTGOMERY] who warned that within 2 weeks the Veterans' Administration will be laying off 800 medical personnel a week, every week. That the time has come to pass the dire supplemental.

Now the fact is that we do not just have to pass the supplemental in the House, we have to pass the supplemental in the House and get a supplemental through the other body, so it can go downtown to the President and be signed. The other body is going to leave at the end of the day and they will be gone until after Memorial Day, and I agree with my friend from Michigan who makes the point that there is something a little wrong about a Memorial Day weekend where we can find the time to go home for Memorial Day but we have not found the time to take care of veterans. I think that every Member of this House in a bipartisan basis should listen carefully to what the chairman on Veterans' Affairs said about the fact that within a very few days we are going to start laying off 800 medical personnel a week in the Veterans' Administration Hospitals unless we pass the supplemental.

We have everyone here today. Today is the day to pass the supplemental. There is no excuse for going home without having passed the supplemental, and if we pass it today I think we can then put pressure on the other body, and we can get it passed in the other body today and get it signed. If we do not do our job today, we, the House, will guarantee that veterans will not, in fact, have any kind of help on this particular problem until after Memorial Day.

DIRE SUPPLEMENTAL STATUS

(Mr. SMITH of Iowa asked and was given permission to address the House for 1 minute.)

Mr. SMITH of Iowa. Mr. Speaker, I hear all this talk about the supplemental. Let me make clear what happened yesterday and where we are.

The chairman of the Committee on Appropriations offered to yield to every single thing the administration wanted and the House Republicans wanted, except we would have a chance to vote on drugs. Reluctantly, everything would come out that they objected to except money for the war on drugs. But, any member could have a separate vote on that. Any Member can move to strike. The ranking member of the Committee on Appropriations offered to do so, to move to strike that money so we could have the vote. But they do not want to vote on it. So there was an objection on that side.

Mr. GINGRICH. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from Georgia.

Mr. GINGRICH. Mr. Speaker, the fact is, and I believe that the gentleman would agree, that we have already agreed in principle to bring in a clean bill to the floor and allowing the Members to have an amendment to add the money, and we are very prepared to vote on their adding the money now.

We will do it today. We have agreed in principle to their leader. We are very prepared right now, if the gentleman from Mississippi [Mr. WHITTEN] will bring a clean bill in to have an amendment. We agreed to have an amendment for Mr. MILLER.

Mr. SMITH of Iowa. Why do Members want to take the Drug money out and then require the Members to fight to get it back in? Why wouldn't we leave it in and anyone who objects could have a motion to strike?

Mr. GINGRICH. The President offered a clean bill, asked for a clean bill. I think, frankly, virtually all Members on the other side of the aisle agreed that it is fair, have a clean bill. But the gentleman from Iowa [Mr. SMITH] and the gentleman from California [Mr. MILLER] will be allowed to have an amendment. We are willing. I am willing to help vote for a rule that gives a chance to amend, gives the gentleman a chance to amend. It has no Republican amendments.

We are willing to do it today. We are not afraid to vote.

Mr. SMITH of Iowa. Does the gentleman deny the veterans the money they need because Members want to take the money out and have Members later put it back in instead of moving to strike the money?

STATUS OF THE SUPPLEMENTAL

(Mr. GUNDERSON asked and was given permission to address the House for 1 minute.)

Mr. GUNDERSON. Mr. Speaker, I yield to the gentleman from Georgia [Mr. GINGRICH].

Mr. GINGRICH. I think it is an important argument. We can argue about whether it is important to have a position where some Members are trying to take the money out of the

bill or try to put the money in the bill, but on the specific question, are we prepared on the Republican side to vote on the issue of $821 million in additional spending on drugs that is not offset, we are very prepared to make the budget fight and to vote on your amendment. All we ask is that the gentleman's amendment be a free-standing amendment and that it is offered. We are prepared to have an hour debate on the amendment. We are prepared to have debate on the amendment of the gentleman from California [Mr. MILLER], and prepared to go to the floor today. I think it is silly to argue over whether it is taken out or putting it in. We are prepared to vote up or down on the gentleman from Iowa, Mr. SMITH's amendment today.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. I agree it is silly to argue over that. That is the reason it is not a fight about veterans at all. It is a fight about a silly thing about whether or not we take it out or put it in, and Members are holding up the veterans for that silly argument? I agree with the gentleman from Georgia on that.

Mr. GUNDERSON. Mr. Speaker, if I have any time remaining, I want to emphasize that it is not a question of taking out or putting in. Why are we holding up the veterans? We have a piece of legislation in there right now which is a straight supplemental to solve the veterans' problems. We can take that up today or we can take the clean supplemental out of the committee today. The question is, are we going to fight about drug money for the next fiscal year which begins in October, or are we going to deal with veterans which are losing 800 jobs a week starting now?

STATUS OF THE SUPPLEMENTAL

(Mr. SMITH of Mississippi asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. SMITH of Mississippi. Mr. Speaker, I represent two VA hospitals, in Biloxi and Gulfport, MS, with outpatient facilities in Pensacola, FL, and Mobile, AL.

An additional $300 million is urgently needed to provide the new medical equipment and better treatment of veterans and hospitals' outpatient clinics and community nursing homes and more medical supplies and prosthetic devices to our veterans. These additional sums are especially needed to improve the quality of medical care to low-income veterans and for others for whom the VA has a statutory obligation to provide that care. Without the supplemental funding today by the House, the Department of Veterans' Affairs medical program will not provide for over 930,000 visits by veterans to VA outpatient clinics, will not provide nursing care homes to an additional 300,000 veterans. Will not purchase equipment for new facilities, therefore delaying the opening of those new facilities. Will not provide adequate levels of prosthetic services to those veterans. We will not purchase materials for those required to protect our VA employees and patients, from contracting AIDS.

Mr. Speaker, without the additional funding today, certain VA medical centers will not be able to meet their staffing needs by contracting for nursing and other health care professionals. Since they are unable to hire sufficient numbers of Federal workers with the necessary skills, lack of funds for additional employees will deny veterans the medical care that they need and deserve.

I call on the House today to pass this dire supplemental veterans' appropriations bill.

FSX: A BAD DEAL

(Mr. HOLLOWAY asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. HOLLOWAY. Mr. Speaker, I rise today in strong opposition to the agreement with the Government of Japan on the development of a new fighter plane, the FSX.

I strongly disagree with the notion that we should transmit any of our valuable aerospace information to the Japanese.

America is the leader of the world when it comes to fighter aircraft construction and development. Why in the world should we give Japan an opportunity to assume a leadership role themselves by utilizing our aircraft technology?

As you know, the Senate approved the FSX agreement Tuesday—after adding the Byrd amendment. Despite approval of the Byrd amendment, I stand here today to say clearly: The FSX deal remains a bad idea which is against America's best interest now. It will be against our interests tomorrow and for the foreseeable future.

I agree with the observation made during debate in the other body: Instead of negotiating a senseless agreement with a competitor who enjoys a huge trade surplus and has repeatedly engaged in unfair tariff practices, we should stand up and demand that the Japanese buy American F-16's off the assembly line. If they are unwilling to do this, let them attempt to build their own fighter plane without our highly advanced technical help!

As you know, I am a "Buy America" man. The past two decades of migration of technology and skills overseas has caused fierce competition for American firms in areas where they were previously dominant. We are dominant in aircraft construction. Let's stay that way.

International competition may be the blood of our free enterprise economy, but it may be the death of our national security. It makes absolutely no sense for the United States to save a potential competitor the billions of dollars necessary to conduct the research, development, testing and evaluation to get to the point of production.

Let's start thinking of ourselves first—and let's not give a handout to our competitors. Let us demand a level playing field. Let us act in a manner consistent with that of the leading nation in the world. That means we must not now or ever again permit ourselves to be mugged at the negotiating table.

Mr. Speaker, I must concur with my colleague, Congressman DORNAN—"sometimes no deal is better than any deal."

□ 1110

DEMOCRACY ON THE RISE

(Mr. DREIER of California asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. DREIER of California. Mr. Speaker, as this week comes to an end and we are in the midst of debating the dire supplemental appropriations bill, I have to say that one message is very clear throughout the world, from Buenos Aires to Panama City to Tiananmen Square in Beijing: Oppressed people want the opportunity to engage in the same kind of debate in which we are engaging here today.

Earlier this week in Argentina, the election of Carlos Menem saw for the first time in 61 years the election and transition from one civilian government to another in that country.

I would also like to praise the Organization of American States, the body which condemned Anastasio Somoza 10 years ago. Yesterday, while not openly stating it, they made the decision to very clearly condemn the actions of the Narco military forces of Manuel Noriega.

Today, for the second day in a row in China, we see taking place the largest outpouring in the history of the world—over a million people—demonstrating in behalf of democracy, which we have as a model in this country. I think this message is very clear.

Mr. Speaker, this week we have witnessed these three examples of people throughout the world struggling for freedom. They want to have a chance to enter into the same kind of debate in which we are engaging here today.

VETERANS' BENEFITS STILL AWAITING ACTION ON DIRE EMERGENCY SUPPLEMENTAL

(Mr. JAMES asked and was given permission to address the House for 1 minute.)

Mr. JAMES. Mr. Speaker, in my State of Florida there are nearly 1½ million veterans. There is no excuse for these benefits not to be voted today.

We all know the issue. Everyone in this Chamber, at least the vast majority, will vote for a supplemental on veterans' benefits, it is that simple. But the leadership has to get together and let us vote on it up and down.

Whatever we add to it, fine, but let us get it done before noon if we can so that the Senate can get to the issue.

I realize there is a problem because there are expenditures some Members want included for this year and last year, and we have the blackmail leverage, that is, for those who want to approach it that way. But the issue is, are we going to vote on it or not? The people will not forgive us if we do not; they will blame our leadership if we do not get it accomplished today.

Mr. Speaker, we are all responsible if we do not do what needs to be done.

FUNDS NEEDED IN THE SUPPLEMENTAL FOR BOTH VETERANS AND THE WAR AGAINST DRUGS

(Mr. AuCOIN asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. AuCOIN. Mr. Speaker, I agree with the statement made by the last speaker. I am convinced that the majority of the Members of this Congress or this House want to vote today on veterans' benefits, and let no one be confused over that fact.

There are those of us on this side of the aisle and some, I hope, on the other side of the aisle who also feel the obligation to vote for something else that the American people are looking for us to vote for, and that is adequate funds to prosecute the drug wars in this country.

I just want to say to the Members and to my colleagues and to those who may be listening that the only dispute here is whether or not the House will have the chance today before we leave to vote on two critical things for the United States: Veterans' benefits for those veterans who need them and adequate funding to prosecute the war on drugs. We want to vote for both of those things. As of now we are being denied the chance to vote for both of those things.

Mr. SOLOMON. Mr. Speaker, will the gentleman yield?

Mr. AuCOIN. I am not going to yield. I have only 1 minute to finish my statement.

I would just urge those who feel that veterans need these benefits, as I do, to permit a vote on those veterans' benefits and to permit a vote on funds for the drug wars.

Mr. SOLOMON. There is no dispute about that.

Mr. AuCOIN. There is no city in this country that is exempt from this fight. We want to make in order an amendment that allows these funds to go forward.

Mr. SOLOMON. Respectfully, will the gentleman yield now?

Mr. AuCOIN. Respectfully, I yield to the gentleman from New York.

Mr. SOLOMON. Respectfully, we want to do the same thing.

Mr. AuCOIN. Wonderful.

Mr. SOLOMON. We want to make those two amendments in order. There is no dispute about that.

Mr. AuCOIN. Mr. Speaker, I just want to make the record very clear, that those of us who are in support of an amendment to fund the war against drugs are not doing a thing to deny veterans' benefits. We want both of those things to happen. We want those amendments on the floor, and we want to do it today.

CLARIFYING THE CONTENT OF A RULE FOR CONSIDERING DIRE EMERGENCY SUPPLEMENTAL APPROPRIATIONS

(Mr. HANCOCK asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. HANCOCK. Mr. Speaker, I yield to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I just wanted to make clear what the gentleman from New York was pointing out to the gentleman from Oregon a moment ago. There is no dispute about voting on the so-called drug amendments. The question is whether or not we can bring a rule to the floor that allows precisely those kinds of votes.

Our leadership on this side of the aisle has agreed to that. As I understand it, most of the leadership on the other side of the aisle, I would say to the gentleman from Oregon, has also agreed to a package that would bring to the floor a rule that would make in order consideration of a bill that would allow three amendments: One by the chairman of the Appropriations Committee, one by the gentleman from California [Mr. MILLER], and one by the gentleman from Iowa [Mr. SMITH]. We are all agreed to that.

The problem is that there are Members on the gentleman's side that refuse to go along with that kind of a package. We cannot move on the bill until we get an agreement from the leadership of the Appropriations Committee to bring that package to the floor. What we are suggesting is that we bring that package to the floor, let us have the votes the gentleman from Oregon talked about, and let us pass a bill to fund the veterans.

Mr. AuCOIN. Mr. Speaker, will the gentleman respectfully yield?

Mr. HANCOCK. I am glad to yield to the gentleman from Oregon.

Mr. AuCOIN. Mr. Speaker, I appreciate the gentleman's yielding.

I appreciate what the gentleman has said. He has clarified the situation. I just walked on the floor, and the gentleman has clarified it for me. I would just make the statement that I do not think the Members on our side of the aisle resist making in order these amendments. There may be a few Members on this side who are in high places in that category, but I am in league for once with my friend, the gentleman from Pennsylvania. I think these amendments ought to be debated. I do not think the gentleman is afraid of a vote on a transfer from Star Wars to drug wars. We want to give the gentleman that opportunity.

Mr. WALKER. Mr. Speaker, let me say to the gentleman that the situation is that we have to take the matter before the Rules Committee in order to do it, and the gentleman's side of the aisle is going to have to agree to it.

The SPEAKER pro tempore. (Mr. GORDON). The time of the gentleman from Missouri [Mr. HANCOCK] has expired.

EARNED INCOME TAX CREDIT SEEN AS A BETTER WAY TO ASSIST THE WORKING POOR

(Mr. PENNY asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. PENNY. Mr. Speaker, neither the Labor-backed 60-day training period for first-time job seekers nor the Bush administration's plan for a 180-day training wage for all new job seekers holds out any promise that training will actually take place. These proposals smack of good politics rather than good policymaking for the work force.

Furthermore, a subminimum wage will likely result in a paperwork burden that will outstrip its usefulness to employers. There is some evidence that the existing subminimum laws go unused by employers because of the reporting requirements. It is unfortunate that the debate over an increase in the minimum wage has evolved into an argument over the relative merits of $4.25 versus $4.55 or whether a 60-day training period is preferable to 180 days.

There is an obvious compromise, given the administration's concern over a higher wage rate and Labor's

concern with the subminimum wage. The subminimum or training wage should be dropped and a final wage rate of $4.25 over 3 years should be accepted. Once that is done, we should stop pretending that the minimum wage solves the problem of the working poor. Less than 20 percent of minimum wage earners are supporting a family, and neither $4.25 nor $4.55 will pull them out of poverty. Expanding the earned income tax credit and adjusting it by family size is an equitable way to assist wage earners in coping with the expenses that result from raising a family, and because the EITC is targeted to those most in need of a wage supplement, it is preferable to a large increase in the minimum wage.

Mr. Speaker, it would be tragic if in the final analysis no compromise was reached on the minimum wage issue, but it would be a greater tragedy if serious consideration is not soon given to the EITC as a better vehicle to improve family incomes for America's working poor.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. GORDON). The chair will begin to recognize Members for special orders without prejudice to the resumption of legislative business. The Chair would advise Members to anticipate recorded votes.

□ 1120

CONGRESS DOES NOT HAVE THE COURAGE OF ITS CONVICTIONS IN THE WAR ON DRUGS

The SPEAKER pro tempore (Mr. NEAL of North Carolina). Under a previous order of the House, the gentleman from California [Mr. MILLER] is recognized for 5 minutes.

Mr. MILLER of California. Mr. Speaker, hopefully in a short time we will be able to resolve the issue surrounding the emergency supplemental appropriations bill for 1989 expenditures for the remainder of this year. On that legislation we hope to be able to offer an amendment that will allow us to transfer for the next fiscal year enough money from the Star Wars program to fully fund the Drug Wars Program in this country, a program that we, as Members of the Congress, committed ourselves to prior to the last election when many Members of the Congress took this well to explain to their constituents and to the Nation their deep concern for the drug epidemic that was plaguing our cities, our children, our adults, our work places, almost every facet of American life. We have now come to the sad situation, and maybe to the crucial hour, when this Congress will have to make up its mind whether those speeches were just so campaign rhetoric or whether or not we are going to truly commit the resources and the forces of this Nation to law enforcement, to drug rehabilitation, to education in order to rid this country of the scourge of drugs, and to rid our work places, and to give back to our children their childhood.

Mr. Speaker, that is the issue that is going to be drawn. That is the issue that we must confront.

As chairman of the Select Committee on Children, Youth and Families, I have spent a considerable part of the last 6 years talking with young people, with police chiefs, with school counselors and principals, with gang members, about this war on drugs, and I think maybe the most salient piece of evidence comes from some young gang members that testified in our committee when, in the presence of police chiefs and law enforcement representatives from major cities, they told us how the people that were controlling the drug trade in their neighborhoods and in their cities, people for whom they worked in the distribution of drugs; they told us how these people were fully prepared to do anything that was necessary to carry on their right to sell drugs in this country. They told us that the people that were making a profit off of the drug wars were fully prepared to arm the young people, that they were fully prepared to spend whatever money it took to maintain their market shares in the American drug market.

In addition, Mr. Speaker, they told us that they knew that they would win the drug war because the government would run out of patience, that the politicians would just give their speeches, that the various chiefs of police would sweep the streets on one Saturday night, but not on the other Saturday night, that all of the mayors in this Nation had serious deficit problems, and, as a result of that, they were fully committed to the notion that they were going to win the drug war because they knew that this history would repeat itself: that every October before election this country would become deeply concerned about drugs, but every January we would cut the budget, that every Presidential candidate would say it was important and then request less money after they were elected.

In fact, Mr. Speaker, they viewed this system with such cynical, cynical notions that they believed, in fact, that they were at no risk of being arrested; they were in fact at no risk of going to jail because the money would not be authorized for jails. The money would not be authorized for arrests. The money would not be authorized for prisons. They are even aware that earlier this week the President asked for $1.2 billion for a war on crime, but he provided no way to spend that money, no way to pay for that program, and they are aware that most of that money will never get enacted.

So, Mr. Speaker, they will continue to plague our neighborhoods, to plague our children, to plague our work places because they are on the winning side on the war on drugs because this Congress does not have the courage of its convictions to appropriate the money necessary to prosecute the war on crime and to prosecute the war on drugs.

Now what does that mean? It does not mean an awful lot to the Members in this Chamber because most of us live in neighborhoods where people do not sell drugs. Most of our children go to school where they are relatively safe. Most of our children do not walk through neighborhood streets or pass neighborhood corners where sometimes 40 or 50 drug dealers congregate. Most of our children can go out and play after school.

But what it does mean to a significant number of people trapped in neighborhoods infested by drugs is that they are losing their liberties. They are losing their rights. They are losing the right in this Nation to live a peaceful and decent life because their children come home, and they are told they cannot go out and play because of drugs. The children at night are told not to sleep in their beds, but to sleep on the floor so they do not get shot by stray bullets. People who are trying to move their families into housing cannot because the drug lords have taken over the housing. Kids that want to play basketball cannot because there are no hoops. There is no grass on the fields.

Mr. Speaker, there are no alternatives, and we have got to understand what this means to this country. This means the erosion of basic liberties for people, and, if we believe that this can be contained to the housing projects of Chicago, if we believe that this can be contained to the housing projects just a few blocks from this Capitol in any direction, we are terribly wrong. We are terribly wrong because it will not be contained. It is going to spill over on every institution that we use.

I will remind my colleagues that every institution that has confronted drugs has lost the war. Our hospitals are losing the war to crack babies. Our nutrition programs are losing the war to crack babies. Our foster care system is losing the war to drug-addicted babies. Our educational system is losing the war to drug-addicted children, and, continuing up the ladder, we will continue to see every social institution in this country swamped as a result of drugs.

The question for this institution, Mr. Speaker, in the next few hours is whether or not we are going to say finally to the American people that we have the courage of our convictions to

fully fund the drug program that we promised them, that we told them would be on the streets. I am terribly afraid that perhaps the answer is that we will not do that, but it is our goal to give this Congress an opportunity to give them a choice with the AuCoin amendment to take one-third of 1 percent of the defense budget of this country, and for that one-third of 1 percent of the defense budget we will be able to double, to double the Federal efforts on the war on drugs. I think that is a tradeoff that this Congress and this country needs to make.

THE INFORMATION POLICY ACT OF 1989

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from West Virginia [Mr. WISE] is recognized for 5 minutes.

Mr. WISE. Mr. Speaker, earlier this week, I introduced H.R. 2381, the Information Policy Act of 1989. H.R. 2381 is a bill to reform the information dissemination policy functions of the Director of the Office of Management and Budget, and for other purposes. I have reserved this time in order to talk about some of the major information policy issues facing the Nation and to discuss what my legislation is intended to do.

The flow of information from the Federal Government to its citizens is essential to the successful functioning of the democratic process and to the proper operation of the economy. In fact, the Federal Government is the largest single producer, consumer, and disseminator of information in the United States.

There are many segments of American society that need government information in order to function. These include the Federal Government itself, every type of business and industry, libraries and schools, newspapers and television, State and local governments, and ordinary citizens.

Government data is used in many different ways. Voters may use almost any type of Federal information to help make political decisions. Federal, State and local agencies use Federal statistical and economic data to make management decisions. Corporations rely on census information to make strategic business decisions. People doing business with the Federal Government need information to know what products and services are being purchased. Everyone relies on information from the National Weather Service to know if it will rain tomorrow.

Federal information is also a valuable economic commodity. There is a large and growing private information industry that functions in part by taking public government data, adding value to it, and reselling it to others. There are thousands of information products and services that are based in whole or in part on government information.

Because government information is so important, the policies and practices that regulate the dissemination of government information are also important. Over the last few years, the Office of Information and Regulatory Affairs at the Office of Management and Budget has become the central information policymaker for the Federal Government.

At the end of 1985, OMB issued Circular A-130 on the management of Federal information resources. The most important part of the circular sets out policies that apply to the collection and dissemination of Federal agency information. A draft supplement to the circular was published for comment earlier this year.

Existing and proposed OMB information policies have been controversial. Some object that OMB takes an accountant's view of the value of Government information. They complain that OMB is too concerned about cost-effectiveness and cost recovery and that OMB has not put sufficient emphasis on meeting Government's general obligations to make information available to the public in a useful way.

Another complaint is that OMB policies are too heavily tilted toward the private sector. OMB wants to prevent agencies from offering an information product if the private sector might offer a similar product. Here too, the complaint is that OMB places too high a priority on the interests of the private information industry and too little weight on meeting the information needs of the public.

In January of this year, OMB proposed further policy guidance on information dissemination issues. This draft statement also became the center of controversy. Many people objected to the language that agencies should avoid disseminating any value-added electronic information products.

The draft OMB guidance included an example of the application of this principle using CD-ROM. CD-ROM stands for "compact disc—read only memory". This technology—which is very similar to the audio compact discs now used in place of phonograph records—has the ability to store and retrieve very large amounts of data on a small, inexpensive disc.

OMB suggested that agencies planning to release databases on CD-ROM's should not include on the discs the search and retrieval software necessary to access the database. According to OMB, this would be a prohibited value-added service.

CD-ROM may well be an excellent way of making information available in a useful electronic format. We may need to encourage wider use of CD-ROM by Federal agencies. But releasing massive amounts of data without adequate indexes and software tools that permit people to make effective use of the data is worthless. OMB's artificial restrictions on value-added services would mean that Government CD-ROM discs would have no value at all.

Whether or not you like the information policies that OMB has established, their importance is undeniable. OMB's policies have become the focus of debate on these issues. Ten years ago, the Freedom of Information Act was at the center of Federal dissemination policies. The FOIA still retains its importance today and will continue to be an essential tool in the future.

But the FOIA has been joined by other information distribution mechanisms. New technology is forcing us to reconsider how the Federal Government provides information to its citizens. The Federal Government needs to modernize our information policy laws.

OMB's policy guidance was issued under the authority of the Paperwork Reduction Act. But that act contains few specifics on dissemination issues. Congress has not provided any clear direction for OMB's policymaking efforts on information dissemination. That is the principal purpose of the bill that I have introduced.

The Information Policy Act of 1989 is intended to define and direct the information dissemination policy functions of the Director of the Office of Management and Budget. It is time for the Congress to take a more active role in shaping the policies that guide the availability of Government information.

The Information Policy Act is needed because changes in technology are making our information dissemination laws obsolete. Most of our statutes were written in an era when all information was on paper. Today, more information is kept in electronic formats, and this raises new problems that existing laws do not resolve.

I support the use of information technology to modernize the Government's information activities. But I want to be sure that the benefits of that technology will be fully shared with the public. I want to be sure that agencies will not use technology to exercise monopoly control over public information. I want to be sure that fees for electronic information will be reasonable. The Federal Government needs effective, efficient, and equitable information dissemination policies. That is the objective of my legislation. It will require OMB to recast and extend its information dissemination policy guidance.

Under H.R. 2381, OMB would be assigned specific information dissemination policy functions. Among other things, future OMB guidance would have to:

Recognize that the flow of information from the Federal Government to citizens is essential to the proper operation of the United States as a democratic society;

Require that electronic databases maintained by agencies be available to the public in useful electronic formats with adequate software, indexes and other tools;

Prohibit the maintenance of monopoly control over public information;

Supplement and not replace the information disclosure requirements of the Freedom of Information Act;

Require agencies to use marginal cost pricing and to provide for fee waivers for public interest disclosures; and

Require agencies to make public information products, including products in electronic formats, available to depository libraries.

In addition, through my legislation, OMB will be required to develop oversight and enforcement procedures; provide for the development and maintenance of an index of public databases maintained by Federal agencies; and establish an advisory committee on information policy issues.

Another provision requires the preparation of uniform technical standards for Government produced CD-ROM discs. CD-ROM clearly has a lot of potential for making data widely available at low cost. We may need to encourage—but not direct—the use of CD-ROM by Federal agencies. If the Government can develop uniform procedures for indexing, data formatting, and search software, then Government CD-ROM discs will be easier for everyone to use. Standards for other electronic information technologies are also authorized by the bill.

Finally, the bill makes a number of miscellaneous changes to other records laws. Among other things, these changes would increase oversight of Privacy Act systems of records notices and give the Archivist of the United States authority to determine what constitutes records under the Federal Records Act.

The general idea behind the Information Policy Act is to establish basic principles in statute. Once we have accomplished this, I want to let OMB and the agencies apply these principles to make real decisions about existing and future information systems. I don't want the Congress to micromanage all of the Government's information activities, and I don't want OMB to control all of the information in Government. Nevertheless, every agency must operate under uniform and consistent rules and procedures.

Another pitfall that I hope to avoid is the prescription of any specific technology in statute. It is apparent that information policy is being driven today by technological developments. But in shaping new policies, we need technology-neutral principles that can be equally applied to floppy disks, magnetic tapes, CD-ROM, or whatever else the computer industry develops. I want to encourage the use of any information technology that will make Government data more valuable. At the same time, I don't want a statute directing the use of a specific technology.

Mr. Speaker, later this year, the Committee on Government Operations will consider legislation to reauthorize the Paperwork Reduction Act. That legislation will address many concerns about the role of the Office of Management and Budget in general and the Office of Information and Regulatory Affairs in particular. I look forward to working together with Government Operations Committee Chairman JOHN CONYERS on the reauthorization legislation.

The Information Policy Act addresses only a fraction of the issues that will be raised during the reauthorization process. But the information policy problems that we face are complex and difficult, and it is not too early to begin thinking about them. I hope that my bill will provide a good starting point for the debate.

□ 1130

THE 41ST ANNIVERSARY OF THE STATE OF ISRAEL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. ANNUNZIO] is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, I take great pleasure in saluting the people of the State of Israel on the occasion of the 41st anniversary of the founding of their nation. It was at midnight, May 14–15, 1948, the fifth and sixth days of Iyar 5708, under the Jewish calendar, that the British mandate of Palestine came to an end, and the State of Israel was created.

From the destruction of the Second Temple in 70 A.D. and their final heroic stand against the Romans at Massada in 73 A.D., until they declared their independence on May 14, 1948, the Jewish people were without a homeland, and in the Diaspora—dispersed throughout the world but without the loss of their identity.

The creation of the State of Israel was the culmination of centuries of struggle by the Jewish people to obtain political and religious freedom. Seen in its historic context, the establishment and growth of Israel is a momentous turning point in the 2,000-year-old quest by the Jewish people to achieve self-determination and religious freedom. The struggle has not been an easy one. Yet founded in difficult circumstances by a people who had suffered some of the most severe forms of persecution in the history of mankind, the Jewish people transformed the State of Israel into a modern agricultural and technological state.

Israel has always chosen a course of pursuing peace, even in the face of hostile neighbors who have been intent on destroying this tiny nation from the moment of its creation. The fruit of Israel's persistence and determination to achieve this goal was the signing of the Camp David accords agreed to by Egypt and Israel. Today, Israel remains committed to seeking a lasting peace in a hostile environment dedicated to the destruction of this country.

Mr. Speaker, on the 41st anniversary of the founding of the State of Israel, I am glad to join with the citizens of the State of Israel, and their friends in the 11th Congressional District of Illinois which I am honored to represent, and throughout the world, who are celebrating this occasion. I also join them in their hopes and prayers that this year will bring us a step closer to the elusive peace which the State of Israel has always remained committed to achieve.

NATIONAL LAW ENFORCEMENT TRAINING WEEK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin [Mr. ASPIN] is recognized for 5 minutes.

Mr. ASPIN. Mr. Speaker, I rise today to introduce a joint resolution to designate January 7, 1990, through January 13, 1990, as "National Law Enforcement Training Week."

Law enforcement training, which serves as our law enforcement professionals' weapon against crime, is critical to the immediate and long-term safety and well-being of this Nation. As you know, law enforcement professionals provide service and protection to our Nation, so that our citizens may live free from fear. Each day, 500,000 law enforcement officers put their lives on the line as they go about their duties. Their jobs are dangerous ones. In the past 10 years, 1,525 police officers have been killed, 204,584 have been injured and 590,822 have been assaulted. In fact, every 57 hours, another American law enforcement officer is killed in the line of duty. Law enforcement training is the tool which enables these professionals to protect the Nation and themselves from harm.

With the crime and drug war raging, our law enforcement professionals need our support now more than ever. That is why I am sponsoring legislation to recognize the importance of law enforcement training. Law enforcement training is a critical element in keeping our law enforcement officers safe and effective. This legislation will not only honor current law enforcement training professionals, but it will also highlight the importance of this profession as a potential career path for the youth of our Nation. I hope you will join me in sponsoring this legislation.

H.J. RES. 273

Whereas law enforcement training and sciences related to law enforcement are critical to the immediate and long-term safety and well-being of this Nation because law enforcement professionals provide service and protection to citizens in all sectors of society;

Whereas law enforcement training is a critical component of national effort to protect the citizens of this Nation from violent crime, to combat the malignancy of illicit drugs, and to apprehend criminals who commit personal, property, and business crimes;

Whereas law enforcement training serves the hard working and law abiding citizens of this Nation;

Whereas it is essential that the citizens of this Nation be able to enjoy an inherent right of freedom from fear and learn of the significant contributions that law enforcement trainers have made to assure such right;

Whereas it is vital to build and maintain a highly trained and motivated law enforcement work force that is educated and trained in the skills of law enforcement and sciences related to law enforcement in order to take advantage of the opportunities that law enforcement provides;

Whereas it is in the national interest to stimulate and encourage the youth of this Nation to understand the significance of law enforcement training to the law enforcement profession and to the safety and security of all citizens;

Whereas it is in the national interest to encourage the youth of this Nation to appreciate the intellectual fascination of law enforcement training; and

Whereas it is in the national interest to make the youth of this Nation aware of career options available in law enforcement and disciplines related to law enforcement: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That January 7, 1990, through January 13, 1990, is designated as "National Law Enforcement Training Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate exhibits, ceremonies, and activities, including programs designed to heighten the awareness of all citizens, particularly the youth of this Nation, of the importance of law enforcement training and related disciplines.

DRUG-FREE WORKPLACE SHOULD APPLY TO CONGRESS

The SPEAKER pro tempore (Mr. NEAL of North Carolina). Under a previous order of the House, the gentleman from Pennsylvania [Mr. WALKER] is recognized for 60 minutes.

Mr. WALKER. Mr. Speaker, we have had quite a discussion on the floor today about the needs of our veterans and whether or not we ought to pass the supplemental appropriation, the dire emergency supplemental appropriation, to assure that veterans' care continues at high quality levels, and then a discussion primarily coming from the other side as to whether or not we ought to use that veterans bill as a vehicle to deal with the drug crisis in this country.

I have a little bit of familiarity with the whole drug issue. I have brought several amendments in the past to the floor, trying to get additional money for fighting drugs. In the last Congress, I came out here with a concept known as the drug-free workplace, which proved somewhat controversial on the floor, but ultimately was adopted by the Congress.

Now, the reason I find some of the discussion interesting, primarily coming from our colleagues on the Democratic side of the aisle today about the drug situation, relates to that drug-free workplace, because interestingly enough, in the course of our deliberations in the last Congress we passed a provision in an appropriations bill which covered Congress under the drug-free workplace. What we said was that Congress had to develop a policy for a drug-free workplace. In other words, under law, we are now obligated to do something about creating a drug-free workplace in the Congress.

Now, the rest of the country has also had to comply with that provision. Many companies across the country have had to put in place policies, they put in programs such as testing programs. They have done a lot of things over the last several months to bring themselves into compliance with the drug-free workplace provisions passed by this Congress just a year ago.

One institution in the country is noticeably lacking in its dedication to do something about the drug-free workplace. Guess which institution?

The U.S. House of Representatives has yet to obey the law. We have yet to put in place drug-free workplace provisions.

Now, I have to tell you from the minority side of the aisle, we do not have any power to do that. It is the majority side of the aisle that has to put in place these rules, these regulations, these standards out of the House Administration Committee. In other words, if there is really a willingness to fight drugs in this body, you would think that one of the first things we would do is obey the law ourselves; but the fact is that we have consciously at this point determined that we are not going to comply with the law. We are not going to go ahead and put in place the drug-free workplace regulations that we are required to do and which we require of all the country.

Now, many in the country might regard that as hypocrisy. "You force us to do it, but you won't do it yourself."

What we often say in those kinds of cases where we are unwilling to comply with the laws we pass for other people, "Well, there is no specific requirement for Congress to do it. We exempted Congress when we passed the law."

I have got to tell you, in this particular instance we did not exempt the Congress. Congress is specifically included under the general government provisions of the appropriation bill passed last year.

This House specifically voted, almost 2 to 1, to cover ourselves under the drug-free workplace amendments. We are not doing it. There is no action by the House Administration Committee thus far. There is no action by the Rules Committee. There is no action by anyone to cover this body under the drug-free workplace.

Now, to all my colleagues who have come to the floor and argued today that we have got to do something about fighting drugs, let me say to each of them, let us put our own House in order. I am prepared to live in this body with drug-free workplace amendments. I am ready to have regulations apply to all of us that help us get out from underneath the scourge of the drug culture.

□ 1140

What I hear from the other side of the aisle is they are willing to throw big dollars into programs where there is questionable need for the dollars at the present time, and at the same time are unwilling to have it apply to them in their own offices, apply to them in their own committees, apply to them in their own work on this Hill. I would suggest that the American people are going to look at that and really raise major questions.

That is the reason why some of us have to believe that what we are doing is playing politics with the veterans and playing politics with the drug issue in what has been happening out here over the last couple of days and particularly over the last couple of hours.

I want to make it very clear we are prepared on our side of the aisle to move a bill today that deals with the veterans' problem. We are prepared on our side of the aisle to allow the votes which are necessary, because people on the other side of the aisle want to vote on this issue, to give them the chance to vote on several drug amendments. We are prepared to do that. We would hope those amendments would fail, not because we are against fighting the war on drugs but because it just does not add up.

For example, the one place where the people on the other side want to put money in is into the Bureau of Prisons. Many of us think that we ought to put some money into the Bureau of Prisons, too, to lock up a bunch of drug dealers, the drug pushers and drug users across this country, but the fact is, though, that 92 percent of the funding for the Bureau of Prisons which is necessary for this kind of construction is already available in an unobligated balance. The money is not needed between now and October 1. We may need to upgrade those fundings next year, but it is not needed at this moment. Another place the drug amendments are going to put money in is into the State and local governments. The majority of the State grants that are already in place have not been obligated, and so the majority of the money is still available in that particular category.

We have to assume that what is happening here on the floor right now is playing politics with an issue that is a very serious concern to most of the American people, and I have to tell everyone that many of us are concerned about the idea that we have reduced the drug war to playing politics, particularly when we are unwilling in this body to fight the drug war ourselves by complying with the laws that apply to us on drugs.

Mr. Speaker, I would be far more willing to accept the arguments of my colleagues on the other side that they want to get serious about the drug war if we were complying with the law that covers us to get drugs out of the Congress, and I realize that we have had arguments in the past that suggest, "Well, we do not have a problem here," but we know that that is just not true. We know of people who have been arrested on Capitol Hill around our work sites, employees of the House who have been found using drugs within the last few months. We have a problem here. To suggest that there is no problem and that we do not have any obligation to obey the law is just wrong.

I would hope that within the next few hours, certainly within the next few days, that all of those who have come to the floor today suggesting that they are committed to doing something tough on drugs, committed to taking those actions which are necessary to fight the drug war, will also get in touch with the Committee on Rules and with the Committee on House Administration and a lot of other places and ask them to cover us, ask them to put the drug-free-workplace language into place which we are supposed to have based upon the law passed last year.

Let me turn, though, for a moment to the other side of the equation, the question of whether or not this dire supplemental for the veterans is really needed. Some have contended within the last couple of days in the House that the administration is just raising a phony issue, that we do not really need the money right now, that we can delay implementation of the money for a few days, that no one is getting hurt, that the Veterans' Administration is managing, that somehow the veterans are not suffering despite the present shortfall in funding. After hearing some of those statements made on this floor, some of us contacted the Secretary of Veterans' Affairs, Mr. Derwinski. Mr. Derwinski has quite a different story to tell. Mr. Derwinski said in a letter which was delivered to the Hill today that it is important that the House act on this immediately. He also said flatly that delayed action will force us to take measures to cut back on the level of medical care provided.

Mr. Speaker, that does not sound to me like someone who is suggesting that we have days, maybe even weeks, to wait. It sounds to me like a Secretary who feels strongly that he has to have the money now in order to move forward the programs that are vital to our veterans, and we know the situation that the Secretary finds himself in. We have documentation of the problem.

Most of my colleagues must not be aware that 2,632 beds have been closed since last July due to a lack of funds. That is 2,632 beds otherwise occupied by veterans in need of medical care that have been closed within the last year as a result of the lack of funds.

I heard somebody come out here a little bit ago and try to make this a partisan issue, that somehow the administration was at fault for that problem. The administration does not spend one dime that Congress does not appropriate. The appropriations levels that we came up with last year are the cause of this lack of funds. We have now come to the realization, both in the administration and hopefully here in the Congress, that there is a shortfall in those moneys, and so, therefore, something needs to be done.

When it comes to actually getting the action here, we get people who want to load up the bill with all kinds of porkbarrel items, not just on drugs, but there are all kinds of items in there. Japanese reparations is in the bill. We have all kinds of things down in there that we have decided to put in the bill and thereby delay the ability of the veterans to get the badly needed money to fund the hospitals that provide them with care.

It is not just that we have lost 2,632 beds; 133 facilities across this country have reported a shortfall of over $300 million in what they need for equipment, maintenance and supplies. In other words, we have 133 facilities across the country, veterans' facilities, who cannot keep the opeation going. They have a shortfall in the very things that they need to keep the operation going. That is a real crisis. The Secretary of Veterans' Affairs understands that that is a real crisis, and he has requested us to do something.

Fifty percent of all of the facilities are reporting elective-surgery delays and virtually every one of them reported a reduction in pharmacy services. What does that mean? It means, for the veteran, that if he has to have elective surgery done, the chances are that the hospital that he goes to cannot provide that elective surgery for him at the present time. That is a terrible situation. Or if he has a pharmaceutical need, if he is taking a drug, even things like insulin, if he goes to the hospital, every one of the hosptials is more than likely right now to deny him the drugs that he needs. That is a totally unacceptable situation that we continue to exacerbate here by not passing the needed money.

One hundred thirteen facilities across the country have reported using funds allocated for contract nursing home care to offset budgetary shortfalls in other areas. What does that mean? It means that the veteran who needs to be put into a nursing home, that that money will not be available to allow him to go into that nursing home, because it is being put into other kinds of obligations that are of higher priority and higher emergency at the moment. Again, that is totally unacceptable to the families of those veterans who need to have the nursing home coverage and care available to them.

Seventy-two facilities across the country have reported delays in providing clinical appointments to all patients including service-connected veterans. We regularly in this body make it quite clear that regardless of what else we may do on veterans that we are always going to take care of those who have service-connected injuries. These are people who were specifically hurt in the performance of their duties while serving in the armed services, and that we were always going to make certain that they had the highest level of care available to them, and now, as a result of the inaction in this House, we now have them not receiving the clinical appointments that they need to deal with their service-connected injuries.

□ 1150

That is not the fault of someone downtown. That is not the fault of the hospital in the field. That is not the fault of the clinic. The fault rests right here in this House; it does not rest across the way in the Senate. It rests right here because all appropriation bills have to start here.

So for those Members who for some personal reason are holding up action on the veterans' appropriation, they are in fact causing service-connected veterans not to receive the appointments they need to deal with their clinical needs. That is wrong, and we have to do something to change the situation as of today. It cannot wait until next week, it cannot wait until after Memorial Day, it has to be done today.

This figure is a little shocking: 85 percent of all of the facilities across the country, veterans' facilities, indicated that inpatient and outpatient reductions are imminent due to the budget constraints. That is the reason why Secretary Derwinski is telling us we have to act today, because he understands that 85 percent of all his facilities are going to reduce inpatient and outpatient care almost immediately if we do not get the action taken today.

Those statistics alone should be enough to drive anyone who really does care about veterans toward doing something today. But to come out here and make political arguments that are designed to line up votes for the next campaign year at the expense of our veterans, I think, is very questionable. I think it is exactly the kind of action that the American people are finding more and more disturbing about the Congress, that the Congress has specific things to do, needs that have to be met, and yet we are seemingly incapable of doing those without loading up bills with pork barrel subjects without doing things, which the American public perceives as being absolutely wrong. It is exactly the situation we are in today.

We are in a situation where a few would place politics above policy. Some of us think that in this case the policy is very, very important. It is a policy of support for the veterans of this country that needs to move forward now, not later. It has to be done clean, not later. It has to be done clean, not dirty, and it is time to do it today.

Mr. SOLOMON. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I am glad to yield to the gentleman from New York.

Mr. SOLOMON. Mr. Speaker, I really appreciate the gentleman bringing this to the attention of this body because it is a question of politics today, and whether it is intentional or unintentional, it is seriously hurting the veterans' hospitals in this Nation today.

We just passed a budget on this floor yesterday for the coming year, 1990. In that coming year 1990 budget that we passed we picked up a shortfall of approximately $600 million that is existing in all of these veterans' hospitals out there today, 172 of them, plus 220 outpatient clinics. That means that throughout every single hospital in this country there is a shortfall of about $4 million per hospital.

I ask the gentleman to think of a hospital in his home district, whether it is Albany, NY, whether it is Pittsburgh, PA, or San Diego, CA.

Mr. WALKER. Lebanon, PA.

Mr. SOLOMON. Lebanon, PA. The sum of $4 million is a lot of money.

Let me tell my colleague what is happening today because of that shortfall. We picked up the difference in the 1990 budget coming, but here we are not even dealing with it for this present year.

I just got a call from someone up in Saratoga County in New York whose husband was turned away from a veterans' hospital because he could not get insulin. The gentleman from Pennsylvania mentioned that earlier in his statement.

I just got a call from a hospital director saying that they have lost doctors and nurses, and because of attrition and no money to pay them, they cannot replace them. Does my colleague know the difference between a nurse's salary for a veterans' hospital and that in the private sector? It is about $6,000. We have good, patriotic young men and women serving as nurses in our hospitals who are working for $5,000 and $6,000 less than they could make by going across the street and going to work for a private or even a public hospital.

When some of them do leave, there is no money to replace them. We have young nurses graduating from college today, from nursing schools who they would like to bring into the veterans' hospitals. They cannot hire them because there is no money there, because this Congress refuses to take action.

We have a $600 million shortfall. That means in Connecticut $600 million and all of those veterans' hosptials in Hartford, CT, are affected the same way. If we do not act today before the Senate walks out, which they are about to do, there will be no supplemental budget for at least 30 days.

In 30 days we are going to have veterans and their families hurt because of nonunderstanding by Congress here today.

I would just like to ask the gentleman from Pennsylvania what is his understanding of the holdup, what is it right now, today? As I understand it, there are 433 Members of Congress in this House in agreement with how we would operate, how we would bring that supplemental to the floor today, and there are two in disagreement. If that is the case, why can we not bring the supplemental onto the floor?

Mr. WALKER. I guess part of our problem is that the two who are in disagreement happen to be very powerful Members of this Congress, and they are Members who have to be forced to sign off on things, I guess, or have to be convinced to sign off on things before it happens. I personally think that is a shame.

I think the gentleman from New York is right, the vast majority of Members, and I do not know whether it is 433 or 400, but anyway the vast majority of Members are willing to have a scenario where we would get the votes that some on the other side of the aisle think they need, and where it may be a tough vote from some Members, but nevertheless they would cast the tough votes in order to get the veterans' thing done, and we are perfectly willing to go through that scenario. There are a handful of Members around here who are keeping us from doing that. That is the problem.

Mr. SOLOMON. If the gentleman from Pennsylvania will yield, I have a great deal of respect for those two Members of Congress on that side of the aisle. They both are outstanding Members. But there is something wrong, that somehow, someone just does not understand the gravity of this situation. It is a serious situation. It is a serious situation.

The Rules Committee could right now meet, and there is a quorum of all Rules Committee members, of which I am one, right now present in this Capitol. We could go upstairs to the Rules Committee, we could meet under the same agreement that all 433 Members have agreed to. That means we could report a clean supplemental with the dire needs that President Bush asked for. We would give the two Members on that side of the aisle their amendments that they want, and we would vote them up or down. They would get their day in court, and we could go home, and the veterans would be taken care of. But let us pass it.

Mr. WALKER. In fact, I am told that our side is willing to allow three amendments, to allow the chairman of the Appropriations Committee to have an amendment also. And even though my colleague from Pennsylvania [Mr. GEKAS], who has just joined us on the floor, has a very important amendment that he would like to have included in all of this that deals with section 89, all of us would like to vote on that issue too, but we are willing at this point in the spirit of compromise to say okay, give them their amendments, give them what they need, but let us get the bill out here, and let us act on behalf of the veterans, and we will try to come back to some of the things we regard as important another day. I wish we could get that kind of cooperation from a handful of Members on the other side, and that they would be willing to do it. Let me say I know of no one on our side of the aisle who is not willing to move ahead.

Mr. YOUNG of Florida. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I will yield to the gentleman from Pennsylvania [Mr. GEKAS] in a moment, but first I yield to the gentleman from Florida [Mr. YOUNG], who has been here for sometime.

Mr. YOUNG of Florida. Mr. Speaker, I thank the gentleman from Pennsylvania for yielding.

I would like to inform the gentleman and our colleagues that yesterday the Florida Members of Congress met with General Peck, who is the new Director of Veterans' Affairs for the State of Florida, and he discussed at length veterans' needs in Florida.

Having the privilege of representing the Eighth District of Florida, which is most of Pinellas County, we found we have more veterans' facilities in that congressional district than all of the other congressional districts. We also found that we have more veterans than most of the other congressional

districts. Given the large number of veterans and veterans facilities in my district, I know first hand how very serious the current funding shortfall for veterans is.

I do not want to see any layoffs at the Bay Pines Hospital. I do not want to see medical care services reduced in any way at Bay Pines, which is in my district. I do not want to see any layoffs of the staff, and I do not want to see any of the veterans living in my district, or in Florida, or anywhere else in the United States denied medical care or benefits that they have had committed to them by this Congress year after year after year.

□ 1200

And frankly I join with the gentleman from Pennsylvania and our other colleagues in being considerably frustrated as to why we cannot get this supplemental appropriations bill on the floor today and get it passed while the Congress is in session to prevent layoffs at our veterans facilities and the denial of medical care or attention to veterans who need it badly.

I thank the gentleman for yielding.

Mr. WALKER. Mr. Speaker, I thank the gentleman for his comments and would request that he respond to a question.

The distinguished gentleman from Florida serves on the Committee on Appropriations. Would it be his guess that most of the members of the Committee on Appropriations would join with him in that sentiment, that we are dealing with only a handful of people, not even a majority of the members of that committee?

Mr. YOUNG of Florida. I would say to the gentleman the vast majority, of the members on both sides of the Committee on Appropriations also would like to settle this matter in a timely fashion and that means today.

Mr. WALKER. I thank the gentleman very much and thank him for his statement. It is right on target.

I yield to the gentleman from Pennsylvania [Mr. GEKAS].

Mr. GEKAS. I thank the gentleman for yielding.

I say to my fellow Pennsylvanian I would reiterate some of the comments made by the gentleman with regard to section 89.

I am willing to appear before the Committee on Rules—and I have some growing support on that—to try to include in this supplemental budget fiasco that we have now with a bit of sanity with respect to another part of the budget problem that we have, and that is section 89 and what it does across the board nationwide.

I have consulted with the gentleman from New York [Mr. SOLOMON] who is on the Committee on Rules, and he is, too, willing to help me carry the water on this important issue.

We both believe—and I speak for the gentleman and of course he can speak for himself—that we believe that even if we adopt this in the Rules Committee, the long shot that it might be, it would do no violence to what we consider the clean bill that we are after in order to help the veterans. Why? Because the bill to eliminate section 89, to repeal section 89, has nothing to do with the fiscal realities of the supplemental budget. It does not add or detract one dollar from that piece of legislation.

When we talk about clean bill, and I would ask the gentleman to concur if he does, we are talking about a clean money bill having to do with the veterans and leaving all the other money considerations out of the bill that would not be agreed to by the administration.

Mr. WALKER. I yield to the gentleman from New York.

Mr. SOLOMON. I thank the gentleman for yielding.

Let me just say that if you were to appear before the Committee on Rules we are going to do everything we can to make that amendment in order. There is nothing I feel stronger about than the repeal of section 89 to help the small businesses across this country. Seventy-five percent of all the new jobs in America are created by small businesses and they need that repeal of section 89.

But let me say to the gentleman, as strong as I feel about that issue, I feel stronger at this time because of the dire need for the veterans of this Nation. And if it were a question of clouding that issue, then I am sure, and I am glad to hear the gentleman say that he would withhold and fight that in court at another time, in order to get this on the floor. I think that every Member of Congress should treat this as a real dire need for the veterans of this Nation.

I appreciate the attitude of the gentleman.

Mr. WALKER. I yield to the gentleman from Pennsylvania.

Mr. GEKAS. I thank the gentleman for yielding.

Just to reinforce that point, I aim to strive mightily before the Committee on Rules, if that opportunity be given, to advance the repeal of section 89; there is no question about that.

However, and I know I am going to gain the support of my colleagues for determining that section 89's repeal has nothing to do with whether or not this bill is clean or not. I think that is an important point. I think it remains clean even if we add the repeal of section 89.

But as the gentleman from New York [Mr. SOLOMON] says, I want the veterans considered as the primary target of our activity here, and failing that, or if we can add to it some consideration for the repeal of section 89, I am willing to do it. But I will not insist on being heard on this issue—no, I will insist on being heard, but I will not carry it to its fullest conclusion if I feel that our veterans are going to be threatened by it.

Mr. WALKER. I wish we could get the number of our colleagues to be as rational in their approach to this issue as the gentleman from Pennsylvania is. I know that he feels strongly about section 89. I feel strongly about it. I would love to vote on the gentleman's amendment.

I think it is an entirely appropriate vote for the Congress to have. I think we have delayed having that vote for too long. This is certainly a time to do that. But I think the gentleman is in the spirit of what had to be done here.

There are high priorities of all kinds this Congress should be addressing. The highest priority at the moment is to move the money that is direly needed by our veterans then we will deal with some of the issues as they come up, and we will try to force a vote on some of these things.

You know, on these days when Congress goes home and does nothing we could be taking up section 89, for example. Our legislative schedule around here so far has certainly not been heavy lifting. We could certainly deal with some of these national priorities, including drugs. If we want to come up with additional money for drugs, I think a lot of us would be perfectly willing to talk about that as another issue here on the floor.

I think some of us would like, for instance, as part of another drug bill to look at some questions of whether or not we ought not to deal with the death penalty and a few things like that.

The gentleman from Pennsylvania was instrumental last year in getting an increase in the activities of using the death penalty against drug dealers and so on.

We might want to expand that authority some here on the House floor if we could get that kind of debate.

But the fact is nobody wants to debate these issues for real; they want to debate them in a way that it makes good politics and little else. I think that is terribly wrong when you are doing it on the back of the veterans.

Mr. Speaker, I yield to the gentleman from Missouri.

Mr. EMERSON. I thank the gentleman for yielding.

Mr. Speaker, I want to join in the statement that is being made by both the distinguished gentlemen from Pennsylvania and the gentleman from New York [Mr. SOLOMON] in frankly exposing the parliamentary situation which exists here and which delineates the reasons for which these vital provisions for veterans are being held hostage. Heavy is going to be the re-

sponsibility of those who cut the veterans off at this very critical passage. The Senate—the other body, I should say, is not going to be in session next week. We may be talking about a 10-day to 2-week delay here if we do not act today.

There is going to be some explaining that needs to be done.

I have in my congressional district the General John J. Pershing Veterans Medical Facility. I represent a very, very far-flung rural district in southeast and south central Missouri. Veterans come from far and wide, particularly service-connected veterans, for assistance.

These veterans come for assistance often without appointments. They are going to be starting to be told that medicines and other services are not available to them, and that is going to be a real tragedy.

So I commend the gentleman for the service that he is rendering by laying this out.

As I indicated, some heavy explaining is going to have to be done, and I am glad that the record is being made here so that the veterans themselves will know where the responsibility lies for this interference with the services to which they are entitled and to which we as a Nation have every obligation to give them.

Mr. WALKER. I thank the gentleman. I think the gentleman would have joined me in being stunned to hear things like what the gentleman from New York was reporting to us, that there are veterans in his district who are not getting insulin.

I have a brother who is a diabetic. I understand that in a very personal sense if you cannot get your insulin, that is a personal emergency, that is a dire personal emergency.

Now what is happening across this country is that that is not just in the gentleman from New York's district, that is in other places across the country that there are some veterans being denied the drugs that they need, including things like insulin, because this Congress refuses to act.

You know, some may tell us that that is not a dire emergency.

I got to tell you for the veteran who is turned away for his insulin, that was a dire emergency; for the other veterans across the country who are being turned away, that is a dire emergency; for the veteran who cannot find the bed he needs when he has a medical emergency, that is a dire emergency.

You know, all of those things are happening out there as we stand here and talk, and yet we cannot seem to get a handful of people to give up their own personal agendas for the good of the country and for the good of the veterans of the country.

Again I say this is exactly the kind of performance that the American people are getting more and more turned off by when they look at the Congress. I mean I hear any number of our colleagues day after day say, "How come we don't get any respect? How come everybody is beating up on us? The news magazines, they beat up on us, the radio talk show hosts beat up on us, everybody beats up on Congress because we are doing our job."

Well, the fact is they are beating up on us because we are not doing our job. Our job today right here is to pass a supplemental appropriation that deals with the veterans emergency. Evidently, we are having trouble doing that. That earns us the contempt of many in the public who look at this operation and find it wanting.

I would suggest that if we are going to ever win respect from people, we have to clean up our own act. We have to make certain that when we are talking drugs we are willing to, like the kids say, walk like we talk; that it is not just something where we come and talk about a drug war and then do not walk it on the House floor by implementing drug-free work places for this body; that when we talk about doing the Nation's business that we really mean that, that when crises arise and so on we are capable of responding to the crises.

That is how you gain respect. You do not get much respect from people who see you failing to walk like you talk and failing to respond when crises arise.

□ 1210

That is precisely the position that this House is in today.

Mr. SOLOMON. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from New York.

Mr. SOLOMON. Well, to our colleagues out there listening in their offices, I think the Members should think about this. The Office of Management and Budget, under all administrations, Democrat and Republican, are always hesitant to put money into a supplemental budget. In other words, they are stingy. They are tight with a buck. But this administration, this OMB has put their stamp of approval on this dire supplemental which is very, very large. One of the reasons they did that, thank goodness, is because this Congress had the infinite wisdom last year to create a Department of Veterans' Affairs and a Secretary of Veterans' Affairs who now has Cabinet status and now sits beside the President. That new Secretary of Veterans' Affairs, and Ed Derwinski, a former colleague of this House and a very able Member of this House, did get the President here to convince OMB and the rest of the admistration that this is a dire need. That is why it is before us today.

I just cannot tell Members again, in other words, how important it is. Every time employers have to lay off five nurses in a hospital, an entire ward is shut down. That means 50 beds go empty. That means 50 veterans are turned away. If there is a situation where people are sick, that is the reason we have the veterans' hospitals. If we did not need them, we should have shut them down.

The truth is, today, we depend on an all-voluntary army, all-voluntary military in this country. We do not have a draft, whether that is right or wrong, but one of the great reasons for people to enlist today is because of the veterans' benefits that they will be entitled to after giving 5 years of their life, after giving 10 years or 20 years of their life. It is an earned benefit.

Now to say that that veterans who may not carry the proper kind of health insurance he knows he is entitled to be taken care of for his medical needs in the veterans' hospitals, he does not have that care and now he is on Social Security, he is 68 years old, he served 5 years in the United States Army during the Second World War, he has no medical coverage whatsoever, and he is turned away and told to drive home 85 miles from that hospital. That is wrong, gentlemen, and I would tell those Members who are negotiating in that back room over there right now, come to an agreement, come out here on this floor and let Members act on the supplemental. Members need to do it for the people of this country.

Mr. WALKER. Let me say to the gentleman, there are a number of people in groups who absolutely agree with what the gentleman has said. For example, within the last day or two, the Veterans of Foreign Wars have come to this Congress saying, "We need to act immediately on this supplemental legislation as it applies to veterans."

The American Legion telegraphed, telegraphed the Congress and said, "You have got to act immediately." It says, "The American Legion strongly supports immediate action on a clean supplemental appropriations bill for fiscal 1989." The Paralyzed Veterans of American have made the same kind of request for this Congress. They want Members to act and they want Members to act now. They do not want this delayed by Congress playing politics.

There might be another subject to deal with, since it was dealt with emotionally by one of my colleagues a few minutes ago about whether or not in order to get the drug money into all of this that we ought to cut the Strategic Defense Initiative. Let Members understand that the particular thing that the gentleman is talking about doing, whether a Member is for or against Strategic Defense, raises a couple of fairly troubling questions.

For example, the amount of unobligated balances in the SDI program for the rest of fiscal year 1989 is $400 million. The gentleman who brings the bill to the floor wants to obligate a billion dollars. By the end of May, that $400 million will be $200 million. That means, somewhere, we are $800 million short in his amendment. What does that mean? Well, it means if Members are going to take it all out of SDI, what will have to be done is deobligate funds already under contract. In other words, take contracts that have presently been let and pull those contracts back. We have to pay the liabilities on those contracts. We have to do all the things that are necessary to deobligate. What would that mean? Well, across the country it means that 19,000 contractors' personnel would be laid off. In addition, we would get termination liability costs, and there would be significant program disruptions for many of the 1,200 SDI contracts which include about 250 small businessess and universities.

Now, before we get all enthusiastic about star wars versus drug wars and all of that, let us think about the impact across the country. Are we willing to have 250 small businesses and universities undermined by action that we take precipitously on this floor? Are we willing to have over 1,200 SDI contracts undermined? Are we willing to have 19,000 people lose their jobs as a result of playing politics on the House floor? I am not certain that that is a wise action to think about. I also think that it makes a mockery of the system here to suggest that we all of a sudden find money that is not really available.

I mean, if there is only $200 million available in one account at the end of the month and we are obligating for the rest of the year an additional billion dollars out of that account, it seems to me that we are playing with funny money somewhere and that we are coming up with awfully phony economic arrangements. So I think that we have to look at the real nature of some of the proposals that will be before us within the next, hopefully, few minutes, but certainly are likely to come before this floor one way or another over the next couple of months and certainly during the length of this Congress.

Mr. Speaker, with that I think I have covered the topic.

WAR ON DRUGS

The SPEAKER pro tempore (Mr. NEAL of North Carolina). Under a previous order of the House, the gentleman from New York [Mr. SOLOMON] is recognized for 60 minutes.

Mr. SOLOMON. Mr. Speaker, first of all, I would like to call attention to the Members of the House the fact that we now pledge allegiance to the flag of the United States of America, that symbol of our country, and a shocking thing happened this morning when we opened up the session and the Speaker recognized a Member of the House to read the Pledge, and there was quite a bit of confusion. There were a lot of people in the well, and perhaps all Members were not listening. But I was shocked to look up in the Press Gallery and see only two Members up there, both sitting down during the delivery of the Pledge of Allegiance. I do not know whether they could not hear or were not aware that the Pledge was taking place, but I would like to call attention to the press and give them the benefit of the doubt that when the Pledge is offered every morning in this House, that the person delivering the Pledge asks all Members to rise, place their hand over their heart and join in pledging allegiance to the flag. I would certainly hope that whoever those two Members were up there that they were listening to this and that they remember, and I hope that they join Members in standing and paying proper respect to the flag.

Mr. Speaker, there is this question of money being appropriated to deal with this terrible problem facing the American people today and that is the drug war. Yes, we should be dealing with it. Like other areas, it is not always necessary just to throw money at the problem and think that is going to solve it.

Two words come to mind. Those two words are supply and demand. If there is a demand for drugs by the American people, there will always be a supply. It does not matter how much interdiction there is, how much money is spent on the Coast Guard and the police and the military and the Border Patrol. America is never going to stop the drugs from coming into this country to satisfy the demands of people that are using those illegal drugs.

□ 1220

So it is not a question of how much money we spend on interdiction, how much money we spend on rehabilitation, which is necessary, or how much we spend on education; it is what we do about the demand. Nancy Reagan, when she was the First Lady, led a great fight with the slogan, "just say no," but "just say no" is not enough. Yes, it is good, but it is not enough.

I raised five children who were teenagers in late 1960's and 1970's, and I can recall even back in those days, when drugs were not widespread throughout the suburban areas and particularly the rural areas like the one I represent in the Adirondack Mountains in upstate New York, that some of my children were being snubbed by others and being sort of outcasts because they would not use drugs.

We should think about that. If we are going to deal with the real problem, and that is the demand, we are going to have to turn that around, and the American people are going to have to snub those other American people that use drugs. As for students in the high schools, if they are using drugs, their peers ought to stand up and identify them and squeal on them because they are breaking the law. There is nothing wrong with squealing on a law-breaker, no matter what the case.

If there are school teachers and there are other school teachers in their little enclave who smoke marijuana, then the other teachers ought to identify them.

I cannot recall the name of the school, but I heard about one principal out in Ohio. I was told by our new drug czar, Bill Bennett, that that principal tells the students and the teachers in his school that "The first time you are caught using drugs, we are going to tell you about it, we are going to warn you, and the second time we are going to tell the police." That is the way it should be. Whether it is students, whether it is athletes, whether it is school teachers, whether it is our fellow workers, that is the way it should be. And I am going to tell the Members right now that if I ever see a Member of Congress smoking a marijuana stick or taking cocaine, I am going to identify that Member because I think the public ought to know about it.

If there is a fellow worker on an assembly line using drugs, his fellow workers ought to stand up and ridicule him and hold him up to scorn. If you are an executive and you go to a cocktail party and all of a sudden there is marijuana being smoked or a pill being taken by somebody over in the corner, you ought to identify him and point him out to your peers. That is the way it should be all across the way.

There are cases where we have young doctors giving medical care to the American people smoking marijuana, and that is illegal, and unless we hold these people up to ridicule and scorn, we are never going to deal with this demand.

It does not cost 5 cents, not a nickel, to tell the person next to you, "I don't want anything to do with you. I don't want to sit next to you at a football game, I don't want to ride in a carpool with you, I don't want anything to do with you, and I want the world to know you are a lawbreaker." Then and only then are we going to deal with this problem. That is the only way we are going to cut down on the demand, and it does not cost a nickel.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. SOLOMON. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I thank the gentleman for his statement, because the gentleman is talking about a zero tolerance policy that goes well beyond law enforcement.

We have heard a lot about zero tolerance, that we will not tolerate drugs coming into the country, and the Customs agents try to stop it and it has been somewhat controversial when they have seized fishing boats and a number of other things. There is zero tolerance for law enforcement officers, but the fact is that unless there is zero tolerance publicly for these who evade the law and break the law by using drugs, we are not as a society going to be able to deal with this problem.

There are 23 million casual users of drugs in this country, and that is about 10 percent of the country that is at least involved in the casual use of drugs. They cannot be doing that without other people knowing and understanding that it is being done, and the moment that you say, "It's OK with me, it is him, not me, that is involved," you are contributing to the fact that your kids are exposed to drugs, that your community is exposed to drugs, and that your Nation is being undermined by drugs, because those people have to buy that product somewhere. They are buying it from an illegal empire, and $150 billion worth of cash goes into that empire. That then allows them to buy crooked lawyers, it allows them to buy guns and ammunition, it allows them to fund whole armies, and it allows them to fund peasants who are growing this poison in other parts of the world.

That is where the money comes from. It comes from these people who go down on the street and buy this poison and use it themselves or give it to others, and we ought to be as a society thoroughly intolerant of those kinds of folks.

The gentleman is absolutely right, it does not cost us a dime to be intolerant, and it has a tremendous social advantage to it because those people then become isolated, and none of us in our lives likes to be isolated. None of us likes to be set apart and scorned. So we begin to have a social context in which drug use is an unacceptable social behavior, and that changes the nature of the problem dramatically.

If we could lower the number of people using drugs from 23 million down to a far lower number, we would cut the amount of money that goes into the drug empire, and we would begin to cause drastic changes as far as the drug dealers are concerned in what they are able to do; they would not have the kind of money that they now are able to get in the drug market.

So I would commend the gentleman for his statement. He is absolutely correct. And I want to thank the gentleman also for participating yesterday in a hearing that was held by the Republican Study Committee where we looked specifically at the question of what we call user accountability, in other words, holding people accountable for their actions, namely, holding people who use drugs accountable for what they do and suggesting that one of the things that needs to be explored is a far greater use of Federal power to stop these people. Again, it does not cost a lot of money, for instance, to deny somebody food stamps who is a drug user or to deny housing benefits to people who are drug users. Those people who are convicted of that kind of crime or who are found through testing programs to be drug users ought to be denied Federal benefits. The one power this Government has is not just spending money to solve problems but denying money to people who are part of the problem. It does not cost the taxpayers anything to deny people the money who are part of the problem we face, who are costing us money.

When we want to spend $800 million to upgrade the amount of money being spent on the drug war, we ought to think about the fact that maybe we can get most of that money back by denying benefits to those 23 million Americans who are out there using the drugs that are causing us the problem and who are causing us to have to spend the money. I wonder how many Members who come to this floor talking about the drug war are willing to say: "If you use drugs, no student loans. If you use drugs, no food stamps. If you use drugs, no welfare benefits. If you use drugs, no public housing." I wonder how many of them are willing to do that. That would not cost us much money, but it surely would be effective.

Mr. SOLOMON. Mr. Speaker, let me just thank the gentleman first for his remarks. We know that they are going to get that opportunity because the gentleman from Pennsylvania [Mr. WALKER] has been one of the leaders in introducing amendments to various pieces of legislation which deal with drug testing and which deal with this terrible problem.

This Member of Congress led the fight, beginning back in 1982, to establish a lawful policy of this Nation that any young man who refused to register for the draft was not entitled to any benefit from the Federal Government: student loans and grants, food stamps, job training, nothing. If they refused to register for the draft, they would get no help from the Federal Government.

We are going to do that. I am going to join with the gentleman from Pennsylvania in offering legislation and offering amendments to every piece of legislation that comes before this body that says that anybody who uses drugs is not entitled to any benefit of the Federal Government, bar none. Then let us see how they feel about that.

Now, the other side of the aisle, with all due respect, did join us in overwhelmingly supporting the Solomon amendments back in the early 1980's, and that became the law of the land. It resulted incidentally, I would say to my good friend, the gentleman from Pennsylvania, in a compliance rate for registration today that is greater than at any time in the history of this Nation prior to the Second World War and the First World War, anytime the draft has been in effect. I would ask the Members to listen to this: We now have a 98.8-percent compliance by the young men of this Nation who live up to their obligations as useful citizens and who obey the law of the land.

□ 1230

So, Mr. Speaker, let us make the law of the land, "No use of drugs, and, if you do use it, you don't get any help from this Federal Government and from the taxpayers of this Nation."

Mr. Speaker, let us let the 220 million Americans who do not use drugs stand up to those 22 million that do, and that way we will eliminate this demand once and for all.

Mr. WALKER. Mr. Speaker, will the gentleman yield further?

Mr. SOLOMON. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I want to say to the gentleman from New York [Mr. SOLOMON] that he is absolutely correct, and the point is that we get some secondary benefits out of this, too. Some of the same people who probably argue against denying benefits to people who use drugs argued last year, at least briefly, against the drug-free workplace concept, but what we have found is that we have implemented the drug-free workplace concept, which is a policy of intolerance, that people finding that kind of intolerance among employers are now calling drug counseling centers and saying to them, "How do I get off drugs," or, "How long do I have to stay off drugs in order to pass the test to get the job?"

What is happening, Mr. Speaker, is that those drug counselors then are able to begin talking to these folks who may never have come to their attention before, and, before they get arrested, they are putting them into rehabilitation programs, and we are beginning to deal with the problem right at that level.

So, it does have an impact. If we do begin to cut off Federal benefits, like in this case we are going to cut off Federal contracts from employers who do not have the policy. The employers, therefore, get tough, and employees have to begin to deal with how it affects their personal lives, and guess what? It has an impact on society, and

it is not costing us huge amounts of money to do this. In fact, the money is being spent by many of these employers, but it is in their best interest to do that because they get increased productivity because they have drug-free workplaces.

Now it is those kinds of programs that make some sense in terms of dealing with this whole thing, and yet all we often hear in this body is how much money are we willing to spend? How much more money are we willing to put forward? I just think that the gentleman from New York [Mr. SOLOMON] has hit upon exactly the direction that we need to go, and that is that we have to become specifically intolerant. User accountability has to be raised to a high level as a part of the overall drug war.

Mr. SOLOMON. Mr. Speaker, I certainly thank the gentleman from Pennsylvania [Mr. WALKER] for his remarks.

At this time, Mr. Speaker, I am going to yield back the balance of my time, and I hope that we have some kind of an agreement in the offing that is going to bring this supplemental budget back to this floor.

Let us refresh all the memories of all the Members who are sitting back in their offices. We are still waiting for the supplemental to arrive on the floor. The Committee on Rules has not been called into meeting. There is no rule being considered. The veterans of this Nation are being held hostage because of whatever reasons. But, wherever these negotiations are going on, behind that door or this door, let the RECORD show that the Republican Party on this side of the aisle is in full agreement with the Democrats to bring that bill on the floor. There are only two Members of this whole entire Congress of 435 Members that are holding up this bill from coming before the floor.

Please, please, be reasonable. Go to the leadership on that side, of the aisle, and tell them, "I allow the bill to come to the floor." That is the only decent thing to do.

Mr. WALKER. Will the gentleman yield?

Mr. SOLOMON. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, if we cannot get an agreement pretty soon, maybe what we are going to have to do is start naming those Members so their constituents can get to them directly.

Mr. SOLOMON. Mr. Speaker, I hate to do that because they are two very respected Members in the House.

Mr. WALKER. Sure, and for the moment we do not need to do that. We assume an agreement is under way.

But, as the gentleman knows, before too long this is a vital enough issue that maybe what we need to do is begin to make certain that the pressure is turned up by beginning to name names.

Mr. SOLOMON. Also, Mr. Speaker, we hate to hold up that train that is leaving for New York. I am a New Yorker, and I am not able to make that trip because of some prior obligations here in Washington, but it would not take but a minute to bring that bill out on the floor and to act on it, and we could all go home for the weekend.

Mr. Speaker, I yield back the balance of my time.

ISRAEL'S PEACE INITIATIVE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. FASCELL] is recognized for 5 minutes.

Mr. FASCELL. Mr. Speaker, on May 14 the Government of Israel announced a new initiative aimed at advancing the peace process. The decision had broad-based support in the Israeli Cabinet and has also been endorsed by the Israeli Parliament. I believe that this new initiative is a timely and constuctive step. In particular the proposed elections on the West Bank which are an integral part of the Israeli initiative offer a new opportunity for meaningful progress in bridging the gap between the Palestinians and the people of Israel.

Elections, in and of themselves, unfortunately are unlikely to produce peace. But elections may offer the only chance to move away from the current violence. Elections will present an opportunity for the Palestinians to choose their own representatives to negotiate both middle- and long-term solutions to the problems which divide Israelis and Palestinians.

Decades of stalemate have left deep scars on the hearts and bodies of both Israelis and Palestinians. These scars understandably make it harder rather than easier to find new ways to craft a better future. Elections offer one chance to find a way to that future. It is my hope that those genuinely seeking peace will carefully examine the real opportunity the new Israeli initiative offers and give it the chance which it deserves.

It is my hope and expectation that the United States will continue to play a positive role in furthering peace in accordance with the spirit of the Camp David accords. To support the broad goals which the new Israeli initiative seeks the United States should try to get input from all parties so that our complementary efforts will help make Israel's new initiative a truly effective step. It is also my hope that the international community will join in supporting this constructive Israeli initiative.

THE THRIFT CRISIS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. LAFALCE] is recognized for 10 minutes.

Mr. LAFALCE. Mr. Speaker, as the House prepares to pass legislation to funnel massive amounts of taxpayer money into the Nation's failing savings and loan industry, I think it is important that we take a moment to look at what we are really doing.

This is the most massive bailout in the Nation's history and the winners are receiving money from the pockets of American taxpayers, not manna from heaven.

Yet, neither President Bush, the Senate, nor the House, which is likely to see floor action within the next few weeks, has taken the time to really explore the ramifications of this emergency legislation that is roaring through Congress like a train out of control.

I fear that we are losing sight of what should be some of our primary goals in this legislation—to minimize taxpayer costs and ensure an equitable sharing of the burden. Judged by these two standards, the President's plan simply does not measure up.

And the dollars will come from the pockets of taxpayers and our children and grandchildren.

There are five major problems with the President's plan: First, the cost estimates for resolving problem thrift cases are deceptively low; second, the bonding mechanism is both fiscally irresponsible and morally reprehensible and will significantly increase the costs to the American taxpayer; third, the alleged burden sharing is inequitable—the taxpayer contribution is significantly understated, the industry contribution is overstated, and other legitimate sources of income such as the States are not tapped; fourth, the application of the capital standards treats institutions inequitably and may ultimately increase the cost to the taxpayer; and fifth, efforts to draw in private capital to help minimize the resort to taxpayer funds are inadequate.

To date, Congress has effected little or no improvement.

I. RECENT HISTORY OF THE THRIFT ISSUE

It is instructive to revisit the recent legislative history of the thrift crisis. We now face, at a minimum, a $100 billion problem. That problem, if not its complete scope, was already apparent 3 years ago, in 1986, when Congress was considering FSLIC recapitalization. In that legislation, Congress developed the FICO Bonding Program, a self-help program that put the costs of recapitalizing the FSLIC squarely on the industry.

The level of that recapitalization became a serious point of contention. The industry, driven largely by concerns as to the costs it would be forced to bear, was insistent that we had a $2 to $3 billion problem, nothing more. I and others argued at the time, on the House floor and in conference, that a substantially greater amount of money—at least $15 billion in bonds—was necessary if we were to seriously address the problem. But it was impossible to garner the necessary political support for a realistic financing package.

Congress finally passed a $10.8 billion recapitalization bill in August 1987. It was too little and too late.

Had we provided for a reasonable sum of money at the time to close hopelessly insolvent institutions, we would not be facing the problem we face today. Instead, insolvent institutions continued to operate and even grow, drawing in deposits with high-interest rates. The rising cost of funds became a debilitating

drain on the healthier institutions, increasing the potential scope of the problem.

Even the minimalist program Congress designed was not fully implemented. The industry never committed the full amount for which it was responsible under the FICO Program. I argued at the time that the industry was setting us up for an eventual taxpayer bailout, and that is precisely where we are today.

Congress, the administration, and the industry had a second chance on the issue just last year. By that time, the Bank Board and the industry had acknowledged that the problem was perhaps more in the neighborhood of $20 to $30 billion. I introduced two bills last year to deal with the burgeoning crisis. The first, which became law, extended for 1 year the moratorium on the departure of institutions from the FSLIC to stabilize the situation while Congress developed a comprehensive plan.

The second would have increased the recapitalization level under the FICO Bond Program by $5 billion. That legislation would have ensured that the industry was at least tapped for the $3 billion in retained earnings it had previously agreed to commit to the problem before there was any effort to turn to the taxpayer. The legislation passed the Banking Committee, but industry pressure precluded the granting of a rule and the measure never went to the House floor. As recently as 6 months ago, the industry was unwilling to admit either the size of the problem or its obligation to contribute significantly to its resolution.

Now we are finally acknowledging and trying to address the full scope of the problem. But the situation has deteriorated so badly that too many issues are getting insufficient attention in the rush to judgment. Allow me to review the major issues before us.

II. THE COST OF THE PLAN: ADMINISTRATION ESTIMATES

I am troubled by some of the "smoke and mirrors" that have accompanied the administration's cost projections.

The administration cites the overall cost of the plan at approximately $90 billion. But, the cost estimates are understated and the economic assumptions that underlie them, overly optimistic.

An analysis provided by the House Banking Commitee staff of the data released to date suggests that the total cost of the administration plan, before subtracting estimated revenues, will be approximately $335 billion, including the cost of the financing corporation—FICO and REFCO—bonds, FSLIC notes, assistance agreements, guarantees, future assistance, and purchase of zero coupon bonds.

There are several reasons that the administration's estimate is so low. First of all, the administration's plan calls for the issuance of 30-year REFCO bonds. However, administration data and releases have largely focused on present value costs and have not presented as part of the costs the interest over time on the additional debt we are incurring. This understates the real cost. To make an analogy, when the average person buys a home it is the principal plus the interest that he views as his ultimate cost, not the principal alone.

In contrast to the President's proposal, committee staff projections are based on the assumption that the new REFCO bonds, like the earlier FICO bonds, will be based on a 30-year schedule. Under the plan, the interest costs over time fall primarily on the taxpayer. It is this cost that will be a continuing drain on the average citizen and economy, and that will necessitate additional constraints on spending for other important Government programs.

Second, under the administration's plan the taxpayer assumes the bulk of the responsibility for the costs associated with past FSLIC transactions. The administration caps the cost of the deals already put in place at $40 billion. Yet GAO suggests that these costs will amount to at least $70 billion when interest, subsidies, and other guarantees are included. Moreover, the cost estimates on the guarantees continue to rise.

There has been minimal cash outlay in past FSLIC-assisted transactions. The money spend largely takes the form of FSLIC notes and other guarantees that represent the Government's contribution. Long-term special assessments on the industry were already being counted to defray these costs. But, under the President's plan those assessments will be eliminated within a shorter timeframe. Taxpayer vulnerability for these past expenditures will therefore inevitably be greater.

The issue of full faith and credit on the FSLIC notes and guarantees has never been resolved. The President's plan resolves that issue by making the U.S. taxpayer the ultimate backstop for costs associated with past deals.

Third, the resolution costs the administration estimates and the premium income it anticipates from institutions which remain operating are based on the assumption that there are approximately 500 institutions in the pool of insolvents the Government must handle. Yet, several hundred more institutions may move into that pool as they prove unable to bear new financial burdens imposed and meet new capital requirements. The pool of cases to resolve will ultimately be larger and the number of remaining institutions supposed to sustain the anticipated premium inflow from the industry much smaller. As a result, the projections of costs and industry contributions are highly questionable.

Finally, the administration makes some highly unrealistic assumptions.

Interest rates: Ignoring economic cycles and projected increase in interest rates, the administration assumes that interest rates will remain stable and moderate over an extended period. The administration plan includes an initial 7.4 percent interest rate assumption. But current long-term rates are now 9 percent and FICO bonds are currently trading at 9.46 percent with many analysts suggesting further increases. If these analysts prove correct, interest rate costs on the bonds will be higher than anticipated. Interest is to be paid from insurance premiums and tax revenues. But the industry premium contribution is fixed.

Any increase in interest costs will therefore be borne by the taxpayer.

Deposit Growth: The Treasury's financial model assumes 7.2 percent annual deposit growth. Thrift institutions pay insurance premiums calculated as a percentage of their deposits and these premiums, in turn, would be used to reduce cost to the Government and the taxpayer. Thus, an optimistic assumption about growth could underestimate the impact on the American taxpayer. The Nation's thrifts had record deposit withdrawals in recent months and the situation is not stabilizing. Moreover, other aspects of the administration's plan do not make the thrift charter as attractive as it might be. In addition, the administration has stated it wants to lower the cost of funds at many troubled thrifts by requiring them to offer less attractive rates for deposits. This objective, in conjunction with the administration's desire to close a significant number of institutions, would shrink the amount of insured deposits and the base on which premiums will be assessed, leaving the taxpayer with higher costs.

Asset recovery: The administration's plan estimates $12 billion in receivership proceeds as part of the contribution the industry will make over the next 10 years. But the plan assumes that the Government will recoup approximately 40 percent of the book value of the assets of failed institutions. Experts suggest such estimates are highly optimistic. The quality of assets in the portfolios of many troubled institutions is poor and the workout problems associated with an asset pool of this size, enormous. Moreover, the plan calls for disposal of property within 5 years. Deep discounts will be demanded by investors if this timetable is adhered to and local real estate markets could be seriously destabilized, affecting other, now healthy, financial institutions.

Timetable for resolution of remaining problems: Administration cost estimates assume instant resolution of all troubled institutions—at today's costs. This is unrealistic. Each month that the resolution of problem cases is delayed adds approximately $1 billion to the cost. While the administration estimates the base cost of resolving remaining problems at $50 billion—not counting already issued notes and guarantees—committee staff analysts estimate that this figure is at least 20 percent low.

Many experts have suggested that rapid closure of insolvent institutions will reduce the ultimate costs. But closure requires hard cash to pay off depositors and to a large extent closure is not even being contemplated.

III. WHO WILL PAY?

A. THE BONDING MECHANISM: PASSING THE COSTS ON TO FUTURE GENERATIONS

Not only will the administration's plan cost more than it says, it will cost more than is necessary. Much debate has focused on whether the funding for the thrift bailout should be on or off budget. While a valid issue, that debate misses the most important point.

The central question is whether we should rely on the issuance of long-term bonds to fund this massive bailout. In my view, bonding under these circumstances is not only fiscally irresponsible but morally reprehensible. To avoid coming to grips with some tough realities, we are passing the costs of this bailout—far higher costs than would otherwise be necessary—on to our children and grandchildren.

The President and the Congress have decided to spend an additional $40 to $50 billion over the next 3 years. We will, therefore, be spenders. The issue is, will we tax and spend, or borrow and spend. In this context, I believe

it is far more appropriate and morally defensible to tax ourselves rather than our children.

Bonding is appropriate for the funding of capital expenditures—investments in the future. Fiscal responsibility dictates that we not bond to cover present consumption, and certainly not to cover past consumption, which is exactly what we are doing here. The bonding mechanism suggested under the President's plan is a much higher cost solution than a direct infusion of funds. The difference in cost between a direct appropriation and the bonding mechanism could be as much as $150 billion over the 30-year period. It is the American taxpayer who will bear these costs.

Why, then, has bonding been proposed? What the administration proposes is simply another financing gimmick that will allow a further suspension of reality. This gimmick will allow us to keep the costs off budget, to solve an enormously costly problem largely with taxpayer funds while still giving the illusion that taxpayer resources are not being tapped. The costs are real, and they should be acknowledged as such.

The industry, the regulators, Congress, the administration, and the States share the blame for this crisis. We should now pay for our past mistakes. It is fundamentally unjust to require future generations to pay instead.

The administration estimates we will need approximately $40 to $50 billion over the next 3 years. In the House Banking Committee, I pressed for an amendment that would have directly authorized $50 billion over the next 3 years and urged that the unnecessary funds come from taxes, user fees, or other forms of revenue enhancement. Unfortunately, I was not successful.

While such an approach would involve some short-term pain, it would save the American taxpayer $150 billion over the 30-year life of the bonds. If we were to tax and spend, we would need slightly more than $15 billion a year for the next 3 years. If we were only to take the increase in gasoline prices that we have seen in recent weeks and direct those moneys to the solution of the FSLIC crisis, we would be well on our way.

While $15 billion a year is certainly a significant sum, it is far less than the $150 billion the American taxpayer will otherwise pay. And, under my approach, it is we, not our children and grandchildren, who would bear the burden. That is as it should be.

I will continue to advocate a direct authorization and appropriation funded by a one-time tax to handle the costs of the bailout as the bill moves to the House floor.

There is precedent for a self-financing approach. The Reagan and Bush administrations have advocated self-financing mechanisms for new programs. Indeed, last year President Reagan and Vice President Bush favored a new tax for a new program—a self-financing tax for the Medicare Catastrophic Healthcare Act of 1988. That same approach should apply here.

The administration repeatedly invokes the need for fiscal discipline to support its decisions to utilize a bonding mechanism and to keep the costs off budget. But, in my view, we have surely failed in our effort to achieve fiscal discipline if we comply with Gramm-Rudman and the demands of other industrialized countries for U.S. fiscal discipline by devising financing gimmicks to hide real costs.

We must also be attentive to how the proposed bond issuance might increase the degree to which Government borrowing—or something closely akin thereto—crowds out other borrowers in U.S. capital markets. Other borrowers are already disadvantaged in our capital markets because of the high level of Government borrowing. The REFCO bonds will fuel this problem. Increasingly greater amounts of money that could be turned toward productive investment will be deflected toward ongoing debt repayment.

B. BALANCE OF OBLIGATION BETWEEN INDUSTRY AND TAXPAYER

The administration markets its proposal as a shared commitment by the industry and the taxpayer, implying something akin to a 50–50 split. The President has rightly suggested that the thrift industry and the taxpayer share the burden of the overall costs. However, I believe the projections as to what the industry can and will contribute over time are unrealistic. Hence, I believe the taxpayer will bear the most significant portion of these costs.

First of all, the ability of the industry to contribute depends on the continuing viability of a substantial portion of thrift institutions. Moreover, the administration assumes a deposit growth rate of 7 percent and no further disintermediation in calculating premium income. Both of these assumptions are unrealistic, particularly because a significant portion of the disintermediation we are seeing is simply a function of rate differentials.

The plan locks even the healthiest thrifts that could effect a transfer to the FDIC into the FSLIC system for 5 years, gives them a seal that will mark them as second-class citizens, increases their premium costs, and leaves them with a permanent disadvantage in terms of premium costs vis-a-vis commercial banks. This will not make them very attractive to either investors or depositors.

It is hard to avoid the conclusion that healthy thrift institutions are being locked into a system so that their alleged resources can be depleted to refund the FSLIC fund. Few of these institutions may make it. Yet the plan counts on the premium inflow from surviving institutions as a major source of funds.

Second, the costs to the industry under the President's plan are fixed, while the taxpayer costs are indeterminate. Under the plan, the industry must contribute approximately $2½ billion in retained earnings and $300 million annually. Whatever costs are not covered by this industry contribution become a taxpayer obligation. Wherever under the plan there is a hole of questionable size, it is taxpayer money that must ultimately fill it.

Costs associated with past transactions beyond the ability of FSLIC to subsume are to be picked up by the taxpayer. If interest rates are higher, or deposit growth is lower, than anticipated, taxpayer money will fill the void. If additional bond issuance is necessary, the taxpayer will bear principal and interest costs. If a number of additional institutions move into insolvency and premium inflow into the new fund is less than anticipated, the taxpayer will pick up the tab. The burden on the industry is heavy, but fixed. The taxpayer is being asked to proffer a blank check.

The indeterminate nature of the taxpayer obligation is yet another reason why direct authorization and appropriation of funds financed by a special tax is a better approach. Under the administration's bonding proposal, Congress is being asked to write a blank check with the American taxpayer's signature. Once the bonding mechanism is in place, necessity may eventually dictate that higher and higher levels of bond issuances, funded by the American taxpayer, be approved. If there is to be a taxpayer contribution, it should be precisely fixed now and the source of funds identified.

The thrift industry and the taxpayer must inevitably share the financing cost. But Congress should have a precise and true picture as to the realities of the balance of obligation between industry and taxpayer before it can assess whether the balance is fair and what other options might merit consideration. The bulk of the burden under the Bush plan will clearly fall on the taxpayer.

C. THE RESPONSIBILITY OF THE STATES

The President's plan involves not only a massive bailout, but a massive transfer of resources from the Northeast and Midwest to the Southwest.

It was primarily State-chartered institutions with a very broad array of powers operating under lax supervision—that were nonetheless federally insured—that broke the Federal insurance fund. In 1987, the FSLIC resolved the problems of 47 thrift institutions at an estimated cost to the insurance fund of $3.7 billion. State-chartered institutions were responsible for $2.4 billion, or two-thirds of the total. In 1988, the FSLIC resolved the problems of 205 thrift institutions at an estimated cost to the insurance fund of $30.9 billion. State-chartered institutions were responsible for $23.3 billion, or three-quarters of the total.

Of the $18.6 billion cost attributable to Texas institutions in 1988, State-chartered institutions were responsible for $16.7 billion—approximately 90 percent of the total resolution costs. Of a total of 81 Texas institutions which were involved in resolutions during 1988, 64 were State-chartered. From 1980 to 1985, deposits in State-chartered S&L's in Texas grew by a staggering 186 percent, while the growth in federally chartered S&L's in Texas grew by only 60 percent.

As a consequence of the enormous drain on the insurance fund created by these State-chartered institutions, we are now engaged in a fundamental restructuring of our banking system involving massive Federal assistance. We have a dual banking system and it is that system that we are bailing out. The States have obligations as well as rights under that system; and the duality of that system should reflect in some sharing of the costs.

It is true that the Federal Government has an obligation to both State-chartered and federally chartered institutions—the provision of insurance to depositors within legally prescribed limits. But, in the context of the administration's plan, we are not for the most part talking about liquidating institutions and paying off depositors. The administration will be relying heavily on mergers, acquisitions, and shrinkage to work out this problem. In effect, we are engaged not in a depositor payoff, but in a massive restructuring effort designed to

preserve institutions and the stability of communities. The States and the Federal Government should share responsibility for that effort.

The vast majority of the problem was caused by a very small portion of the industry in a select number of States. Those who were primarily responsible for the problem should bear a reasonable portion of the cost burden of solving it. In cases where Federal Government regulators extended insurance coverage in reliance upon deficient regulatory oversight provided by the State, the State should contribute to the solution of the problem. If one segment of the industry is more culpable than another, that segment should bear a greater burden.

The Northeast-Midwest region is responsible for less than 10 percent of the estimated total cost of FSLIC resolutions, but would pay 45 percent of the tax portion of the bailout package. Over 80 percent of the FSLIC case resolutions and stabilizations in 1988 were in Texas, Oklahoma, and California. Over 90 percent of these case resolutions were generally in the South and West; less than 10 percent were in the Northeast-Midwest. At the same time, the tax effort of the Northeast-Midwest States far exceeds their tax capacity, while in the South and West, largely the opposite is true. Texas, for example, has neither a State personal income tax nor a State corporate income tax. It does have an oil and gas severance tax, the costs of which are passed on to Northeast and Midwest consumers by the companies that pay them.

There must be some regional equity in paying the costs of this bailout. Certainly, the Federal regulators are culpable, and Federal taxpayers will certainly bear the largest portion of this burden. But the lax supervision in certain States was also largely to blame. For example, Wisconsin, not unlike Texas, went through a serious economic downturn. Its thrifts, however, remained sound and healthy because of the capital standards imposed by State regulators on State-chartered institutions.

There is precedent for such a cost-sharing approach. Conditionality has been a key component of previous Government bailouts. Those benefiting the most directly paid a portion of the price. In the Chrysler bailout, for example, all those with an economic interest participated in the cost of the bailout.

In the House Banking Committee, I argued for an amendment that would have required the States to contribute some fair share toward the bailout costs. The amendment failed, but I will continue to seek some mechanism by which the States can make some reasonable contribution to the cost of the restructuring of the thrift industry as the bill moves to the House floor.

Another amendment I offered on a related issue did, however, carry. Premiums on deposit insurance paid by thrift institutions are now assessed on a flat-rate basis—that is, all institutions pay at the same rate. In my view, levying the same fees on safe and risky institutions for equivalent amounts of deposit insurance encourages excessive risktaking by the institutions. As a result, the burden of insurance losses is distributed inequitably among institutions. My amendment would permit the assessing of deposit premiums on a risk-adjusted basis. Conservatively operated institutions would pay less; "go-go thrifts" more. As a result, institutions in States that have lax oversight and supervision and allow institutions to engage in riskier activities would bear a higher premium burden. This should help discourage risktaking and protect the fund.

D. INFUSION OF PRIVATE CAPITAL

It is imprudent and unnecessary to tap taxpayer funds where private capital may be available. The administration's plan takes some important steps toward drawing more private capital into the industry. But, in my view, it does not do enough. Those provisions which do exist appear to focus on the fate of the healthiest institutions rather than borderline institutions where the need is arguably greater. I share the administration's obvious concern that any FSLIC solution must deal with the weak, but still solvent, segment of the industry as well as the bankrupt thrifts. However, I believe that increasing the amount of Federal assistance is not the only or even the best means to address this aspect of the problem.

Private capital can strengthen the condition of marginal thrifts and forestall the need for Federal assistance in the future. Before we commit huge levels of taxpayer dollars to bailing out institutions that are still salvageable, we should remove restrictions that make infusions of private capital impossible.

We are currently faced with a thrift industry that is starved for new capital and could arguably survive and prosper were that capital to be secured. Yet there are few sources from which that capital can come. Because of a variety of constraints, acquisitions of an interest by other financial institutions are forestalled and diversified firms looking for investment oportunities are precluded from looking to the thrift industry. Yet a capital contribution from such institutions could be vital to the industry and reduce taxpayer costs.

In the course of the House Banking Committee's consideration of the bill, I offered an amendment which was accepted that will permit thrift holding companies to acquire noncontrolling interests in undercapitalized, but still solvent savings institutions in transactions approved by thrift regulators. By acquiring such interests, healthy members of the thrift industry with useful management expertise will bring significant fresh capital to weaker institutions. This amendment also eliminates other impediments to investments in the industry by other diversified firms, allowing such firms to acquire failing as well as failed institutions. Under current law, such firms can invest only once an institution has failed. At that point, Government money is also required. The time to draw private capital in is before Government funds must be committed, in the hope of avoiding that eventuality altogether.

Other amendments that I offered which were approved eliminate other restrictions on the flow of capital into the thrift industry. Under current law, insurance companies which are subsidiaries of S&L holding companies cannot invest in other S&L holding companies, even when that investment is purely passive. Insurance companies are among our largest institutional investors. As we seek acquirors for troubled thirfts, an increasing number of companies will become S&L holding companies, and insurance companies will be precluded from investing in an ever larger array of firms. The restriction in current law removes a source of capital strength for the thrift industry and may even serve as a deterrent to potential acquirors of troubled thrifts. My amendment will permit insurance companies which are subsidiaries of S&L holding companies to invest in other S&L holding companies as long as that investment is passive. The amendment would also allow investment in thrift stock by securities firms as part of normal trading operations.

I believe we must go still further—every private investor dollar spent is another taxpayer dollar saved. As the bill goes forward, I intend to try to expand the opportunities for other diversified firms to invest in the thrift industry under appropriate guidelines.

IV. THE CAPITAL REQUIREMENTS

A. THE IMPORTANCE OF TOUGH STANDARDS

The capital requirement is the crux of this legislation. If the American taxpayer is forced to make a significant contribution to the thrift industry bailout, the imposition of tougher capital and accounting standards on the industry which will ensure this will never happen again must be a necessary quid pro quo. All of the capital proposals under discussion will impose a tougher capital standard on the industry.

We are in the situation we now face largely because institutions were able to gamble on risky investments with taxpayer dollars, in the form of Federal deposit insurance, backing them up. In such a situation, the investor realizes any gain, but the Government—and the taxpayer—bears any loss.

Investors will be more prudent only if they have their own funds at risk. Experts who have analyzed thrift industry problems point out that those institutions with positive net worth have, as a group, positively improved their position during the 1980's. In contrast, those with no or minimal positive net worth have deteriorated further.

Private capital is the appropriate buffer between the industry and its insurance fund and the best protection for the taxpayer. We must ensure that savings institutions have a real cushion to fall back on.

B. THE EQUITY ISSUE: THE NEED FOR A TRANSITIONAL RULE

While I strongly believe in tough capital requirements, I find myself in a somewhat anomalous position. Over the last several years in the House Banking Committee, I have argued repeatedly against accounting gimmicks and sleight-of-hand capital standards.

But I do not believe that we can now wipe the slate completely clean in one quick stroke without doing unnecessary damage to viable institutions and increasing taxpayer costs. The tangible capital requirement we are considering will be a new requirement for the thrift industry, and it is an appropriate one—but it cannot be met overnight.

In particular, in the early 1980's, numerous healthy institutions took over failing institutions at the behest of the Bank Board. Then, as now, FSLIC had no money to contribute in these assisted transactions. As a result, the Bank Board permitted acquiring institutions to

count intangible assets—most often supervisory goodwill—on their books in exchange for the money FSLIC could not contribute. These institutions acted in reliance on a Government commitment and, in effect, bailed out an underfunded FSLIC. The rug should not now be pulled out from under them.

The inequity of the failure to provide some reasonable transition rule for these institutions becomes even clearer when we examine the 1988 FSLIC-assisted transactions. Under the Southwest plan, the Bank Board resolved the problems of numerous hopelessly insolvent thrifts in the Southwest. In most cases the technique was similar to that used in the early 1980's—the Bank Board located an acquiror for the ailing institution. Again, FSLIC had no cash to contribute. But this time the Bank Board did not grant supervisory goodwill—it issued FSLIC notes. Institutions holding those notes will now be in a position to meet the new capital standards. Institutions with supervisory goodwill on their books will not.

In the House Banking Committee markup, I urged that some accommodation be made for potentially viable institutions that will be unable to comply as quickly with the new capital standards because of their past participation in FSLIC-assisted transactions. Unfortunately, the press coverage on this issue had turned the debate into a game about who could be tougher. Certainly, we want tough standards—but those standards must be fair and reasonable as well. It is in no one's interest to throw viable institutions into the pool of insolvents that must be handled with taxpayer money. I will continue to seek some reasonable transition rules as the bill moves to the House floor.

C. THE IMPACT ON THE TAXPAYER CONTRIBUTION

The capital requirements will inevitably affect the size of the taxpayer contribution under the administration's proposal. Thrift institutions must meet far more stringent capital requirements within 2 years under the President's proposal, within 1 year under the House Banking version. The likely result is that many of the now salvageable institutions will move into insolvency.

The larger the pool of insolvent institutions, the higher the taxpayer contribution will be. The $50 billion cost that the President has estimated is based on resolving the problems of approximately 500 insolvent institutions. In fact, it is already a low estimate given this current number of insolvent institutions. If we drive more institutions unnecessarily into insolvency that cost must be higher still. Moreover, institutions pushed into insolvency are in no position to contribute the premium income which is a major source of the alleged industry contribution under the President's plan. It is the american taxpayer who will bear the increased cost—a far greater cost than anyone is presently contemplating.

There may be additional costs to the Government as well. Those institutions which carry intangible assets on their books do so generally under written agreements they have entered into with the U.S. Government, agreements which generally state that they cannot be superseded by subsequent regulations. It is a fundamental principle of law that damages are in order when a contract is breached, and those damages may well be more onerous where the contract was induced by the Government.

These institutions can—and will—sue, at great cost to the Government in terms of court costs and potential damages. Stockholder suits may also be in order. In many cases, a thrift stock institution issued a prospectus describing the thrift's capital position in accordance with the standards approved by the Bank Board. The SEC approved such solicitations. Stockholders who invested based on these representations may well have a right to recover for the inevitable loss they will incur from a drop in stock prices if the institution is found to be out of compliance with the new capital standards.

We face enormous additional costs to the Government and years of entangled litigation. As that becomes more apparent, we may well wish we had introduced some modest and equitable flexibility into the capital requirements from the start.

D. THE ALTERNATIVE APPROACHES

Allow me to review the various approaches to the capital standards that have been under discussion. Despite all the rhetoric about tough capital standards, the President's original plan was actually rather nebulous regarding the capital requirements put in place. The President's bill contends that the thrift industry must meet standards no less stringent than the capital standards for national banks by 1991, but we are left to imagine how the regulators will interpret such a standard in the thrift industry context—in fact, the standards for national banks are in flux.

The Comptroller is moving toward implementation of risk-based capital standards for national banks, but those standards have been largely developed without regard to concerns peculiar to the thrift industry. The thrift industry would fare better under a pure risk-based standard since home mortgages are weighted as low-risk items. However, it was never clear in the President's proposal whether a risk-based standard governed or a 6-percent capital floor applied regardless of the capital level required under the risk-based standards.

The Comptroller's capital standard for national banks also incorporates a 3-percent tangible capital requirement, although the President's plan does not explicitly impose a 3-percent tangible capital requirement on thrifts. Indeed, under the President's bill, thrifts could count goodwill amortized over 10 years toward meeting their capital requirement.

The House Banking Committee bill, represented in the press as soft on capital standards, was actually the most stringent proposal—far more so than the President's bill—by the completion of the amendatory process. The House proposal requires the industry to meet a 1.5-percent tangible capital requirement by June 1990, and a 3-percent tangible capital requirement by 1994, and demonstrate progressive improvement in the interim. Goodwill acquired in past assisted transactions can be counted toward meeting capital requirements in progressively smaller amounts, declining to zero percent by 1994, but the minimum tangible capital test must still be met.

According to statistics collected by the Bank Board's Office of Regulatory Activities, 1,100 of the approximately 2,700 solvent U.S. thrifts—containing 70 percent of the industry's assets—would fail to meet the 1.5-percent tangible capital test. Between 1,450 and 1,560 institutions, containing between 77 and 82 percent of the industry's assets, would fail the 3-percent tangible capital test.

The approach developed by the Senate Banking Committee in fact had the maximum degree of flexibility. The Senate Banking proposal ostensibly embraced the standard in the President's bill—that is, capital standards no less stringent than those applicable to national banks. However, the bill also permitted goodwill—amortized over 25 years or under the terms of an existing agreement, whichever is less—to count toward capital.

Thus an institution could meet its capital requirement by counting goodwill. In effect, there was no tangible capital floor in the bill as passed by the Senate Banking Committee. Institutions that met their capital requirements only by the counting of intangible assets could grow. But they could grow only to the degree that growth was in traditional thrift assets and backed by an inflow of tangible capital. In action on the Senate floor, however, a 1.5-percent tangible capital requirement was imposed.

In effect, the Senate Banking Committee bill may have taken the best albeit not the toughest approach. That approach recognizes some harsh realities and does not throw viable institutions unnecessarily into insolvency. Certainly, institutions with no tangible capital should be subject to tighter supervision, and the Senate Banking language provided for this. But if these institutions are viable, they should not unnecessarily become part of the pool of case resolutions that will be handled largely with taxpayers dollars.

There is a continuing problem that exists under all the proposals. The administration has long argued that the 1991 deadline put forward in its proposal is not a cliff. Failure to meet the deadline was not to prompt liquidation, but growth constraints. In the course of congressional debate, the focus has also been on growth limitations as the appropriate remedy should institutions be unable to comply with new capital standards in the timeframe agreed upon. But far more than growth constraints are allowed under all the outstanding proposals.

Institutions not in compliance not only have growth limitations imposed, but they are also not in compliance under the terms of existing statutes. Such a judgment is a death sentence for these institutions. That status triggers an array of legal and operational problems that have an immediate impact on an institution's viability and profitability—a judgment that the institution is operating in an unsafe and unsound manner, and the possibility of cease-and-desist orders, consent decrees, forced mergers or a shift in management.

Where an institution is demonstrably operating in an unsafe and unsound manner such safeguards should come into play. Such a judgment should not be automatic, however, simply because an institution does not meet the deadline for complying with capital standards, particularly if it is an institution with good management and good prospects. In such cases, the imposition of growth limitations,

coupled with demands for annual improvement in the institution's capital position, is the appropriate remedy.

The statute must provide more clarity regarding precisely what happens to institutions that do not meet the capital standards. We cannot rely on unfettered regulatory discretion. Some effort was made in the House Banking Committee to set clearer parameters on sanctions. But the burden of proof remains on the institution to avoid an automatic finding of unsafe and unsound operation if it fails to meet capital standards in a timely fashion. That burden belongs on the regulator. I intend to pursue this issue.

V. CONCLUSION

We are rushing to judgment on the President's proposal with inadequate attention to the basic issue I have raised here. It is imperative that we resolve these fundamental issues.

CLARIFYING THE LEGISLATIVE PROGRAM FOR TODAY

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, as Members are aware, we have been proceeding today in an attempt to get a general agreement which would permit us today, before the Sun sets, before this session ends today, to take action on the urgently necessary appropriations for the veterans of this country, for veterans health benefits and other things which, unless we act within a very few days, may expire for want of funds. These funds have been requested by the administration, have been requested by the director of the Veterans' Administration. They have been recommended by our committees. They have been recommended by the Committee on Appropriations, and they were included in the bill which we brought up some days ago and which because the subject of an effort to amend in order to bring all those various appropriations contained in the bill within the total budgetary amounts allowable under our budget agreement.

Unfortunately, Mr. Speaker, because of deeply held convictions on the part of a great many Members respecting numerous priorities which confront our country, priorities that affect the homeless, priorities that affect our efforts to conduct a vigorous and effective war against drugs, as well as other priorities, we have been unable until this time to resolve an agreement.

At the present time conversations are in progress between the Democratic and Republican leadership, between people on the Committee on Appropriations and the Committee on Rules. We hope to be able within a very few minutes to announce to the House an agreement by which in a bipartisan way we would permit progress to be made and an effort to be undertaken today on the most urgent of those urgent supplemental appropriations, those affecting the veterans of this country.

Mr. WILLIAMS. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from Montana, my distinguished friend.

Mr. WILLIAMS. Mr. Speaker, I thank the gentleman from Texas [Mr. WRIGHT] for yielding.

As the gentlemen from Texas [Mr. WRIGHT] knows from his travels throughout the United States, in visiting with veterans, and as he knows for a not-long-ago trip to Montana, where among those he talked to were veterans, we have in our State a serious shortfall of revenues to properly keep our word, our commitments, with regard to health care to Montana's veterans. A higher percentage of Montanans have served in the military on behalf of their country than of citizens of any other State, so we have a proportionately very large population of veterans in our State, and I want to say how much we appreciate the actions of the gentleman from Texas [Mr. WRIGHT] and the action of the leadership in attempting to resolve this matter of a supplemental appropriation that will restore most, if not all, of the shortfall that our veterans' hospitals in Montana and elsewhere are experiencing.

Mr. Speaker, this is a vital matter and one that I know has taken a good deal of the gentleman from Texas [Mr. WRIGHT] time as he has valiantly tried to write this supplemental in a way that it can receive support in the House. I want to commend him and thank him for yielding to me.

□ 1240

Mr. WRIGHT. I thank the gentleman.

I would urge all Members to await the results of the conference now under way, and with confidence look forward to our being able to resolve that matter today.

Other matters of vital urgency and equal interest to the country are questions of drugs, questions of the needs of the homeless population of this country, which will await further action. They are not yet at the emergency point where failure to appropriate within the next day or hours would cause cutbacks in immediate service.

So pending the moment when we can get agreement on the manner in which those various matters could come before the floor, we are hoping to be able to attend to those urgent matters concerning the veterans' population today.

I think every American feels a special responsibility to those people who have sacrificed their wholeness in defense of our Nation. We have a peculiar sense of commission to them. Of all the things we certainly never would want to allow to lapse, health care for the veterans' population of America is highest among that priority.

THE NORTHERN SPOTTED OWL IN THE PACIFIC NORTHWEST AND ITS IMPACT ON THE TIMBER INDUSTRY

(Mr. AUCOIN asked and was given permission to address the House for 1 minute.)

The SPEAKER pro tempore. Without objection, the gentleman from Oregon is recognized for 1 minute.

There was no objection.

Mr. AUCOIN. Mr. Speaker, I appreciate the Chair recognizing me. I thought as we await the outcome of some of the discussions going on over the floor that perhaps Members of the House would like to be informed about the confrontation between the northern spotted owl in the Pacific Northwet and its impact on the timber industry, which is an industry that is very important to my constituents.

I have been waiting for a chance to have your undivided attention, and now that I have it, I would like to fill this time.

If the gentleman from New York [Mr. SOLOMON] whose district depends on wood products from the Pacific Northwest wishes me to yield to him, I would be happy to yield to him.

Mr. SOLOMON. Mr. Speaker, will the gentleman yield?

Mr. AUCOIN. I am glad to yield to the gentleman from New York.

Mr. SOLOMON. Mr. Speaker, I have great interest in the subject matter the gentleman just brought up. Perhaps he would include the great horned owl of the great Adirondack Mountains, which has a similar impact on the wood industry as the great northern spotted owl.

Mr. AUCOIN. I did not know about the horned owl. I knew about the northern spotted owl. In the Pacific Northwest, the northern spotted owl is a creature that has as its habitat old growth forests, old growth trees.

It is estimated, if you can believe it, that some 1,000 acres, according to some estimates, are needed to be set aside and preserved from timber harvesting in order to protect one nesting pair of spotted owls. That is 1,000 acres of timberland. Another estimate is 2,700 acres of habitat necessary to be undisturbed in order to protect one nesting pair of northern spotted owl.

You can understand what an impact this has on the timber industy in the Pacific Northwest. It seems to be that I am being told you have all learned enough now about the northern spotted owl and I am happy to yield back the balance of my time.

THE GREAT NAVY BEAN AND SUGAR BEET OF MICHIGAN

(Mr. TRAXLER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAXLER. Mr. Speaker, I was terribly interested in the horned owl, but I think there is some information that this membership and the people of America ought to have, and that concerns the navy bean, of which 80 percent of that crop is grown in my district.

I want each of you to know that there is no more nutritious vegetable in the entire United States, and indeed, the world, than the navy bean.

Furthermore, with the emphasis upon colon cancer and health, you ought to be aware that it produces the highest fiber of any fruit or cereal grown in these United States.

While I am not going to speak about the distraction of the bean, it ought to be in every American's diet and it ought to be served, in my judgment, at least every day. If that were the case, there would be an immense amount of prosperity in my district. The Nation might suffer from some other problems, but I suggest there is enough of that in this body already.

The other commodity that I want to refer to is that of the wondrous beet. The sugar beet is to my district what the Bible is to other parts of the country.

Mr. AUCOIN. Mr. Speaker, will the gentleman yield?

Mr. TRAXLER. I am delighted to yield to my owl friend, the gentleman from Oregon.

Mr. AUCOIN. Mr. Speaker, I cannot believe the gentleman asked me to stop talking about the northern spotted owl of the Pacific Northwest so that we could hear about the gentleman's sugar beet. I am surprised, I say to my friend.

Mr. TRAXLER. I may have to reclaim my time to talk about the beet. The gentleman wants to know about the beet, does he not?

Mr. AUCOIN. Mr. Speaker, if the gentleman will yield further, I wanted the gentleman to know about the northern spotted owl, but I will listen to the story about the beet.

Mr. TRAXLER. The sugar beet, Mr. Speaker, is to my district, as I said, what the Bible is to some other parts of America and the world. Fundamentally, it is the way in which my farmers pay their land contracts and their mortgages.

It is due to the generosity of the American public and this Congress that it is held in such high esteem through the domestic sugar program.

I want the gentleman to know that there is no finer sweetener that has ever been devised than that which comes from the beet.

I ought to mention, too, that cane sugar is also an outstanding sweetener as well.

There is another thing to be said for corn sweetener, and that is that it comes from corn.

Mr. AUCOIN. Mr. Speaker, will the gentleman yield further?

Mr. TRAXLER. I am pleased to yield to the gentleman from Oregon on the spotted owl.

Mr. AUCOIN. Mr. Speaker, I appreciate the gentleman yielding to me.

It looks like the gentleman from Massachusetts [Mr. CONTE] is arriving, but I wonder if the gentleman might yield to the gentleman from New York who has a horned owl that he has been very eager to talk about?

Mr. TRAXLER. I would like to get a report on the bean situation in New York, if I could.

Mr. SOLOMON. Mr. Speaker, will the gentleman yield?

Mr. TRAXLER. I yield to the gentleman from New York.

Mr. SOLOMON. Mr. Speaker, I am sorry, we do not have any navy beans in New York, but we have the gentleman from Massachusetts [Mr. CONTE] and that is just as good.

Mr. TRAXLER. Mr. Speaker, if I can reclaim my time, the gentleman from Massachusetts is knowledgeable on tomatoes. He knows something about corn as well. I am always pleased to welcome him to the agricultural conference and to the caucus. He is a strong supporter of both the navy bean and the Michigan beet.

SUPPLEMENTAL APPROPRIATIONS FOR THE DEPARTMENT OF VETERANS' AFFAIRS, FISCAL YEAR 1989

Mr. WHITTEN. Mr. Speaker, I send to the desk the bill (H.R. 2402) making supplemental appropriations for the Department of Veterans' Affairs for the fiscal year ending September 30, 1989, and for other purposes and I ask unanimous consent for its immediate consideration in the House.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The Clerk read the bill, as follows:

H.R. 2402

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are hereby appropriated, out of any money in the Treasury not otherwise appropriated, to provide supplemental appropriations for the Department of Veterans Affairs for the fiscal year ending September 30, 1989, and for other purposes, namely:

DEPARTMENT OF VETERANS AFFAIRS

VETERANS BENEFITS ADMINISTRATION

COMPENSATION AND PENSIONS

For an additional amount for "Compensation and pensions", $701,481,000, to remain available until expended.

READJUSTMENT BENEFITS

For an additional amount for "Readjustment benefits", $22,212,000, to remain available until expended.

LOAN GUARANTY REVOLVING FUND

For an additional amount for "Loan Guaranty Revolving Fund", $120,100,000, to remain available until expended.

VETERANS HEALTH SERVICE AND RESEARCH ADMINISTRATION

MEDICAL CARE

For an additional amount for "Medical care", $340,125,000: *Provided,* That of the sums appropriated under this heading in fiscal year 1989, not less than $6,800,000,000 shall be available only for expenses in the personnel compensation and benefits object classifications.

DEPARTMENTAL ADMINISTRATION

GENERAL OPERATING EXPENSES

(INCLUDING TRANSFER OF FUNDS)

For an additional amount for "General operating expenses", $24,900,000, of which $15,000,000 shall be derived by transfer from "Construction, minor projects": *Provided,* That in the appropriation language under this heading in the Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1989, insert a period after $774,316,000" and delete the language that follows.

No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

The SPEAKER pro tempore. The gentleman from Mississippi [Mr. WHITTEN] is recognized for 1 hour.

Mr. WHITTEN. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from Massachusetts [Mr. CONTE], and pending that I yield myself such time as I may require.

Mr. Speaker, we have all recognized the need to look after the veterans and the Veterans' Administration.

H.R. 2402 provides a total of $1,208,818,000 for:

Medical care	$340,125,000
Compensation and benefits	701,481,000
Readjustment benefits	22,212,000
Loan guaranty revolving fund	120,100,000
General operating expenses	24,900,000

Of this amount, $843,793,000 is mandatory and the balance is needed to maintain the medical care employment level at the level of 194,720 full-time equivalent employment called for in the fiscal year 1989 appropriations bill and to administer the program.

Every Member is for taking care of the needs of the veterans and of the Department of Veterans' Affairs. When representatives of the American Legion and the VFW arranged a conference with me to discuss the needs

of the veterans this year, I prepared a bill to take care of the needs of the VA, which came largely because of the demand at the last minute by colleagues on the other side of the Capitol last year that we agree to a further reduction in the budget ceiling of $1.9 billion.

The VA Subcommittee and the other subcommittees went along developing a supplemental appropriations bill.

After we reported the bill, the executive branch called for substantial reductions in other programs handled by the various subcommittees and I requested each subcommittee to review the earlier determination.

This was done.

Mr. Chairman, H.R. 2072 provides funds to meet dire emergencies in the area of drugs and crime, veterans programs, guaranteed student loans, operating crop loans, U.N. Peacekeeping, migration and refugee assistance, trade adjustment assistance, forest fire fighting and rehabilitation, reimbursement to States for foster care and adoption assistance, and to the Internal Revenue Service for processing tax returns and investigation, collection, and taxpayer services.

After a leadership proposal to provide offsets by 57 of one-hundredth of 1 percent governmentwide cut was rejected, I asked the subcommittee chairmen involved to either provide offsets or to deter programs to the regular 1990 bills in order to meet the intent expressed by the House.

Agreement has been reached that an amendment to be offered by myself which reduces H.R. 2072 by $1,005,611,000 through offsets and deferrals will be made in order and that points of order will be waived against provisions making transfers or offsets from funds beyond the scope of this bill that are in violation of clauses 2 and 6 of rule XXI; that the amendments be considered en bloc, and they not be subject to amendment or division.

The effect of the amendment is to:

Reduce forest fire reimbursement	−$258,000,000
Provide offsets for farm operating loans	−75,000,000
Defer FAA operations for later action	−70,700,000
Provide payments for operation of low-income housing assistance by transfer	−88,000,000
Provide FEMA emergency food and shelter assistance by transfer	−15,000,000
Defer VA homeless assistance	−30,000,000
Defer HUD homeless assistance	−108,500,000
Defer Justice Department anticrime package	−43,186,000
Defer NOAA operations and research	−32,200,000
Defer civil liberties public education fund	−250,000,000
Provide transfer authority to the Judiciary	−16,240,000
Provide FCC by reprogramming	−500,000
Defer Securities and Exchange Commission	−18,285,000
Total effect of amendment	−1,005,611,000

□ 1250

Mr. Speaker, I reserve the balance of my time.

Mr. CONTE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, veterans are crying for our immediate help, and this bill represents the last chance we have to deliver it before Memorial Day.

Every Member of this great institution has heard from veterans who are being denied basic medical care due to shortfalls in VA funding. Across this proud country, prescription orders are not being filled; worn artifical limbs are not being replaced; and needy patients are being turned away in droves from understaffed medical facilities. The problem is real. We know it is real.

And yet we have been incapable of providing the emergency response that the situation requires.

Faced with a crisis threatening our Nation's freedoms and security, our veterans in Germany, in the Pacific, in Korea and in Vietnam knew exactly how to respond. They forgot their political and personal differences long enough to join together and face the common enemy head-on. Today, the common enemy is the insidious decay of a medical care system upon which thousands upon thousands of American veterans rely.

The proven strategy of a united front is the only one which is certain to arrest the decline. At least this new bill offers an opportunity to join together and actually enact something important to all of us: emergency fiscal year 1989 funding for the VA.

It truly breaks my heart that these veterans, who have sacrificed so much to preserve the freedoms institutionalized by this great body, have, during their hour of greatest need, been left twisting in the wind while congressional leaders continue to play political chess games with their fate.

Friends, we must disengage the engine from the train and permit a separate vote on VA funding.

The other programs in H.R. 2072 as reported are all worthy of consideration, but only VA health care constitutes the type of "dire emergency" that warrants immediate and urgent consideration outside the regular appropriations process. But we can no longer permit our sick and ailing veterans to be held hostage to other programs within H.R. 2072, however compelling those programs might be.

Mr. Speaker, this bill gives our veterans a fair break. They have already made the sacrifice, and we have incurred a debt. We owe it to our veterans to provide adequate medical care. This bill is the only sure way of guaranteeing that medical services, will be there when the veterans need it.

Let us live up to our commitment; support this bill.

Mr. WEBER. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I am happy to yield to the gentleman from Minnesota.

Mr. WEBER. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I want to commend the gentleman for his statement, and I certainly support his remarks.

As I recall, there was a bill introduced in this Congress by the gentleman from Massachusetts that would have solved this problem long ago, was there not?

Mr. CONTE. Reclaiming my time, yes, I did file one, House Joint Resolution 272.

Mr. WEBER. House Joint Resolution 272. Did we not seek to have that bill brought to the floor of this House just within a matter of several hours ago almost?

Mr. CONTE. Yesterday.

Mr. WEBER. Almost a full day ago? Why did we not vote on that bill at that time? Can the gentleman enlighten us a bit?

Mr. CONTE. I was not recognized by the Chair at that time to make that kind of a motion, and it required unanimous consent. I was not given that. But it is not a question of pride of authorship or anything else. It is something that is a dire, dire emergency right here. It is needed, and it has got to be passed. I am pleased that we are finally going along with the idea that we propounded here yesterday, and I do not care who gets the credit.

Mr. WEBER. If the gentleman will yield further, I certainly commend my leader for his modesty, but I want the gentleman from Massachusetts to know that many of us, when we vote "yes" on this, if we get that opportunity, in our minds we are going to be thinking "272, 272; thank you SILVIO CONTE for 272."

Mr. CONTE. I thank the gentleman very much.

Mr. WHITTEN. Mr. Speaker, I yield 10 minutes to the gentleman from Michigan [Mr. TRAXLER].

Mr. TRAXLER. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, let me say to my distinguished friend, the gentleman from Massachusetts, that he is put in a rather embarrassing position by my good friend, the gentleman from Minnesota, on House Joint Resolution 272; 272 was introduced on May 17, and it is a very fine resolution and does the good thing that we are going to do today. The gentleman is to be com-

mended for putting a resolution in yesterday that does what we are going to do today, and we regret that it could not have done the day he did it.

Mr. WEBER. Mr. Speaker, will the gentleman yield?

Mr. TRAXLER. I am happy to yield to the gentleman from Minnesota.

Mr. WEBER. Mr. Speaker, I am always glad to engage in a dialog with my good friend from the Bean State.

Mr. TRAXLER. Beets, too.

Mr. WEBER. Mr. Speaker, I do not understand how the gentleman can suggest that my friend, our leader, the gentleman from Massachusetts [Mr. CONTE], who has been doing battle in behalf of the veterans nigh on these many months, is in an embarrassing position when the gentleman from Michigan and others now have to explain to us why they now want to pass the bill that they prevented us from considering yesterday.

Mr. TRAXLER. Mr. Speaker, is the gentleman aware that we have been trying to bring the supplemental bill up for some time, but that it was the gentleman's side of the aisle that objected to it yesterday or the day before. I forget, because we have had so many different versions.

May I suggest to everyone that we can go on with this all afternoon, and I do have an important statement to make. I just want to say to my friend that there is enough blame here in terms of whether we should have done it yesterday or today, and I am sure we will all take our share of it.

I want my colleague, the gentleman from Massachusetts, to know that he is to be commended for putting the resolution in yesterday.

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. TRAXLER. I am happy to yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Speaker, the gentleman and I have the greatest respect for the gentleman from Michigan.

Mr. Speaker, I wrote to Dick Darman, the Director of the Office of Management and Budget, on February 23, urging upon him the need for a supplemental in the area of Veterans' Administration health care.

I will put that letter in the RECORD at this point:

HOUSE OF REPRESENTATIVES,
Washington, DC, February 23, 1989.

Hon. RICHARD DARMAN,
Director, Office of Management and Budget, Washington, DC.

DEAR DICK: This country has encountered an immediate crisis in the area of Veterans Administration health care. Due to shortfalls in the FY 89 budget, there has been a significant reduction in delivery of medical benefits to veterans—benefits on which veterans rely and for which the U.S. citizenry, through its elected representatives, has agreed to provide.

The impacts of the current shortfall are severe. Last fall, the V.A.'s Department of Medicine and Surgery proclaimed that an additional $633 million would be required in FY 89 to provide services at the FY 88 level. Some treatments are currently being denied to previously eligible veterans. Nursing and staff shortages have closed thousands of V.A. hospital beds at a time when the health care needs of the aging veteran population have substantially increased. Confidence in the Government's commitment to the well-being of those who have bravely served our country is being eroded.

I understand that the V.A. has requested FY 89 Supplemental funding of $314 million for V.A. medical programs. The V.A. has also reqeusted an addition of $512 million in new budget authority to the Administration's FY 90 budget proposal. I urge your swift and favorable consideration to these requests.

I am not oblivious to the impacts such increases might have on the national deficit. Nevertheless, the total cost seems a small price to pay to honor our commitment to those who have protected and strengthened this country through military service. Further, the efficient delivery of services through the V.A. system may well save tax dollars that would otherwise be spent on Medicare or Medicaid.

The time to assign blame for the emaciation of V.A. health care delivery has passed. The time to act is now.

Thank you for your consideration of this urgent matter.

Sincerely,

SILVIO O. CONTE,
Member of Congress.

Mr. Speaker, I was urging him to send up a supplemental for the veterans on February 23.

After the gentleman and I talked soon thereafter about this supplemental, I went down to the White House, and I worked very, very hard to change the administration's mind about the need for offsets for the veterans' money, because I knew they were controversial. We did, and the gentleman was very appreciative of that.

Mr. TRAXLER. Indeed, I was.

Mr. CONTE. The gentleman is a good man and a good friend.

Mr. TRAXLER. I thank the gentleman, and I am honored to be called that.

Mr. Speaker, I want to just conclude my remarks with a brief statement.

Mr. Speaker, let me say that this whole issue, I think, has served a very, very useful purpose. Today's debate and the discussions that have gone on today and yesterday, I think, have served the American veteran well. Let me tell the Members why.

The bill that we have before us provides a $340 million supplemental for the medical care account in 1989. The bill also includes mandatory appropriations for veterans' compensation and pensions in the amount of $701 million, $22 million for the GI bill, and $120 million for the loan guaranty revolving fund. There is nearly $25 million for the general operating expenses account.

Mr. Speaker, I want to thank the subcommittee members, and my distinguished friend, the gentleman from New York [Mr. GREEN], for their work on this measure. I also want to thank the gentleman from Massachusetts [Mr. CONTE], who is ex officio, and certainly the full committee chairman, the gentleman from Mississippi [Mr. WHITTEN], for the work they did in assisting us in the subcommittee in arriving at these figures whatever that time period was in the distant past.

What is important here is that while we have been talking about the dire need for a VA supplemental for medical care that we understand how we got here and where we are going, because the VA medical account is, I think, from the conversations I have heard here on the floor, a very high priority of the membership.

□ 1300

I want to tell Members my assessment is that it will not be too many weeks before that priority will be put to the test when we bring the 1990 VA, HUD and Independent Agencies Appropriation bill to this floor. If Members think we are having fun today, watch me on that day.

What is this all about? It is about politics, and if you have not figured that out, you are really behind the curve. Let me tell Members what the politics of VA medical care is.

What was the President's request for VA medical care, for instance, in 1986. Get this: It was 192,000 FTE's, full-time equivalent employment. We gave him 193,000. That is what Congress did.

In 1987 the President's request to the Congress was for 185,000 FTE's. These figures come from budget documents, these are not madeup figures, not hype. Hey, this is not hype, this is reality, truth. Get this; truth on the floor of the House. The President requested 185,192 in 1987. Do my colleagues know how much the Congress gave him? You were generous, you did what was right for the American veteran and you gave him 194,140 FTE's, the barest number possible.

Do Members know what the request was in 1988? It was 190,330. The Congress, all of us, with the leadership of the gentleman from Mississippi, SONNY MONTGOMERY, insisted that it be 194,140.

Now in 1989 the request was for 192,358. We gave them 194,720.

Now listen to this one. Now what they want and what the President requests for 1990 for medical personnel to staff the VA is 186,194.

I will tell Members we cannot do it, we cannot do it for less than 194,700, and even at that level I want to assure Members we are not being generous to the American veteran.

I hope that whatever the decision is on the part of the subcommittee, and I cannot speak for it, I can only tell you it is my hope that the Members will say, based on what you have all told us

right out here on this floor, and you are all on the record that you are for veterans' medical care—that when we bring a decent, responsible figure that you are going to support it on this floor. But remember when we appropriate that money for veterans' medical care it has to come from someplace. When we go above the President's recommended 186,000 personnel level and we come back with a figure, for instance, of 194,700, that money is going to come out of something that Members may think is more important. We are going to have fun then, and we are going to see who the friends of the veterans are.

Will Members remember my statement? Remember what I just told you, because some of the Members that have been banging that microphone this morning are going to suggest there are other portions of the 1990 bill that will be on the floor at that time that adequately funds veterans programs but, does not fund their favorite portions properly. They are going to want to take some money from someplace and fund their favorite projects. That is when we are going to have a lot of fun, and that is how we separate real from phony.

I want to commend the Membership for their interest, their concern, and their dedication on behalf of the American veteran. We look forward to the passage of this bill and the Senate taking it up most promptly and moving it on to the White House.

I want to place in the record at this point a table on requested and funded FTE levels.

VETERANS' ADMINISTRATION JURISDICTIONAL FTEE

	President's request to Congress	FTEE associated, with appropriated funding	Actual	President's request to Congress for activations
Year:				
1981	184,672	185,869	184,242	398
1982	181,106	186,287	186,154	845
1983	187,546	188,238	188,111	1,633
1984	190,544	190,574	189,865	2,346
1985	193,321	193,941	193,229	2,557
1986	192,048	193,941	193,864	2,068
1987	185,192	194,140	194,459	1,307
1988	190,330	194,140	193,798	1,981
1989	192,358	194,720		1,882
1990	186,194			

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. TRAXLER. I yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Speaker, I want to commend the gentleman from Michigan on an excellent statement. His committee has one of the most difficult jobs in the 302(b) allocation of any Appropriations Subcommittee in the Congress with veterans, with housing, with clean water, with the space program, and many other important programs.

Can the gentleman tell me, when we are having such difficult times like this, should we embark on a big space station program? Where are we going to get the money?

The gentleman does not have to answer me now. We can talk about it later.

Mr. TRAXLER. Mr. Speaker, I appreciate the gentleman's question. As the Japanese would say, that is yet to be determined. And each of the agencies, as any member of the subcommittee will tell you, within our jurisdiction is our favorite agency and we are committed within the resources available to us to do the very best for each and every one of them we can.

Again, I thank the gentleman and I yield back the balance of my time.

Mr. CONTE. Mr. Speaker, I yield 3 minutes to the gentleman from New York [Mr. GREEN].

Mr. GREEN. Mr. Speaker, I thank the distinguished ranking minority member of the full Appropriations Committee for yielding time to me, and I rise for two purposes. First, to express my appreciation to the distinguished ranking minority member of the full committee and to my chairman, the gentleman from Michigan [Mr. TRAXLER], the distinguished chairman, and the ranking minority member of the Veterans' Affairs Committee for their efforts early on in this session to force the OMB to face up to the problem that we were facing in funding veterans' medical care. This is truly a crisis.

The testimony before our Appropriations Subcommittee demonstrated that fully 95 percent of the veterans being cared for by the VA medical services are service-connected disability veterans, so that this really is the group to which we have the greatest obligation as a nation.

I also rise to echo the point made by my distinguished chairman as to the problems that this account is going to create as we shortly move on to the fiscal year 1990 appropriation bills. Plainly, if this account is more than $300 million short with just the balance of this year to go, it is many hundreds of millions of dollars more short in terms of the full fiscal 1990, and we are certainly going to have to find within our 302(b) allocation in our subcommittee the money to make that good above and beyond what the administration has requested for the VA medical account.

So I hope all Members, as the appropriation process now unfolds, will be very much aware of that priority and understand that that is going to be a very significant factor in shaping not only the veterans' portion but the entire Veterans, HUD, and independent agencies appropriation bill for fiscal year 1990.

Mr. WHITTEN. Mr. Speaker, I yield 5 minutes to the gentleman from Iowa [Mr. SMITH].

Mr. SMITH of Iowa. Mr. Speaker, I thank the gentleman for yielding time to me.

Mr. Speaker, I want to recap briefly and then ask the administration to do something.

On May 10 the head of OMB sent up a letter which, among other things, said this: "Much of that newly-provided 1989 drug funding remains unobligated."

To the untrained ear, that sounds as if to say there is more money available than needs to be there for drug control. Actually, of course, there is unobligated money, there has to be unobligated money. Under the Anti-Deficiency Act agencies should spend no more than about one-twelfth per month in the salaries and expenses accounts. So most of the accounts in the anti-drug effort are on target; they are in the 50 percent range at the end of 6 months. There are three or four accounts that appear to have unobligated balances greater than they need to be, but in the law enforcement area there are none of them that appear to have more money than they need.

So the chairman of the full committee a week ago today wrote back to the head of the OMB and he said this:

> We have not been able to identify the individual accounts directly involved in the war on drugs which contain more funding than is needed or will be used in fiscal 1989. I would appreciate receiving by Monday noon the identification of each individual account of anti-drug funding which in your opinion has a surplus that will not be needed or used appropriately in this fiscal year, and the amount of the surplus in each such account.

A reply came back to the chairman on Monday and it said:

> Please note that my early letter did not state that there was a surplus of funds that would "not be needed or used appropriately."

□ 1310

Well, that answers that. There is no surplus that the OMB Director has identified that will not go used by the end of the fiscal year. But in addition to that he did not go forward and then identify any accounts in which there will be a surplus.

For example, $300 million was appropriated for interdiction in the Department of Defense. It does not appear at this time that there is any way they can use that money this year. But the accepted procedure, if there is a surplus in any account in one department that can be transferred to another department, is for the administration to send up a request for the transfer. They have not done so to date.

They have not identified any single account that they say there is more money in than they will need by the end of the year.

So what I am doing today is to call on them—we have a little time now that we are passing the veterans bill by itself, we will have a little time over the weekend here—and I am calling on the head of the OMB, the President and anybody else who is involved to send up to the Congress a specific identification of an account that has a surplus in it and propose the transfer of that surplus to other accounts as long as those accounts are in for the war on drugs.

If there is any such account, OMB is obligated to identify the account and the amount of money. Now if we are going to have an offset for the money that is in this bill, that is the way to get it. They can do that over the weekend.

Some say, I hear criticism around here that we are advancing some money in this bill from fiscal year 1990 requests up to fiscal year 1989. You cannot speed up the war on drugs unless you advance some money that would not have been available until next fall.

For example, in the area of prisons, we are advancing $105 million that would not have been available for obligation until next October. If they do not have that authority to obligate now instead of next October, they cannot start the process. They need that. They would only outlay $5 million in this fiscal year but they need the authority to go ahead and obligate and that would speed up by several months the building of some of those prisons.

The Bureau of Prisons needs $49.4 million to work on getting some facilities on some of these bases that have just recently been identified as surplus. They need that now rather than next fall. You cannot speed up the war on drugs unless you advance to this time some of the things they would have done next fall.

So when we are trying to find money to cover funds in one department and you want to offset those funds with unused funds in another department, the only way you can do it is for OMB to send up a proposal for a transfer.

Now as far as law enforcement is concerned, I have checked carefully with various agencies, with DEA, FBI, the Justice Department, the Marshals Service, the various agencies that are in law enforcement and they do not have a surplus. They are obligating funds in the usual and appropriate manner.

So we need more money in those law enforcement areas. The President came up here on Monday and said we need more money in those areas; and I agree with him on that. But what we need now is some cooperation from the administration to identify and support the amount of money that is needed at this time that will help us speed up the war on drugs, and if it can be offset from some other department, they need to identify those offsets. They can do that between now and next Monday.

Mr. CONTE. Mr. Speaker, I yield 3 minutes to the gentleman from New York [Mr. SOLOMON].

Mr. SOLOMON. I thank the gentleman for yielding this time.

Mr. Speaker, it is with a great sense of relief that I rise in support of this supplemental. I would first of all say to our good friend and good friend of the veterans, the gentleman from Michigan [Mr. TRAXLER] that in the budget for 1990 that was just passed, the gentleman from California [Mr. PANETTA] sitting over there and the gentleman from Minnesota [Mr. FRENZEL] sitting over here were good enough to help us add an additional $220 million to function 700 in the 1990 budget which is going to go a long way toward picking up those numbers of employees that our good friend Mr. TRAXLER was talking about.

Now also Mr. TRAXLER mentioned that we were going to have some fun later on when there was going to be a question of where this money was coming from. I think he was kind of intimidating us a little bit saying that we were going to be forced to take that money out of the national defense budget of this country. Let me remind Mr. TRAXLER that every single red-blooded American that I know who served in the Armed Forces of the United States of America and now has the right to call themselves veterans, their first priority is a strong national defense and the national defense budget of this country.

Having said all that, I want to take my hat off to the gentleman from Michigan [Mr. TRAXLER] and the gentleman from New York [Mr. GREEN], for the outstanding job that they have done and also to the gentleman from Mississippi [Mr. MONTGOMERY] and the gentleman from Arizona [Mr. STUMP] for working to get what we really need for the veterans.

I want to thank even the gentleman from Iowa [Mr. SMITH] and the gentleman from California [Mr. MILLER], for their understanding in stepping aside, putting their differences aside and letting this bill come before us.

I want to thank the gentleman from California [Mr. COELHO], the gentleman from Washington [Mr. FOLEY], and the Speaker of the House, and the gentleman from Massachusetts [Mr. CONTE], for getting this bill out here on the floor.

But I guess more than all I want to thank the majority chairman of the Committee on Appropriations, the gentleman from Mississippi [Mr. WHITTEN], for understanding and for putting these differences aside.

We will pass this bill today and we will come back to fight another day on other issues, and that shows a big man on the part of all these people involved. I commend you all for it. I hope you all have a nice weekend.

Mr. WHITTEN. Mr. Speaker, I yield 3 minutes to my friend and colleague, the gentleman from Mississippi [Mr. MONTGOMERY], chairman of the Committee on Veterans' Affairs.

Mr. MONTGOMERY. I certainly will be brief.

Let me thank my colleague, the gentleman from Mississippi [Mr. WHITTEN], for the job he has done in bringing this veterans legislation that we can vote on today, and I thank the gentleman from Massachusetts [Mr. CONTE], and the gentleman from Michigan [Mr. TRAXLER], and the gentleman from New York [Mr. GREEN], and especially to the leadership on this side of the aisle plus the leadership on the other side, and to the gentleman from Arizona, [Mr. STUMP], and others who have worked to get this legislation before us today.

Mr. Speaker, we are not crying wolf, trying to get this funding for our veterans programs. It is needed. I certainly want to commend all so that we could have this opportunity.

Mr. CONTE. Mr. Speaker, I yield 1 minute to the gentleman from Georgia [Mr. GINGRICH].

Mr. GINGRICH. I thank the gentleman.

Mr. Speaker, I just want to rise to praise the gentleman from Massachusetts. This has been a long process, these last 6 or 7 weeks, and the gentleman has hung in there, he has done yeoman's work again and again, he has been patient. He has counseled some of us who might have been less wise than he is. I think the fact that we are going to be able to send this bill to the other body this afternoon, that the veterans are going to get the help they want, that we will have a real chance that the other body will now act and pass this before Memorial Day, is in large part due to the gentleman from Massachusetts [Mr. CONTE]. I want to say "Thank you" on behalf of everybody who cares about veterans. The gentleman from Massachusetts really has made this possible.

Mr. CONTE. I thank the gentleman very much.

Mr. Speaker, I really appreciate those kind words.

Mr. Speaker, we have no further requests for time, and I yield back the balance of my time.

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I do not want the time to pass without my saying "Thank you" to the leadership—to the Speaker, JIM WRIGHT, to the majority leader, TOM FOLEY, to the majority whip, TONY COELHO—to my friends on the committee, to my friend the gentleman from Massachusetts [Mr. CONTE] and all the others, plus our

colleagues who have additional interests who worked today to make it possible to bring this veterans supplemental appropriations bill to the floor today.

We have had a whole lot of cooperation in order to bring this about, from everybody here, and from everybody who is interested in what we are doing.

I just want to say "Thank you" to all of them.

Mr. WHITTEN. Mr. Speaker, I yield 3 minutes to the gentleman from New York [Mr. MRAZEK].

Mr. MRAZEK. I thank the chairman for yielding.

Mr. Speaker, I simply wanted to say that I had the opportunity at the North Port Veterans' Administration Hospital earlier this week, on Monday, to have what might have been one of the largest field hearings in the United States with almost 1,000 veterans deeply concerned about the impact of budget cuts which totaled about 20 percent over the last 8 years and about $2.55 million specifically this year in additional cuts.

Horror stories from veterans in building 11 at the North Port Veterans' Administration Hospital complex, veterans of World War II, men who are incontinent and there are no custodial staff or nurses aides to assist them to take a shower; where registered nurses are providing showers but there are no linens to put them back into the bed; no socks, no rubber gloves for the nurses who tend to them.

We listened to stories of men who have cancer and who have to travel 3 hours to get to a linear accelerator in the Bronx in order to get radiation therapy.

Anyone who has had a loved one who needed radiation therapy is well aware of the difficulty that that continued therapy will have on their life and the idea of having to travel 3 hours in order to get it is simply unacceptable.

□ 1320

We are going to have to restore not only this money, in my view, but additional funds because really there is no villain here. There are dedicated staff people. There are dedicated administrators who want to do their best. The only villain is a lack of resources to get the job done. This is a good first down payment.

Mr. Speaker, I want to thank those who have helped to put it together.

Mr. HAMMERSCHMIDT. Mr. Speaker, I rise in strong support of the dire emergency supplemental as introduced by the Honorable SILVIO CONTE of Massachusetts. The resolution is urgently necessary to overcome a serious budget shortfall which has the Department of Veterans' Affairs in a state of medical emergency.

Unless the bill is passed by the Congress and signed into law, the Secretary of Veterans' Affairs, the Honorable Edward Derwinski, has advised us that substantial reductions in personnel will have to commence at veterans' health care facilities across the country.

As ranking minority member of the Subcommittee on Hospitals and Health Care, we have held many hearings documenting an already insufficient level of essential health care personnel. Nurses in particular are in short supply. Without this emergency supplemental, this level will drop even more sharply.

May 19, 1989, has been identified as the date on which without supplemental funding, the Department's capital accounts will be frozen. We simply cannot allow this to happen.

The resolution before us will add $340,125,000 to the medical care account. This amount will provide 1,539 average employment, increasing the annual employment level to 191,616 full time equivalent employments. In addition, an increase of 933,000 outpatient visits would be realized.

The Office of Management and Budget has already approved a supplemental for the Department of Veterans' Affairs. It has the full support of the administration.

I very strongly urge the support of my colleagues on this resolution. This action is vitally necessary to preserve the commitment of the Nation to provide quality health care to our Nation's veterans.

Mr. EDWARDS of Oklahoma. Mr. Speaker, I am concerned about the quality of veterans health care in Oklahoma, which could be seriously impaired if the additional funds contained in this bill are not approved.

Last year, Congress approved a medical care staffing level at VA hospitals of 194,720. However, as a result of underfunding, the Department of Veterans' Affairs is estimating that staffing levels will drop to 186,000—a loss of 8,720 full-time employees. To compensate, VA medical facilities across the country have been forced to reduce staff, terminate services, and postpone needed maintenance. In some facilities, inadequate equipment cannot be replaced and medical supplies are in short stock.

The cumulative impact of these actions on veterans' health care is devastating—with many veterans being denied treatment. The VA hospital in Oklahoma City, for example, which serves many of the veterans in my district, has been forced to close one of its wards because of a shortage of nurses. The lack of funds is also contributing to additional staffing needs for pharmacists, respiratory therapists, and ward coordinators. This situation is repeated in many other hospitals around the country.

The bill before us today includes $340,000 to cover the shortfall in health care services for veterans. This funding will permit the VA to increase employment to the 194,720 level by the end of the fiscal year. It will also provide additional funds for equipment and maintenance. Failure by Congress to approve these funds will almost certainly require the VA to undertake another round of cutbacks which would force hospitals to turn away even more veterans.

There is a growing concern among veterans that their benefits are gradually being eroded. Providing the funds necessary to maintain the level of health care services is the minimum required to fulfill the obligation we have to the men and women who have served our country.

Mr. MARLENEE. Mr. Speaker, I salute the courage of the leadership of the appropriations and the Rules Committees to bring a clean bill to the House floor dealing with a $1.2 billion supplemental appropriations for veterans' benefits, which includes $340.1 million for veterans' health care. This is an extremely urgent matter, with many veterans' hospitals across America on the verge of default by June. I am absolutely delighted that veterans' funding is not held hostage to other nonemergency spending like Japanese-American reparations.

Last March, President Bush requested a $2.1 billion supplemental appropriation to honor previous obligations mandated by law. The bulk of the President's request was targeted on veterans' benefits, adequate funding for the guaranteed student loan program, and payments to States for foster care and adoption assistance.

The big spenders then added all sorts of other unnecessary Federal spending to see how much the President will tolerate in lard and pork. Every member in this body has talked about the need to control the Federal deficit. Yet, the original supplemental proposed by the Democrats in this House was double the President's request. The Democrats ballooned the administration's supplemental request to $4.7 billion.

I was angry. If that bill passed the House, it would have been good for another point or two increase in interest rates. It would have showed that we couldn't control our own voracious appetite for spending thus creating the climate for raising interest rates for another point or two. Simply put, Mr. Speaker, that bill was destabilizing for our economic future.

Yesterday, the Democrat leadership attempted to sneak another budgetbusting supplemental bill under our noses. The bill was pared down by $1 billion over the first request but it was rumored to contain some nonemergency spending, like $250 million for Japanese-American reparations. I personally find it objectionable to debate issues on the House floor with no knowledge of what is in the bill. Fortunately, many Republicans objected.

Now, we finally have an oppportunity to debate a real emergency supplemental that will resolve the funding crisis at the Veterans' Administration. After weeks of cantankerous debate and bruised egos, we can finally pass a pure $1.2 billion VA supplemental bill. I add my unequivocal strong voice of support for H.R. 2402. For all the veterans across Montana, I thank God that we've finally seen the resolution of this issue. I ask my colleagues to join me to make sure that this never happens again by supporting adequate, stable funding for the VA in future budgets.

Mr. LAGOMARSINO. Mr. Speaker, as one of the cosponsors of H.R. 2402, the emergency supplemental appropriations addressing the critical needs of our veterans, I rise in strong support of the measure and urge its swift passage.

Like many of my colleagues, I recognize the extremely serious funding requirements of the

new Department of Veterans' Affairs to ensure that adequate medical care and mandatory benefits are available to America's veterans. We must not forget that these brave Americans answered our Nation's call during its most pressing times of need. Now, in their hour of need the Nation must return the call.

Already, the Veterans' Department has been forced to reduce the medical sevices to eligible veterans because of inadequate funds. This must be reversed. We must uphold our commitments to other veterans, who made great sacrifices and still bear the scars of their service today. Mr. Speaker, H.R. 2402 accomplishes these goals.

I am very encouraged that H.R. 2402, introduced just yesterday by the distinguished vice chairman and ranking Republican member of the Appropriations Committee, Mr. CONTE, has been expeditously considered and brought before the full House for a vote. In contrast with the other recent supplemental appropriations bills, this one focuses on what is truly a dire emergency—funding veterans health care. While I recongize that there are other important programs in need of supplemental funding, these programs' needs not as time-sensitive and we can carefully consider them after passing H.R. 2402. Because some of these other proposals are more controversial than others, I am further encouraged that the majority in the committee and in the House have agreed with Mr. CONTE, me and others, to address them separately. It's about time we stopped holding veterans medical care hostage to partisan positioning on other budget and funding issues.

I strongly support this vital measure and urge my colleagues to join me in voting for H.R. 2402.

Mr. BRENNAN. Mr. Speaker, today I urge my colleagues to support the VA emergency supplemental appropriation measure to provide $340 million to the health care account of the VA. This is an important step toward restoring the highest level of service at our VA medical centers across the country.

The funding made available today will reopen surgical and psychiatric wards, reopen drug and alcohol abuse treatment facilities, and restore medical services to veterans who have been denied care because their ailments are described as "not sufficiently serious". Perhaps its most important purpose is that it will begin to restore the peace of mind that veterans used to enjoy by knowing that the sacrifices they made are remembered and appreciated by their Government.

However, while this is an important step, it is by no means the only step we have to take concerning VA hospitals. Earlier this session I introduced H.R. 1382 to provide $432 million in supplemental funds for the health care account of the VA. I believe that this figure more accurately reflects the level of the funding shortage. After this fiscal year, estimates on the budget shortfall exceed $1 billion. While we can be pleased with our actions today, our work has truly just begun.

Our veterans deserve the best medical care we can provide. While the quality of the personnel at our VA hospitals is second to none, they need more funds to adequately serve our veterans. I urge all my colleagues to work with me to adequately fund VA hospitals in future years.

Mr. SMITH of New Jersey. Mr. Speaker, I am very relieved that the House today voted to approve $340 million for fiscal year 1989 veterans health care services. As Secretary of the Department of Veterans' Affairs, Edward Derwinski, pointed out, VA hospitals are in dire need of additional funding to deliver medical care to veterans.

Without the money provided by this supplemental measure, the VA would have been forced to freeze capital accounts in spite of the increased need for updated medical equipment. Activation of almost 100 projects to provide veterans with health care services would not be possible, and at least 200 FTEE would be eliminated from VA health care facilities each pay period.

These additional cutbacks would paralyze the VA and its ability to serve the needs of our veteran population. The services affected by these cutbacks are benefits that our veteran population have earned, services that our country has pledged to deliver.

The quality of health care services we provide for our Nation's veterans has been questioned more and more frequently over the past few months. The VA has already been turning away service-connected veterans because of insufficient personnel to deliver care and we simply cannot afford to further cut back services. It is only fitting that we move quickly to provide the VA with these needed resources.

Mr. Speaker, I strongly support this supplemental measure and commend my colleagues for approving the bill.

GENERAL LEAVE

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill (H.R. 2402) making supplemental appropriations for the Department of Veterans' Affairs for the fiscal year ending September 30, 1989, and for other purposes, and that I be permitted to include tabular and extraneous material.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi.

There was no objection.

The SPEAKER pro tempore. (Mr. NEAL of North Carolina) without objection. The previous question is ordered.

There was no objection.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CONDITIONAL ADJOURNMENT OF RECESS OF THE SENATE FROM THURSDAY, MAY 18, 1989 OR FRIDAY, MAY 19, 1989, TO WEDNESDAY, MAY 31, 1989 AND CONDITIONAL ADJOURNMENT OF THE HOUSE FROM THURSDAY, MAY 25, 1989 TO WEDNESDAY, MAY 31, 1989

Mr. FOLEY. Mr. Speaker, I call up from the Speaker's table a privileged Senate concurrent resolution (S. Con. Res. 38) and ask for its immediate consideration.

The Clerk read the Senate concurrent resolution, as follows:

H. CON. RES. 38

Resolved by the Senate (the House of Representatives concurring), That when the Senate recesses or adjourns at the close of business on Thursday, May 18, 1989, or Friday, May 19, 1989, pursuant to a motion made by the Majority Leader, or his designee, in accordance with this resolution, it stand recessed or adjourned until 2:15 post meridiem on Wednesay, May 31, 1989, or until 12 o'clock meridian on the second day after Members were notified to reassemble pursuant to section 2 of this resolution, whichever occurs first; and that when the House adjourns on Thursday, May 25, 1989, it stand adjourned until 12:00 o'clock meridian on Wednesay, May 31, 1989, or until 12 o'clock meridian on the second day after Members are notified to reassemble pursuant to section 2 of this resolution, whichever occurs first.

SEC. 2. The Majority Leader of the Senate and the Speaker of the House, acting jointly after consultation with the Minority Leader of the Senate and the Minority Leader of the House, shall notify the Members of the Senate and the House, respectively, to reassemble, whenever, in their opinion, the public interest shall warrant it.

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

LEGISLATIVE PROGRAM

(Mr. GINGRICH asked and was given permission to address the House for 1 minute.)

Mr. GINGRICH. Mr. Speaker, I ask the majority leader to share with Members the schedule for next week, and I yield to the gentleman from Washington.

Mr. FOLEY. Mr. Speaker, I thank the distinguished Republican whip for yielding. We have considered the business for the day and for the week. The House will not be in session tomorrow. The House will meet at noon on Monday, May 22, but there is no legislative business scheduled. On Tuesday, May 23, the House will meet at noon and consider six bills under suspension of the rules, recorded votes on suspensions, H.R. 932, the Puyallup Tribe of Indians Settlement Act of 1989; H.R. 1414, to provide for the appointment of enlisted members of the Armed Forces to the American Battle Monuments Commission; H.R. 498, to clarify

and strengthen the authority for certain Department of the Interior law enforcement services, activities, and officers in Indian country; H.R. 881, Coquill Restoration Act; H.R. 2344, to authorize the transfer to the Republic of the Philippines of two excess naval vessels; House Concurrent Resolution 121, to express the sense of the Congress with respect to the assassination of Col. James Rowe in the Philippines.

On Wednesday, May 24, and Thursday, May 25, the House will meet at 11 a.m. on Wednesday and 10 a.m. on Thursday and consider H.R. 2072, dire emergency supplemental appropriations for fiscal 1989, subject to a rule; unnumbered H.R., to transfer funds for antidrug initiatives, subject to a rule; and unnumbered H.R., to amend the Mineral Leasing Act relating to oil shale claims, subject to a rule.

On Friday, May 26, the House will not be in session during the Memorial Day district work period. At the close of the week's business, the House will adjourn until 12 noon on Wednesday, May 31. Conference reports may be brought up at any time in the further program.

Mr. GINGRICH. I wonder if I might ask the distinguished majority leader a couple of questions. First I note the absence of the FSX issue, and I wonder if that might be on the calendar for next week.

Mr. FOLEY. I am happy the gentleman mentioned that. That may well be on the calendar for next week. We have not a clear designation yet with respect to that, and any action that might be taken by the Committee on Foreign Affairs, but that is absolutely correct, and we may have a vote on FSX.

Mr. GINGRICH. Just for the purpose of those colleagues who were not part of our earlier discussion, when the dire emergency supplemental comes up, since it will not have the veterans' money, could the majority leader just explain for a moment what will be in that bill in the context of that rule in that vote?

Mr. FOLEY. We anticipate there will be one rule which will encompass both that bill and the bill involving the transfer of funds for drug-fighting purposes for two separate bills. The first bill, H.R. 2072, will most likely be the text of the unanimous-consent request offered by the distinguished chairman of the Committee on Appropriations yesterday. It will include such things as funds for refugee programs, for the provision for forest fire fighting. There will be funds for guaranteed student loans, Federal employment benefits and trade adjustment assistance, international peace keeping, Jewish refugee assistance and some funds for the homeless and funds for drug enforcement.

Mr. GINGRICH. Let me just say, first of all, I very much appreciate this week having worked with the majority leadership and having gotten the veterans' supplemental through today. I think it was an important step.

I would note that because of the unusual nature of next week's rule and the two initiatives that are being offered on the dire emergency supplemental and the proposal to transfer funds for antidrug initiatives which, as I understand it, represents a bill which has not yet been written or introduced, House Resolution blank at this stage, I would just say to my colleagues on the Democratic side there may well be one or two initiatives that come to the Rules Committee at the same time in an effort to find equal opportunity, and I might say for floor action on ideas during the week.

Mr. FOLEY. I thank the gentleman for that information.

Mr. GINGRICH. I thank the leader and look forward to seeing him next week.

ADJOURNMENT TO MONDAY, MAY 22, 1989

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at noon on Monday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. FOLEY. Mr. Speaker, I ask unanimous consent the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

HOUR OF MEETING ON WEDNESDAY NEXT

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that when the House adjourns on Tuesday, May 23, 1989, it adjourn to meet at 11 a.m. on Wednesday, May 24, 1989.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

□ 1330

THE USE OF SNIFFER DOGS AT AIRPORTS—AN UPDATE ON AIDS

The SPEAKER pro tempore (Mr. NEAL). Under a previous order of the House, the gentleman from Indiana [Mr. BURTON] is recognized for 60 minutes.

Mr. BURTON of Indiana. Mr. Speaker, I have two issues that I would like to touch on briefly today. I will not take the entire 60 minutes so that those who are still in the Chamber can get out of here and get to their homes or wherever they have to go.

First of all, we have a real problem with the possibility that a terrorist might get on a U.S. aircraft at one of our international airports and blow it up. We have had occasions where this has occurred at foreign airports, but we have not yet experienced it here in the United States.

In order to ward off this possibility, I and a number of other Members of Congress have suggested that some measures be taken by the Federal Aviation Administration to make sure that this does not happen. One inexpensive way to head off this eventuality is to train sniffer dogs that have the ability to detect Semtex and other plastic explosives before they get on an aircraft. They use these sniffer dogs at many of our State Department offices around the world, and they use them behind the scenes to check luggage at many of our airports, but they do not use them at the gates that passengers go through to get on an aircraft. In my view, we ought to train teams of trainers and sniffer dogs and policemen to be at these aircraft entranceways to check hand-carried-on luggage that goes on the aircraft and that, therefore, is not subject to scrutiny behind the scenes.

The FAA has come to my office and talked to me, and they have talked to the gentleman from Minnesota [Mr. OBERSTAR] and others and have said that they believe this would cause some problems for them in that the dogs might scare passengers, and there is a possibility that the dogs might bite passengers. And they point out that the dogs can only be used for a specified period of time before they are worn out and then have to rest before they go back through another cycle.

Now, my answers to their criticisms are as follows: First of all, we could put muzzles on dogs that are loose-fitting enough so they can still use their tongues and their sniffing devices so they could detect these plastic explosives. So that argument does not hold water. The second thing I would say to them is that people see dogs all the time. They see the seeing-eye dogs, they see dogs in yards and on the streets, and people are used to that. And if they know that it is for their own safety that these dogs are going to be at the airports, in my view they will not object to them.

The third thing is that the dogs do have a limited period of time that they can detect these plastic explosives, maybe 30 to 45 minutes. But their

being there, just being on the premises would be a deterrent as far as allowing these terrorists to get on planes with plastic explosives. If you were a terrorist and you were going through a metal-detecting device on a plane and you saw that dog there, I think you would be very discouraged. You would be very concerned that you would be detected and you might be arrested and go to jail immediately. So I think the deterrent effect of having these sniffer dogs at airports is very, very important, and I criticize very strongly the Federal Aviation Administration for trying to stop the training and the utilization of these sniffer dogs at our airports.

Sometime in the future some terrorist is going to get on a plane and blow it up here in the United States. We can avoid that to a large degree, I believe, by using sniffer dogs and other technologies. There are new technologies coming on board which would detect a plastic explosive device that one would walk through, like a metal-detecting device, but those are 2 to 3 years away, and in the interim period we have no protection. That is why these sniffer dogs are so vitally important to the security of the air-traveling public, and every Member of this body and the other body ought to be concerned that there is no way to detect plastic explosives right now in hand-carried-on luggage.

That is why these sniffer dogs are so important, and I urge my colleagues to contact the FAA and ask them to drop their opposition to the training of sniffer dogs for this purpose.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. BURTON of Indiana. I am happy to yield to my colleague, the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I think the gentleman has raised a very important question on the floor. Obviously, the American public is looking at us to be very, very vigilant with regard to terrorist activities and plastic explosives.

The gentleman, I think, makes a good interim suggestion until we do have appropriate technology to take care of this problem. I want to thank the gentleman for his statement here on the floor.

Mr. BURTON of Indiana. Mr. Speaker, I thank the gentleman for his contribution.

I would just like to say also that these dogs would be a good adjunct to the new technology once it comes on line in 3 or 4 years. But in the short run I think it is a real deterrent to those terrorists or would-be terrorists who might want to get a plastic explosive device on an American airline.

Mr. Speaker, the other thing I want to talk about very briefly is the AIDS pandemic, a subject that has not been addressed by this body for some time. The people of this country have not really been as aware of what is going on as far as the AIDS epidemic is concerned as I think they should be, so I am going to give the Members some figures today that came straight from the Center for Disease Control so the American people and my colleagues will know what is going on vis-a-vis the AIDS epidemic.

In 1983 we had 4,200 cases of AIDS, people dead or dying of AIDS. One year later that figure had doubled to over 9,900; 1 year later it had more than doubled again to 20,000, and then 2 years later it went from 20,000 in 1985 to almost 50,000 in 1987. And now, from 1987 through the end of 1989, the projection is that there will be 122,000 dead or dying from the AIDS pandemic. So the figure is more than doubling every 2 years right now.

Now, if we would extrapolate this out to the year 1999, we would reach some startling figures. By the end of 1991, if this trend continues, we would have 250,000 people dead or dying, 250,000 up to 280,000. If the percentages continue as they have for the past 7 years, by 1993 we will have between 500,000 and 650,000 people dead or dying. By 1995 we will have a minimum of over 1 million dead or dying, up to 1.5 million. By 1997 that figure could be between 2 million and 3.5 million, and by 1999, 10 years from now, we could have 4 million to 8 million people dead or dying of AIDS in this country. And that does not include the number of people who are infected and walking around carrying the virus and who are able to communicate it to other human beings in this country.

The Center for Disease Control said 4 years ago that we had 1.5 million people infected and it was doubling every 1½ years. Based upon their projections back then, we would have somewhere between 6 million and 12 million people carrying the disease today, but they still maintain that we only have 1.5 million infections. I do not know how they are coming up with that figure. They must be pulling it out of the sky. But the fact of the matter is that we must have more than 1.5 million if they said they had that many 4 years ago.

Why is this a big cause of concern? Well, obviously because we have loved ones we are concerned about. We are concerned about our children who are sexually active. We need to be concerned about them. A study that was conducted last September by the Center for Disease Control showed that 800,000 young men between the ages of 18 and 44 had 10 or more sexual partners in a year. We have heard on television and through reports that the way to stop the AIDS pandemic is through education. We have been educating people on television with pretty explicit commercials for some time now, and yet the study shows that 800,000 young men in this country had 10 or more sexual partners last year, and they are doing it each and every year. This means that the AIDS epidemic is continuing to spread in a very rapid way, but we do not know how far it has gone or what the extent of it is.

How are we going to find out? I have been advocating now for 4 years that we have a uniform testing program across this country. We do not want to violate people's civil rights, we want to make sure that people keep their jobs and their health insurance and everything else, and we want to make sure there is not discrimination, but the only way to get a handle on this epidemic is to know who has it, how it is being transmitted, who is spreading it, and where it is spreading most rapidly, and if there are any other ways it is being spread other than conventional ways, we need to find out about that as well. The only way to find that out is through a routine testing program.

We in this country, at the Center for Disease Control and at Health and Human Services, are walking around with our heads in a sack, and the epidemic continues to increase.

□ 1340

Mr. Speaker, I have a daughter who is 16, a daughter who is 25, and a boy who is 14, and I talk to them about the risk of AIDS all the time. Hopefully the education and information I am giving them is going to help, but we have millions and millions of young people in this country who are going on their merry way not realizing the dangers that face them, and the epidemic is spreading, and it is going to spread in an exponential manner unless we do something about it, and that is why a mandatory testing program is absolutely essential.

Mr. Speaker, people say, "Well, we can't do that. We haven't done it before."

We have done it before, Mr. Speaker. When I was in grade school, everybody was tested for tuberculosis. We had the Wassermann test for syphilis. We have had a lot of tests in the past for diseases that threatened the population of this country, and there has never been a disease that threatens this continent, this country, like the AIDS pandemic.

Millions of people are going to die, and millions more are going to be carrying this disease and spreading it unless we do something about it in a very, very quick timeframe.

If my figures are accurate; that is, that we have around 5 to 6 million infected right now, then this disease is pretty much out of control. The incubation period for AIDS at first was thought to be 1 year, then 2 years, then 3 years. Now most scientists

agree that the incubation period, that period that a person can carry the disease and not even know they have it, runs from 7 to as high as 20 years or more. That means a person that looks perfectly normal, healthy, has no manifestation of the disease and can communicate it to another human being for up to 20 years. They can be a walking epidemic.

Mr. Speaker, the one thing about testing is, once we find out if a person has the disease, we can tell them, "You have the disease. You can no longer have sexual contact with people outside the AIDS community because you will be in effect killing them if you do that. It will be as bad as shooting them with a gun."

Then, Mr. Speaker, we would have to have a mechanism to enforce that, so, therefore, we need an entire program to deal with the AIDS pandemic, but the first and most important thing that we have to do is have a testing program.

I have talked to a lot of my colleagues in the past, and nobody seems to listen in this place. Nobody seems to listen in this place about the AIDS pandemic and the spread of it, but listen to these figures one more time because this is not baloney.

We have gone from 4,200 cases in 1983, to 9,900 in 1984, to 20,000 in 1985, to 50,000 in 1987, to 122,000 at the end of this year. That means we are going to have a quarter of a million, at least, in 1991, a half a million in 1993, and a million in 1995 minimum, and it will probably be more like a million and a half. In 1997 we will have 2½ to 3½ million. In 1999 we will have between 4 and 8 million people dying in this country, and we are fiddling while Rome burns.

Mr. Speaker, we need to protect people's civil rights; I agree with that, but I say to my colleagues that the most important and overriding issue is the health of this Nation, and until we start a testing program this disease is going to continue to spread, and it is going to wipe out a lot of people in this country.

I want to tell my colleagues one more thing before I close, and that is that in the 14th century, 1347 to 1350, 25 to 50 million people in Europe were wiped out by the bubonic plague. Now it can happen. It has happened before in history, and it will happen again unless we get a handle on this.

Mr. Speaker, I urge my colleagues to think long and hard about a mandatory testing program along with a complete program to deal with this crisis because every day we wait more people are condemned to dying.

NATIONAL LITERACY DAY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey [Mr. PAYNE] is recognized for 5 minutes.

Mr. PAYNE of New Jersey. Mr. Speaker, I am pleased to be able to introduce a resolution to designate July 2, 1989, as National Literacy Day. For the past 3 years Mr. FLORIO had introduced this resolution and many of my colleagues joined in as cosponsors. The resolution was eventually enacted and Congress was able to bring attention to the plight of more than 27 million Americans who lack the basic skills necessary to function in today's ever changing, technological society.

Today more than 27 million adults cannot complete a job application, read a newspaper, comprehend a bus or train schedule or understand a warning label on a bottle of medicine. The Department of Education estimates that more than 2.3 million more illiterates including high school dropouts, unlettered pass-along graduates and some immigrants, are added to that list every year.

However, the problem has not been confined to those groups of dropouts or disadvantaged minority group members, although they represent the highest number. Increasingly, we are discovering that working members of mainstream American society are either totally illiterate or unable to read at the level presumably required by their job or of their position in society.

Our Nation's competitiveness is being eroded by the presence of millions of Americans who are functionally illiterate. The product of these deficiencies is being acutely displayed in the work place by citizens who cannot comprehend simple manuals or operate equipment. Consequently, the total cost of the errors, accidents, and missed opportunities in business now exceeds $225 billion annually.

In 1964, John Kenneth Galbraith wrote that:

> People are the common denominator of progress. So * * * no improvement is possible with unimproved people, and advance is certain when people are liberated and educated. It would be wrong to dismiss the importance of roads, railroads, power plants, mills and other familiar furniture of economic development * * * but we are coming to realize * * * that there is a certain sterility in economic monuments that stand alone in sea of illiteracy. Conquest of illiteracy comes first.

This statement is no less truer today than in the 1960's.

Equally important, however, is the societal cost. The lack of reading, writing, and mathematical skills leads to resignation, despair, and, in some cases, contributes to crime, alcohol and drug abuse, unemployment, and economic dependence. More specifically, the cost includes welfare expenditures for the children of adults who lack the skills necessary to obtain gainful employment, necessary law enforcement to slow the growing underground econ- omy generated by the individuals who cannot compete on the open job market, and consequently, the cost includes the maintenance of prisons that are the eventual end for those persons. It is a cost that is too high to pay.

Essentially, Mr. Speaker, illiteracy has become a social tax. It is a tax that, while falling directly on the backs of the millions of illiterate individuals, has, in turn, exacted the very strength of our Nation.

I would, therefore, urge my colleagues to join me in recognizing the need to eradicate the scourge of illiteracy by cosponsoring this resolution. Because as a man wiser than myself once said, "It is the fate of this country that depends upon the education of its people."

GENERAL LEAVE

Mr. PAYNE of New Jersey. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore (Mr. NEAL of North Carolina). Is there objection to the request of the gentleman from New Jersey?

There was no objection.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. STANGELAND (at the request of Mr. MICHEL), for today, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. SMITH of Mississippi) to revise and extend their remarks and include extraneous material:)

Mr. WALKER, for 60 minutes, today.

Mr. SOLOMON, for 60 minutes, today.

Mr. MCEWEN, for 60 minutes, today.

(The following Member (at the request of Mr. BURTON of Indiana) to revise and extend their remarks and include extraneous material:)

Mr. BURTON of Indiana, for 60 minutes, today.

(The following Member (at the request of Mr. KLECZKA to revise and extend their remarks and include extraneous material:)

Mr. MILLER of California, for 5 minutes, today.

Mr. WISE, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. SKELTON, for 30 minutes, on May 24.

Mr. SKELTON, for 30 minutes, on May 25.

Mr. ASPIN, for 5 minutes, today.

(The following Members (at the request of Mr. SMITH of Iowa) to revise and extend their remarks and include extraneous material:)

Mr. FASCELL, for 5 minutes, today.

Mr. LAFALCE, for 10 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. BEREUTER and to include extraneous material notwithstanding the fact that it exceeds 2 pages of the RECORD and it is estimated by the Public Printer to cost $1,694.

(The following Members (at the request of Mr. SMITH of Mississippi) and to include extraneous matter:)

Mr. CAMPBELL.

Mr. CRANE.

Mr. SPENCE.

Mr. FIELDS.

Mr. BARTON of Texas.

Mr. KOLBE.

Mrs. MARTIN of Illinois.

Mr. SHUSTER.

Mr. SMITH of Mississippi.

(The following Members (at the request of Mr. BURTON of Indiana) and to include extraneous matter:)

Mr. SMITH of New Jersey.

Ms. SCHNEIDER.

Mr. SMITH of New Hampshire.

Mr. SHUMWAY.

Mr. RITTER.

Mr. HANSEN.

Mr. LENT.

Mr. DAVIS.

Mr. BURTON of Indiana.

Mr. BUECHNER.

(The following Members (at the request of Mr. KLECZKA) and to include extraneous matter:)

Mr. DYMALLY.

Mr. FASCELL in two instances.

Mr. MONTGOMERY.

Mr. LANTOS.

Mr. SKELTON.

Mr. LEVIN of Michigan.

Mr. ASPIN.

Mr. MARKEY.

JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, a Joint Resolution of the House of the following title:

H.J. Res. 170. Joint resolution designating May 1989, as "National Digestive Disease Awareness Month."

ADJOURNMENT

Mr. COELHO. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 49 minutes p.m.), under its previous order the House adjourned until Monday, May 22, 1989, at 12 noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1225. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the volunteers in the National Forests Act of 1972 to permit volunteers to be considered employees under 31 U.S.C. 3721; to the Committee on Agriculture.

1226. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the Housing Act of 1949 to extend through fiscal year 1992 appropriation authorizations for certain housing assistance programs conducted by the Secretary of Agriculture under title V of the Housing Act of 1949, pursuant to 31 U.S.C. 1110; to the Committee on Banking, Finance and Urban Affairs.

1227. A letter from the Director, Office of Management and Budget, transmitting the annual report of activities under the Freedom of Information Act during calendar year 1988, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

1228. A letter from the Deputy General Counsel, Department of Defense, transmitting a draft of proposed legislation to modify the tax treatment of gain on sales of residences by certain members of the Armed Forces; to the Committee on Ways and Means.

1229. A letter from the General Counsel, Department of the Treasury, transmitting a draft of proposed legislation to authorize appropriations for the Department of the Treasury for unforeseen emergencies of a confidential nature, pursuant to 31 U.S.C. 1110; jointly, to the Committee on Banking, Finance and Urban Affairs and Ways and Means.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 932. A bill to provide for the settlement of land claims of the Puyallup Tribe of Indians in the State of Washington, and for other purposes; with amendments (Rept. 101-57). Referred to the Committee of the Whole House on the State of the Union.

Mr. MONTGOMERY: Committee on Veterans' Affairs. H.R. 1414. A bill to provide for the appointment of enlisted members of the Armed Forces to the Americans Battle Monuments Commission; with amendments (Rept. 101-58). Referred to the Committee of the Whole House on the State of the Union.

REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

Mr. ANDERSON: Committee on Public Works and Transportation. H.R. 1659. A bill to improve aviation security by requiring the installation and use of certain explosive detection equipment at certain airports located outside the United States and by providing assistance for the acquisition of such equipment, and for other purposes; with an amendment, referred to the Committee on Foreign Affairs for a period ending not later than May 31, 1989, for consideration of title II of the amendment recommended by the Committee on Public Works and Transportation pursuant to clause 1(i), Rule X (Rept. 101-59, Pt. 1). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. STAGGERS:

H.R. 2401. A bill to amend title 38, United States Code, to authorize certain uses of funds collected by the Department of Veterans' Affairs as third-party reimbursements for the value of hospital care or medical service furnished to veterans; to the Committee on Veterans' Affairs.

By Mr. WHITTEN:

H.R. 2402. A bill making supplemental appropriations for the Department of Veterans' Affairs for the fiscal year ending September 30, 1989, and for other purposes; considered and passed.

By Mr. WYDEN (for himself, Mr. FASCELL, Mr. TAUKE, Mr. MARKEY, Mr. ACKERMAN, Mr. AKAKA, Mr. ATKINS, Mr. AUCOIN, Mr. BATES, Mr. BERMAN, Mr. BOEHLERT, Mr. BOSCO, Mrs. BOXER, Mr. BROWN of California, Mr. BRYANT, Mr. BUSTAMANTE, Mr. CAMPBELL of California, Mr. CLARKE, Mr. COELHO, Mr. CONYERS, Mr. CROCKETT, Mr. DEFAZIO, Mr. DELLUMS, Mr. DOWNEY, Mr. DYMALLY, Mr. EDWARDS of California, Mr. ENGEL, Mr. EVANS, Mr. FAUNTROY, Mr. FLORIO, Mr. FEIGHAN, Mr. FOGLIETTA, Mr. FRANK, Mr. GEJDENSON, Mr. GONZALEZ, Mr. GUARINI, Mr. GREEN, Mr. HALL of Ohio, Mr. HAMILTON, Mr. HAWKINS, Mr. HAYES of Illinois, Mr. HOCHBRUECKNER, Mr. HUGHES, Mr. KASTENMEIER, Mr. KENNEDY, Mrs. KENNELLY, Mr. KILDEE, Mr. KOSTMAYER, Mr. LEHMAN of California, Mr. LEHMAN of Florida, Mr. LEVINE of California, Mr. LIPINSKI, Mr. MCCLOSKEY, Mr. MCDERMOTT, Mr. MCHUGH, Mr. MATSUI, Mr. MAVROULES, Mr. MFUME, Mr. MINETA, Mr. MOAKLEY, Mr. MOODY, Mrs. MORELLA, Mr. MORRISON of Connecticut, Mr. MRAZEK, Mr. NEAL of North Carolina, Mr. OBEY, Mr. OWENS of New York, Mr. PANETTA, Mr. PARKER, Ms. PELOSI, Mr. PENNY, Mr. RANGEL, Mrs. ROUKEMA, Mr. ROYBAL, Ms. SCHNEIDER, Mrs. SCHROEDER, Mr. SHARP, Mr. SKAGGS, Mr. SMITH of Florida, Mr. SOLARZ, Mr. STARK, Mr. STOKES, Mr. STUDDS, Mr. TORRES, Mr.

TOWNS, Mr. UDALL, Mrs. UNSOELD, Mr. WILLIAMS, and Mr. WOLPE):

H.R. 2403. A bill to encourage negotiations between the United States and the Soviet Union to establish mutual and verifiable restrictions on the production of plutonium and highly enriched uranium for nuclear weapons purposes; jointly, to the Committees on Foreign Affairs and Armed Services.

By Mr. BEREUTER:

H.R. 2404. A bill to authorize the Secretary of Transportation to carry out a highway bridge demonstration project to improve the flow of traffic between the States of Nebraska and South Dakota; to the Committee on Public Works and Transportation.

By Mr. BOSCO (for himself, Mr. RINALDO, Mr. MRAZEK, Mr. ROE, Mr. ANNUNZIO, Mr. GILMAN, Mr. JACOBS, Mr. GUARINI, Mrs. BOXER, Mr. ACKERMAN, Ms. SNOWE, Mr. STARK, Mr. LIPINSKI, Mr. CONYERS, Mr. SOLARZ, Ms. SCHNEIDER, Mr. HAYES of Illinois, Mr. RICHARDSON, Mr. TORRES, Mr. DEFAZIO, Mr. COURTER, Mrs. ROUKEMA, Mrs. SCHROEDER, Mr. SAXTON, Mr. ROYBAL, Mr. TORRICELLI, Mr. BATES, Mr. MATSUI, Mr. FOGLIETTA, Mr. MFUME, Ms. PELOSI, Mr. LELAND, Ms. OAKAR, Mr. FAUNTROY, Mrs. COLLINS, Mr. DE LUGO, Ms. KAPTUR, Mr. SMITH of Florida, Mr. WEISS, Mr. EVANS, Mr. MARKEY, Mr. TRAFICANT, Mr. DELLUMS, Mr. MURPHY, Mr. GARCIA, Mr. KOLTER, Mr. HAWKINS, Mr. CROCKETT, Mr. BUSTAMANTE, Mr. STOKES, Mr. LANTOS, Mr. GEJDENSON, and Mr. KASTENMEIER):

H.R. 2405. A bill to prohibit the implementation of certain regulations of the Secretary of Health and Human Services and the Secretary of Agriculture respecting irradiated foods, to amend the Federal Food, Drug, and Cosmetic Act to prescribe labels for irradiated food, and for other purposes; to the Committee on Energy and Commerce.

By Mr. BRYANT (for himself, Mr. MINETA, Mr. QUILLEN, Mr. BENNETT, Mr. DONNELLY, and Mrs. PATTERSON):

H.R. 2406. A bill to amend the Forest and Rangeland Renewable Resources Planning Act of 1974 to stengthen the restraints upon clearcutting and certain other cutting practices in the National Forests of the United States; to the Committee on Agriculture.

By Mr. CAMPBELL of California (for himself and Mr. Dymally):

H.R. 2407. A bill to provide for the naturalization of natives of the Philippines through active-duty service in the Armed Forces of the United States during World War II; to the Committee on the Judiciary.

By Mr. COLEMAN of Missouri (for himself, Mr. MARLENEE, Mr. EMERSON, Mr. GRANT, Mr. ROBERTS, Mr. WEBER, Mr. HOUGHTON, Mrs. SMITH of Nebraska, Mr. COMBEST, Mr. WHITTAKER, Mr. SKELTON, Mr. ROBINSON, Mr. SCHUETTE, Mr. MORRISON of Washington, Mr. BEREUTER, Mr. CHAPMAN, Mr. VOLKMER, and Mr. GRANDY):

H.R. 2408. A bill to transfer certain programs within the Department of Agriculture to a newly established Rural Development Administration, and for other purposes; to the Committee on Agriculture.

By Mr. COLEMAN of Missouri (for himself, Mr. MARLENEE, Mr. EMERSON, Mr. GRANT, Mr. ROBERTS, Mr. WEBER, Mr. HOUGHTON, Mrs. SMITH of Nebraska, Mr. COMBEST, Mr. WHITTAKER, Mr. SKELTON, Mr. ROBINSON, Mr. SCHUETTE, Mr. MORRISON of Washington, Mr. CHAPMAN, Mr. VOLKMER, and Mr. GRANDY):

H.R. 2409. A bill to establish an emergency community water assistance grant program for eligible communities adversely affected by the droughts of 1988 and 1989; to the Committee on Agriculture.

By Mr. PURSELL:

H.R. 2410. A bill to amend the Public Health Service Act to provide for the establishment of an Advisory Committee on the Development and Maintenance of Nursing Resources; to the Committee on Energy and Commerce.

By Mr. COLEMAN of Missouri (for himself, Mr. MARLENEE, Mr. EMERSON, Mr. GRANT, Mr. ROBERTS, Mr. WEBER, Mr. HOUGHTON, Mrs. SMITH of Nebraska, Mr. COMBEST, Mr. WHITTAKER, Mr. SKELTON, Mr. ROBINSON, Mr. SCHUETTE, Mr. MORRISON of Washington, Mr. BEREUTER, Mr. CHAPMAN, Mr. VOLKMER, and Mr. GRANDY):

H.R. 2411. A bill to establish new loan rates applicable for loans made for health care and related facilities under section 307(a)(3) of the Consolidated Farm and Rural Development Act; to the Committee on Agriculture.

H.R. 2412. A bill to authorize the Secretary of Agriculture to establish and maintain a central receiving facility at the Department of Agriculture for the storage and retrieval of data relating to Federal rural development programs; to the Committee on Agriculture.

H.R. 2413. A bill to amend the Office of Federal Procurement Policy Act to provide for procurement set-aside targets for rural areas; to the Committee on Government Operations.

By Mr. DARDEN (for himself, Mr. BARNARD, Mr. HATCHER, Mr. JENKINS, Mr. JONES of Georgia, Mr. LEWIS of Georgia, Mr. RAY, Mr. ROWLAND of Georgia, and Mr. THOMAS of Georgia):

H.R. 2414. A bill to permit States to waive application of the Commercial Motor Vehicle Safety Act of 1986 with respect to farm vehicles whether or not such vehicles are operating within 150 miles of the farm; to the Committee on Public Works and Transportation.

By Mr. FIELDS (for himself and Ms. SCHNEIDER):

H.R. 2415. A bill to amend the African Elephant Conservation Act to strengthen prohibitions on importation of African elephant ivory; to the Committee on Merchant Marine and Fisheries.

By Mr. HOAGLAND:

H.R. 2416. A bill to direct the Secretary of Agriculture to construct an outlet ditch to the Missouri River in Burt County, NE; to the Committee on Agriculture.

By Mr. INHOFE:

H.R. 2417. A bill to prohibit the transportation of certain hazardous substances in crude oil pipelines; jointly, to the Committees on Energy and Commerce and Public Works and Transportation.

By Mr. JACOBS:

H.R. 2418. A bill to provide for treatment of Federal pay in the same manner as non-Federal pay with respect to garnishment and similar legal process; to the Committee on Post Office and Civil Service.

By Mr. JENKINS:

H.R. 2419. A bill to authorize the Secretary of Agriculture to exchange certain property in the Chattahoochee National Forest for the construction of facilities in the national forest; to the Committee on Agriculture.

By Mrs. JOHNSON of Connecticut (for herself, Mr. BOEHLERT, and Mr. CONTE):

H.R. 2420. A bill to authorize the Secretary of Housing and Urban Development to make grants to States for the acquisition, construction, and rehabilitation of limited equity cooperative housing for low- and moderate-income families; to the Committee on Banking, Finance and Urban Affairs.

By Mr. KILDEE (for himself, Mr. TAUKE, Mr. SAWYER, Mr. GRANDY, Mrs. UNSOELD, Mrs. LOWEY of New York, Mr. POSHARD, and Mr. COLEMAN of Missouri):

H.R. 2421. A bill to amend title II of the Domestic Volunteer Service Act of 1973 to authorize appropriations for fiscal years 1990 through 1993, and for other purposes; to the Committee on Education and Labor.

By Mr. LEVIN of Michigan (for himself, Mr. MATSUI, and Mr. MOODY):

H.R. 2422. A bill to amend titles II and XVI of the Social Security Act to strengthen protections for beneficiaries under the representative payee program; to the Committee on Ways and Means.

By Mr. McDERMOTT (for himself and Mr. DICKS):

H.R. 2423. A bill to provide for the safe operation of tanker traffic in Puget Sound, to improve responses to oil spills in Puget Sound, and for other purposes; jointly, to the Committees on Merchant Marine and Fisheries and Public Works and Transportation.

By Mr. PALLONE:

H.R. 2424. A bill to prohibit the establishment of a ship fuel replenishment system in Middletown, NJ, by the Department of the Navy; to the Committee on Armed Services.

By Mr. PEASE (for himself, Mr. CLINGER, Mr. LEVIN of Michigan, and Ms. KAPTUR):

H.R. 2425. A bill to provide an improved program of extended unemployment compensation, and for other purposes; to the Committee on Ways and Means.

By Mr. PORTER (for himself, Mr. SKELTON, Mr. RIDGE, Mr. SPRATT, Mr. McHUGH, Mr. BOSCO, Mr. MOAKLEY, Mr. DYMALLY, Mr. HERTEL, Mr. GILMAN, Mrs. MARTIN of Illinois, Mr. WOLF, Mr. CARDIN, Mr. COOPER, Ms. PELOSI, Mr. McMILLEN of Maryland, Mr. McCURDY, Mr. ROE, Mr. ATKINS, Mr. CONTE, Mr. BUSTAMANTE, Mr. SCHEUER, Mr. DORGAN of North Dakota, Mr. AUCOIN, Mr. JONTZ, Mr. McDERMOTT, Mr. CONYERS, Mr. VOLKMER, Mrs. LOWEY of New York, Mr. KASTENMEIER, Mr. PENNY, Mr. SABO, Mr. FAUNTROY, Mr. NEAL of Massachusetts, Mr. WALSH, Mr. BONIOR, Mr. APPLEGATE, Mr. LANCASTER, Mr. WAXMAN, Mr. LEVINE of California, Mr. MAVROULES, Mr. DICKS, Mr. MRAZEK, Mr. FOGLIETTA, Mr. DEFAZIO, Mr. FRANK, Mrs. MORELLA, Mr. BATES, Mr. DERRICK, Mr. MORRISON of Connecticut, Mrs. BOXER, Mr. HENRY, Mr. BEREUTER, Mr. KOSTMAYER, Mr. ENGLISH, Mr. ECKART, Mr. LIPINSKI, Mrs. UNSOELD, Mr. EVANS, Mr. GLICKMAN, Mr. FAWELL, Mrs. ROUKEMA, Mr. OWENS of New York, Mr. SKEEN, Mr. GREEN, Mr. CLINGER, Mr. HAYES of Illinois, Mr. STARK, Mr. UDALL, Mr. KILDEE, Mr. PARRIS, Mr. OBERSTAR, Mr. WEBER, Mr. BROWN of California,

Mr. DREIER of California, Mr. SMITH of Florida, Mr. TOWNS, Mr. WEISS, Mr. HORTON, Mr. GARCIA, Mr. LEVIN of Michigan, Mr. CHANDLER, and Mr. MFUME):

H.R. 2426. A bill to promote the nonproliferation of chemical, biological, and toxin weapons; to the Committee on Foreign Affairs.

By Mr. SCHEUER (for himself, Ms. SCHNEIDER, Mr. WALKER, Mr. BROWN of California, Mr. PRICE, Mr. VALENTINE, Mr. LEWIS of Florida, Mr. MCCURDY, Mr. SMITH of New Hampshire, Mr. WOLPE, Mr. TANNER, Mr. MCMILLEN of Maryland, Mr. SKAGGS, Mr. SHAYS, and Mr. SMITH of Texas):

H.R. 2427. A bill to authorize appropriations for certain atmospheric and satellite programs and functions of the National Oceanic and Atmospheric Administration, and for other purposes; to the Committee on Science, Space, and Technology.

By Ms. SCHNEIDER (for herself, Mr. MACHTLEY, Mr. MORRISON of Connecticut, and Mr. ROWLAND of Connecticut):

H.R. 2428. A bill to authorize the Secretary of the department in which the Coast Guard is operating to convey the Block Island Southeast Lighthouse to the Block Island Southeast Lighthouse Foundations; to the Committee on Merchant Marine and Fisheries.

By Mr. SHUMWAY:

H.R. 2429. A bill to amend the act entitled "An Act to authorize the Secretary of the Interior to construct, operate, and maintain the Auburn-Folsom South unit, American River division, Central Valley project, California, under Federal reclamation laws" enacted September 2, 1965, and the Flood Control Act of 1970; to the Committee on Interior and Insular Affairs.

By Mr. SKELTON:

H.R. 2430. A bill to require additional testing of hazardous liquid pipeline facilities and additional training of operators of such pipeline facilities to reduce the danger of spills, and for other purposes; jointly, to the Committees on Energy and Commerce and Public Works and Transportation.

By Mr. SMITH of Texas:

H.R. 2431. A bill to redesignate the Midland General Mail Facility in Midland, TX, as the "Carl O. Hyde General Mail Facility;" to the Committee on Post Office and Civil Service.

By Mr. SMITH of New Hampshire (for himself and Mr. DOUGLAS):

H.R. 2432. A bill to designate a segment of the Merrimack River in the State of New Hampshire for study under the Wild and Scenic Rivers Act; to the Committee on Interior and Insular Affairs.

By Mr. TRAFICANT:

H.R. 2433. A bill to amend the Controlled Substance Act to provide the penalty of death for certain serious drug offenses; jointly, to the Committees on the Judiciary and Energy and Commerce.

By Mr. WHITTAKER:

H.R. 2434. A bill to change the name of "Marion Lake, located northwest of Marion, Kansas, to "Marion Reservoir;" to the Committee on Interior and Insular Affairs.

By Mr. WOLF:

H.R. 2435. A bill to provide that a demonstration project be conducted to test flexiplace work arrangements for Federal employees, and to provide for the establishment of a program to facilitate the exchange of information relating to job-sharing arrangements among Federal employees; to the Committee on Post Office and Civil Service.

By Mr. ASPIN:

H.J. Res. 273. Joint resolution designating January 7, 1990, through January 13, 1990, as "National Law Enforcement Training Week;" to the Committee on Post Office and Civil Service.

By Mr. HUGHES (for himself, Mr. BERMAN, Mr. CROCKETT, Mr. FAWELL, Mr. FRENZEL, Mr. FUSTER, Mr. GREEN, Mr. MCGRATH, Mr. OWENS of New York, Mr. PALLONE, Mr. PANETTA, Mrs. ROUKEMA, Mr. ROYBAL, Mr. SAXTON, Mr. SCHEUER, Mr. SKELTON, Mr. WAXMAN, Mr. WEISS, Mr. MATSUI, Mr. MANTON, Mr. LANTOS, and Mr. MOLINARI):

H.J. Res. 274. Joint resolution to designate the week beginning June 11, 1989, as "National Scleroderma Awareness Week;" to the Committee on Post Office and Civil Service.

By Mr. GARCIA (for himself, Mr. WOLF, Mr. ALEXANDER, Mr. BLILEY, Mr. CRAIG, Mr. CRANE, Mr. DANNEMEYER, Mr. EMERSON, Mr. FAUNTROY, Mr. FIELDS, Mr. FLIPPO, Mr. FUSTER, Mr. GONZALEZ, Mr. GRAY, Mr. GRANDY, Mr. HANCOCK, Mr. HASTERT, Mr. HORTON, Mr. HUNTER, Mr. HUTTO, Mr. KASICH, Mr. LAGOMARSINO, Mr. LANCASTER, Mr. LIVINGSTON, Mr. MCEWEN, Mr. MONTGOMERY, Mr. MOORHEAD, Mr. NATCHER, Mrs. PATTERSON, Mr. PACKARD, Mr. QUILLEN, Mr. RAY, Mr. RHODES, Mr. ROBINSON, Mr. SCHULZE, Mr. SHUMWAY, Mr. SKELTON, Mr. SLATTERY, Mr. SMITH of New Jersey, Mr. SOLOMON, Mr. SPENCE, Mr. STANGELAND, Mr. VENTO, Mrs. VUCANOVICH, Mr. WHITTAKER, Mr. ORTIZ, and Mr. HAMMERSCHMIDT):

H.J. Res. 275. Joint resolution designating 1990 as the "International Year of Bible Reading;" to the Committee on Post Office and Civil Service.

REGULATION OF LOBBYING ACT

In compliance with Public Law 601, 79th Congress, title III, Regulation of Lobbying Act, section 308(b), which provides as follows:

(b) All information required to be filed under the provisions of this section with the Clerk of the House of Representatives and the Secretary of the Senate shall be compiled by said Clerk and Secretary, acting jointly, as soon as practicable after the close of the calendar quarter with respect to which such information is filed and shall be printed in the CONGRESSIONAL RECORD.

The Clerk of the House of Representatives and the Secretary of the Senate jointly submit their report of the compilation required by said law and have included all registrations and quarterly reports received.

REGISTRATIONS

The following registrations were submitted for the third calendar quarter 1989:

(NOTE.—The form used for reporting is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective headings. This page (Page 1) is designed to supply identifying data.)

PLEASE RETURN 1 ORIGINAL TO: THE CLERK OF THE HOUSE OF REPRESENTATIVES, OFFICE OF RECORDS AND REGISTRATION, 1036 LONGWORTH HOUSE OFFICE BUILDING, WASHINGTON, D.C. 20515

PLEASE RETURN 1 ORIGINAL TO: THE SECRETARY OF THE SENATE, OFFICE OF PUBLIC RECORDS, 232 HART SENATE OFFICE BUILDING, WASHINGTON, D.C. 20510

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

Is this an Amendment? ☐ YES ☐ NO

IDENTIFICATION NUMBER

NOTE on ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:

(i) *"Employee".*—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)

(ii) *"Employer".*—To file as an "employer", write "None" in answer to Item "B".

(*b*) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.

(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

☐ CHECK IF ADDRESS IS DIFFERENT THAN PREVIOUSLY REPORTED

NOTE on ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (*a*) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (*b*) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER—State name, address, and nature of business. If there is no employer, write "None."

NOTE on ITEM "C".—(*a*) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).

(*b*) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).

(*c*) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have ☐ terminated, place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the specific legislative interests by reciting: (*a*) Short titles of statutes and bills; (*b*) House and Senate numbers of bills, where known; (*c*) citations of statutes, where known; (*d*) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (*a*) description, (*b*) quantity distributed, (*c*) date of distribution, (*d*) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed.)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and, if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. *If this is a "Quarterly" Report, disregard this item "C4" and fill out items "D" and "E" on the back of this page.* Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly Report."

QUARTERLY REPORTS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following quarterly reports were submitted for the first calendar quarter 1989:

(NOTE.—The form used for reporting is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective headings. This page (Page 1) is designed to supply identifying data, and Page 2 deals with financial data.)

PLEASE RETURN 1 ORIGINAL TO: THE CLERK OF THE HOUSE OF REPRESENTATIVES, OFFICE OF RECORDS AND REGISTRATION, 1036 LONGWORTH HOUSE OFFICE BUILDING, WASHINGTON, D.C. 20515

PLEASE RETURN 1 ORIGINAL TO: THE SECRETARY OF THE SENATE, OFFICE OF PUBLIC RECORDS, 232 HART SENATE OFFICE BUILDING, WASHINGTON, D.C. 20510

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19 . . . . .

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

IDENTIFICATION NUMBER

Is this an Amendment? ☐ YES ☐ NO

NOTE on ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:

(i) *"Employee".*—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)

(ii) *"Employer".*—To file as an "employer", write "None" in answer to Item "B".

(*b*) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.

(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

☐ CHECK IF ADDRESS IS DIFFERENT THAN PREVIOUSLY REPORTED

NOTE on ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (*a*) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (*b*) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER—State name, address, and nature of business. If there is no employer, write "None."

NOTE on ITEM "C".—(*a*) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).

(*b*) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).

(*c*) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have ☐ terminated, place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the specific legislative interests by reciting: (*a*) Short titles of statutes and bills; (*b*) House and Senate numbers of bills, where known; (*c*) citations of statutes, where known; (*d*) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (*a*) description, (*b*) quantity distributed, (*c*) date of distribution, (*d*) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed.)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and, if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. *If this is a "Quarterly" Report, disregard this item "C4" and fill out items "D" and "E" on the back of this page.* Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly Report."

STATEMENT OF VERIFICATION

[Omitted in printing]

NOTE on ITEM "D."—*(a)* IN GENERAL. The term "contribution" includes *anything of value.* When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"—§ 302(a) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN EMPLOYER.—(i) *In general.* Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in connection with legislative interests.

(ii) *Receipts of Business Firms and Individuals.*—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) *Receipts of Multi-purpose Organizations.*—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of $500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE.—(i) *In general.* In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) *Employer as Contributor of $500 or More.*—When your contribution from your employer (in the form of salary, fee, etc.) amounts to $500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "NONE" in the space following the number.

Receipts (other than loans)

1. $.....Dues and assessments
2. $.....Gifts of money or anything of value
3. $.....Printed or duplicated matter received as a gift
4. $.....Receipts from sale of printed or duplicated matter
5. $.....Received for services (e.g., salary, fee, etc.)
6. $.....TOTAL for this Quarter (Add "1" through "5")
7. $.....Received during previous Quarters of calendar year
8. $.....TOTAL from Jan. 1 through this Quarter (Add "6" and "7")

Loans Received—"The term 'contribution' includes a . . . *loan* . . ."—§ 302(a).

9. $.....TOTAL now owed to others on account of loans
10. $.....Borrowed from others during this Quarter
11. $.....Repaid to others during this Quarter

12. $......"Expense Money" and Reimbursements received this Quarter.

Contributors of $500 or More (from Jan. 1 through this Quarter)

13. Have there been such contributors?
Please answer "yes" or "no": .....

14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last day of this Quarter, total $500 or more:

Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:

Amount	*Name and Address of Contributor* ("*Period*" from Jan. 1 through....., 19.....)
$1,500.00	John Doe, 1621 Blank Bldg., New York, N.Y.
$1,785.00	The Roe Corporation, 2511 Doe Bldg., Chicago, Ill.
$3,285.00	TOTAL

NOTE on ITEM "E".—*(a)* IN GENERAL. "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—§ 302 (b) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6") and travel, food, lodging, and entertainment (Item "E 7").

E. EXPENDITURES (INCLUDING LOANS) IN CONNECTION WITH LEGISLATIVE INTERESTS:

Fill in every blank. If the answer to any numbered item is "None," write "NONE" in the spaces following the number.

Expenditures (other than loans)

1. $.....Public relations and advertising services
2. $.....Wages, salaries, fees, commissions (other than Item "1")
3. $.....Gifts or contributions made during Quarter
4. $.....Printed or duplicated matter, including distribution cost
5. $.....Office overhead (rent, supplies, utilities, etc.)
6. $.....Telephone and telegraph
7. $.....Travel, food, lodging, and entertainment
8. $.....All other expenditures
9. $.....TOTAL for this Quarter (Add "1" through "8")
10. $.....Expended during previous Quarters of calendar year
11. $.....TOTAL from Jan. 1 through this Quarter (Add "9" and "10")

Loans Made to Others—"The term 'expenditure' includes a . . . *loan* . . ."—§ 302 (b).

12. $.....TOTAL now owed to person filing
13. $.....Lent to others during this Quarter
14. $.....Repayments received during this Quarter

15. *Recipients of Expenditures of $10 or More*_____

If there were no single expenditures of $10 or more, please so indicate by using the word "NONE".

In the case of expenditures made during this Quarter by, or on behalf of, the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example:

Amount	*Date or Dates—Name and Address of Recipient—Purpose*
$1,750.00	7-11: Roe Printing Co., 3214 Blank Ave., St. Louis, Mo.—Printing and mailing circulars on the "Marshbanks Bill."
$2,400.00	7-15, 8-15, 9-15: Britten & Blaten, 3127 Gremlin Bldg., Washington, D.C.—Public relations service at $800.00 per month.
$4,150.00	TOTAL
